

**Web Browser Support for OWA 2003**  
**(Outlook Web Access)**

Outlook Web Access versions ..... 1  
 Increased browser support ..... 1  
     Browser support for Outlook Web Access for Microsoft operating systems ..... 1  
     Browser support for Outlook Web Access with other operating systems ..... 2

**Outlook Web Access versions**

Exchange 2003 now includes two versions of Outlook Web Access:

**Outlook Web Access Premium**

Outlook Web Access Premium is designed for Microsoft Internet Explorer 5.01 or later and includes all OWA features.

**Note:** Microsoft Internet Explorer 6 is required for some features.

**Outlook Web Access Basic**

Outlook Web Access Basic is designed to work in browsers other than Internet Explorer that support the HTML 3.2 and the European Computer Manufacturers Association (ECMA) script standards and provides a subset of the features available in Outlook Web Access Premium.

**Increased browser support**

The following table shows the new level of browser support for the operating systems offered by Outlook Web Access for Exchange 2003.

**Browser support for Outlook Web Access for Microsoft operating systems**

	Windows 98 Second Edition	Windows ME	Windows 2000	Windows XP	Windows Vista
