

## Microsoft PowerPoint 2003 Activities

- **Activity 1 – Creating a new blank presentation**
  1. Open Microsoft PowerPoint
  2. **Choose File>New**
  3. In the Task Pane, choose **Blank Presentation**. The Title slide layout is chosen by default.
  4. Choose a background color by choosing **Format>Background**. Choose the “Light Blue” color and click “Apply.”
  5. In the top text box, **enter “This is My Presentation.”**
  6. Format the text in the top text box to **Bold**.
  7. In the bottom text box, **enter “Spring 2006.”**
  8. Format the text in the bottom text box to font size **44**.
  9. Insert a new slide. Choose **Insert>New Slide**.
  10. Apply a new Slide Design. Choose **Format>Slide Design**.
  11. In the Task Pane, choose the **Proposal** design located at the bottom of the design list. Scroll down using the mouse. (It is the design with the clocks and stack of documents) Notice the formatting change in your slides.
  12. Change the slide Layout. Choose **Format>Slide Layout**.
  13. Under the Text and Contents Layout section, **select the first Title, Text, and Content layout**. Notice the layout change.
  14. Click on the “click to add title” text box and **enter “My New Slide.”**
  15. Save your presentation to the “PowerPoint Training” folder on the desktop. **Name it “My Presentation.ppt.”**
  
- **Activity 2 – Creating Tables**
  1. On the second slide of your presentation, and in the **Content** box of the object placeholder, click the **Insert Table icon** to bring up the Insert Table dialog box.
  2. In the Number of Columns text box, **type 3**.
  3. In the Number of Rows text box, **type 3**. **Click OK**.
  4. Once the table is displayed, **move the table to the bottom of the slide and shrink and move the left text box above the table**.
  5. In the text box, **type Job Salaries**.
  6. In column 1 row 1 of the table, **type Jobs**.
  7. Press the Tab key to move to the next cell (Column 2, Row 1) **Type Level 1**.
  8. Press the Tab key to move to the next cell, **type Level 2**.
  9. Press the Tab key, **type Technician**.
  10. Press the Tab key, **type 35,000**.
  11. Press the Tab key, **type 38,000**.
  12. Press the Tab key, **type Software Support**.
  13. Press the Tab key, **type 37,000**.
  14. Press the Tab key, **type 40,000**.
  15. Resize the cells in the table so that all text is on one line.

16. Change the Fill color in Row 1 by **highlighting the 3 cells, right click on the row**, and select **Borders and Fill**.
17. In the **Fill tab** on the Format Table dialog box, **choose Red** from the drop down box and select the **Semitransparent check box**. **Click OK**.
18. **Save** your presentation

**Optional Activity** - Insert a Table from Microsoft Word

1. Locate the slide on which you want the table.
2. Choose **Insert>Object** to open the Insert Object dialog box.
3. **Select Create from File**.
4. **Click Browse**.
5. Navigate to the file you want to insert and **double click it**.
6. **Click Ok**.

• **Activity 3 – Creating Charts**

1. **Insert a new slide in your presentation**.
2. Under the Text and Content layouts, select the **Title and Text over Content** layout.
3. In the top title box, **type My Chart**.
4. Shrink the text box so that it fits under the title box and in the text box, **type Stock Prices**.
5. Enlarge the Content container box and **click on the Insert Chart icon**.
6. Notice the default data and chart type. **Double click the chart to open the data sheet**.
7. Change the Chart Type by **right clicking in the white area** around the Chart and select **Chart Type**.
8. Select the **Line** chart type in the Chart Type box.
9. In the Chart Sub Type box, **click the first chart in the second row**. **Click OK**.
10. Change the legend values in the Datasheet. **Change East to Microsoft**. **Change West to Yahoo**. **Change North to Google**. Notice the Legend change.
11. Change the X axis values. **Change 1<sup>st</sup> Qtr to January**. **Change 2<sup>nd</sup> Qtr to April**. **Change 3<sup>rd</sup> Qtr to July**. **Change 4<sup>th</sup> Qtr to October**. Notice the X axis value change.
12. Change the Y axis values. **Delete the existing Y axis values and enter the following values for the stock prices:**

	January	April	July	October
Microsoft	<b>60</b>	<b>45</b>	<b>30</b>	<b>22</b>
Yahoo	<b>70</b>	<b>85</b>	<b>75</b>	<b>65</b>
Google	<b>100</b>	<b>250</b>	<b>350</b>	<b>400</b>

13. Click out of the Datasheet and Chart area to view the entire slide.
14. To go back to the Datasheet and Chart, **double-click on the chart**.
15. **Other Options:**
  - a. **Change the location of the Legend** by double clicking on the Legend and select a different position on the Placement tab.
  - b. **Change the formatting of the Lines** by double clicking on them and on the Patterns tab, change the color, style, etc.
  - c. **Change the Axis increments** by double clicking the Axis and on the Scale tab, change the number increments. Click on the Font, Number and Alignment tabs to change Axis formatting.
16. Save your presentation.

**Optional Activity** - Insert a Chart from Microsoft Excel

1. Locate the slide on which you want the table.
2. Choose **Insert>Object** to open the Insert Object dialog box.
3. Select Create from File.
4. Click **Browse**.
5. Navigate to the file you want to insert and double click it.
6. Click Ok.

• **Activity 4 – Inserting Objects (Pictures, Word Art, Shapes) Using the Drawing Toolbar.**

1. **Insert a new slide in your presentation.**
2. **Delete any text or title boxes.**
3. **Insert a picture.** Choose **Insert>Picture>From File**.
4. Navigate to the PowerPoint Training Folder on the Desktop and **double-click on the FUlogo.jpg file**. Move the picture to the top of the slide.
5. **Insert Word Art.** **Click on the WordArt icon** in the Drawing toolbar to open the WordArt gallery.
6. Select the art option located at **Row 3, Column 3**. **Click OK**.
7. When prompted to enter text, **enter “This is WordArt!!”** **Click OK**.
8. **Insert Shapes.** From the AutoShapes menu in the Drawing toolbar, **select Basic Shapes** and then select the Smiley Face.
9. From the AutoShapes menu, **select Block Arrows** and then select the double ended left and right arrow.
10. From the AutoShapes menu, **select Callouts** and then select the second callout.
11. Enter the following text in the callout, **“This is a callout!!”**
12. Manipulate your objects by changing the size, shape, and any other format.
13. Save your presentation.

**Inserting Sound**

1. On your objects slide, **Choose Insert>Movies and Sound>Sound From Clip Organizer**.
2. From the Clip Art Task Pane, **select the first audio file entitled “Claps Cheers.”**
3. When the PowerPoint dialog box appears, **choose “Automatically.”** Notice the speaker icon that appears on your slide.
4. Play your presentation using the slideshow and notice the sound.
5. Go back to edit your objects slide.
6. **Right click the speaker icon and select Edit Sound Object.**
7. **Check the “Hide sound icon during slideshow” checkbox.** Play your presentation again to notice the change.

**Inserting Video**

1. On your objects slide, arrange the objects on your slide to the perimeter of the slide so that there is an empty space in the middle.
2. **Choose Insert>Movies and Sound>Movie From File.** Navigate to the Microsoft PowerPoint Training folder on the Desktop and **choose NewMouse.wmv**. **Click OK**.
3. When the PowerPoint dialog box appears, **choose “When Clicked.”** Notice the video square that appears on the slide.
4. Play your presentation using the slideshow and click on the movie square to start the video when on that slide.

- **Activity 5 – Animation**

**Adding Animation to a slide**

1. **Insert a new slide in your presentation.**
2. In the title text box, **type “My Animation.”**
3. In the text box underneath the title, **type “This is a test of my animation!”**
4. In the slides pane, select slide 7, your newest slide.
5. Choose **Slide Show>Animation Schemes**.
6. In the Slide Design – Animation Schemes task pane, from the Apply to Selected Slides option list, **under the Exiting Heading, select Float.**
7. **Click the Slide Show button** on the bottom of the pane to display the slide in show mode.
8. Use the spacebar to advance the slide. Notice the animation. Exit the slide show.
9. From the Apply To Selected Slides option list, **select No Animation.**
10. Save your presentation.

**Adding Animation to an object**

1. On the last slide of your presentation, select/highlight the sentence **“My Animation.”**
2. Choose **Slide Show>Custom Animation**.
3. **Click Add Effect**, and then **choose Emphasis**.
4. From the Emphasis Effect options list, **select More Effects**.
5. In the Add Emphasis Effect dialog box, **double-click Change Font Color**.
6. Click the Slide Show button on the bottom of the pane to display the slide in show mode.
7. Use the spacebar to advance the slide. Notice the animation. Exit the slide show.

**Adding a Motion Path to an object**

1. On the last slide of your presentation, select the sentence **“This is a test of my animation!”**
2. Choose **Slide Show>Custom Animation**.
3. Click **Add Effect**, and then choose **Motion Paths**.
4. From the list, **select the third option, “Down.”**
5. Click the Slide Show button on the bottom of the pane to display the slide in show mode.
6. Use the spacebar to advance the slide. Notice the animation. Exit the slide show.

**Set the Order of Effects**

1. Notice the 2 effects in the Custom Animation pane.
2. Select the 1<sup>st</sup> animation, Change Font Color.
3. From the Start drop-down box, **select With Previous**.
4. Select the 2<sup>nd</sup> animation, Motion Path Down.
5. From the Start drop-down box, **select After Previous**.
6. Click the Slide Show button on the bottom of the pane to display the slide in show mode.
7. Use the spacebar to advance the slide. Notice the animation. Exit the slide show.
8. **Other Options:**
  - a. You can re-order effects by clicking on the re-order buttons on the bottom of the Custom Animation pane.

**Activity 6 – Preparing to Deliver a Presentation**

**Arrange and Hide Slides**

1. In your presentation, select slide 7 (My Animation) in the Slide tab.
2. **Drag slide 7 above slide 6.**

3. Select the new slide 7 (This is word art!).
4. **Right-click** on the slide and **select “Hide Slide.”**
5. Run the slide show and notice that there are only 6 slides in the show.

### **Add Slide Transitions**

1. In your presentation, **select slide one. Press and hold the “shift” key and click the last slide in the presentation to select all slides.**
2. **Choose Slide Show>Slide Transition** to display the Slide Transition task pane.
3. From the Apply to Selected Slides list box, apply the **Cover Up Transition.**
4. In the Modify Transition area, **set the transition speed to “Medium.”**
5. **Select slide two.**
6. From the Apply to Selected Slides list box, apply the **Blinds Vertical Transition.**
7. Play your slide show and notice the two different transitions.

### **Slide Timing**

1. In your presentation, select all your slides from the slides tab.
2. **Choose Slide Show>Slide Transition.**
3. Under the Advance Slide section, **uncheck On Mouse Click** and **check Automatically after.**
4. Set the Automatically after time to **5 seconds.**
5. Click the Slide Show button on the bottom of the pane and watch the automatic slide show.

### **Custom Show**

1. In your presentation, **choose Slide Show>Custom Shows.**
2. Click **New.**
3. In the Slide Show Name text box, type **My Custom Show.**
4. In the Slides in Presentation list box, **select slides 1, 3, and 5** and add them by **clicking the Add button one at a time.**
5. Once the slides are added, **move slide 3 (My Inserted Chart) in the “Slides in Custom Show” box to be slide two by selecting slide three and clicking on the up arrow.**
6. **Click OK.**
7. Notice the new custom show in the Custom Shows box.
8. Click Close.
9. **Choose Slide Show>Custom Shows.**
10. **Choose My Custom Show** and click the Show button. Navigate through the presentation.

### **Printing Your Presentation**

1. In your presentation, **choose File>Print.**
2. In the Print What drop-down box, **select Handouts.**
3. In the Handouts section, from the Slides Per Page drop-down box, **select 3.**
4. Notice the printing format.
5. Click Cancel.

### **Saving Options**

- a. Saving your presentation as a web page
- b. Package for cd.
- c. PowerPoint Viewer

- **Activity 7 - Delivering a Presentation**

- **Navigating in a Presentation**

- Use the F5 key on the keyboard to begin a slide show from your first slide.
- Use the ESC key on your keyboard to exit the slide show.
- Use the space button, mouse click, and arrow keys on the keyboard to navigate through a slide show. Use **Alt + tab** to navigate through applications via the keyboard.

- **Annotating During a Presentation**

1. When in your slide show, **right-click** the slide.
2. **Choose Pointer Options** to display the list of annotation tools.
3. Choose an annotation tool.
4. Draw on the slide by clicking and dragging the mouse.
5. Change the mouse cursor back to the arrow to continue with the presentation.
6. When at the end of the show, you will get the dialog: “Do you want to keep your ink annotations?” **Click Discard.**

- **Presentation Guidelines**

- The key to a good presentation is developing well organized, clear, and professional looking slides.
- Slide layout, font, color scheme, and slide content are the main components to developing a great presentation.
- Use no more than six bullet points per slide.
- Minimize the number of fonts used in your presentation.
- Keep font sizes consistent.
- Don't type in all caps.
- Keep bullet points short and to the point. Incomplete sentences are OK.
- For contrast, use a light colored font on a dark background and vice versa.
- Use bold formatting to make appropriate words stand out.
- Minimize use of italics. They are more difficult to read.
- Do not vary the look of one slide greatly from the next. Consistency is the key.
- Keep it simple.
- Keep your objects Big.
- Make your information Clear.
- Limit the number of slides
- 3 slides per minute is the maximum
- Practice moving between slides.
- Don't read from your slides.
- Don't speak to your slides.
- Be prepared for technical difficulties
- Avoid the use of flashy transitions.
- Run your presentation from a hard disk rather than from removable media.
- Communication is the key.
- Use Text to support the communication.
- Use Pictures to simplify complex concepts.
- Use Animations for complex relationships.
- Use Visuals to support, not to distract.
- Use Sounds only when absolutely necessary.

- **Color guidelines**
  - Select intense colors when you want to make text stand out, but keep in mind that too much of a good thing can overwhelm viewers.
  - Select contrasting colors for slide text and the slide background to make the text easier for your audience to see and read.
  - Select complementary colors to make your color combinations aesthetically pleasing – contrast a secondary color (a color created by mixing two primary colors) with the third (complementary) primary color.
- Complementary Colors
  - The following list describes the three secondary colors and their complementary primary colors:
    - Purple (blue and red) goes with yellow.
    - Green (yellow and blue) goes with red.
    - Orange (yellow and red) goes with blue.
