CAMPUS FIRE SAFETY FACT SHEET

Between January 2000 and August 1, 2005, the Center has identified 75 fire fatalities in student housing. This includes students, parents and children. Since these fires are identified by scanning the wire services, and not all fires are identified as student-related, it is believed that the actual number is higher.

The deadliest months are April and May, when 21 deaths have occurred, followed by August and September with 19 fire deaths.

<table>
<thead>
<tr>
<th>Location of fatal fires</th>
<th>Common threads</th>
</tr>
</thead>
<tbody>
<tr>
<td>Off-campus</td>
<td>Lack of automatic fire sprinkler systems</td>
</tr>
<tr>
<td>On-campus (residence halls)</td>
<td>Missing or disabled smoke alarms</td>
</tr>
<tr>
<td>Fraternities and sororities</td>
<td>Careless disposal of smoking materials</td>
</tr>
<tr>
<td></td>
<td>Alcohol consumption</td>
</tr>
</tbody>
</table>

Clearly, the problem lies in the off-campus occupancies where, according to the US Department of Education, approximately 2/3 of the students in the nation live.

FATAL FIRES THIS ACADEMIC YEAR

- Miami University, Oxford, Ohio - 3 killed in an off-campus fire
- University of Mississippi, Oxford, Mississippi - 3 killed in a fraternity fire
- Georgetown University, Washington, DC - 1 killed in an off-campus fire
- Penn State - State College, Pennsylvania - 1 killed in an off-campus fire
- Savannah College of Art and Design, Savannah, Georgia - 1 killed in an off-campus fire
- Southern Adventist University, Collegedale, Tennessee - 1 killed in a residence hall fire
- University of Maryland, College Park, Maryland - 1 killed in an off-campus fire

GEOGRAPHIC DISTRIBUTION

Since January 2000, the fatalities identified by the Center have occurred in the following states:

SOLUTIONS

A three-pronged approach that includes Prevention, Detection and Suppression is needed to address the issues of fires, both on- and off-campus.

- **Prevention** will educate students, parents and administrators about fire safe behavior.
- **Detection** will provide the early warning needed to alert the occupants to the fire and notify the fire department to respond.
- **Suppression**—early suppression through automatic fire sprinklers—will save lives and property.
This is an opportunity to reduce not only the current loss of life and property from fire on campuses, but also to dramatically change the impact of fire on society.

By educating today’s students about fire-safe actions as well as providing them with a fire-safe environment while they are in school, they will then be more aware of the dangers from fire after they graduate.

This long-term approach to reducing fires through education and awareness will have a significant impact on reducing the over 3,900 lives lost to fire and $12.3 billion property loss that the United States sees every year.

Through strong, aggressive efforts in fire safety on our nation’s campuses we have the opportunity to make the change, now and for the future.

**LEGISLATION**

The following is a summary of legislation that has been introduced in Congress related to campus fire safety.

**HR 128 College Fire Prevention Act**  
**84 Co-sponsors**  
This legislation calls for $100,000,000 per year for five years in matching funds for the installation of automatic fire sprinklers or other fire suppression or prevention technologies.

**HR 1131 Fire Sprinkler Incentive Act**  
**61 Co-sponsors**  
This legislation will reduce the depreciation schedule on the installation of an automatic fire sprinkler system from 27 years to five years, promoting the installation of these life-saving systems.

**HR 2637 and S 1196 Campus Fire Safety Right to Know Act**  
This legislation will have schools provide existing information about fire safety on their campuses to the US Department of Education, similar to the reporting requirements for crimes under the Clery Act. This will provide a wealth of information for parents and students when they are researching schools and help to educate them about important fire safety issues.

**HR 295 and S 224 House and Senate Resolutions**  
These resolutions will formally designate September as Campus Fire Safety Month.

*The Center for Campus Fire Safety is a non-profit organization dedicated to improving fire safety on our nation’s campuses through education and advocacy and is a leader in campus fire safety. Its operations are guided by a Board of Advisors made up of dedicated professionals and advocates from across the nation. The Center provides information and resources free to the public through its website at [www.campusfire.org](http://www.campusfire.org).*
