ePortfolio

What are electronic portfolios?

- Allow users to collect and display a wide range of documents and information and thereby create an electronic portrait of themselves and their work
- Users have accounts that enable them to store their files and personal information and create web-based views that can be accessed by others. Different views can be created containing various subsets of the user's material.

Your Goals

All portfolios must be connected to a goal. A goal can be connected to more than one portfolio. Setting goals and reflecting on them may help you make your internship experience more personal and meaningful.

Your Portfolios

A Portfolio is essentially a collection of your work which you put together to demonstrate the attainment of specific skills.
