THIS IS YOUR MOMENT
YOUR COLLEGE EXPERIENCE WON’T BE MEASURED IN YEARS OR EVEN SEMESTERS.

At Fairfield University, your time as a student is measured in moments. Hundreds and thousands of them—challenging moments, profound moments, fun moments, moments of clarity. They build on each other, make you who you are, and who you want to become.

These moments take place on and off campus, in and out of class, but they all have one thing in common—they make Fairfield an experience with depth. The learning goes deeper, your friendships are stronger, and the experience stays with you for the rest of your life.

And it starts right now, as we encourage you to look a little deeper in this book, and discover everything a Fairfield education can offer you—the moments that guide, define, and make you.
OUR BREAKTHROUGH MOMENTS
C A N  B R E A K  D O W N  W A L L S
At Fairfield, we're dedicated to making sure that your time here sticks with you. That won't happen without powerful moments. Moments that set you on a career path, of course, but also moments that ensure you leave college an all-around stronger person—with a stronger intellect, and a stronger character.

It might mean taking classes that explore the world from a staggering number of viewpoints. It could mean engaging in projects that let you leave the classroom far behind, or that let you work side-by-side with your professor. No matter what it means for you, you'll experience an education that turns your strengths into an enriching career.
LET CURIOSITY GET THE BEST OF YOU
Our foundation is called the Core Curriculum. But it’s more than just a set of classes—it's a chance for you to explore different disciplines and subjects, exposing you to new perspectives and expanding your knowledge.

When you delve into the Fairfield Core, you'll take classes that let you explore how creative thinking helps unlock new ideas, how to solve problems using data analysis, and discover strengths and passions you didn't even know you had.

Along the way, you'll explore how different classes and majors relate to each other, like how social justice is connected to biology that relies on mathematics. New ideas and skills will build on one another to make you an adept thinker and an adaptable individual, capable of success wherever you go. Just like in life, no matter where you go or how you learn, you'll always return to the basics over and over again.

ADEPT THINKER
ADAPTABLE INDIVIDUAL
TOGETHER
WE GROW.
AND HARVEST.
It’s good to collaborate with other students on projects. It’s great to collaborate with your professors. And it’s even better to collaborate with both, working on a project that has a long-term benefit for the entire University, not to mention the earth.

That was the goal of the students involved in the Rainwater Harvesting System recently installed on the Barone Campus Center roof, made to collect 41,000 gallons of rainwater every year to use on University lawns and greenery.

Devised and designed by engineering students in the Senior Design course, they collaborated with their professor and a faculty advisor, and were awarded a $1,500 grant for their project from the Campus Sustainability Committee. It’s projected to collect about 560 gallons of water for every inch of rain, and will eventually be replicated across other buildings on campus.

It’s just one of the hundreds of projects underway at Fairfield that match students and professors together in pursuit of the common good.
WHEN YOU REALIZE YOU’RE PART OF A COMMUNITY,
AND CAN TRULY STAND ON YOUR OWN
College campuses are more than just places to take classes, and Fairfield is no exception. Actually, we’re pretty exceptional, as our campus is calibrated for living and learning. It is 200-acres of idyllic scenery—big enough to get lost exploring, yet small enough to feel at home. We believe that what you do can have as big of an impact on your education as what you learn, and we wanted to create the perfect atmosphere to do it all.

Play the sport you’ve always wanted to try. Find your new favorite kind of bagel at Einstein's in the Barone Campus Center, located at the heart of our campus. Or just grab some coffee or dinner or hang out with the hundreds of students who pass through the building every day. Test your karaoke skills on a supportive, or at least willing, audience at The Levee, the on-campus pizza place. Spend time perusing the art collection at the University's Bellarmine Museum.

No matter what you do, see, experience, or even eat, you’ll leave this campus a stronger, more confident individual, ready to take on all kinds of turf.
WITH EVERY CHALLENGING MOMENT COMES THE OPPORTUNITY TO CHANGE
College will challenge you. There’s no way around it. In fact, if you aren’t being challenged, you’re probably not getting a very good education. At Fairfield, we embrace this, realizing that the challenges you’ll face in college better prepare you for the ones you’ll face in the world.

Collaborate with students not just outside your major, but outside your school and even the University. Take a class that might take you halfway around the world or down the road into the city of Bridgeport. Learn about a different culture firsthand, all while learning how to make the world a better place.

*The bigger the challenges, the more you’ll grow to meet them face-to-face.*
WHEN A FEAR OF FAILURE IS REPLACED BY A WILL TO SUCCEED
Every issue, every problem, every task has an astounding number of sides and thousands of different viewpoints from which to approach it. We believe bringing people from different areas of study together to tackle these issues lends clarity, and clarity leads to solutions.

*Some schools call this interdisciplinary. We call it problem-solving.*

It’s the student who double majors in biology and international studies, who earns a scholarship to study infectious diseases in Africa. It’s the study that aligns the nursing school with the business school, to give a health program an amplified voice. It’s the professor who realizes her students need to be adaptable leaders, so takes them out of class to find real world solutions to real world problems.
WHERE
DOING
SOMETHING
DIFFERENT
CAN
MAKE A
DIFFERENCE
NURSING STUDENT JENNIFER DELSOLE LEARNED THAT EVEN UNDERGRADS CAN MAKE A DIFFERENCE IN HEALTHCARE.

Unlike most universities, undergraduates at Fairfield have opportunities to conduct research projects with faculty mentors. So when Jennifer teamed up with Dr. Eileen O’Shea to study the value of a lead poison prevention program, she knew she was in for an experience that few undergraduate nursing students get the chance to undertake.

Jennifer and Dr. O’Shea went to local elementary schools as part of a service-learning project, which is an opportunity for Fairfield students to link academic studies with community service, so that both are strengthened. While Jennifer gathered data, she was also educating children on how to identify and avoid lead paint in their environment.

She eventually presented the project at the National Society for Pediatric Nursing in Nashville, as one of the few undergraduates in attendance. “Everyone in nursing school has the same classes, same experiences,” says Jennifer. “I can truly say that I did something different.”
The College of Arts and Sciences has the largest offering of courses at Fairfield. Working closely with a passionate faculty, you’ll have the opportunity for civic engagement and hands-on research across many disciplines: the arts and humanities, natural sciences and mathematics, and social and behavioral sciences. This integrated approach to education will provide you with the necessary tools and knowledge to succeed in work and in life. Even if your major isn’t in this college, you’ll still take your core classes in the College of Arts and Sciences.

**MAJORS:**
- American Studies
- Biochemistry
- Biology
- Chemistry
- Communication
- Economics - B.A. and B.S.
- English: Creative Writing, Journalism, Literature, Professional Writing
- Five-Year B.A./M.A. Teacher Certificate
- History
- International Studies
- Mathematics
- Modern Languages and Literatures - French, German, Italian, Spanish
- Philosophy
- Physics
- Politics
- Psychology – B.A. and B.S.
- Religious Studies
- Sociology and Anthropology
- Visual and Performing Arts: Art History; Film, Television, and Media Arts; Music; Studio Art; Theatre
**Good business starts with good ethics.**

Using group problem-solving scenarios, casework and a faculty experienced in all fields, in classrooms with the same technology found in major corporations, you’ll learn the skills needed to become an ethical leader in business on a local and global scale.

**Majors:**
- Accounting
- Finance
- Information Systems
- International Business
- Management
- Marketing
As a nursing student, you’ll learn by doing and succeed by caring. Blending the latest simulation technology with the depth of a Jesuit education, you’ll graduate both a highly skilled nurse and a fully developed person, better equipped to lead, and make a positive difference in healthcare and in patients’ lives.
If you’re hardwired to change the world, this is the school for you.

No matter which program you pursue, you’ll collaborate with thinkers to learn how things work, and how to make them work better, providing you the skills to solve the world’s engineering problems.

**MAJORS:**
- Bioengineering
- Computer Science
- Computer Engineering
- Electrical Engineering
- Mechanical Engineering
- Software Engineering
The study abroad programs at Fairfield can take you many different places on earth, but they'll all take you beyond your expectations. You'll be exposed to a wealth of learning opportunities, including how different cultures approach problem solving and creative thinking.

Study language in Florence, Italy; business in Brisbane, Australia; or a subject of your choice at one of our many overseas partner universities. Explore what service learning means in Tanzania or Nicaragua. And discover what a completely different culture can teach you about your own.
The Office of International Programs partners with universities all over the world, with programs that include locations like:

The University of Dar es Salaam in Tanzania, a place endowed with spectacular natural beauty, and a rich tapestry of peoples and cultures that stretch back hundreds of years. The University and the local Jesuit community will provide critical support to students, helping them to connect service opportunities with their academic interests.

Florence, Italy, where you'll learn amid treasures of art and architecture in one of Europe's most beautiful cities. Fairfield University's award-winning Florence program offers a comprehensive package of academic programming, cultural events, and support services designed to ensure an outstanding semester or year in Florence.

Aix-en-Provence, France is a university town that has been a center of study for French students since its first university was founded there in the 15th century. Today, more than forty thousand students live and study in the city.
Just because something is challenging doesn’t make it taxing. In fact, many of our student organizations and activities give you the chance to learn while you’re hanging out with some of your best friends, making plans or discussing how to make the University (and the world) better, and putting those plans into action.

Perhaps the best example of this is the Fairfield University Student Association. It’s known around here as FUSA, and it’s one of the most popular student groups on campus, offering some of the best opportunities for leadership. Not only do they plan campus events—including the annual (and incredibly popular) “President’s Ball”—they’re also responsible for advocating for student needs and concerns.

DON’T LIVE FOR THE MOMENTS, LIVE IN THEM
The bonds you form in college will stay with you for the rest of your life. Nowhere is that more true than at Fairfield University. In fact, we’re known for alumni who stay close for a lifetime. There’s a reason for that: everything about our environment promotes a sense of community. From our living and learning experiences, to our hundreds of clubs, to our coastal location, every minute you’re here is another chance to make friends and memories.

And while our community is inclusive, it’s also expansive. Because no matter what’s going on in the world, no matter what our background, home country, or heritage is, more unites us than divides us. When we respect and value each other, we find the common good rooted in us all, and work together to bring out each other’s potential. At Fairfield, you’ll meet people from every corner of the country, and even the world. We live together. We work together. We play together.

Oh, and we have fun.
FIND A PLACE TO LOSE YOURSELF

There’s a lot to be excited about in college, but at Fairfield we give you a whole new reason: proximity to the beach. The town of Fairfield’s coastal location means you can spend every morning before class running on the sand bar at low tide, or spend the evenings cooking out on your deck. Give back to the community by participating in a clean up day on the beach, or organize a quick study session with classmates in beach chairs. And do it all with time to spare for class.

And when you’re a senior, you may have the opportunity to live on the beach. Not near the beach, on it. Every year, around 400 seniors move into homes on the beach, close to campus. It’s just one of many unforgettable ways Fairfield turns an education into an experience, and an experience into an education.
WHEN YOU LEAVE PLENTY OF ROOM
FOR LEAVING YOUR ROOM

5:45 PM THE TOWNHOUSES
Fairfield, Connecticut, is everything a college town should be: small enough to navigate on foot, but big enough that you’ll never run out of things to do once you leave campus. But just in case you do, New York City is just a short commuter train ride away. A typical day finds our students both on and off campus, taking advantage of everything the University, the town and the region have to offer.
9:00 AM
BARONE CAMPUS CENTER
Coffee and bagel before class

10:00 AM
DOLAN SCHOOL OF BUSINESS
Intro to Accounting

11:15 AM
BELLARMINE MUSEUM OF ART
Trek across the grass near Bellarmine—stop to let the turkeys cross

3:00 PM

WHEN YOU CAN’T STOP TALKING ABOUT
THE TIME YOU LOST YOUR VOICE
Whether you're a star athlete or just a fan, on game day, everyone plays on the same team—a community singularly determined to beat a common foe. So when it's time for a game of lacrosse on campus or a basketball game at the nearby 9,500-seat Webster Bank Arena, you and your fellow Stags will come together to form a formidable herd of red.
DISCOVER HOW A QUIET MOMENT CAN OFTEN SPEAK THE LOUDEST
Some moments are big and full, loud and in-your-face. But they can’t all be like that, and they shouldn’t. After all, you can’t appreciate the loud without the quiet. Or the big without the small. Striking this balance between being active and being still is important for anyone, but especially for college students.

At Fairfield University, opportunities for quiet, reflective moments are everywhere. While we are a Catholic, Jesuit school, you don’t have to be religious to experience moments of personal reflection on campus. You only need to walk around to find inspiration everywhere you turn, like a silent sunrise over the Long Island Sound, a thought-provoking painting in the Bellarmine Museum of Art, or an inspiring homily in the Egan Chapel.
WHEN YOU REALIZE A LUNCH CAN ALSO NOURISH YOUR SOUL
Fairfield University is a Catholic, Jesuit university in mission and spirit. That means that our objectives include promoting a sense of social responsibility, and making sure all students embrace and develop their full creative, intellectual potential.

It also means different things to different people. It might mean serving a meal on Friday night at a local shelter. Or meeting for Sunday night Mass at Egan Chapel. Or simply taking time out of each day to reflect on your life as a student at Fairfield.

Campus Ministry programs give you the chance to explore your faith through a variety of outlets, including retreats, service trips, liturgies, and gatherings for prayer and reflection, which are open to students from all religious backgrounds.

For all students, it means that we’re in this together—that our principles guide us to foster a community of curious, socially responsible seekers. We believe it will make you a better person, and the world a better place to live.
HOME IS WHERE THE HEART (AND MIND) IS.
Your strongest bonds at college will most likely be with your roommates and housemates. These bonds are where your community starts to take shape, and solidifies over four years. We think it should be more than just comfortable, but intellectually and spiritually fulfilling. To that end, we’ve created the Fairfield Residential Colleges, a chance for you and fellow students to live and learn side-by-side, engaging in dinners and conversation with fellow students, mentors, and even faculty members.

Our signature program is the Ignatian Residential College. Students in this community seek to better understand the world by asking such questions as “Who am I,” “Whose am I” and “Who am I called to be,” using the answers as jumping-off points for better understanding themselves and their place in the world.

No matter which residential college you belong to, you’ll use reflection and a common cause to discover deeper intellectual, social, and spiritual truths about each other and the world—and you’ll be better equipped to answer life’s biggest questions.
SOME MOMENTS CHANGE YOU, SOME MOMENTS YOU CHANGE.
There are moments that define you.

*Your first day at college.*

*Your first job.*

*Your first paycheck.*

These are shifts that change the course of your life; that move you to a different city; that change the way you look at the world, bring new people into your life, and force you to become a mature, capable individual.

Those are the kind of moments for which a Fairfield education will prepare you. Each of the over 42,000 bachelor degrees we’ve awarded represents a different jumping off point—students who’ve embraced their capabilities and used them to take on the world.
At Fairfield, we believe in providing a return on the investment you’ve made in your education. Most likely, that will come in the form of a career that you’re passionate about diving into. And we’ll help you take your first step into that career.

Our faculty and staff work with you to develop a course of study with an eye toward your future. That might mean enhancing your classes with research opportunities. It could mean finding the right internships for you. Or it might be as simple as discussing what sort of career you’d like to work toward, and which classes and opportunities will lead you there.

One such out-of-class opportunity is the Business Plan Competition, sponsored by the Dolan School of Business. It combines research, planning, networking, and creativity into one school-wide competition, with real cash prizes. Last year’s innovations included solar-power phone chargers, heart rate monitors, music-sharing applications, and clothing items for cancer patients.
After hopping the campus shuttle to the train station, you’ll be in New York City in about an hour. That means you’re only 60 minutes away from the largest metropolitan area in the country. You already know that New York is the biggest dining, shopping, and entertainment destination in the country. You already know that it’s a melting pot for nationalities and a hot spot for culture.

But what you might not have thought about is the wealth of internship opportunities this proximity affords you. The corporate corridor between Fairfield and New York is a region known for access to Fortune 500 companies thriving with internships. And with internships come job opportunities.

FROM A MINOR IN FILM CAME A MAJOR DISCOVERY IN LIFE
KATIE DELLAMAGGIORE ('00) STARTED OUT AS A COMMUNICATION MAJOR WITHOUT A MAP.

Communication led Katie to a film minor and Rev. James Mayzik, SJ, associate professor of film, television and media arts, who helped Katie find her passion with one assignment: putting together short stories of seniors who were reflecting on their upcoming graduation.

Soon after, she landed an internship at MTV, which she parlayed into a full-time job. But her love of documentaries still loomed large. She went on to create a production company—Rescue Media—and her first documentary Brooklyn Castle is an unlikely story of an impoverished middle school in Brooklyn, New York, and its national dominance in chess. It’s a story of truly inspired students from a truly inspired filmmaker, whose spark was ignited at Fairfield.
When you realize it’s time to leave, that’s when you’ve really arrived.

THE MOMENT YOU FINISH
IS THE MOMENT YOU START
These are the kind of moments at Fairfield University that add up to the most significant four years of your life. It's a college experience unlike any other—an awakening that motivates you to realize your academic potential and purpose in life. And when you do, you'll go forth into the world with all the momentum of a thundering herd.

So take a moment to think it over. Take a moment to consider your options. Then, take a moment to plan your visit to Fairfield.
TAKE A FIRST LOOK AT A SECOND-TO-NONE CAMPUS
Surrounded by major cities (and major interstates, airports, and rail lines), Fairfield University is easy to visit. We’d love to meet you, and visiting campus is the best way to get a sense of everything we have to offer.

Schedule a 90-minute campus visit, led by our student tour ambassadors. Or, schedule an interview with an admissions representative. Interviews aren’t required for admission, but they’re a great way to learn everything you’d need to know about Fairfield.

*To set up a campus tour and experience Fairfield University firsthand, visit fairfield.edu/admission or call (203) 254-4100.*
More than 85% of our students receive some kind of financial assistance. To learn how we can meet your specific needs, and more about financial aid deadlines, visit fairfield.edu/finaid.

You'll get a comprehensive picture of all the options available to you, including scholarships, grants, federal work-study, federal loan programs, and information on how to apply.

Just as all students have different academic goals in college, we recognize that their financial aid needs may vary over the course of their four years at Fairfield. We pride ourselves on working individually with students and their families every year, to providing the latest information to help them manage and navigate through financial aid choices.
