2008-09 ACADEMIC CALENDAR

Fall 2008

Aug. 22......................... Deadline for undergraduate readmission application for fall
Aug. 31......................... Residence halls open at 9 a.m. for freshman arrival
Aug. 31 - Sept. 1............. Orientation for international students
                           Freshman Welcome Class of 2012
Sept. 1......................... Residence halls open at 10 a.m. for all other residential students
                           Transfer orientation for new undergraduate students
                           BCC main dining hall opens at 4 p.m.
Sept. 2......................... Classes begin for all schools
Sept. 2 - Sept. 8............. Drop/add for undergraduate students
Oct. 13......................... Columbus Day – University holiday
Oct. 14......................... Monday classes meet for all schools (day or evening)
Oct. 17......................... Degree cards due for January graduation
                           Deadline for freshman deficiencies
                           Deadline for summer 2008 and spring 2008 make-up of incompletes
                           Deadline for spring 2009 study abroad applications
Oct. 24......................... Last day for course undergraduate and University College withdrawal
                           (except ASAP II courses)
Oct. 27 - Nov. 14............. Undergraduate advising and registration for spring 2009
Nov. 14......................... Deadline for undergraduate educational leave applications for spring 2009
Nov. 26 - Nov. 30 .......... Thanksgiving recess
                           Dining hall closes at 2 p.m. on Nov. 25; reopens at 4 p.m. on Nov. 30
                           Residence halls close at 6 p.m. on Nov. 25; reopen at noon on Nov. 30
                           Undergraduate students with evening classes on Nov. 25 are permitted
                           to remain until 10 p.m.
Dec. 1......................... Classes resume
Dec. 10......................... Last day of undergraduate classes
Dec. 11, 12, 14.............. Reading days
Dec. 15 - Dec. 21............. Final examinations for undergraduate students (except reading days)
Dec. 18......................... Last day of classes for graduate programs and University College
Dec. 20......................... Residence halls close at 6 p.m.
                           Dining hall closes at 2 p.m.

Winter 2009 Intersession

Jan. 5 - Jan. 9............... University College classes
Spring 2009

Jan. 5  Deadline for undergraduate day readmission for spring 2009
Jan. 11  New undergraduate student and international student orientation
         Dining hall opens at 4 p.m.
         Residence halls open at 10 a.m.
Jan. 12  Classes begin – all schools
Jan. 12 - Jan. 16  Drop/add period for undergraduate students
Jan. 19  Martin Luther King Jr. Day – University holiday
Feb. 13  Degree cards due for May graduation
Feb. 16  President’s Day – University holiday
Feb. 18  Deadline for fall 2008 make-up of incompletes
Feb. 27  Residence halls close at 6 p.m. for spring recess
         Dining hall closes at 2 p.m.
         Deadline for freshman deficiencies
         Deadline for fall 2009 study abroad applications
March 2 - March 8  Spring recess
March 8  Spring intersession classes – University College
March 9  Residence halls reopen at noon
         Dining hall reopens at 4 p.m.
March 9  Classes resume – all schools
         Last day for undergraduate and University College course
         withdrawal (except ASAP II courses)
April 8  Dining hall closes at 7 p.m.
         Monday classes meet for all schools (day or evening)
April 9 - April 13  Easter recess for undergraduate day and evening engineering students
April 9 - April 12  Easter recess for all other schools
April 13  Classes resume for all students except undergraduate day students
         and evening undergraduate engineering students
         Dining hall opens at 10 a.m.
April 14  Classes resume for undergraduate day and evening engineering students
March 30 - April 17  Undergraduate advising and registration for fall 2009 registration
April 24  Deadline for undergraduate educational leave applications for fall 2009
April 30  Last day of classes for undergraduates
May 1, 3, 4  Reading days for undergraduate students
May 2 - May 9  Final examinations for undergraduate day students (except reading days)
May 4  Last day of classes for graduate students and University College
May 8  Residence halls, townhouses, and apartment complex close at 6 p.m.
         Dining hall closes at 2 p.m.
May 17  59th Commencement – 10 a.m.
May 18  Residence halls, townhouses, and apartment complex close at noon

Summer 2009

May 20 - May 27  University College pre-session
May 25  Memorial Day holiday
May 26 - Aug. 6  Engineering summer session
June 1 - June 26  University College session one
July 2 - July 31  University College July session two
July 4  Holiday
July 6  Degree cards due for Aug. 15 graduation
July 29 - Aug. 4  University College one week post-session
Fairfield University Mission

Fairfield University, founded by the Society of Jesus, is a coeducational institution of higher learning whose primary objectives are to develop the creative intellectual potential of its students and to foster in them ethical and religious values, and a sense of social responsibility. Jesuit education, which began in 1547, is committed today to the service of faith, of which the promotion of justice is an absolute requirement.

Fairfield is Catholic in both tradition and spirit. It celebrates the God-given dignity of every human person. As a Catholic university, it welcomes those of all beliefs and traditions who share its concerns for scholarship, justice, truth, and freedom, and it values the diversity that their membership brings to the University community.

Fairfield educates its students through a variety of scholarly and professional disciplines. All of its schools share a liberal and humanistic perspective, and a commitment to excellence. Fairfield encourages a respect for all the disciplines— their similarities, their differences, and their interrelationships. In particular, in its undergraduate schools, it provides all students with a broadly based general education curriculum with a special emphasis on the traditional humanities as a complement to the more specialized preparation in disciplines and professions provided by the major programs. Fairfield is also committed to the needs of society for liberally educated professionals. It meets the needs of its students to assume positions in this society through its undergraduate and graduate professional schools and programs.

A Fairfield education is a liberal education, characterized by its breadth and depth. It offers opportunities for individual and common reflection, and it provides training in such essential human skills as analysis, synthesis, and communication. The liberally educated person is able to assimilate and organize facts, to evaluate knowledge, to identify issues, to use appropriate methods of reasoning, and to convey conclusions persuasively in written and spoken word. Equally essential to liberal education is the development of the aesthetic dimension of human nature, the power to imagine, to intuit, to create, and to appreciate. In its fullest sense, liberal education initiates students at a mature level into their culture, its past, its present, and its future.

Fairfield recognizes that learning is a lifelong process and sees the education that it provides as a foundation upon which its students may continue to build within their chosen areas of scholarly study or professional development. It also seeks to foster in its students a continuing intellectual curiosity and a desire for self-education that will extend to the broad range of areas to which they have been introduced in their studies.

As a community of scholars, Fairfield gladly joins in the broader task of expanding human knowledge and deepening human understanding, and to this end it encourages and supports the scholarly research and artistic production of its faculty and students.

Fairfield has a further obligation to the wider community of which it is a part, to share with its neighbors its resources and its special expertise for the betterment of the community as a whole. Faculty and students are encouraged to participate in the larger community through service and academic activities. But most of all, Fairfield serves the wider community by educating its students to be socially aware and morally responsible people.

Fairfield University values each of its students as individuals with unique abilities and potentials, and it respects the personal and academic freedom of all its members. At the same time, it seeks to develop a greater sense of community within itself, a sense that all of its members belong to and are involved in the University, sharing common goals and a common commitment to truth and justice, and manifesting in their lives the common concern for others which is the obligation of all educated, mature human beings.
Fairfield University

A comprehensive university built upon the 450-year-old Jesuit traditions of scholarship and service, Fairfield University is distinguished by academic rigor, collegiality among faculty and students, and a beautiful 200-acre campus with views of Long Island Sound.

Since its founding in 1942 by the Society of Jesus (the Jesuits), the University has grown from an all-male school serving 300 to a competitively ranked coeducational institution serving 3,300 undergraduate students and more than 1,000 graduate students, as well as non-traditional students enrolled in University College.

The University offers 34 majors in six different schools: College of Arts and Sciences, Charles F. Dolan School of Business, Graduate School of Education and Allied Professions, School of Engineering, School of Nursing, and University College.

Fairfield students benefit from the resources and reputation of a school consistently ranked among the top regional universities in the North by U.S. News & World Report. In the past decade, 44 Fairfield students have been named Fulbright scholars, and the University is among the 12 percent of four-year colleges and universities with membership in Phi Beta Kappa, the nation’s oldest and most prestigious academic honor society. Undergraduate students represent 32 states and more than 45 countries.

Students have personal contact with professors, nearly all of whom hold doctorates in their fields; access to first-rate facilities and technology; and may participate in Division I athletics, intramural teams, performance troupes, cultural programs at the Regina A. Quick Center for the Arts, and more than 80 clubs and organizations. In addition, Fairfield students volunteer weekly in the community and many engage in mission programs at home and abroad.

Fairfield is located one hour north of New York City, at the center of an academic corridor populated by colleges and universities, cultural and recreational resources, and leading corporate employers. As a relatively youthful institution—the third youngest of the 28 Jesuit universities in the United States—Fairfield is well-positioned to meet the needs of today’s students with its state-of-the-art facilities and technology; internship and study abroad opportunities; and dedication to providing a myriad of integrated living and learning opportunities.

**Get to know us!**
The best way to get to know Fairfield University—its academic programs, exceptional faculty, well-equipped and attractive campus, and its admission and financial aid programs—is to visit the campus. A personal interview is also strongly recommended.

**STUDENT RESOURCES AND SERVICES**

In the spirit of its Jesuit founders, Fairfield University offers a myriad of resources and services designed to foster the intellectual, spiritual, and personal development of its students. To access those services, students are required to obtain a **StagCard**. The StagCard is the University’s official student identification card. It’s used to access residence halls, computer labs, the library, and other campus facilities and events. It can also be used as a debit card to make purchases at vending machines, the University bookstore, and many locations off-campus.

The StagCard Office is located in the Aloysius P. Kelley, S.J. Center. Office hours are: Monday, Wednesday, Thursday, and Friday from 8:30 a.m. to 4:30 p.m.; Tuesday from 11 a.m. to 7 p.m. For more information on the StagCard, please visit www.fairfield.edu/stagcard.

**Academic Resources**

**Academic Advisor.** Students who have a declared major are assigned a faculty advisor in that academic discipline. Undeclared students are also assigned a faculty advisor. However, when these students declare a major, they will be reassigned to an advisor in the academic discipline chosen. Advisors are available to meet regularly with students, monitor progress, advise students at registration time, and discuss courses and programs of study.

**Dean of Freshmen.** The Office of the Dean of Freshmen is available to all first-year students, from June of the summer prior to entrance into Fairfield University through the conclusion of the second semester. The Office of the Dean of Freshmen handles the pre-registration for courses that take place prior to June Orientation, as well as the academic component of June Orientation. Through the Dean’s Office, academic advisors are assigned to students, questions about curriculum and courses are answered, and schedule changes are made.

In addition, the Dean’s Office provides special services for first-year students that include topics such as the following:

1) ways to maximize the college experience;
2) improvement of study and time management skills;
3) strategies to improve test taking and reading comprehension.

The Office of the Dean of Freshmen is a central location to obtain answers to academic and curriculum questions, as well as to obtain referrals to on-campus resources.
Academic Support Programs

- **Tutoring.** The Office of Student Support Services, located in the Aloysius P. Kelley, S.J. Center, recruits students who are proficient in their major concentration and/or other subjects and trains them to function as peer tutors. Students may receive free up to two hours of individual or group tutoring per course per week through the peer tutoring program. Additional tutoring services are available through the University’s individual schools in select subject areas. For more information, contact Student Support Services, the dean’s office of your school, or the office of the Dean of Freshmen.

- **Academic Skills Development.** Administered by the Office of Student Support Services, students in this program take an inventory to assess areas that need improvement. Those areas are then addressed in meetings and workshops. The Office of Student Support Services is located in the Kelley Center.

- **The Writing Center.** The Writing Center, located in Donnarumma Hall, provides one-to-one assistance in writing to all students. Undergraduate peer tutors and English department faculty members work with students on any type of writing they pursue: course papers; case, field, and lab studies; creative writing; professional and graduate school essays; and résumés. For more information about The Writing Center, please visit www.fairfield.edu/writingcenter.

The Charles E. Culpeper Language Resource Center. Located in Canisius Hall, the Charles E. Culpeper Language Resource Center supports the multimedia language/culture needs of students, especially those studying modern languages and literatures. The 25-station facility offers Macintosh and Windows-based computers and a variety of international television programs, films, and multimedia and audiovisual equipment. Resource Center staff members are available to assist with interactive multilingual word processors, e-mail programs, tutoring software, cultural simulations, foreign language adventure games, and browsers.

The DiMenna-Nyselius Library. DiMenna-Nyselius Library is the intellectual heart of Fairfield’s campus and its signature academic building, combining the best of the traditional academic library with the latest access to print and electronic resources. Carrels, leisure seating, and research tables provide study space for up to 900 individual students, while groups meet in team rooms, collaboratories, or study areas, or convene for conversation in the 24-hour cybercafé.

Other resources include a 24-hour, open-access computer lab with Macintosh and Intel-based computers; a second computer lab featuring Windows-based computers only; two dozen multimedia workstations; an electronic classroom; a 90-seat multimedia auditorium; photocopiers, microform readers, and printers; and audiovisual hardware and software. Workstations for the physically disabled are available throughout the library.

The library’s collection includes more than 350,000 bound volumes, 1,500 journal and newspaper subscriptions, electronic access to 30,000 full-text journal and newspaper titles, 17,000 audiovisual items, and the equivalent of 109,000 volumes in microform. To borrow library materials, students must present a StagCard at the Circulation Desk.
Students can search for materials using an integrated library system and online catalog. Library resources are accessible from any desktop on or off campus at http://sirsi.fairfield.edu. From this site, students use their StagCard number and a pin code to access their accounts, read full-text journal articles from more than 150 databases, submit interlibrary loan forms electronically, or contact a reference librarian around the clock via e-mail or “live” chat.

In 2005, the library added an Information Technology Center consisting of a 30-seat, state-of-the-art training room, a 15-seat training lab, and a 12-seat conference room/group study with projection capability. Also, the Center for Academic Excellence is housed on the lower level.

During the academic year, the library is open Monday through Thursday, 7:45 a.m. to midnight; Friday, 7:45 a.m. to 10:30 p.m.; Saturday, 9 a.m. to 9 p.m.; and Sunday, 10:30 a.m. to midnight.

First-Year Experience. Incoming first-year students become acquainted with the University through the First-Year Experience program, which provides weekly small-group meetings with specially-trained upperclassmen facilitators and a faculty/staff resource person. A speaker series coincides with weekly discussion topics, which may include the reality of living on a college campus; time management; service as an integral component of a Jesuit education; and development of a healthy lifestyle. First-year students also participate in a community service project with their group.

International Students. International students are served through the Office of Student Support Services, located in University College (David Dolan Hall). This department sponsors a specialized orientation program for international students and provides assistance with legal forms and other documentation.

Students With Disabilities. Fairfield University is committed to providing qualified students with disabilities an equal opportunity to access the benefits, rights, and privileges of its services, programs, and activities in an accessible setting. Furthermore, in compliance with Section 504 of the Rehabilitation Act, the Americans with Disabilities Act, and Connecticut laws, the University provides reasonable accommodations to qualified students to reduce the impact of disabilities on academic functioning or upon other major life activities. It is important to note that the University will not alter the essential elements of its courses or programs.

If a student with a disability would like to be considered for accommodations, he or she must make this request in writing and send the supporting documentation to the director of Academic and Disability Support Services. This should be done prior to the start of the academic semester and is strictly voluntary. However, if a student with a disability chooses not to self-identify and provide the necessary documentation, accommodations need not be provided. All information concerning disabilities is confidential and will be shared only with a student’s permission. Fairfield University uses the guidelines suggested by CT AHEAD to determine disabilities and reasonable accommodations.

Procedures for Requesting Consideration for Reasonable Accommodations

1. A student who wishes to be considered for reasonable accommodations at Fairfield University must identify him/herself to the Office of Academic and Disability Support Services.

   a. Undergraduate students entering Fairfield University for the first time—who have been accepted and have indicated their intention to enroll—will receive an orientation packet that contains a Request for Consideration for Reasonable Accommodations Form and a brochure containing information about this. These forms can also be obtained by contacting the Office of Academic and Disability Support Services at (203) 254-4000, ext. 2615, or by going to www.fairfield.edu/adss_index.html.

   b. Transfer, University College, graduate students, and those who are currently enrolled at Fairfield University should contact the Office of Academic and Disability Support Services at (203) 254-4000, ext. 2615, for information or go to www.fairfield.edu/adss_index.html.

2. The student should return his/her Request for Consideration for Reasonable Accommodations Form, as well as his/her documentation to: Office of Academic and Disability Support Services Fairfield University 1073 North Benson Road Fairfield, CT 06824-5195

   For information regarding documentation requirements at Fairfield University call the Office of Academic and Disability Support Services at (203) 254-4000, ext. 2615, or visit www.fairfield.edu/adss_index.html.

3. The Office of Academic and Disability Support Services reviews the student’s documentation to determine if it is appropriate and complete. If additional information or clarification is needed, the director consults with the student and/or appropriate healthcare provider. If additional documentation is determined to be needed, it is the student’s responsibility to provide it.

4. The Office of Academic and Disability Support Services completes a careful review of the student’s documentation to determine whether the student is disabled under the ADA and/or Rehabilitation Act and eligible to receive accommodations at Fairfield University.
5. After it has been determined that a student is eligible to receive accommodations, the Office of Academic and Disability Support Services prepares a list of reasonable accommodations based on the request and supporting documentation. When appropriate, the director reviews the accommodations with relevant individuals on campus to determine if the suggested accommodations are reasonable in the context of a particular program, activity, or service.

6. After the accommodations are determined to be appropriate, the student is asked to make an appointment to meet with the Director of Academic and Disability Support Services. The student and the director sign and date an Accommodations Agreement on the Disability Intake form. Procedures for implementing accommodations are discussed, and the student's rights and responsibilities are reviewed. The student is also apprised that individual circumstances may warrant a modification of the accommodations agreed upon and listed on the Accommodations Agreement. The original agreement is kept in the student's file. The student receives a letter outlining the agreed-upon accommodations and, when they are needed in areas such as housing and transportation, those offices are notified.

Please note: If, in the future, a student wishes to discuss the possibility of receiving accommodations not listed on the signed Accommodations Agreement, the student should make an appointment to meet with the director. Additional documentation may be needed. STUDENTS MUST REQUEST ACCOMMODATIONS EACH SEMESTER. It is the student's responsibility to schedule an appointment to meet with the director each semester in order to make these accommodations.

7. If a student disagrees with the eligibility and/or accommodation decisions made by the Office of Academic and Disability Support Services, he or she has the right to file a grievance/complaint. Information regarding the filing of a grievance and/or complaint is available by contacting the Office of Academic and Disability Support Services at (203) 254-4000, ext. 2615.

Accommodations — intended to reduce the impact of a disability — are determined on an individual basis and may include, but are not limited to:

- Extended test time and/or tests proctored in a distraction-reduced environment
- Note-takers, scribes, readers
- Books on tape from RFBD or use of an assistive technology workstation
- Individual accommodations as appropriate (essential elements of course(s) or degree will not be altered)
- Housing Accommodations as appropriate — please follow this link, www.fairfield.edu/adss_housing.html, for more information about changes to housing.

Send letters requesting accommodations to the Director of Student Academic and Disability Support Services, Fairfield University, 1073 North Benson Road, Fairfield, CT 06824-5195.

Counseling and Health Services

Counseling Services. The professional staff of Counseling Services offers a myriad of mental health services to undergraduate students. In addition to providing short-term individual psychotherapy to deal with personal, psychological, and/or academic stressors, the department also provides group counseling, 24-hour emergency crisis management, mental health screenings, consultation to faculty and staff, referral coordination, and psycho-educational programming from its Dolan Hall offices. A psychiatrist is regularly on campus to evaluate and treat students. Fairfield University enjoys an affiliation with Renfrew Eating Disorders Treatment Program for students struggling with eating disorders. Services are confidential.

The Health Center. The Student Health Center located in Dolan Hall is staffed by a nurse practitioner available daily; medical doctors and specialists available on a part-time basis; and registered nurses available around the clock. In addition, students can readily be referred to specialists in all fields of medicine, or in cases of serious illness, admitted to Bridgeport Hospital or St. Vincent's Medical Center in Bridgeport, just minutes from campus. The Student Health Center is open 24 hours a day, seven days a week, when classes are in session. Students are required to provide proof of medical insurance. A health and accident policy is available on a fee basis for students who need additional insurance. Special health policies are required for nursing students. Information may be obtained from the School of Nursing.

Athletics and Recreation

Varsity Athletics and Club Sports. Through the Department of Athletics, students can participate in varsity sports. Fairfield competes in the National Collegiate Athletic Association Division I and is a charter member of the Metro Atlantic Athletic Conference. The University currently offers varsity sports for men and women in basketball, cross-country, golf, lacrosse, rowing, soccer, swimming and diving, and tennis, as well as men's baseball, women's field hockey, and women's volleyball. Student-athletes in these sports are recruited by Fairfield; however, a limited number of walk-on opportunities exist. Interested students should see the coach of the applicable sport for more information.
The men’s and women’s basketball teams play at the Arena at Harbor Yard, located in nearby Bridgeport, considered one of the top facilities in collegiate basketball. Discounted tickets for Fairfield Stags basketball games are available to students. For tickets or other information, call the box office or visit www.fairfieldstags.com. In addition, soccer, lacrosse, and other games are held on campus and are free to students.

The Thomas A. Walsh Athletic Center caters to the academic and athletic needs of student athletes. A high-tech study center provides individual and group study areas, computer terminals with Internet access, a complete reference library, and academic counseling. The building also houses a practice gymnasium for volleyball, men’s and women’s basketball, softball, and baseball; a 4,700-square-foot weight training center; locker rooms; and a suite of administrative and coaching offices for the athletic department.

The department also sponsors a club Spirit Group that includes cheerleading, dance team, and pep band.

Intramural Sports, Recreation, and Fitness. The Department of Recreation oversees Fairfield’s club sports, organizes student intramural activities, and sponsors fitness and activity classes.

Club sports, which are organized and operated by students in conjunction with the department, allow student teams to compete against clubs from other colleges and universities. These competitive sports are open to the student body and currently include cheerleading, men’s crew, equestrian, men’s ice hockey, karate, men’s and women’s rugby, skiing, track, and men’s volleyball.

Intramural sports programs, which are open to all students, include basketball, flag football, floor hockey, indoor soccer, outdoor soccer, outdoor and indoor volleyball, softball, and three-point contests. Fitness and activity classes, also open to all students, may include yoga, aerobics, t’ai-chi-bo, lifeguard training, and CPR certification. Fees may apply for participation in intramural sports or fitness classes.

The Department of Recreation also oversees the Leslie C. Quick Jr. Recreation Complex and several outdoor recreation facilities. The Quick RecPlex features a 25-meter, eight-lane swimming pool; a field house for various sports; a whirlpool; saunas in the men’s and women’s locker rooms; and racquetball courts. Other amenities are two cardio theatres, a weight room, and group fitness courses. The Department of Recreation also oversees the outdoor tennis and outdoor basketball courts. The Quick RecPlex is open to any undergraduate student who presents a current StagCard.

Cultural, Governmental, and Social Opportunities

The Barone Campus Center. The John A. Barone Campus Center is the social focal point of University activities. Extensively renovated in 2001, it offers students a place to relax, socialize, or study during the day. Students can sip cappuccino at Jazzman’s Café, shop at the University bookstore, watch deejays for the campus radio station, WVOF-FM 88.5, at work in their glass-enclosed studio, check their mail, or grab meals at one of two dining facilities. The Campus Center also offers ATM services, a game room, lounge space for commuter students, and meeting and planning space for clubs and organizations. The center is open 24 hours from Sunday through Thursday, and from 7 a.m. to 1 a.m. on Fridays and Saturdays. Call the campus center at (203) 254-4222 between 9 a.m. and 9 p.m. for bookstore and dining hall hours.

Center for Multicultural Relations. Fairfield honors and respects people of all beliefs, traditions, cultures, and races. Faculty, students, and administrators gather at The Center for Multicultural Relations to explore opportunities for dialogue and cross-cultural exchange. Conversation comes easily at the Center because differences are welcomed and respected, and individuality is honored. The Center’s activities and organizations are open to all students.

Clubs and Organizations. Fairfield offers a wide range of interest-based clubs and organizations. Students who don’t spot an organization that reflects their interest may gain approval to start a group under guidelines established by the Office of Student Activities. All clubs and organizations are members of the Council of Student Organizations. Depending on their size and scope, student clubs and organizations may receive funding directly from student fees, academic or administrative departments, or from COSO itself.

The Regina A. Quick Center for the Arts serves as a cultural hub and resource for the University and surrounding towns, offering popular and classical music programs, dance, theatre, and outreach events for young audiences. The center includes the 740-seat Aloysius P. Kelley, S.J. Theatre, the smaller Lawrence A. Wien Experimental Theatre, and the Thomas J. Walsh Art Gallery. Tickets to Quick Center events are available to students at a discounted price. For a calendar of events, visit www.quickcenter.com. The PepsiCo Theatre, is home base for Theatre Fairfield, the University’s performing arts club, and provides another venue for theatre and dance in an intimate setting. In addition, various departments schedule exhibitions, lectures, and dramatic programs throughout the academic year. These events are open to all members of the University community and many are free.

The Levee. The Levee is a one-story social gathering place for up to 150 patrons. Home of Mike’s Pizza – a Fairfield favorite – the Levee hosts entertainment, including bands and comedians.
Student Government. All full-time undergraduate students are considered members of the Fairfield University Student Association, which represents the student viewpoint on campus, sponsors events, rules on infractions of University policies, and provides entertainment for the academic year. The FUSA offices are located in the Barone Campus Center and are open daily. Those who become active in the organization have a chance to test their leadership abilities and to take part in decisions that affect the University as a whole. In addition, each of the various living communities – residence halls, apartments, townhouses, off-campus housing and commuters – are represented by smaller associations that plan programs and activities, and lend support to FUSA.

FUSA has three branches: the Cabinet, the Legislature, and the Student Court. The Cabinet includes the president, who is elected each March in a campus-wide popular election. The president serves as the spokesperson for the undergraduate body and is empowered to appoint a cabinet for assistance in carrying out his or her duties. The president also has ultimate responsibility for the FUSA budget, overseeing its allocation and administration. An elected vice-president of activities works with the president to determine which activities will most interest and benefit the student body.

The Student Court consists of a chief justice and eight associate justices. It serves as the final arbitrator of all constitutional and legal disputes arising from the activities of the student association. It also serves as a hearing body for minor infractions of policies outlined in the Student Handbook, as determined by the Office of the Dean of Students and Director of Judicial Affairs. Finally, the justices act as student representatives on the Student Conduct Board and Traffic Appeals Board. They are selected through an application and screening process conducted by the FUSA president, who then appoints the justices with confirmation by the Legislature. Justices serve until their graduation, resignation, or removal from the Student Conduct Board.

The Legislature or Student Senate includes 40 elected representatives from the student body (10 per class year). The Senate establishes committees to deal with particular issues and reviews and approves the president’s budget recommendations. It also initiates and passes legislation. Records of these proceedings are kept on file in the FUSA offices and the Office of Student Activities.

Campus Life
Residence Halls, Townhouses, and Apartments. Residential life is an integral part of the college experience at Fairfield, providing students the opportunity to develop new interests, become a leader or team player, make decisions and take responsibility for them, and learn to get along with new people.

Incoming students live in freshmen-only residence halls where programming and activities are geared toward the needs of first-year students. Students share a common bathroom on the corridor, and all buildings are coed, with men and women living on alternate floors or in alternate wings. Sophomores may remain in a traditionally styled residence hall or opt for a suite-style setup, where two bedrooms share an adjoining bathroom. Juniors and seniors apply for the opportunity to live more independently, in the on-campus townhouses or apartments, or off campus in houses rented through landlords.

Residence halls have social and study lounges available. In addition to standard furniture, rooms are equipped with a ready-to-use phone system, including voice-mail, computer network data ports, cable television hook-up, and a combination refrigerator/microwave unit. Laundry facilities are available as well, and most halls have a common kitchen facility. The apartments and townhouses have kitchens, phone service, cable television, and computer network data ports.

Resident assistants, commonly referred to as RAs, provide educational and social programming and supervise behavior in the residence halls. Jesuits living in various residence halls are a resource for students in need of spiritual or informal guidance.

Parking. Vehicles must display a valid registration decal and be parked properly in designated areas. Freshman resident students are not permitted to have vehicles on campus. Parking fees are $60 yearly (prorated monthly) or $10 per week. Free day passes are issued on a limited basis.

To register a vehicle, students go to their StagWeb account to complete and submit the vehicle registration form. Next, bring the printed confirmation sheet, the vehicle’s registration, proof of enrollment and payment to the Department of Public Safety. A pamphlet explaining traffic and parking regulations will be issued with a registration decal. Vehicles parked in fire lanes, handicapped spaces, or service vehicle spots are subject to fines and may be towed at the owner’s expense. Vehicles of disabled persons must display an official state handicapped permit. Through an agreement with the town of Fairfield, no member of the University community may park on the neighborhood streets adjacent to the campus.
Public Safety. The Department of Public Safety is responsible for the safety of people and property on campus. Officers patrol campus by bike, foot, and vehicle 24 hours a day, 365 days a year. The Department of Public Safety is authorized to prevent, investigate, and report violations of State or Federal Law and University regulations. In addition, officers are trained to provide emergency first aid and are supplemental first responders for the Town of Fairfield. Public Safety officers also oversee the flow of traffic on campus and enforce parking regulations. Any student, faculty member, or employee of Fairfield University should directly report any potential criminal act or other emergency to any officer or representative of the Department of Public Safety immediately, by calling (203) 254-4090 or visiting us in Loyola Hall, Room 2.

Student Rules and Regulations; Discipline. The Student Handbook delineates the University’s rules and regulations governing student behavior, including the student code-of-conduct and adjudication process, as well as the residence life and housing policies and procedures. The handbook is distributed to all full-time undergraduate students, and contains additional information about Computing and Network Services, the University’s history, student resources, and other pertinent student information. An online version is available through the University’s website, www.fairfield.edu. The handbook is published by the Office of the Dean of Students with support from the Office of Judicial Affairs and the Department of Residence Life and Housing. Students with questions or those who need interpretation of policies outlined in the handbook should contact the dean of students, associate dean of students for residence life and housing, or the director of judicial affairs.

The dean of students and the vice president for student services have general care for student welfare and student discipline. The administration reserves the right to dismiss a student or to exercise other disciplinary measures for misconduct either on or off campus. The University has an official adjudication process that sets guidelines for the reporting of incidents, hearings, and appeals. Any student involved in disciplinary action has the right to be heard in his or her own defense.

The dean of students, or his or her designee, may separate a student from the University for reasons of health or safety when that student’s continued attendance poses a significant risk to the student or others, and when the dean has reason to believe that such action is in the best interest of the student or others at the University. In such cases, the University’s adjudication process may be waived.

Besides the offenses mentioned in the Student Handbook, behavior that leads to criminal or civil action renders a student liable to University disciplinary action up to and including expulsion.
Career Planning
The Career Planning Center, located in the Aloysius P. Kelley, S.J. Center, helps students identify and achieve career goals. The center offers job listings, counseling services, specific data on the current job market, and workshops on topics such as resume writing or interviewing techniques. The center also keeps abreast of needs in all fields of employment and either arranges interviews for seniors or notifies qualified students of job openings. Career Fairs held in September and February attract nearly 80 employers and 400 students each year.

The Center works collaboratively with the schools and colleges of the University to provide internship opportunities for undergraduate students. If an internship is completed for academic credit, it must be approved by the major department or school. Some internships may carry a stipend. The University distinguishes between part-time jobs and internships, not on the basis of compensation, but on the basis of the work and/or professional mentoring involved. Internships should support a student’s academic course of study or professional development and training.

While the Center primarily serves undergraduate students, its services are open to all students and graduates of Fairfield. Undergraduates are encouraged to familiarize themselves with and use the Center’s services prior to senior year, and graduates are always welcomed back.

Computing Services
Fairfield’s Computing Services are state-of-the-art. High-speed fiber-optic cable, with transmission capabilities of 100 megabits per second, connects classrooms, residence hall rooms, and faculty and administrative offices, providing access to the library collection, e-mail, various databases, and other on-campus resources.

Numerous computer labs are available for walk-in and classroom use, as well as offer both Windows and Macintosh hardware and software. All campus buildings are connected to the Internet, and all residence hall rooms have Internet connections, cable television, and voicemail. Students are issued individual user IDs and passwords for StagWeb, a secure website where students can check e-mail, register for courses, review academic and financial records, and be alerted to campus-wide announcements.

Administrative Computing (SunGard Higher Education) is located in Dolan 110 East and provides support for the integrated administrative system, Banner. Additionally, Administrative Computing supports StagWeb, the campus portal that enables students to access their e-mail, grades, calendars, course schedules and other types of information that is important to the adult learner.

Computing and Network Services, located on the second floor of Dolan Commons, provides lab support, technical advice, classroom technology applications, and personal Web page assistance. All computing and network infrastructure on campus, the telecommunications system, hardware and software support for faculty and staff desktops/laptops, and operational support for public computer labs, fall within the jurisdiction of C&NS. Office hours are 8:30 a.m. to 4:30 p.m. Contact the Help Desk at (203) 254-4069 or cns@mail.fairfield.edu.

Religious Life
Mass is held daily in the Egan Chapel of St. Ignatius Loyola during the lunch hour, on some weeknights, and twice on Sundays. Students can also be referred to services at other local churches and synagogues. The Pedro Arrupe, S.J., Campus Ministry Center, located on the lower level of the Chapel, provides meeting and work spaces for an active Campus Ministry. The Campus Ministry team nourishes a faith community on campus, taking seriously its unique role in expressing the University’s Catholic and Jesuit identity. The team, comprising pastoral ministers, laypeople, and a council of 18 student leaders, provides counseling and spiritual direction, conducts liturgies and retreats, trains students as lectors and Eucharistic ministers, and coordinates interfaith and ecumenical events. The Campus Ministry team also provides a caring response to students who seek spiritual direction and counseling.
Fairfield University is fully accredited by the New England Association of Schools and Colleges, which accredits schools and colleges in the six New England states. Accreditation by one of the six regional accrediting associations in the United States indicates that the school or college has been carefully evaluated and found to meet standards agreed upon by qualified educators.

**Additional accreditations include:**
- AACSB International – The Association to Advance Collegiate Schools of Business (Charles F. Dolan School of Business)
- Accreditation Board for Engineering and Technology (School of Engineering)  
  - Computer Engineering Program  
  - Electrical Engineering program  
  - Mechanical Engineering program  
  - Software Engineering Program
- American Chemical Society (College of Arts and Sciences)  
  - B.S. in Chemistry
- Commission on Accreditation of Marriage and Family Therapy Education of the American Association for Marriage and Family Therapy (Graduate School of Education and Allied Professions, GSEAP)  
  - Marriage and Family Therapy program
- Connecticut State Department of Higher Education (GSEAP)  
- Council for Accreditation of Counseling and Related Educational Programs (GSEAP)  
  - Counselor Education programs
- Commission on Collegiate Nursing Education (School of Nursing)  
  - Undergraduate Nursing programs  
  - Graduate Nursing programs

**Program approvals include:**
- Connecticut State Department of Higher Education  
  - Elementary and Secondary Teacher certification programs  
  - Graduate programs leading to certification in specialized areas of education  
  - School of Nursing programs
- Connecticut State Board of Examiners for Nursing  
  - Undergraduate Nursing programs
- Council on Accreditation of Nurse Anesthesia Educational Programs

**The University holds memberships in:**
- AACSB International – The Association to Advance Collegiate Schools of Business
- American Association of Colleges for Teacher Education
- American Association of Colleges of Nursing
- American Council for Higher Education
- American Council on Education
- ASEE – American Society for Engineering Education
- Association of Catholic Colleges and Universities
- Association of Jesuit Colleges and Universities
- Connecticut Association of Colleges and Universities for Teacher Education
- Connecticut Council for Independent Colleges
- Connecticut Council for Higher Education
- National Association of Independent Colleges and Universities
- National Catholic Educational Association
- New England Business and Economic Association
Compliance Statements and Notifications

Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act
Fairfield University complies with the Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act. This report contains a summary of the Fairfield University Department of Public Safety’s policies and procedures along with crime statistics as required. A copy of this report may be obtained at the Department of Public Safety office, located on the ground floor of Loyola Hall, Room 2, or at www.fairfield.edu/ps_clery.html. The Department of Public Safety is open 24 hours per day, 365 days a year. The University is in compliance with the Student Right to Know and Campus Security Act (PL 103-542).

Fairfield is a drug-free campus and workplace.

Catalog
The provisions of this catalog are not to be regarded as an irrevocable contract between Fairfield University and the students. The University reserves the right to change any provision or any requirement at any time.

Non-Discrimination Statement
Fairfield University admits students of any sex, race, color, marital status, sexual orientation, religion, age, national origin or ancestry, disability or handicap to all the rights, privileges, programs, and activities generally accorded or made available to students of the University. It does not discriminate on the basis of sex, race, color, marital status, sexual orientation, religion, age, national origin or ancestry, disability or handicap in administration of its educational policies, admissions policies, employment policies, scholarship and loan programs, athletic programs, or other University-administered programs.

Notification of Rights Under FERPA
Fairfield University complies with the Family Educational Rights and Privacy Act of 1974 (also known as the Buckley Amendment) which defines the rights and protects the privacy of students with regard to their educational records. A listing of records maintained, their location, and the means of reviewing them is available in the Office of the Dean of Students.

Listed below are the rights afforded to students with respect to their education records under FERPA are:

1. The right to inspect and review the student’s educational records within 45 days of the day the University receives a request for access: Students should submit to the registrar, dean, head of the academic department, or other appropriate official, written requests that identify the record(s) they wish to inspect. The University official will make arrangements for access and notify the student of the time and place where the records may be inspected. If the records are not maintained by the University official to whom the request was submitted, that official shall advise the student of the correct official to whom the request should be addressed.

2. The right to request the amendment of the student’s education records that the student believes are inaccurate or misleading: Students may ask the University to amend a record that they believe is inaccurate or misleading. They should write to the University official responsible for the record, clearly identify the part of the record they want changed, and specify why it is inaccurate or misleading. If the University decides not to amend the record as requested by the student, the University will notify the student of the decision and advise the student of his or her right to a hearing regarding the request for amendment. Additional information regarding the hearing procedures will be provided to the student when notified of the right to a hearing.

3. The right to consent to disclosures of personally identifiable information contained in the student’s education records, except to the extent that FERPA authorizes disclosure without consent: One exception that permits disclosure without consent is disclosure to school officials with legitimate educational interests. A school official is a person employed by the University in an administrative, supervisory, academic or research, or support staff position (including law enforcement unit personnel and health staff); a person or company with whom the University has contracted (such as an attorney, auditor, or collection agent); a person serving on the Board of Trustees; or a student serving on an official committee, such as a disciplinary or grievance committee, or assisting another school official in performing his or her tasks. A school official has a legitimate educational interest if the official needs to review an education record in order to fulfill his or her professional responsibility.

4. The right to file a complaint with the U.S. Department of Education concerning alleged failures by Fairfield University to comply with the requirements of FERPA. The name and address of the Office that administers FERPA are:
   Family Policy Compliance Office
   U.S. Department of Education
   600 Independence Avenue, SW
   Washington, DC 20202-4605
Academic Policies
Philosophy of Education
Fairfield University has, as its primary objective, the development of the creative intellectual potential of its students within a context of religious commitment.

Fairfield believes in the particular excellence of a liberal education. In an effort to achieve this objective, it requires each student to take courses from five areas of knowledge: mathematics and the natural sciences, history and the social and behavioral sciences, philosophy and religious studies, English and the arts, and modern and classical languages. Thus assured of a basic, well-rounded education, students are free to pursue a major field of study in preparation for scholarly or professional pursuits.

To assist the student in the quest for truth, the University promotes dialogue between teacher and student, between student and student, between teacher and teacher. This dialogue takes place in an environment of absolute freedom of inquiry.

Faculty Advising
All members of the faculty share personally and actively in the responsibility for providing students with educational, career, and personal guidance. One of the hallmarks of a Jesuit education is the personal interest each professor takes in students; the professor tries to know each student's strengths and weaknesses. This tradition is basic to Fairfield. Classes are not large, and there are ample opportunities for close student-teacher relationships. Members of the faculty make themselves available for informal discussions, advice, and encouragement well beyond their published office hours.

During the orientation program for first-year students and transfers, each student is assigned to a faculty advisor. In subsequent years, depending upon the student's major and career interests, the first advisor will be replaced by a professor in the student's field of academic interest. The faculty advisor will be available to meet regularly with the student, offer appropriate counsel, watch the student's progress, and, in general, help him or her adjust to college life.

Students who plan to enter professional or graduate school after graduation from Fairfield are referred to faculty who are knowledgeable about specific professions and graduate schools. Faculty will offer advice and will assist students in the application for admission and the attainment of scholarships and fellowships to professional and graduate schools.

Academic Year
The academic year begins in early September and ends in late May, with recess periods at Christmas and in the spring. It is divided into two semesters, each extending over a period of about 14 weeks. The semester hour is the unit of instructional credit. The class day begins at 8 a.m. and is divided into class periods of 50, 75, or 150 minutes and laboratory periods of two, three, or four hours.

Full-Time Status
The normal course load for a matriculated student is five courses per semester, equivalent to 14 to 19 credit hours. To maintain full-time status, a matriculated student must be registered for a minimum of 12 credit hours each semester.

Class Ranking System
Student rank is based on total credit hours completed and recorded.

<table>
<thead>
<tr>
<th>Class</th>
<th>Credit Hours Earned</th>
<th>Year</th>
</tr>
</thead>
<tbody>
<tr>
<td>First-year</td>
<td>0 through 29</td>
<td>1</td>
</tr>
<tr>
<td>Sophomore</td>
<td>30 through 59</td>

</tr>
<tr>
<td>Junior</td>
<td>60 through 89</td>
<td>3</td>
</tr>
<tr>
<td>Senior</td>
<td>90 through 120</td>
<td>4</td>
</tr>
</tbody>
</table>

Degree Requirements
At the time of graduation, a student must have earned a minimum of 120 credits and completed at least 38 to 46 three- or four-credit courses, depending on the course of study. However, no simple accumulation of credits is sufficient – in itself – to qualify for a degree from Fairfield University. Rather, students are expected to have completed with success all of the assigned courses that constitute the curriculum of their choice. The curriculum consists of courses that fall into the required categories of core curriculum, major, and electives. A second major, minor, and concentration are also an option. Students must have a minimum grade average of 2.0 (C) or better overall and in their major. Students must abide by the terms of the University's residency requirement, set forth below. In addition, students are expected to complete their undergraduate degrees within 10 years of beginning their studies.
Academic Policies

Class Attendance: All students are expected to attend every scheduled class session. The impact of attendance on grading is specified in the syllabus. Unexcused absences by first-year students may be reported to the dean of freshmen; unexcused absences by other students may be reported to the appropriate academic dean.

Absence from Examinations or Quizzes: Unless there are serious reasons for absence on the day of an examination or quiz, a grade of zero will be awarded for the missed work. However, a student may be excused from an examination for reasons beyond his or her control. In such cases, a reasonable attempt should be made to notify the professor prior to the scheduled examination. At the request of the faculty member, a student who misses an examination due to illness must submit a written excuse from a private physician.

If this student has been under the care of University Health Services, he or she must sign a medical release form authorizing the Health Center to provide information to the appropriate faculty member. If the excuse is rejected by the faculty member, the student may appeal to his or her academic dean for resolution of the issue. Students should consult with the faculty member regarding the course makeup policy.

Released Time: A student participating in a University-sponsored event has the right to be excused without penalty or grade jeopardy from exams, student presentations, attendance, and other classroom events during that time, provided the student makes up the required work in the fashion mutually agreed upon by the professor and the student.
Academic Policies

Students participating in such University-sponsored events will be allowed to make up any major exams, tests, or quizzes they miss in a course when they are involved in a scheduled event provided that participating students, or the faculty moderator, inform all their professors in writing at the beginning of the semester, or as soon thereafter as possible, once scheduling is confirmed.

University-sponsored events covered by this policy are defined as follows:

- **Athletics**
  - All varsity sporting events, including post-season tournaments
- **Others**
  - Concerts, plays, or other group performances where the absence of a member would detract from the overall performance

Not included in this policy are departmental clubs.

### Grades

The quality of student performance in coursework is graded according to the official marks of A, B, C, D, and F. These marks have the following meanings:

- **A** Outstanding achievement
- **B** Superior level of achievement
- **C** Acceptable level of achievement with course material
- **D** Minimal achievement, but passing
- **F** Unacceptable level of achievement; course must be repeated to obtain credit

The plus (+) may be added to grades of B or C to indicate work performed at the top of that range.

The minus (-) may be added to grades A, B, or C to indicate work performed below that range.

A semester's grade normally will be determined according to the following procedure:

The semester's work (examinations, quizzes, recitations, and out-of-class assignments) will establish approximately two-thirds of the grade, the final examination establishing approximately one-third of the grade. If a professor chooses a method other than the established procedure, the following criteria must be met:

- **a.** The students must be informed in writing at the beginning of the semester as to the procedure in determining the grade for the course.
- **b.** A memorandum must be submitted in writing to the departmental chair and the appropriate dean at the beginning of each semester.

In addition to the foregoing academic grades, which indicate the quality of student performance, the notations I (Incomplete) or W (Withdrawal) may appear on a student's grade report.

### Quality Point Value

The official mark or final letter grade earned in a course is assigned quality points. The quality points per credit hour and numerical equivalency for letter grades are as follows:

<table>
<thead>
<tr>
<th>Letter</th>
<th>Quality Numerical</th>
<th>Points Equivalent</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>4.00</td>
<td>93-100</td>
</tr>
<tr>
<td>A-</td>
<td>3.67</td>
<td>90-92</td>
</tr>
<tr>
<td>B+</td>
<td>3.33</td>
<td>87-89</td>
</tr>
<tr>
<td>B</td>
<td>3.00</td>
<td>83-86</td>
</tr>
<tr>
<td>B-</td>
<td>2.67</td>
<td>80-82</td>
</tr>
<tr>
<td>C+</td>
<td>2.33</td>
<td>77-79</td>
</tr>
<tr>
<td>C</td>
<td>2.00</td>
<td>73-76</td>
</tr>
<tr>
<td>C-</td>
<td>1.67</td>
<td>70-72</td>
</tr>
<tr>
<td>D</td>
<td>1.00</td>
<td>60-69</td>
</tr>
<tr>
<td>F</td>
<td>0.00</td>
<td>0-59</td>
</tr>
</tbody>
</table>

Each semester's course grades are computed into a weighted average. To determine a weighted grade point average, the number of credits per course is multiplied by the quality points earned per course. The total number of quality points for all courses is then divided by the number of credits attempted.

### Incomplete

A grade of “I” is issued when, due to an emergency situation such as illness, a student prearranges with the professor to complete some of the course requirements after the semester ends. All course work must be completed within 30 days after the beginning of the next regular semester. Any incomplete grades still outstanding after the 30-day extension will become Fs.

### Course Load

Fairfield University desires to see all undergraduate students make normal progress toward graduation. For full-time students, the normal rate of work is defined as five courses per semester, each bearing three or four credit hours. Some courses, notably one-credit music courses and science labs, do not contribute toward this calculation of a normal course load or progress toward graduation; they are considered as supplementary work. The minimum rate of work for full-time students is four courses (minimum 12 credit hours) per semester.
Withdrawal from Courses
Students who wish to withdraw from a course after the initial add/drop period may do so through the end of the seventh week of the semester (or by the mid-point of the term in the case of accelerated or other unusual terms) provided that (a) the student’s academic dean, in consultation with the course instructor, finds withdrawal to be in the student’s best interest and (b) the student remains enrolled in a minimum of 12 credit hours. After the seventh week of the semester (or mid-point of other terms), course withdrawal will be granted only in highly unusual circumstances, such as a health emergency. Withdrawal after the seventh week will not be permitted simply to prevent receipt of a grade that might not meet the student’s satisfaction. In all cases, if withdrawal is granted, the University Registrar will record a grade of W (withdrawal) on the student’s permanent record. To initiate a request to withdraw from a course, a student must complete a Course Withdrawal Form and meet with his/her academic dean.

Repeat Course Policy
When a student repeats a course that was failed, the new grade will be recorded. Quality point values will be averaged into the cumulative average, and the credits will count toward the degree. The original grade will remain on the transcript and be calculated into the cumulative average.

When a student repeats a course for which the student has previously obtained a passing grade, the new course and grade will be recorded on the transcript with the notation, repeat course. Neither the credits nor the grade will count toward the degree. The original grade will remain on the transcript.

First-Year Student Midterm Deficiencies
Halfway through the fall and spring semesters, first-year students are provided with midterm estimate grades for the courses in which they are earning grades of C- or below. These grades are not part of their official academic record, but allow the students, as well as their faculty advisors and the Dean of Freshmen, to review their academic progress at the mid-point of their first two semesters.

Grade Reports
Grade reports are issued to students by the Registrar via the student Web portal at the end of each semester.

SCHOLASTIC HONORS

Dean’s List
To qualify for the Dean’s List at the conclusion of each semester’s work, a student must have completed a minimum of 12 credit hours, have no outstanding or incomplete grades for that semester, and have attained a semester grade point average of 3.50 or better.

Graduation with Honors
Honors at graduation are awarded for the following weighted grade point averages computed for the four years’ work:

<table>
<thead>
<tr>
<th>Honors</th>
<th>Grade Point Average</th>
</tr>
</thead>
<tbody>
<tr>
<td>Summa cum laude</td>
<td>3.85</td>
</tr>
<tr>
<td>Magna cum laude</td>
<td>3.70</td>
</tr>
<tr>
<td>Cum laude</td>
<td>3.50</td>
</tr>
</tbody>
</table>

Alpha Sigma Nu
Alpha Sigma Nu, the national Jesuit honor society, serves to reward and encourage scholarship, loyalty, and service to the ideals of Jesuit higher education. To be nominated for membership, undergraduate students must have scholastic rank in the top 15 percent of their class, demonstrate a proven concern for others through involvement in extracurricular activities and service to the University, and manifest a true concern and commitment to the values and goals of the society. The Fairfield chapter was reactivated in 1981 and includes outstanding seniors who are encouraged to reflect scholarship, promote service to the University, and provide greater understanding of the Jesuit ideals of education within the University community.

Beta Gamma Sigma
Beta Gamma Sigma is an international honor society recognizing the outstanding academic achievements of students enrolled in collegiate business programs accredited by AACSB International – The Association to Advance Collegiate Schools of Business. With more than 440,000 members worldwide, the Society’s membership comprises the brightest and best of the world’s business leaders. At Fairfield University, the top 7 percent of juniors, the top 10 percent of seniors, and the top 20 percent of graduate students are eligible for membership in the University's Beta Gamma Sigma chapter, which was established in 1998. Each spring, an induction ceremony is held at the Charles F. Dolan School of Business to welcome new members into the Society.
Academic Probation

The purpose of academic probation is to alert the student and the institution to the problems associated with the student’s academic performance and to recommend or implement strategies for improvement. The continuation of poor academic performance will result in the dismissal of the student. Faculty advisors are notified of all advisees placed on academic probation.

A student placed on academic probation will remain on academic probation until the overall GPA is at or above the requirements specified below. A student will be removed from academic probation as soon as his/her cumulative GPA is equal to or greater than the requirement on the basis of subsequent courses completed at Fairfield during the next semester or during special January or summer sessions.

A student on academic probation is ineligible to participate in extracurricular or co-curricular activities during any semester in which the student is on probation. A student on academic probation may petition the Academic Vice President for the right to participate in extra- or co-curricular activities. The appeal must contain a valid and compelling reason why restriction of extra- or co-curricular activities is inappropriate, and must demonstrate effectively that the activity will contribute an improvement in academic performance.

First Year Students: First semester, first-year students with a GPA below 1.90 will not be placed on academic probation for their second semester, but they will lose their rights to participate in extracurricular or co-curricular activities. By the end of the student’s second semester, or the first year at Fairfield, students will be placed on academic probation if the overall GPA is below 1.90.

Sophomores: Sophomores will be placed on academic probation if the overall GPA is below 1.90.

Juniors and Seniors: Juniors and seniors will be placed on academic probation if the overall GPA is below 2.00.

Academic Dismissal

Students meeting any of the following conditions will be dismissed from the University:

• A student who at the end of a semester has received a grade of F in three or more courses.
• A student who at the end of the academic year has received the grade of F in three or more courses.
• A sophomore, who regardless of incompletes, while on academic probation and enrolled full time (i.e., attempting a minimum of 12 credit hours), proceeds to earn a semester GPA below 1.90.
• A junior or senior, who regardless of incompletes, while on academic probation and enrolled full time (i.e., attempting a minimum of 12 credit hours), proceeds to earn a semester GPA below 2.00.

Phi Beta Kappa

Phi Beta Kappa is the oldest and most widely recognized national academic honor society in the United States. Founded in 1776 at the College of William and Mary in Virginia, the society’s aim is to encourage academic excellence in the broad range of the liberal arts. Membership is restricted to students who complete most of their coursework in the liberal studies curriculum; typically those are students who pursue B.A. or B.S. degrees in the College of Arts and Sciences. Fairfield’s Zeta Chapter of Phi Beta Kappa was established in 1995. Each spring it installs new members from among the most academically talented upper-class students. Election to this chapter is based on scholastic standing and academic accomplishments and is limited to seniors and a highly select group of juniors.

Other National Honor Societies

Discipline-based national and international honor societies with chapters at Fairfield University include:

- Alpha Delta Kapa — sociology
- Alpha Epsilon Delta — pre-medical
- Alpha Kappa Delta — sociology
- Alpha Mu Gamma — foreign languages
- Alpha Sigma Lambda — adult higher education
- Chi Sigma Chi — counseling, academic and professional (international)
- Chi Sigma Iota — counseling, academic and professional (international)
- Lambda Pi Eta — communication
- Omicron Delta Epsilon — economics
- Phi Alpha Theta — history (international)
- Pi Delta Kappa — education (international)
- Pi Mu Epsilon — mathematics
- Pi Sigma Alpha — politics
- Psi Chi — psychology
- Sigma Iota Rho — international studies
- Sigma Pi Sigma — physics
- Sigma Tau Delta — English (international)
- Sigma Theta Tau — nursing (international)
- Sigma Xi, The Scientific Research Society — scientists and engineers (international)
- Theta Alpha Kappa — religious studies

Academic Probation

By the end of the student’s second semester, or the first year at Fairfield, students will be placed on academic probation if the overall GPA is below 1.90.

Sophomores: Sophomores will be placed on academic probation if the overall GPA is below 1.90.

Juniors and Seniors: Juniors and seniors will be placed on academic probation if the overall GPA is below 2.00.

Academic Dismissal

Students meeting any of the following conditions will be dismissed from the University:

• A student who at the end of a semester has received a grade of F in three or more courses.
• A student who at the end of the academic year has received the grade of F in three or more courses.
• A sophomore, who regardless of incompletes, while on academic probation and enrolled full time (i.e., attempting a minimum of 12 credit hours), proceeds to earn a semester GPA below 1.90.
• A junior or senior, who regardless of incompletes, while on academic probation and enrolled full time (i.e., attempting a minimum of 12 credit hours), proceeds to earn a semester GPA below 2.00.
Students who have been dismissed from the University for reason of academic failure are normally expected to remain away for at least a full semester (fall or spring) before seeking readmission. Such individuals lose all entitlement to institutionally funded financial aid.

**Voluntary Withdrawal from University**
To discuss voluntarily withdrawing (for non-medical reasons):
1. Contact the appropriate Academic Dean’s office.
2. Submit a written request for withdrawing from the University, including the reasons for the withdrawal. Voluntary withdrawals from the University are subject to the following conditions:
   - There are no pending student conduct issues.
   - The student is not liable for academic withdrawal due to insufficient progress or excessive absence.
   - The student has settled all financial obligations to the University.

*Note:* If a student wants to withdraw when traditional semester classes are not in session, the student must still submit a letter to the Academic Dean’s Office. Students scheduled to live in University housing should send a copy of that letter to the Office of the Dean of Students.

3. After meeting with an administrator in your Academic Dean’s office, all resident students must set up a meeting with an administrator in the Office of the Dean of Students to discuss non-academic-related issues (housing, financial aid, Stag Card, student account, etc.) pertaining to the student’s withdrawal from the University.

**Readmission**
A student who wishes to re-enter Fairfield University after having been dismissed or having withdrawn voluntarily must inform the dean of the appropriate undergraduate school in writing of his/her intention. Those wishing to reapply to complete their undergraduate degree after five or more years of absence from the University must meet with the appropriate dean to discuss their intentions and evaluate their academic record. The dean forwards the request to the academic vice president for a decision.

**Medical Withdrawal from the University**
A medical withdrawal may be warranted when a student is unable to continue for any number of medical conditions.
1. To discuss this form of withdrawal, contact either the Office of the Dean of Students (ext. 4211), the Health Center (ext. 2241), or Counseling Services (ext. 2146). Most students who seek to withdraw for medical reasons have been using the Health Center or Counseling Services. Therefore, those students will most likely initiate their request through a member of the medical staff or a counselor. Information from personal or private physicians or a psychologist is subject to review by the University.

2. Upon review of the medical merits for the withdrawal request, and appropriate documentation by the Health Center or Counseling Services, the student must make a formal request for withdrawal either in writing or person to the Dean of Students’ Office. This office will review the request and the supporting information and make a decision. Withdrawals granted for medical reasons are not approved until after arrangements for key and ID return are complete, and a move-out deadline from University housing has been established.

3. The Dean of Students’ Office will also discuss with the student the process by which the student can seek readmission to the University.

4. The appropriate academic dean’s office, bursar’s office, registrar’s office, and residence life and housing office are then notified of the student’s change in status. The institutional refund policy applies.

**Readmission to the University after a Medical Withdrawal**
1. To seek readmission following a medical withdrawal, the student must write a letter making the formal request and state the rationale supporting the request. If medical documentation is required, the student should simultaneously submit that information to either the Health Center (when medical situation is physical in nature) or Counseling Services (when medical situation is psychological in nature). That information will be reviewed and any necessary contact with outside care providers or physicians will be made.

2. The Dean of Students’ Office will ask the Health Center or Counseling Services for their evaluation of the request. Upon receipt of that information, the Dean of Students’ Office will contact the student to arrange an appointment in person if at all possible or over the phone if the student is an unreasonable distance from campus.

3. After formal review of the student’s request, the Dean of Students’ Office will decide whether the student should or should not be readmitted. Those applications supported for readmission will be forwarded to the Office of the Academic Vice President for an official letter of readmission to the student. The student may not register for classes or be assigned University housing until the official letter of readmission is reviewed and processed.
CREDITS FROM OTHER INSTITUTIONS

Any courses taken at another institution must be pre-approved by the dean of the student’s school to be eligible for transfer credit. Only credits (not grades) are transferable. For each approved course taken at another institution, credits will be accepted in transfer only if the student has earned a grade of C or better (2.00 GPA and a numerical equivalency of no lower than 73) in that course. Official transcripts should be forwarded to the dean upon completion of pre-approved coursework at other institutions.

Students are cautioned that deans will grant permission to take courses elsewhere only when the student can demonstrate compelling reasons to do so. Typically, students attend other institutions while on approved Educational Leave of Absence during the fall and/or spring semester to participate in a study abroad program or to take advantage of a special curriculum offered at another U.S. institution or to enroll in courses during the summer or winter vacation.

In all cases, the following restrictions apply:

• Of the 120 or more credits required for the bachelor's degree, a minimum of 60 of those credits must be earned at Fairfield University.

• Students are permitted to take no more than two courses at another institution during a summer or winter vacation period.

• The last 30 credits earned toward a student's degree must be completed at Fairfield University or through a program that issues Fairfield University course credit.

Advanced Placement

While in high school, some students pursue one or more college-level Advanced Placement course. Fairfield University will award three or four hours of credit toward graduation for each AP course taken by a student, provided that the student has taken an Advanced Placement Test prepared by the CEEB program and obtained a test score of four or five. It is the discretion of college/school officials to determine if such AP credits can be used to exempt students from specific University courses or requirements. Normally, AP credit will not exempt a student from requirements in his/her major. No student will be awarded more than a total of 15 AP credits by Fairfield University.

Listed below are the most common AP tests submitted by students for advanced placement, along with their Fairfield University equivalent.

Higher Level International Baccalaureate Courses
Fairfield University recognizes the advanced nature of Higher Level International Baccalaureate courses. Generally, three credits will be awarded toward a Fairfield degree for a Higher Level IB course taken by a student, provided a grade of six or seven is achieved. Final determination concerning the amount of credit and whether or not it can be used to exempt students from specific University courses or requirements rests with the dean in consultation with the academic department. Normally, Higher Level IB credit will not exempt a student from requirements in his/her major. Students will be awarded a maximum total of 15 Higher Level IB credits.

College Courses Completed While in High School
High school students who earn college credit while still enrolled in high school can transfer those credits to Fairfield University if the following conditions are met:

- A grade of C or better
- The official college transcript is sent to Fairfield
- The student’s high school counselor sends written verification that the college credits or coursework were not used to fulfill high school graduation requirements, either in subject area or credits.

No more than a total of 15 such credits will be accepted by Fairfield.

Transfer Credit
When students begin their university studies at other institutions and subsequently transfer to Fairfield University, the University accepts transfer credit under the following conditions:

- No courses with grades less than C will qualify for transfer.
- Credit will be granted only for specific work completed at regionally accredited institutions whose quality and course content have been approved by the University.
- Only credit hours, not grades, will transfer.
- Credits earned more than 10 years previous to a credit transfer request may not be able to be accepted.

Every transfer student is required to complete at least two years of full-time undergraduate study at Fairfield in order to receive a Fairfield University bachelor’s degree.
EDUCATIONAL LEAVE OF ABSENCE

Matriculated students may apply for an educational leave of absence for a fall or spring semester or for a full academic year in order to study abroad or for the Washington, D.C., semester. Educational leaves are granted by the associate/assistant dean of the student’s school or college. To be eligible for an educational leave of absence, a Fairfield University student must have an overall GPA of 2.80 or better at the time of application. In addition, the student must have a record of good academic and social standing for the semester immediately preceding application. Students who wish to be granted educational leave of absence must complete all official paperwork with the study abroad coordinator by Feb. 1 for the following year.

All students granted educational leaves by Fairfield University will be charged a fee for maintenance of their matriculation at Fairfield. Furthermore, students who study elsewhere in non-affiliated programs lose their entitlement for institutional financial aid for the period of the leave.

STUDENT RECORDS

Under the Family Educational Rights and Privacy Act passed by Congress in 1974, legitimate access to student records has been defined. A student at Fairfield University has the right to see any records that directly pertain to the student. Excluded by statute from inspection is the parents’ confidential statement given to the financial aid office and medical records supplied by a physician.

A listing of records maintained, their location, and the means of reviewing them is available in the Office of Student Services. Information contained in student files is available to others using the guidelines below:

1. Confirmation of directory information is available to recognized organizations and agencies. Such information includes name, date of birth, dates of attendance, address.

2. Summary of behavioral records and copies of transcripts will be provided to anyone upon written request of the student. Cost of providing such information must be assumed by the student.

3. All other information, excluding medical records, is available to staff members of the University on a need-to-know basis; prior to the release of additional information, a staff member must provide his or her need to know information to the office responsible for maintaining the records.

TRANSCRIPTS

Application for transcripts should be addressed to the University Registrar’s office and should state the name and address of the official to whom the transcript is to be mailed. In accordance with the general practice of colleges and universities, complete official transcripts are sent directly by the university, not transmitted by the applicant. Transcripts will not be processed during examination and registration periods. Requests for transcripts should be made one week in advance of the date they are needed.

**ACADEMIC FREEDOM AND RESPONSIBILITY**

**Academic Freedom and Responsibility**
The statement on academic freedom, as formulated in the 1940 Statement of Principles endorsed by the AAUP and incorporating the 1970 interpretive comments, is the policy of Fairfield University. Academic freedom and responsibility are here defined as the liberty and obligation to study, to investigate, to present and interpret, and to discuss facts and ideas concerning all branches and fields of learning. Academic freedom is limited only by generally accepted standards of responsible scholarship and by respect for the Catholic commitment of the institution as expressed in its mission statement, which provides that Fairfield University “welcomes those of all beliefs and traditions who share its concerns for scholarship, justice, truth, and freedom, and it values the diversity which their membership brings to the university community.”

**Academic Honesty**
All members of the Fairfield University community share responsibility for establishing and maintaining appropriate standards of academic honesty and integrity. As such, faculty members have an obligation to set high standards of honesty and integrity through personal example and the learning communities they create. Such integrity is fundamental to, and an inherent part of, a Jesuit education, in which teaching and learning are based on mutual respect. It is further expected that students will follow these standards and encourage others to do so.

**Honor Code**
Fairfield University’s primary purpose is the pursuit of academic excellence. This is possible only in an atmosphere where discovery and communication of knowledge are marked by scrupulous, unqualified honesty. Therefore, it is expected that all students taking classes at the University adhere to the following Honor Code:

“I understand that any violation of academic integrity wounds the entire community and undermines the trust upon which the discovery and communication of knowledge depends. Therefore, as a member of the Fairfield University community, I hereby pledge to uphold and maintain these standards of academic honesty and integrity.”

**Academic Dishonesty**
Students are sometimes unsure of what constitutes academic dishonesty. In all academic work, students are expected to submit materials that are their own and are to include attribution for any ideas or language that are not their own. Examples of dishonest conduct include, but are not limited to:

- Falsification of academic records or grades, including but not limited to any act of falsifying information on an official academic document, grade report, class registration document or transcript.
- Cheating, such as copying examination answers from materials such as crib notes or another student’s paper.
- Collusion, such as working with another person or persons when independent work is prescribed.
- Inappropriate use of notes.
- Falsification or fabrication of an assigned project, data, results, or sources.
- Giving, receiving, offering, or soliciting information in examinations.
- Using previously prepared materials in examinations, tests, or quizzes.
- Destruction or alteration of another student’s work.
- Submitting the same paper or report for assignments in more than one course without the prior written permission of each instructor.
- Appropriating information, ideas, or the language of other people or writers and submitting it as one’s own to satisfy the requirements of a course – commonly known as plagiarism. Plagiarism constitutes theft and deceit. Assignments (compositions, term papers, computer programs, etc.) acquired either in part or in whole from commercial sources, publications, students, or other sources and submitted as one’s own original work will be considered plagiarism.
- Unauthorized recording, sale, or use of lectures and other instructional materials.

In the event of such dishonesty, professors are to award a grade of zero for the project, paper, or examination in question, and may record an F for the course itself. When appropriate, expulsion may be recommended. A notation of the event is made in the student’s file in the academic dean’s office. The student will receive a copy.
Purpose
Procedures for review of academic grievances protect the rights of students, faculty, and the University by providing mechanisms for equitable problem solving.

Types of Grievances
A grievance is defined as a complaint of unfair treatment for which a specific remedy is sought. It excludes circumstances that may give rise to a complaint for which explicit redress is neither called for nor sought, or for which other structures within the University serve as an agency for resolution.

Academic grievances relate to procedural appeals or to academic competence appeals, or to issues of academic dishonesty. Procedural appeals are defined as those seeking a remedy where no issue of the quality of the student’s work is involved. For example, a student might contend that the professor failed to follow previously announced mechanisms of evaluation.

Academic competence appeals are defined as those seeking a remedy because the evaluation of the quality of a student’s work in a course is disputed. Remedies would include but not be limited to awarded grade changes, such as permission to take make-up examinations or to repeat courses without penalty.

Academic dishonesty appeals are defined as those seeking a remedy because of a dispute over whether plagiarism or cheating occurred. Remedies would include but not limited to removal of file letter, change of grade, or submitting new or revised work.

Time Limits
The procedures defined here must be initiated within one semester after the event that is the subject of the grievance.

INFORMAL PROCEDURE
Step one: The student attempts to resolve any academic grievance with the faculty member, department chair, or other individual or agency involved. If, following this initial attempt at resolution, the student remains convinced that a grievance exists, she or he advances to step two.

Step two: The student consults the chair, or other individuals when appropriate, bringing written documentation of the process up to this point. If the student continues to assert that a grievance exists after attempted reconciliation, he or she advances to step three.

Step three: The student presents the grievance to the dean of the school in which the course was offered, bringing to this meeting documentation of steps one and two. If the dean’s attempts at mediation prove unsuccessful, the student is informed of the right to initiate formal review procedures.

FORMAL PROCEDURE
Step one: If the student still believes that the grievance remains unresolved following informal procedures, she or he initiates the formal review procedure by making a written request through the dean of the school in which the course was offered for a formal hearing in the academic vice president’s office. Such a request should define the grievance and be accompanied by documentation of completion of the informal process. It should also be accompanied by the dean’s opinion of the grievance.

Step two: The academic vice president determines whether the grievance merits further attention. If not, the student is so informed.

If, however, the grievance does merit further attention, the academic vice president determines whether it is a procedural, competence, or academic dishonesty appeal.

• If it relates to a procedural matter, the academic vice president selects a dean (other than the dean of the involved school) to chair a grievance committee.

• If it relates to an academic competence matter, the academic vice president requests from the dean involved the names of two outside experts to serve as a consultant panel in determining the merit of the student’s grievance.

• If it relates to academic dishonesty, the academic vice president will convene a committee comprised of a dean and two faculty from outside the department in which the course was offered to review the material and the sanctions.

In addition, in some instances it may be possible for the academic vice president to settle the grievance.

Step three: For procedural appeals, the grievance committee takes whatever steps are deemed appropriate to render a recommendation for resolving the grievance. The committee adheres to due process procedures analogous to those in the Faculty Handbook.

For competence appeals, the academic vice president contacts the outside panel members and requests that they review the case in relation to its content validity.

For academic honesty appeals, the academic vice president will request that the committee present a written report of their findings relating to the validity of the charge and the sanction.

Step four: The recommendation from either the grievance committee or the panel is forwarded to the academic vice president in written form, accompanied, if necessary, by any supporting data that formed the basis of the recommendation.

Step five: The academic vice president renders a final and binding judgment, notifying all involved parties. If the grievance involves a dispute over a course grade given by a faculty member, the academic vice president...
is the only University official empowered to change that grade, and then only at the recommendation of the committee or panel.

Structure of the Grievance Committee
The structure of the Grievance Committee is the same as the existing Academic Honesty Committee, as follows:

• Two faculty members are selected from a standing panel of eight faculty members elected by the general faculty. The faculty member against whom the grievance has been directed proposes four names from that panel; the student strikes two of those names, and the two remaining faculty members serve.

• Two students are selected from a standing panel of eight students elected by the student government. The student(s) grievant(s) propose four names from that panel; the faculty strike two of those names; the two remaining students serve.

• In the event that a faculty member or student selected through the foregoing process is unable to meet, another elected member of the panel serves as an alternate.

• The committee is chaired by a dean (other than the dean of the school in which the course was offered) to be selected by the academic vice president. The dean so selected has no vote except in the event of a tie, and is responsible for overseeing the selection of the review committee, convening and conducting the committee meetings, and preparing the committee’s report(s) and other appropriate documentation.

• The election of committee members should take into account the possible need for response on 24-hour notice (particularly at the time of Commencement), and availability should, in such instances, be a prime consideration in committee member selection.

Due Process Procedure
a. Both the student and the faculty member have the right to be present and to be accompanied by a personal advisor or counsel throughout the hearing.

b. Both the student and the faculty member have the right to present and to examine and cross-examine witnesses.

c. The administration makes available to the student and the faculty member such authority as it may possess to require the presence of witnesses.

d. The hearing committee promptly and forthrightly adjudicates the issues.

e. The full text of the findings and conclusions of the hearing committee are made available in identical form and at the same time to the student and the faculty member. The cost is met by the University.

f. In the absence of a defect in procedure, recommendations shall be made to the Academic Vice President by the committee as to possible action in the case.

g. At any time should the basis for an informal hearing appear, the procedure may become informal in nature.
The Curricula
Introduction

The various curricula at Fairfield University are arranged into five general categories. The first three categories – core curriculum, electives, and majors – represent coursework that all students are required to complete. The remaining categories – second majors and minors – designate optional coursework. In addition, special features such as an honors program, interdisciplinary learning communities or clusters, independent studies, and internships are available to students.

Choice of Curriculum

Descriptions of the various curricula will be found in the college and school sections and, where appropriate, under the discipline heading. For students who desire a curriculum involving an ordered sequence of courses (natural sciences, accounting, mathematics) the initial choice of program is important; for other students, first-year and sophomore courses provide a solid basis and background for any subsequent decision to major in such areas as economics, English, history, languages, and visual and performing arts.

Students fulfill the curriculum requirements that are in place at the time the student matriculates. Once new changes are in effect, students have the option of remaining with the requirements in effect at the time of their matriculation.

University Course Numbering System

**Undergraduate**

01-99 Introductory courses
100-199 Intermediate courses without prerequisites
200-299 Intermediate courses with prerequisites
300-399 Advanced courses, normally limited to juniors and seniors, and open to graduate students with permission

**Graduate**

400-499 Graduate courses, open to undergraduate students with permission
500-599 Graduate courses

Core Curriculum

The goal of a Fairfield education is to develop the whole person: an intellectual being who can think clearly, accurately, dispassionately; a social being who cares about others and takes one’s place in the world with them; a physical being who knows the laws, limitations, and beauty of the natural world; a spiritual being who seeks to make one’s life express the truths of religion and philosophy.

Because Fairfield believes that a liberal education can achieve this goal, the University has developed a core curriculum that all undergraduates must take to acquire a broad background in all academic areas. During their years at Fairfield, students, regardless of major or field of specialization, take from two to five courses in each of five areas.

Within the framework of these five areas, students have a number of options so that fulfilling the requirement can become a stimulating and enjoyable experience while providing the breadth of knowledge necessary for further studies and for life as a well-educated human being.

Options within the Core Curriculum

**Area I: Mathematics and Natural Sciences**

- Two semesters of mathematics. At least one semester must include a course containing some calculus (MA 19, MA 121, MA 125, or MA 171). A sophomore or upper-division course may be used with approval of the department.
- Two semesters of a natural science. Any two courses in any of the natural sciences, as well as AY 110 and PY 261, fulfill this requirement.

**Note:** Psychology majors cannot use PY 261 to fulfill this core science requirement. Business majors cannot use PS 70 to meet this requirement.

**Area II: History, and the Social and Behavioral Sciences**

- Two semesters of history. HI 30 plus one 200-level course. CL 115-116 (Greek and Roman Civilization) may be used to fulfill this requirement.
- Two semesters of anthropology, communication (CO 100 and CO 230 only), economics, politics, psychology, or sociology. Both courses may be in the same department or they may be in two different departments. Also includes ED 241 for Certificate students only.
Area III: Philosophy, Religious Studies, and Applied Ethics

- Two semesters of philosophy. PH 10 is required followed by a 100-level course.
- Two semesters of religious studies. RS 10 is required.
- One additional course in philosophy (200-level), religious studies, or applied ethics. Also includes ED 329 for Certificate students only. Also PJ 120 counts here.

Area IV: English and Visual and Performing Arts

- Three semesters of English. EN 11 and EN 12 are required. The third course may be selected from any English literature offering that has a number designation of 200 or greater. Writing courses (EN/W) do not fulfill the core literature requirement. Selected courses offering literature in translation may also fulfill this requirement – see listings under classical studies as well as modern languages and literatures.
- Two semesters of visual and performing arts. One semester must be in the area of art history; music history; theatre history; or new media film, radio, television history. The other semester may be selected from any of the three-credit course offerings in art history, music, new media, studio art, and theatre, except for those courses listed as fine arts (FA).

Area V: Modern and Classical Languages

Two semesters at the intermediate level of any language listed among the offerings of the Department of Modern Languages and Literatures or the Classical Studies Program.

Electives

All students in B.A. and B.S. programs should have a minimum number of free electives. These electives may be chosen in any area of study, presuming prerequisites are met, and cannot be determined or required by any department or school. These electives may, of course, be part of a student's minor or second major. Students must check with their advisors for minimum numbers.

Major

The major is central to a student's program of study at Fairfield University. It represents an area of specialization consisting of a cluster of related courses drawn from a single department, more than one department, or an interdisciplinary program. Normally, a student must pursue a minimum of 30 credit hours of coursework to complete a major. The course requirements for each major offered by the College of Arts and Sciences are set forth within each departmental section of this catalog; information on individually designed majors is also in this section. Likewise, the requirements for majors within the Charles F. Dolan School of Business, the School of Nursing, and the School of Engineering are found in those sections of this catalog. In all cases, the selection of courses for a particular major must be done in consultation with a faculty advisor from one's major department or school. In each college or school, the proper work of the major is concentrated in the junior and senior years; where preparatory courses are needed, they are taken in the freshman and/or sophomore year.

Majors are to be selected at the end of the freshman year or during the sophomore year. Students declare majors by going to the office of the dean of the appropriate college or school. When a major is declared, the student is assigned a faculty advisor from the major area.

To change from one major to another in one's school requires completion of a Change of Major form. The Change of Major form can be obtained from the office of the dean of the student's current school. The form must be signed by the chairperson/coordinator of the major in which the student is currently enrolled, the chairperson/coordinator of the major that the student desires, and the dean of the school. The form is then forwarded to the University Registrar.

Notes

- Most core courses are taken within the first two years at Fairfield University. However, precisely when students should take various core courses depends, in part, upon their major. The faculty advisor will assist students in selecting a schedule that meets all core requirements. Normally, English (EN 11 and EN 12), mathematics, and foreign languages are included in the student's first-year schedule.
- Students may elect to complete some of their core requirements by enrolling in interdisciplinary learning communities or core course clusters described on page 36.
- Students with majors in the Charles F. Dolan School of Business are required to take specific courses as part of their core curriculum. See the Dolan School of Business core section for such course details.
- School of Nursing students take specific courses as part of their core curriculum and are required to complete either the visual and performing arts or the modern language requirement.
Diversity Requirements

U.S. Diversity

In order to help students develop a critical consciousness of self and society, all undergraduates are required to select one course that gives significant treatment to aspects of diversity and pluralism in U.S. society. Such courses will explore, in a systematic manner, connections between race, class, and gender, and will examine issues of privilege and difference in U.S. society. Additional aspects of diversity – including religion, sexual orientation, and ethnicity – may also be considered. Approved courses will be designated by a special symbol in each semester’s course schedule booklet. This requirement will not add credit hours or an extra course to a student’s degree program; students will be able to select a designated diversity course from among core requirement courses, major courses, or electives.

A list of courses that currently satisfy the U.S. Diversity requirement follows. Please note that new courses are added each year.

World Diversity

In addition to the U.S. diversity course, a world diversity course is required of all undergraduates. This course focuses on a non-Western culture or society, exclusive of Europe and the United States, and their literary, artistic, musical, religious, philosophical, political, economic, or social traditions. Though courses primarily emphasizing North American and European topics will not count toward this requirement, courses focusing on Native American, Russian, and pre-Columbian or Latin American cultures can meet the requirement. Core language courses do not meet this requirement while literature and culture courses may satisfy it. Moreover, such a course will not emphasize international relations or business relations vis-à-vis Europe or the United States. A study abroad experience may satisfy this requirement if it meets with the spirit and letter of this mission statement.

A list of courses that currently satisfy the world diversity requirement follows. Please note that new courses are added each year.

Second Major (Double Major)

A student has the option of pursuing a second major at Fairfield University. The courses that constitute a second major must meet the stated requirements for a major program and must be approved by the department or interdisciplinary program in which the second major is located. Students declare second majors by completing a Double Major form that is available in the dean’s office of their school. A double major does NOT constitute a double degree.

Minor

In addition to carrying a major, a student may exercise the option of selecting a minor outside the area of specialization. A minor is a cluster of thematically related courses drawn from one or more departments, usually in the range of 15 to 18 credits. Students electing a minor are still required to fulfill the core requirement. In addition to department-based minors, many interdisciplinary minors are also available at Fairfield: American studies; applied ethics; Asian studies; Black studies; classical studies; environmental studies; international studies; Irish studies; Italian studies; Latin American and Caribbean studies; peace and justice; Russian and East European studies; and women’s studies. With appropriate consultation and advisement, students may develop minor programs suited to their needs.

Because the minor is considered to be a supplement to the student’s major program of study, its completion in a given case may not have the same priority as that of a major. In order to select a minor, students must fill out the appropriate form, have it approved by their school or department, and placed on file with the University Registrar. The completion of the minor is subject to the availability of the courses selected.

Clusters:
Interdisciplinary Learning
Communities Across the Core Curriculum

In 1995 Fairfield University launched a major initiative designed to build interdisciplinary linkages between core courses selected from the natural sciences, social sciences, and humanities/visual and performing arts. The connections are made through the creation of interdisciplinary learning communities, or clusters, of two or three core courses united by a common focus or theme.

During a given semester, a group of 20 students enroll in the two or three designated courses that constitute a cluster. Their professors orchestrate course material so that students compare and synthesize the perspectives and methodologies of different academic disciplines. Students and faculty members of a cluster team also participate in activities outside of the classroom, including field trips.

This curriculum initiative has been funded by a major grant given to Fairfield University by the National Endowment for the Humanities, the National Science Foundation, and the U.S. Department of Education. Fairfield University is one of just 14 colleges and universities in the nation to have been awarded this grant in 1994. To date, the University has created several clusters, including those that focus on the integrating themes such as race and ethnicity, discovery and exploration, and the Caribbean environment.

Independent Studies

The independent study option is available in most departments to students who wish to examine a subject in depth for which no course is available. Such guided studies are designed and pursued by students under the tutelage of a faculty member. This option is restricted to students in their junior and/or senior years of study.

Students should apply to the professor under whose direction they wish to study no later than the normal registration period of the preceding semester. The Independent Study Application form, available from the office of the college dean, must be completed and filed with the Registrar before the project may begin.

For projects of less than a semester’s equivalent coursework, one or two credit hours may be assigned. For projects of a semester’s equivalent coursework, three credit hours, or, with a laboratory component, four credit hours may be assigned.

If students undertake more than one independent study project during their college careers, the total credit hours for all projects may not exceed nine credit hours toward the undergraduate degree.
Student Internships

Students at Fairfield University have an opportunity to earn academic credit and gain practical, on-site work experience by pursuing internships in their major fields of study. Through placements in appropriate businesses, corporations, laboratories, law firms, government offices and agencies, nonprofit organizations, etc., students apply and test principles and theories they have acquired in their coursework. In a typical internship carrying three semester credits, students work 10 to 15 hours per week on site. Internships are coordinated by Fairfield University faculty and on-site supervisors. Through such experiences students can enhance their learning and explore potential careers. Upon graduation, students are frequently offered positions with corporations and agencies sponsoring their internships.

To be eligible for an internship, students must be in good academic standing and must meet all prerequisites prescribed by the major department (e.g. GPA, prior coursework). To register for an internship, a student must obtain prior approval from the faculty member who coordinates the internship program in his/her major department.

A maximum of six academic credits can be earned for internship experience. An internship will not substitute for any other stated course(s) in the student’s major field. Further information about specific internship opportunities can be obtained from the departmental chair or the internship coordinator of the specific department.

Study Abroad

An international experience has become an invaluable part of a complete undergraduate education. Fairfield University provides numerous opportunities for study abroad and assistance in navigating the wide array of international study choices.

Nearly 40 percent of Fairfield students participate in some type of international program. With this strong interest in study abroad, the University needs to balance its enrollments between fall and spring semester. Therefore, students need to be flexible about when they will study abroad. All requests will be considered, but not all students will receive placement for their desired semester. Students planning to study abroad must file the Statement of Intent to Study Abroad form no later than Feb. 1 of their sophomore year. Students are notified of their semester placement by the end of February of that same year.

Student must have a cumulative GPA of 2.8 or above at the time of application and be in good standing at the University. As a general rule, federal and state financial aid can be used toward study abroad programs. Fairfield University institutional aid and scholarships will be applied ONLY to Fairfield and approved affiliated programs and ONLY for one semester. Financial aid does not apply to summer or short-term study abroad programs. For most study abroad programs, students pay standard Fairfield University costs for tuition and, if applicable, room and board. For students participating in Fairfield University-administered programs where the program fee is less than the corresponding on-campus Fairfield University fee, Fairfield University grants/scholarships are reduced by a comparable percentage.

All students planning international study must receive approval of academic courses from their academic advisor. Credits will be granted only for academic work successfully completed in approved international programs. All students must work with their academic advisor and the study abroad staff to choose a program from the approved list of study abroad sites that enhances their major/minor academic interests. Only approved courses will be transcripted and accepted into a student’s curriculum.

Fairfield University administers its own programs in Florence and Syracuse, Italy; Galway, Ireland; Managua, Nicaragua; Rouen, France; and Brisbane, Australia.

All academic course work completed at University-administered programs is considered Fairfield University residency credit, and the grades are calculated into the student’s grade point average.

In addition, Fairfield faculty members conduct short-term study abroad programs during January intersession, spring break and summer. These programs carry credit in various disciplines.

Fairfield has approved an extensive list of affiliated programs. Please refer to the Study Abroad Policies and Procedures Brochure for a complete listing. Students studying in these affiliated programs receive transfer credit, meaning grades earned will not appear on the Fairfield transcript.

For more information, please visit the study abroad website, www.fairfield.edu/studyabroad.
College
of
Arts and Sciences
A Message to the Students

Welcome to the College of Arts and Sciences, the oldest and largest of Fairfield’s six schools, home to 15 departments and 17 programs, led by more than 150 full-time faculty members. Over half of all Fairfield University students—around 2,000 in any given year—focus their studies in the College. The College is also the home of the Core Curriculum, which unifies the education of all Fairfield undergraduates. Rising from our Jesuit mission and the liberal arts educational tradition, the Core provides the foundations for your professional and personal success, community engagement and global citizenship, and lifelong learning and reflection.

In the College you will find myriad courses and programs in the arts and humanities, the natural sciences and mathematics, the social and behavioral sciences, and interdisciplinary studies, along with expert and caring faculty, all of which will help you pursue your interests and educational objectives. In order to help you make the most of your time here, let me offer the following advice and encouragement.

First, **discover and follow your passions**. Fairfield’s curriculum offers you an opportunity to experiment and find out what excites you, what calls to you. Have confidence that if you follow your passions, you will be well prepared for whatever career you choose. However your professional journey unfolds and whatever life choices you make, you will find that you need preparation in many disciplines to solve any problem or reach any goal. Your future will require that you encounter, appreciate, and develop the ability to utilize vastly diverse perspectives and modes of inquiry, and that you can “go global” with your interests, abilities, and aspirations.

Second, **take responsibility for getting what you want from your college experience**. Fairfield University offers a top-quality education and many advantages derived from our beautiful campus, ideal geographical location, and impressive faculty, students, and alumni network. But none of these benefits will come knocking on your door—all require you to be curious and active. Get to know your classmates and professors. Take advantage of peer and faculty advising and mentoring. Get involved with residential learning communities. Seek answers to your questions and support for your needs. Encouragement, assistance, and collaboration await.

Third, **engage with opportunities outside of the classroom**. Internships, research with faculty, community service opportunities, and studying abroad are all occasions to cultivate awareness of the world beyond the classroom, to encounter diverse life experiences, to develop leadership skills, and to connect your formal academic study to other contexts. Your education is not bound by the walls and gates of campus or by the clock marking the beginning and end of class. And as you discover the world beyond our campus, I hope you will learn to be guided as much by your compassion for and responsibility to others as you are by your own passions.

Finally, **HAVE FUN!** These are sure to be four of the best years of your life. Four years may seem like a long time, but as the seniors will attest, the years go by very quickly. So don’t delay! This is a chance like no other.

I look forward to sharing your journey with you,

Robbin D. Crabtree, Ph.D.
Dean, College of Arts and Sciences
The oldest and largest of Fairfield's six schools, the College of Arts and Sciences offers a bachelor of arts and a bachelor of science degree, as well as master's degrees in American studies, communication, creative writing, and mathematics. In recent years, the College has won numerous grants to support new and continuing programs. A few examples are bringing geographic information systems technology to area high school classrooms, broadening access to science education, enhancing the core science curriculum, adding critical languages, enhancing diversity at the University, and promoting family literacy. Numerous grants to support specific faculty research were awarded in areas across the sciences and humanities. Students in the College have garnered prestigious scholarships or Fulbright fellowships to study in Australia, China, El Salvador, France, Russia, South Korea, and Morocco, among other locations.

Students are encouraged to select a major by the end of their freshman year (essential in sciences). Undecided students may wish to consult with the Dean of Freshmen, a faculty advisor, professors, or a career counselor to help them choose a program of study. Selecting a major is not an irrevocable decision; the academic program at Fairfield is flexible enough that students can change to another field if they’re not happy with their first choice.

Within each major field of study, courses range from introductory to highly specialized, and there are opportunities for independent study and research. Students may also opt, with faculty advice and agreement, to design their own major. Double-majors and minors can also be arranged for students who want to combine the skills and perspectives of two disciplines.

**Degrees Offered**

**Bachelor of Arts**

The bachelor of arts is a liberal arts degree with emphasis in the arts, humanities, or social sciences. Major concentrations in the B.A. degree program include American studies, communication, economics, English, history, international studies, modern languages and literatures (French, German, Spanish), philosophy, politics, psychology, religious studies, sociology/anthropology, and visual and performing arts.

Students who have studied Latin in high school and who wish to continue their classical studies through two years of college may earn a bachelor of arts with classics degree, even though they do not intend a classics major.

**Bachelor of Science**

The bachelor of science is a liberal arts degree with an emphasis in the sciences. Major concentrations in the B.S. degree program include biology, chemistry, computer science, economics, engineering, mathematics, physics, and psychology. In addition to the traditional major concentrations, the College of Arts and Sciences offers specialized programs and academic services. A partial list follows:

**Health Professions Preparation Program (HP3):**
Fairfield offers a challenging, competitive, and highly successful pre-medical/pre-dental/pre-health professional program. Students in this program pursue studies in a field or major of their personal interest while taking those courses necessary for admission to medical, osteopathic, dental, optometry, podiatry, physical and occupational therapy, and veterinary school.

All students who are considering the health professions as a career should identify themselves and meet with the Health Professions Advisor as early as possible. A great deal of careful planning must be done in order to prepare a strong application for advanced study.

Students who apply to health professions schools need to have a core knowledge of science. This core can be taken within a science major or added to a non-science major. Many pre-medical students elect to pursue a degree in biology that provides well beyond the minimum requirements recommended by the Association of American Medical Colleges for admission to medical school. However, students should also recognize that other majors – in the natural sciences and in non-science fields – are acceptable alternatives as long as the major is supplemented by a combination of courses that represent preparation for medical, dental, and allied health schools. The best preparation for medicine and a number of other health professions usually includes early completion of the following basic course sequences: Mathematics 121-122; Biology 170-171; Chemistry 11-12 and 211-212; and Physics 15-16. The choice and sequence of courses depend on the student’s personal and academic priorities; these should be discussed with the Health Professions Advisor and other academic advisors.

Internship opportunities are of special interest to students preparing for careers in medicine. Options available to Fairfield students include the Emergency Medicine Research Associates Program at St. Vincent’s Medical Center in Bridgeport and a wide variety of local, national, and international opportunities.
Pre-Law Program: Fairfield’s pre-law program has been consistently successful during the past decade. No particular major is recommended for law school candidates. Pre-law students should elect courses that examine the social, economic, and political systems of which the law is a part. They should also select courses that help them develop competencies to write clearly, speak precisely, reason logically, think critically, and read analytically. Finally, students may wish to pursue coursework that examines the law from the perspective of disciplines such as philosophy, psychology, and business. The program is closely supervised by faculty who serve as special advisors to pre-law students.

Education: Students who plan to teach in secondary schools will major in the discipline that they plan to teach and take the required education courses to qualify for certification as high school teachers.

Interdisciplinary Programs: The Fairfield curriculum includes a number of majors and minors that are interdisciplinary in nature. Such programs permit students to combine coursework from more than one academic department, thereby examining a broad subject from a multiplicity of disciplinary perspectives. There are two interdisciplinary majors currently available to students in the College of Arts and Sciences:

- American Studies
- International Studies

In addition, the College offers the following interdisciplinary minors:

- American Studies
- Applied Ethics
- Asian Studies
- Biochemistry
- Black Studies
- Catholic Studies
- Classical Studies
- Education
- Environmental Studies
- International Studies
- Irish Studies
- Italian Studies
- Judaic Studies
- Latin American and Caribbean Studies
- Peace and Justice Studies
- Russian and East European Studies
- Women’s Studies

Internships: Internships provide the opportunity for practical experience in a career field related to a student’s major. Most departments of the College of Arts and Sciences offer credit for internships in appropriate agencies and business firms. Majors who wish to take advantage of these opportunities should consult their department chair or internship coordinator.

Minors: In addition to the major, a number of departments and interdisciplinary programs in the college offer optional minor concentrations. These concentrations are developed under faculty supervision within the context of departmental requirements and offerings.

For further information, contact the department chair or program director. (The interdisciplinary minors have been listed above.)

Honors Program: The College of Arts and Sciences participates in the University Honors Program. The program admits students, at the beginning of their first and second years, to a challenging series of seminars and courses (normally 23 credits), devoted to intellectual history, interdisciplinary studies, and advanced work in the student’s major field. Successful completion of the Honors Program is recorded on the graduating student’s transcript.
American Studies

Departmental Requirements and Options
Each department or program in the College of Arts and Sciences has specific academic requirements and options for earning a degree in its academic field. Those requirements and options are found in the departmental and program sections that are presented in alphabetical order on subsequent pages of this catalog.

White (English)

The American Studies Program provides students with an interdisciplinary curriculum devoted to the examination of American civilization – its culture, institutions, intellectual tradition, and the relationships of its people – making possible a unified, comprehensive approach to American life and thought. Besides the topical unity implicit in this course of study, students discover the methodological differences that characterize the traditional scholarly disciplines as they deal with the infinite complexities of the American experience.

Requirements
For a 30-credit major in American studies, students complete the following:

1. twelve credits in a discipline concentration in fine arts, history, literature, politics, or sociology;
2. twelve credits selected from American-oriented courses in at least three disciplines that differ from the chosen discipline concentration;
3. three credits in a research/theme course taken during senior year; and
4. three credits in AS 201, The American Intellectual Tradition, taken during junior year

For a 15-credit minor in American studies, students complete the following:

1. AS 201 The American Intellectual Tradition (three credits);
2. three American studies elective courses in one of the following disciplines: American literature, history, politics, sociology and anthropology, or visual and performing arts (nine credits); and
3. one American studies elective course outside the concentration (three credits).
Fairfield University also offers a master of arts degree in American Studies. The 400-level core and elective courses in that program are available to qualified senior undergraduate American studies majors and minors with the approval of the program director.

Courses Available for the American Studies Major

**American Studies**

AS 127  America in Film
AS 389  Literature and Religion: The American Experience
AS 201  The American Intellectual Tradition
AS 300  Independent Research Project
AS 327  The Irish in American Film
AS 361  The American Civil War: Myth and Reality
AS 383  America in the 1930s: A Decade of Change

**History**

HI 232  Jefferson’s America: 1760 to 1850
HI 237  The American Prophetic Tradition, 1607-2004

PO 150  Urban Politics
PO 151  Politics of the immigrant: The Irish Catholic and the East European Jewish Communities

Inventing Themselves: African-American Women in U.S. History
HI 264  African-American History, 1865 to Present
HI 273  History and Culture of Central and Eastern Europe since 1945
HI 331  Era of the American Revolution, 1763 to 1800
HI 340  Reconsidering the New Deal Order, 1930 to 1980
HI 342  Immigration, Ethnicity, and Race in U.S. History
HI 348  Social Movements in 20th-Century U.S. History
HI 356  History of the Cold War
HI 362  The Frontier: Man, Nature, and the American Land
Course Descriptions

AS 127  America in Film
This course provides a critical examination of important American films with the intention of exploring the impact of film as a mythmaking medium. Topics include history in film, sexual role-playing, social class and institutions, and the religio-ethical assumptions implicit in American films. Three credits.

AS 389  Literature and Religion: The American Experience
This course surveys the relationship of literature to religion in the history of American letters. Beginning with the moral didacticism of early Puritan literature, American writers have manifested a persistent concern with religio-ethical matters as well as with the impact of religious institutions in shaping our social and cultural environment. Using literary texts by major American writers, the course evaluates the critical perspective and relevance of the imaginative writer’s treatment of religious questions. Three credits.

AS 201  The American Intellectual Tradition
A seminar on major ideas and themes that have helped shape American life, this course makes a conscious effort to demonstrate the interaction between intellectual, social, and cultural dynamics in the formation of America. Three credits.

AS 300  Independent Research Project
During senior year, each American studies major writes a research paper under the supervision of several participating faculty members. Students integrate different intellectual disciplines in the design and execution of their projects. Three credits.

AS 327  The Irish in American Film
Using a historical perspective, this interdisciplinary course examines how the Irish experience has been depicted in American film. The intention of this course is to heighten an appreciation for the myth-making power of film in developing a historical consciousness and creating racial/cultural stereotypes. Topics include the Irish diaspora, the Irish independence movement, Anglo-Irish relations, the IRA, the Irish assimilation into mainstream America, Irish legends in film, and the myth of the Old Country. Three credits.

AS 361  The American Civil War: Myth and Reality
This course exposes students to an interdisciplinary method of learning. While using standard historical texts to establish the facts regarding the American Civil War, this course explores the sometimes confusing and contradictory versions of the Civil War as depicted in literature, photography, feature films, documentary films, music, painting, and other modes of expression. Three credits.

Note: Departmental course descriptions may be found in the appropriate departmental sections of this catalog.
AS 383  America in the 1930s:
Decade of Change

The Great Depression represents the catalytic agent in America's extraordinary transformation in the 1930s, a decade during which the changes in the economic and political sectors provided the matter for American cultural life. This course acquaints students with the complexities of this pivotal period in American life through feature films and documentaries, popular and serious fiction, the American theatre of the time, popular music, public and private art, and mass circulation and little magazines, while introducing them to an interdisciplinary methodology. Three credits.

Anthropology
(see Sociology and Anthropology)

Art History
(see Visual and Performing Arts)

Established in 1980 by a grant from the National Endowment for the Humanities, the Program in Applied Ethics is an interschool program reporting to the Academic Vice President. It operates in close coordination with the deans of the College of Arts and Sciences, the Charles F. Dolan School of Business, the School of Nursing, the School of Engineering, and University College.

The Program integrates interdisciplinary courses, seminars, lectures, colloquia, and workshops in the fields of professional ethics (business, healthcare, science, law, engineering, education, and communication), ethics for the citizen (government, community, environmental concerns, war and peace), and global studies (ethical dimensions of global violence, global health, environmental policies, business practices, and humanitarian action). This unified approach to the theory and practice of ethical conduct in all fields raises student awareness of the moral dilemmas of their chosen fields of practice, of allied fields, and of society and the world. The Program offers a series of core-level and elective courses and seminars in service to various academic and professional programs, and a 15-credit minor.

The Patrick J. Waide Jr. Fund
In 2002, Patrick J. Waide Jr., a former University trustee and distinguished alumnus of Fairfield University (class
AE 262 Ethics and the Community

The course surveys the philosophical grounding of the organizations in contemporary society, examining structured human groups from the household, through the village (or religious/ethnic association), to the nation-state to understand their moral undertakings in their environment; to consider how they implement and balance rights and duties, rules and compassion, autonomy and common purposes. This course gives special attention to structural injustice in the treatment of those marginalized by gender, race, or socioeconomic deficit, and includes an effort to determine where new understanding may yield suggestions for structural modification. Students are provided the opportunity to research and present projects on contemporary social problems that illustrate the themes of the course. This course meets the U.S. Diversity requirement.

(Prerequisite: one course in philosophy or religious studies) Three credits.

AE 265 Ethics in Education

This survey of the ethical issues that arise in the classroom, school, and school district also covers those issues, to a lesser extent, in the educational policies of the state and federal government. The course directly addresses issues of race, class, and gender in the educational system, addressing entitlement to education, access to education, discipline in the educational setting, multicultural issues in general, politics, accountability, assessment, and the ethics of respect as they pertain to teachers, students, and administrators. This course meets the U.S. diversity requirement. (Prerequisite: one course in philosophy or religious studies) Three credits.

Course Descriptions

(GS indicates Global Studies Curriculum)

AE 262 Ethics and the Community

The course surveys the philosophical grounding of the organizations in contemporary society, examining structured human groups from the household, through the village (or religious/ethnic association), to the nation-state to understand their moral undertakings in their environment; to consider how they implement and balance rights and duties, rules and compassion, autonomy and common purposes. This course gives special attention to structural injustice in the treatment of those marginalized by gender, race, or socioeconomic deficit, and includes an effort to determine where new understanding may yield suggestions for structural modification. Students are provided the opportunity to research and present projects on contemporary social problems that illustrate the themes of the course. This course meets the U.S. Diversity requirement.

(Prerequisite: one course in philosophy or religious studies) Three credits.

AE 265 Ethics in Education

This survey of the ethical issues that arise in the classroom, school, and school district also covers those issues, to a lesser extent, in the educational policies of the state and federal government. The course directly addresses issues of race, class, and gender in the educational system, addressing entitlement to education, access to education, discipline in the educational setting, multicultural issues in general, politics, accountability, assessment, and the ethics of respect as they pertain to teachers, students, and administrators. This course meets the U.S. diversity requirement. (Prerequisite: one course in philosophy or religious studies) Three credits.
AE 270 Ethical Dimensions of Global Violence (GS)
A survey of the ethical implications of the new and alarming potentials for violence in a disorderly world. The new faces of violence – insurgency, terrorism inspired by religion, plans for mass destruction, children as warriors – will be examined in the context of Just War theory, the Christian commitment to social justice, and the emerging international order (and disorder). Fully half the course will explore the perspectives of the developing world, especially as violence occurs between factions from the developing world and the traditional wielders of force in the North and West. This course meets the world diversity requirement. (Prerequisite: one course in Philosophy or one course in Religious Studies) Three credits.

AE 271 The Sacred Balance
This course examines contemporary perspectives and diverse cultural worldviews demonstrating a reciprocal relationship between humanity and the natural world. This approach analyzes the ways established and new fields in the sciences can reunite knowledge of the world with a sense of the sacred. Extending into the realm of meaning and value, scientific as well as spiritual perspectives jointly address the ecological challenges confronting contemporary society and the evolution of human consciousness. (Prerequisite: one course in philosophy or religious studies) Three credits.

AE 275 Global Environmental Policy (GS)
A survey of environmental issues on the global scale, exploring ethical and economic dilemmas of liberty and law, justice and welfare, conflicts of cultures, race, and gender, as they arise in the increasing interaction of developed and developing nations. The course focuses on the role of science – with special reference to scientific uncertainty – in the articulation of issues like global warming, the depletion of the ozone layer, and species extinction. The ethical dilemmas and environmental implications of the work of multinational corporations are examined through case studies and group discussion; term projects focus on selected areas and industries. This course meets the world diversity requirement. (Prerequisite: one course in philosophy or religious studies) Three credits.

AE 276 Ethical Dimensions of Global Business Practices (GS)
A survey of the ethical dimensions of contemporary business practice generally, with special emphasis on the ethical implications of global business enterprise. Topics include global employment practices, human and employee rights in a global economy, the implications of external debt for the economies of developing nations, the human costs and benefits of the changes in global agriculture and food provision generally, and the work of international agencies (the World Trade Organization, the International Monetary Fund, and the World Bank in particular) in guiding the economies of the world. This course meets the world diversity requirement. (Prerequisite: one course in philosophy or religious studies) Three credits.

AE 281 Ethics of Communications
This course examines the moral dilemmas of media management, political propaganda, campaign promotions, public relations, and corporate communication. Topics include advertising and marketing practices, especially political advocacy and messages targeted to various audiences; truth and loyalty in public relations practices; the philosophical and constitutional bases of freedom of the press; and problems of media bias, systematic and otherwise. (Prerequisite: one course in philosophy or religious studies) Three credits.

AE 282 Ethics and Computers
This course examines the legal and ethical dilemmas spawned by the proliferation of Internet-based technologies in an increasingly complex society. Topics include the philosophical foundations of the right of privacy; the centralization of power; the impact on employment, computer crime, patents, property, and liability; the tremendous power of instantaneous Internet communications to influence world events; and the possibilities and implications of artificial intelligence. Central consideration is given to the digital divide: the potential for global injustice in global discords between rich and poor societies in access to the Internet and other advanced technology. (Prerequisite: one course in philosophy or religious studies) Three credits.

AE 283 Environmental Justice
This course offers a comprehensive study of the political impact of our global environmental crisis examined through the lens of the relationship of self to society. We study current scientific, religious, economic, and political perspectives that impact our ecological reality globally, including health, trade, population, and waste issues. Working in self-selected groups, students have the opportunity to report on alternative models and activists’ movements aimed at creating a global sustainable future. (Prerequisite: one course in philosophy or religious studies) Three credits.
AE 284  Environmental Ethics
Students examine the environmental problems that arise in our attempts to reconcile the demands of human fulfillment and economic activity, and the requirements of ecological balance. Issues include the diverse perspectives of conservation, preservation, and deep ecology. Student projects cover the wise use of resources; pollution of land, air, and water; conservation of species and open space; global climatic change; and the future stewardship of oceans, forests, and the atmosphere. (Prerequisite: one course in philosophy or religious studies) Three credits.

AE 285  Ethics of Healthcare
This course considers the moral dilemmas of the healthcare setting. Topics include patients’ rights (medical paternalism and patient autonomy, informed consent to therapy, and participation in research); dilemmas of reproduction (technological assistance, abortion, cloning); dilemmas of life and death (assisted suicide, euthanasia, technological interventions for the dying); allocation of healthcare resources; and the special dilemmas of healthcare professionals caught in binds between HMO contracts and professional obligations. (Prerequisite: one course in philosophy or religious studies) Three credits.

AE 286  Ethics of Research and Technology
This course explores the moral dilemmas that attend the search for an application of scientific knowledge. Topics include the methods of science and their limits (e.g., in research with human subjects); scientific fraud, its dimensions and prevention; and the effects of rapidly expanding fields of technology on medicine and industry. (Prerequisite: one course in philosophy or religious studies) Three credits.

AE 287  Engineering Ethics
This course systematically explores the ethical dimensions of situations and tasks common to engineering practice. Issues include professionalism, codes of ethics, consumer risk and safety, employee loyalty and whistle-blowing, research and ownership of information, and the engineer’s responsibility to the natural environment. (Prerequisite: one course in philosophy or religious studies) Three credits.

AE 288  Ethical Dimensions of Global Humanitarian Policy (GS)
This course surveys the ethical dilemmas that arise in the context of global need and global opportunity, specifically the needs of physical, psychological, and spiritual sustenance and support created in the developing world by many kinds of violence, exploitation, and environmental crises, and the opportunities perceived in the developed world to provide assistance through international, governmental, and non-governmental avenues. Topics include the ethical analyses of emerging crises and assessments of needs; the typical structures of assistance, public and private, and the consequences (intended or otherwise) of deploying them; and the dilemmas of seeking and assessing help from donors of uncertain motives and histories. This course meets the world diversity requirement. (Prerequisite: one course in philosophy or religious studies) Three credits.

AE 289  Global Health Care Policy (GS)
This survey of issues of public health on a global scale explores the ethical and economic dilemmas of environmental degradation, national sovereignty, individual liberty, and human happiness and productivity as they arise in the increasing interaction of developed and developing nations. The course studies conditions prevalent in developing nations – poverty, hunger, the absence of physical and social infrastructure, and uneven education, as well as the role of gender and race discrimination – and examines ethical dilemmas confronted in the efforts to deal with health conditions in the developing nations, through case studies and group discussion; term projects focus on selected regions and health conditions. This course meets the world diversity requirement. (Prerequisite: one course in philosophy or religious studies) Three credits.

AE 290  Ethics in America: The Telecourse
This course is a survey of practical ethics, in which televised discussions of selected topics in applied ethics (ethics in government, ethics in the military, medical ethics, business ethics, etc.) illustrate the basic concepts of the Western tradition in ethical reasoning (autonomy, justice, privacy, community, etc.). The discussions feature influential public figures in each field; readings include important writings in the history of ethics. Format: lecture/discussion with in-class video presentations.

Note: Occasional sections of this course are offered online through University College. (Prerequisite: one course in philosophy or religious studies) Three credits.

AE 291  Business Ethics
This course investigates ethical problems in business practice. Topics include the foundation of the free-market system, personal morality in profit-oriented enterprises; codes of ethics, obligations to employees and other stakeholders; truth in advertising, whistle-blowing, and company loyalty; self and government regulation; the logic and future of capitalism; and the changing responsibilities of the manager in a rapidly globalizing business environment. Note: Occasional sections of this course are offered online through University College. (Prerequisite: one course in philosophy or religious studies) Three credits.

AE 293  Ethics of War and Peace
This is a survey of issues relating to war and international conflict. Topics include Just War theory, human rights issues, the impact of war on women, the role of the United Nations Security Council, and the history of global attempts to proscribe and prevent aggression. The course also looks at related issues that have emerged in recent years, such as humanitarian intervention and economic sanctions. (Prerequisite: one course in philosophy or religious studies) Three credits.
AE 294  Ethics of Media and Politics
This course explores the ethical dimensions of the complex relationship between the media and the political process. The media is the only industry protected by the Bill of Rights, and for good reason: it is critical for a democracy to have well-informed citizens. The course looks at the responsibility of the media, and the difficulties of fulfillment in a capitalist society. Who needs to be informed? What is the role of the government in providing information? Students learn ethics from informed discussions, study, and writing on the cases presented. (Prerequisite: one course in philosophy or religious studies) Three credits.

AE 295  Ethics in Law and Society
This course examines the ethical dilemmas of making, enforcing, adjudicating, obeying, and practicing the law. Topics include the nature of law and the province of jurisprudence, freedom and order, legal and moral responsibility, conscientious objection, the structure of rights in the first 10 amendments to the Constitution, capital punishment, and the limits of adjudication, with special attention given to issues of inequality in the application of law, especially as they affect minorities and women. (Prerequisite: one course in philosophy or religious studies) Three credits.

AE 296  Ethics in Government
This course examines the moral dilemmas pertaining to governing and being governed. Topics include the ethical dimensions of making public policy; civil rights and civil liberties; the “establishment of justice” with regard to minorities, women, immigrants, and those politically at risk; corruption in government; war, peace, revolution, and the moral principles that govern them; terrorism and the defense against terrorism; preservation of the environment; and the nature and limits of representative government. (Prerequisite: one course in philosophy or religious studies) Three credits.

AE 297  Eco-feminism
This course explores the historically strong association between women and nature, in which the image of Mother Earth is central, and critiques the power-domination assumption of our culture shown in the exploitation of women and of the earth. Students examine religious, psychological, social, historical, and scientific manifestations of this assumption, along with alternative models of power and responsibility. (Prerequisite: one course in philosophy or religious studies) Three credits.

AE 298  Ethics and Feminist Perspectives
This course offers a philosophical inquiry into the implications of traditional ethical theory and social institutions from perspectives developed in contemporary feminist literature. Examined through the lens of race, class, and gender, specific areas include family, health, work, and media issues. The course explores the psychological and ethical dimensions of social and family oppression, environmental racism, medical paternalism, economic imperialism, and patriarchal structures in the major religious traditions. (Prerequisite: one course in philosophy or religious studies) Three credits.

AE 299  Special Topics in Applied Ethics
The course is an opportunity for the student to carry out a major project in Applied Ethics involving work in the community, derived from a previous AE course. Three credits.

AE/EV/LAC 384/384/384  Seminar on the Environment: Environmental Issues in Latin America and the Caribbean
This seminar examines environmental, ethical, and socio-economic issues of Latin America and the Caribbean. It integrates the hard sciences (biology, chemistry, physics, and physical geography), the social sciences (sociology, politics, economics, and business), and the humanities (history, ethics, theology, and literature). The capstone experience provides students with an overview of multiple perspectives on the environment of Latin America and the Caribbean with a focus on some specific countries and issues. Students conduct independent research projects that demonstrate their mastery of at least one component of each disciplinary group. This seminar counts for the capstone requirement for the minor in Applied Ethics, the minor in Environmental Studies, and the minor in Latin American and Caribbean Studies. This course meets the world diversity requirement. (Prerequisites: two courses in philosophy or religious studies) Three credits.

AE/BU 391/391  Seminar in Business Law, Regulation, and Ethics
This seminar investigates ethical dilemmas of business management, primarily as encountered in real cases. Themes vary from year to year. Format: guest presentations by members of the business community, followed by discussion. (Prerequisites: two courses in philosophy or religious studies) Three credits.
AE 393  Seminar in War, Peace, and Public Policy  
This seminar examines the philosophical, political, and religious aspects of war and peace. Topics include the origin and development of just war theory, the pacifist tradition, and military preparedness. The course focuses on the increased complexity of these issues in the 20th century and especially in the nuclear age. Format: discussion. Note: This course is offered online through University College. (Prerequisites: two courses in philosophy or religious studies) Three credits.

AE 395  Seminar in Legal Ethics  
This seminar examines the peculiar ethical dilemmas confronting lawyers: confidentiality, protection of the guilty, roles in public policy, conflict of interest, and, in general, responsibility for the functioning of the adversary system. Format: discussion. (Prerequisites: two courses in philosophy or religious studies) Three credits.

AE 396  Seminar in Ethics and Government  
This seminar examines the dilemmas of lawmaking and governing: principles, tradeoffs, and compromises; dirty hands and the relationship between government and the individual; international politics; presidential secrecy; covert action; and political trust. Format: discussion. (Prerequisites: two courses in philosophy or religious studies) Three credits.

AE 397  Seminar in Bioethics I: Ethical Issues in Health Care Practice  
This seminar presents an intensive study of select problems in the ethics of medicine and healthcare practice, including abortion; euthanasia; prenatal diagnosis; reproductive engineering and surrogate motherhood; and treatment decisions for very ill newborns. Format: student and guest presentations. This course meets the U.S. diversity requirement. (Prerequisites: two courses in philosophy or religious studies) Three credits.

AE 398  Seminar in Bioethics II: Ethical Issues in Biomedical Research and Resource Allocation  
This seminar offers an intensive study of select problems in the ethics, law, and public policy surrounding healthcare, especially in the United States. Topics include research with human subjects, the professional/patient relationship, allocation of scarce resources, and cost containment. Format: student and guest presentations. (Prerequisites: two courses in philosophy or religious studies) Three credits.

AE 399  Special Topics in Applied Ethics  
Students undertake an advanced program of course, field, and library work arranged with the instructor. Proposals for special topics must be approved by the director and the dean of the student's school. Ordinarily three credits, although special arrangements are possible.
The Asian Studies program focuses on a region that is home to fully half of humanity, the world’s most populous democracy, and one of the fastest growing economies in the world. The importance of Asia in global, political, and economic systems – and particularly its growing impact on the United States – demands a firm understanding of the history, cultures, politics, religions, and economics of Asian countries. Everyone, regardless of major or profession, will be affected by past, present, and future events and developments in Asia.

Combined with a major in a regular discipline, the Asian studies minor prepares the student for a career in international business or banking, journalism, teaching, the United States government, or in international organizations, or for further studies in graduate or professional school.

Requirements
For an 18-credit minor in Asian studies, students complete the following:

1. AN 310 Asian Studies Seminar during the junior or senior year. AN 301 Independent Study may be substituted if the seminar is not offered or if program faculty approve a student proposal for independent study in lieu of the seminar.

2. One course in English, Philosophy, Religious Studies, or Visual and Performing Arts, and one course in Economics, History, or Politics from the course offerings listed on this page.

3. Any three other courses from those listed below. Up to six of these credits (two semesters) may be earned during a one-year course of the study in an Asian language.

4. Study abroad in Asia is not required for this minor, but is strongly recommended. Some courses taken abroad may be counted toward the minor.

Course Offerings

Asian Studies
AN 150 Modern China through Fiction and Film
AN 151 New Chinese Cinema
AN 301 Independent Study
AN 310 Asian Studies Seminar
### Course Descriptions

**AN 150 Modern China through Fiction and Film**
A study of various cultural aspects of modern China in the 20th century through reading translated fiction as well as films. Students explore topics such as modernity, nationalism, individualism, gender, and cultural identity in the modern cultural-historical context. Also will be discussed are issues particular to fiction and film as representational modes: How do fiction and film narrate history and the complex Chinese experience? How have they both been shaped by and contributed to the socio-cultural transformations? And how do they represent the increasingly diversified cultural and social landscape of contemporary China? *This course meets the world diversity requirement.* Three credits.

**AN 151 New Chinese Cinema**
The course examines the films of major directors contributing to the rise of “New Chinese Cinema” in mainland China, Taiwan and Hong Kong since the mid-1980s. Emphasis is on individual directors’ distinctive aesthetics and philosophy in the specific cultural-historical context of film production and reception. Students will study how these films represent history and memory, the relationship between individual and society, woman and gender, and how such films participate in the cultural imagination of China and Chineseness in the global context. The goal will be development of a basic film-critical vocabulary. All films have subtitles, and readings are in English. *This course meets the world diversity requirement.* Three credits.

**AN 301 Independent Study**
Students undertake an individualized program of study in consultation with a director from the Asian studies faculty. Three credits.

**AN 310 Asian Studies Seminar**
This seminar, which is primarily concerned with theoretical and historical issues, examines selected topics concerning Asian cultures, with a focus on the 19th and 20th centuries along the Asian Pacific Rim. The seminar concentrates on a specific topic within the arts and sciences; enrollment is by permission of the professor. Three credits.

Biology Department Web page:
www.fairfield.edu/biology

Requirements

For a 131-credit to 143-credit major in biology, students complete the following:

**Year One**
- BI 170-171 General Biology I and II 8 credits
- CH 11-12 General Inorganic Chemistry I and II 8 credits
- MA121-122 Applied Calculus I and II 6 credits
- Core curriculum courses 12 credits
- Subtotal: 34 credits

**Year Two**
- BI 172 General Biology III 4 credits
- CH 211 Organic Chemistry I 5 credits
- CH 212 Organic Chemistry II 5 credits
- PS 15-16 General Physics I and II* 8 credits
- Biology block elective (see below) 3-4 credits
- Core curriculum courses 12 credits
- Subtotal: 37 to 38 credits

**Year Three**
- Biology block elective (see below) 6 to 8 credits
- Biology electives*** 6 to 8 credits
- General electives 6 to 8 credits
- Core curriculum courses 12 credits
- Subtotal: 30 to 36 credits

**Year Four**
- Biology electives*** 3 to 4 credits
- Biology capstone elective 3 credits
- General electives 12 to 16 credits
- Core curriculum courses 12 credits
- Subtotal: 30 to 35 credits

*Physics may be taken in second or third year.

**The sequence for biology block electives, biology electives, and capstone elective shown here are only suggestions. You may arrange them differently.

***Various upper-level courses may be double-counted toward the departmental concentration in molecular biology or the interdisciplinary minor in marine science.

The biology major prepares students for future professional work in the life and health sciences or advanced education in numerous specializations.
Biology Block Electives and Additional Requirements

During the sophomore (second semester) through senior years of the degree, a minimum of six biology courses and a capstone experience (described below) are required. To ensure breadth of exposure, at least one course must be taken from each of the following three blocks. The three remaining biology course electives may be any 200- or 300-level courses from the blocks listed below. Four of the six courses taken during the sophomore (second semester) through senior years must include a laboratory component.

Molecular, Cell, and Developmental Biology Block (10 courses)
- BI 261 Genetics
- BI 327 Cell Biology
- BI 342 Developmental Biology
- BI 352 Fundamentals of Microbiology
- BI 354 Molecular Biology
- BI 356 Immunology
- BI 357 General Virology
- BI 358 Recombinant DNA Technology
- BI 385 Molecular Mechanisms of Human Disease Seminar
- BI 386 Bacterial Pathogenesis Seminar

Ecology, Evolution, and Environmental Science Block (11 courses)
- BI 321 Animal Behavior
- BI 362 Marine Invertebrate Zoology
- BI 364 Freshwater Ecology
- BI 365 Evolutionary Biology
- BI 366 Ornithology
- BI 368 Plant Biology: Evolution, Diversity, and Environment
- BI 370 Environmental Health and Safety
- BI 375 Biochemical Ecology
- BI 382 Principles of Aquaculture Seminar/Lab
- BI 383 Coral Reef Ecology Seminar
- BI 388 Ecology of the North Atlantic Coast

Physiology and Morphology Block* (8 courses)
- BI 213 Endocrinology
- BI 217 Nutrition and Metabolism
- BI 312 Human Physiology
- BI 313 Comparative Physiology
- BI 326 Biochemistry
- BI 331 Histology
- BI 340 Parasitology
- BI 369 Plant Biology: Morphology, Biochemistry, and Physiology

* BI 107 and BI 108 may be taken by students pursuing allied health programs, where this course is required. Taking both semesters will count as one block 3 upper-level elective with lab. Permission of the department chair is required. See NOTE under course description.

The choice of block electives, advanced biology electives, and general electives inside or outside the department varies according to a student's career objective and interest. Students make their choices after consultation with appropriate department advisors. Students interested in molecular biology may, for example, take advanced courses to fulfill a concentration in molecular biology.

Students interested in biochemistry or marine science may opt for courses that fulfill requirements for these minors. Students interested in graduate, medical, dental, or allied health schools may select electives that meet the requirements for admission to graduate or professional schools. Students interested in science writing or teaching in biology may choose to earn minors in English or education.

Faculty research specializations provide opportunities for qualified students to participate in laboratory research or library investigations in their chosen interest areas under a professor's guidance. Internships at off-campus institutions can also be arranged for qualified students. These opportunities expand and enhance the biology program's numerous possibilities for individualization.

The Capstone Experience

During their capstone experience, students connect the diverse experience and knowledge they acquire as biology majors, focusing these newly acquired skills on a specific problem or current area of biological research. At the heart of a capstone experience is the idea that learning requires participation — in the field, in the lab, through an internship, or in an upper-level seminar course — where biology majors are exposed to the way that science is conducted. As a result, capstone experiences are academically challenging and require biology students to think critically and creatively.

To satisfy the capstone requirement, students may choose from the following options:
- Work with a faculty member on a research project (BI 395, or BI 396);
- Arrange an internship (BI 397, or BI 398); or
- Enroll in an upper-level seminar course (BI 382, BI 383, BI 385, BI 386, or BI 388).

To maximize its value, the capstone experience is normally completed during the senior year. Students intending to continue their studies in graduate school should consider participating in two or more terms of research. All on-campus capstone experiences require prior approval from a student's faculty mentor or advisor. Off-campus capstone experiences require an on-campus faculty mentor and approval from the department chair. Prior consultation is required to assure that the particular activity is acceptable and earns credit for the capstone experience.
Course Descriptions

BI 15  General Biology I
This course, an introductory study of biology for the non-science major, familiarizes students with the general biological principles that govern the activities of all living systems. Concepts include the biochemical origin of life, cellular morphology and physiology, and human genetics. **Note:** This course counts as a science core course but does not satisfy requirements for the biology major or minor. Three lectures. Three credits.

BI 16  General Biology II
Students examine biological systems, such as the human organism, in detail, with an emphasis on pathophysiology, diversity of life, and evolution. Emphasis varies by instructor. **Note:** Counts as a science core course but does not satisfy requirements for the biology major or minor. Three lectures. Three credits.

BI 18  Human Biology: Form and Function
This course, which provides a basic introduction to human anatomy and physiology, examines the major organ systems of the body, focusing on how each system functions and how all systems interact with one another. Using comparative methods, students gain an appreciation for the evolutionary origins of human form, examine how design problems (such as sharing a tube for breathing and eating) were overcome, discuss current issues in public health, and focus on the environmental health problems that human populations face. **Note:** This course counts as a science core course but does not satisfy requirements for the biology major or minor. Formerly listed as BI 33. Three lectures. Three credits.

BI 70  Science, Technology, and Society
This course analyzes the major science and technology issues that confront today’s society. Through an examination of the underlying science, students gain an understanding of the impact these issues hold for the environment, our natural resources, and our society, including benefit versus hazard expectations. Course issues, which change to incorporate timely topics, include acid rain; agriculture; diseases such as AIDS, cancer, and heart disease; energy; genetic engineering; the greenhouse effect; ozone depletion; and water pollution. **Note:** This course counts as a science core course but does not satisfy requirements for the biology major or minor. Three lectures. Three credits.

BI 71  Identity and the Human Genome
This course introduces scientific and social aspects of human genetics to the non-science major. Topics of discussion include the structure and function of genes, human genetic diversity, Mendelian inheritance, and the ethical and legal issues related to emerging genetic technologies. This course counts as a science core but does not satisfy requirements for the biology major or minor. Three lectures. Three credits.
BI 75  **Ecology and Society**  
This course focuses on environmental issues raised by modern society’s conflicting needs for land, water, a livable environment, and renewable/nonrenewable resources. Students examine the available scientific evidence and are encouraged to draw their own conclusions about these environmentally sensitive issues, which are presented in lectures, readings, films, and occasional off-campus field trips (by arrangement). This course is open to all except biology majors. **Note:** While this course counts as a science core course, it does not satisfy requirements for the biology major or minor. Three lectures. Three credits.

BI 76  **Environmental Science**  
The science of the environment is presented through examination of the interconnections among physical, chemical, and biological fields of inquiry. This course looks at how the global environment is altered by the human population, technology, and production of fuels and food. In this course, students will acquire a scientific understanding of current issues in environmental science and learn to evaluate claims about current environmental problems. This course satisfies the Natural Sciences core requirement but does not satisfy requirements for the biology or chemistry major or minor. Three lectures. Three credits.

BI 78  **Introduction to Marine Science**  
This course introduces the non-science major and the marine science minor to the field of oceanography. Topics dealing with the geological, physical, chemical, and biological aspects of science underscore the interdisciplinary nature of world ocean study. **Note:** This course counts as a science core course and is a required course for the marine science minor; it does not satisfy requirements for the biology major or minor. Three lectures. Three credits.

BI 79  **Rainforest Ecosystems**  
This course introduces the non-science major to the rainforest, examining the ecosystems of temperate (North American) and tropical (South American, African, and Asian) rainforests from a botanical and environmental perspective. The course emphasizes the importance of biological diversity and natural products, and analyzes solutions for saving rainforests. This course is sometimes offered as part of the interdisciplinary learning community, Latin American Studies: The Rainforest Community. **Note:** This course counts as a science core course but does not satisfy requirements for the biology major or minor. Three lectures. Three credits.

BI 80  **Tropical Marine Biology**  
This course examines the ecology of tropical marine communities found throughout the world. Students focus on the biology of coral reefs, seagrass beds, and mangrove forests and explore their interdependence. Topics include discussions of coral reef types and distribution, coral reef biodiversity, natural and human impacts, and coral reef management strategies. This course satisfies a science core requirement and can be used as an elective in the marine science minor. It does not satisfy requirements for the biology major or minor. Three lectures. Three credits.

BI 87  **Microbiology: The Plight of Humans and Microbes**  
This course surveys the interactions of microorganisms on humans that result in various types of diseases. The course emphasizes bacterial and viral infections that involve the various organs associated with skin, respiratory, digestive, urogenital, nervous, and lymphatic systems. It also addresses the importance of infection control and prevention, the control of growth, and the functional anatomy of microorganisms, and provides a historical perspective on the various diseases surveyed. **Note:** this course counts as a science core course but does not satisfy requirements for the biology major or minor. Three lectures. Three credits.

BI 96  **God and Modern Biology**  
This course introduces students to the dialogue between science and religion with a detailed consideration of recent advances in modern biological research that raise significant religious, theological, and ethical issues. The course emphasizes developing a practical understanding of the scientific method through interactive experiences and lecture material. Students consider how scientific breakthroughs and ideas can influence or be influenced by religious thought through assigned readings and in-class discussion groups and through the historically significant and most recent findings in the areas of evolution, biotechnology, and the neurosciences. **Note:** This course counts as a science core course but does not satisfy requirements for the biology major or minor. Three lectures. Three credits.
BI 107/108  Human Anatomy and Physiology
This course, recommended for nursing majors, gives students a familiarity with the anatomy and physiology of body processes with special emphasis on the practical aspects of circulation, respiration, digestion, reproduction, and the glands of internal secretion. Techniques include measuring blood pressure, blood typing, and others. Note: This course is not open to biology majors except where required for allied health sciences (chair approval required).

BI 151  Elements of Microbiology
This microbiology course for nursing majors examines the structure and function of bacteria, viruses, yeasts, molds, antibiotics, and bacterial genetics as well as the mechanisms of microbial invasion and the body's immunological response. Note: This course is not open to biology majors. Three lectures, one lab. (Prerequisites: BI 107, CH 84) Four credits.

BI 170  General Biology I (Majors)
This introductory course for biology majors covers the molecular and cellular basis of life, including cell structure and function, cell communication, inheritance, gene expression and regulation, and developmental genetics. Students receive hands-on experience with a broad range of topics and techniques in the accompanying laboratory. Formerly listed as BI 91. Three lectures, one lab. Four credits.

BI 171  General Biology II (Majors)
This introductory course for biology majors covers biochemistry, energy utilization, anatomy and physiology, and the structure and function of plants and animals. Students receive hands-on experience with a broad range of topics and techniques in the accompanying laboratory. Formerly listed as BI 92. Three lectures, one lab. Four credits.

BI 172  General Biology III (Majors)
This introductory course for biology majors covers organismal biology with an emphasis on evolution, biological diversity, ecology, and environmental science. Students receive hands-on experience with a broad range of topics and techniques in the accompanying laboratory. Three lectures, one lab. Four credits.

BI 213  Endocrinology
This course examines the glands of internal secretion and their location, anatomy, and function, including the mechanisms of their secretions and cell signaling importance in the regulation of body functions. Three lectures. (Prerequisites: BI 170, 171, and 172, CH 11-12, and CH 211) Three credits.

BI 217  Nutrition and Metabolism
Students consider the roles of carbohydrates, lipids, proteins, vitamins, minerals, and water in mammalian nutrition, examining the physiology of animal digestion, absorption, and intermediary metabolism in relation to nutritional needs and energy balance. The course covers recent developments in the application of nutritional findings to metabolic disorders such as diabetes, heart disease, and neurochemical deficits, evaluating them in relation to the principles of animal nutrition. Three lectures. (Prerequisites: BI 170, 171, and 172, CH 11-12, and CH 211) Three credits.

BI 260  Ecology
This course is designed as an overview of the science of ecology — the study of interactions between organisms and their environment. This course uses a hierarchical approach to describe organisms, populations, communities, and ecosystems. We discuss the types of questions ecologists ask, and the methods ecologists use to answer questions. Three lectures, one lab. (Prerequisites: BI 170, 171, and 172, CH 11-12) Four credits.

BI 261  Genetics
This course offers a comprehensive study of the fundamental principles of classical and molecular genetics. Major topics include transmission (Mendelian) genetics, gene linkage and mapping, fundamentals of molecular biology, molecular approaches to genetic analysis, genetic engineering and recombinant DNA technology, microbial genetics, developmental genetics, and population genetics. The course emphasizes the role of genetics in evolutionary biology. Three lectures, one lab. (Prerequisites: BI 170, 171, and 172) Four credits.

BI 296  Special Topics in Biology
This course requires library research and the writing of a scholarly paper on a special topic. Students discuss topics with and must obtain consent from an appropriate professor prior to registration. Three credits.

BI 312  Human Physiology
This course considers homeostasis in humans by means of a comprehensive survey of the morphology and physiology of vertebrate organ systems. Special emphasis is given to organ systems associated with water and electrolyte balance, respiration, digestion, movement, and neurological control. Three lectures, one lab. (Prerequisites: BI 170, 171, and 172, CH 11-12, and CH 211-212) Four credits.
BI 313 Comparative Physiology
This course facilitates the understanding of the physiological systems in humans (i.e., circulation, muscle, endocrine and nervous function) by using a comparative, evolutionary approach. Students will examine and compare physiological systems in humans to the range of vertebrates, including other mammals, birds, reptiles, and amphibians. This evolutionary approach will provide a more in-depth comprehension of the functioning of human physiological systems. Three lectures, one lab. (Prerequisites: BI 170, 171, and 172, CH 11-12, and CH 211-212) Four credits.

BI 321 Animal Behavior
This comparative survey of the behavioral patterns and social relationships of invertebrate and vertebrate animals includes an examination of the genetic, physiological, and ecological mechanisms underlying behavioral interactions, and their adaptive significance. In the laboratory, students learn observational and experimental methods used in animal behavior research. Three lectures, one lab. (Prerequisites: BI 170, 171, and 172) Four credits.

BI 326 Biochemistry
This course examines the structure and function of biological macromolecules with emphasis on their role in eukaryotic cell processes. The course focuses on the regulation of metabolic pathways involved in the synthesis, breakdown, and interconversion of biochemical intermediates. Students develop an understanding of basic biochemical principles in the context of overall cell function. Laboratory exercises expose students to a broad range of modern biochemical investigative methods. Three lectures, one lab. (Prerequisites: BI 170, 171, and 172, CH 211-212) Four credits.

BI 327 Cell Biology
This course focuses on the structure and function of eukaryotic cells. Students explore the relationship between gene expression and protein synthesis, and discuss how different proteins coordinate a complex array of important biological tasks in the cell. The course covers the biochemical interactions that occur within and between cells that sustain viability and mediate cell communication. Topics include gene expression and protein production, enzyme structure/function, protein to protein interactions, cytoskeleton and extracellular matrix, mechanisms of transport, signal transduction, cell cycle, and apoptosis. Laboratories include analysis of cell morphology, RNA and protein expression, and assays to study the growth, differentiation, and death of eukaryotic cells in response to their environment. Three lectures, one lab. (Prerequisites: BI 170, 171, and 172, CH 11-12, and CH 211-212) Four credits.

BI 331 Histology
Students study the microscopic anatomy of vertebrate animals, the morphology of cells, and their combinations in the various tissues and organs of the body. The course relates the structure of cells, tissues, and organs to function, with a major focus on the physiology of each organ. Two lectures, two labs. (Prerequisites: BI 170, 171, and 172) Four credits.

BI 340 Parasitology
This introduction to the biology of parasites of humans and domestic animals emphasizes the host-parasite relationship and provides students with an opportunity to integrate acquired knowledge of host and parasite anatomy, biochemistry, physiology, ecology, and immunology. The course also covers the molecular biology of selected parasites. Lab exercises include examination of preserved and living organisms (obtained locally and maintained in the lab), as well as experimental design and evaluation. Two lectures, two labs. (Prerequisites: BI 170, 171, and 172, CH 11-12, and CH 211) Four credits.

BI 342 Developmental Biology
This course explores how the transition from a single-celled, fertilized egg to a multicellular animal is accomplished, emphasizing the dynamic interactions that occur at the molecular level to tightly control developmental processes. Topics include mechanisms of cell fate and differentiation, the molecular basis of differential gene expression, analysis of the molecular cues regulating body axis formation, environmental regulation of animal development, and developmental mechanisms of evolutionary change. The laboratory for this course consists of student-designed group research projects using key animal model systems. Three lectures, one lab. (Prerequisites: BI 170, 171, and 172) Four credits.

BI 352 Fundamentals of Microbiology
This comprehensive introduction to microbiology includes microbial cell structure, physiology, genetics, evolution and taxonomy, diversity, ecology, and applied microbiology. Lab sessions introduce microbiological techniques (aseptic technique, microscopy, bacterial staining, culture techniques), and other research methods. Students use skills acquired in the lab to design and conduct independent investigations. Three lectures, one lab. (Prerequisites: BI 170, 171, and 172, CH 211-212) Four credits.

BI 354 Molecular Biology
This introduction to molecular biology examines protein structure, DNA structure, RNA structure, the roles of DNA and RNA in protein synthesis, and the replication and repair of DNA and RNA in eukaryotic and prokaryotic cells. Relates the effects of mutations to DNA, RNA, and proteins. Three lectures. (Prerequisites: BI 170, 171, and 172, CH 211-212) Three credits.
BI 356 Immunology
This introduction to immunology covers the humoral and cellular basis of immune response, emphasizing antigens, the structure and function of immunoglobulins, antibody formation, and living/experimental manifestations of the immune response. Three lectures. (Prerequisites: BI 170, 171, and 172, CH 211-212) Three credits.

BI 357 General Virology
This introductory course covers the entire field of virology, with a special emphasis on animal viruses. Coverage centers on the physical, biochemical, and biological aspects of each bacterial and animal virus class. Discussion stresses viral morphology; replication and assembly; pathogenesis of viral infections; and the epidemiology, prevention, and control of viral diseases. Three lectures. (Prerequisites: BI 170, 171, and 172) Three credits.

BI 358 Recombinant DNA Technology
This course provides biology majors with practical experience in recent advances in molecular biology and biotechnology. The course allows students to become familiar with the manipulation of genetic material (DNA) and to understand the techniques used for isolation and characterization of genes. Lab sessions cover topics such as the principles of aseptic technique, isolation of plasmid DNA from bacteria, transformation of bacteria and yeast, restriction enzyme digestion, agarose and polyacrylamide gel electrophoresis, and gene manipulation. Three labs. (Prerequisites: BI 170, 171, and 172, BI 354, CH 211-212) Three credits.

BI 359 Recombinant DNA Technology
This course provides biology majors with practical experience in recent advances in molecular biology and biotechnology. The course allows students to become familiar with the manipulation of genetic material (DNA) and to understand the techniques used for isolation and characterization of genes. Lab sessions cover topics such as the principles of aseptic technique, isolation of plasmid DNA from bacteria, transformation of bacteria and yeast, restriction enzyme digestion, agarose and polyacrylamide gel electrophoresis, and gene manipulation. Three labs. (Prerequisites: BI 170, 171, and 172, BI 354, CH 211-212) Three credits.

BI 360 Marine Invertebrate Zoology
Students study the phylogeny, ecology, morphology, and physiology of the major marine invertebrate groups with emphasis on local fauna. The laboratory component includes fieldtrips to various habitats in Long Island Sound to collect specimens for identification and study. Three lectures, one lab. (Prerequisites: BI 170, 171, and 172, or permission of the instructor) Four credits.

BI 361 Freshwater Ecology
Students learn the applied and theoretical concepts of the field of ecology using examples from freshwater aquatic systems. In the laboratory, students learn the major groups of organisms present in aquatic systems and conduct experiments involving ecological concepts such as predation and competition. Three lectures, one lab. (Prerequisites: BI 170-171-172) Four credits.

BI 365 Evolutionary Biology
The course begins with an examination of the intellectual origins of biological thought and includes a study of the historical factors that contributed to Charles Darwin’s development of the theory of evolution. Topics include the evidence for evolution, the forces affecting evolution (e.g., mutation, migration, genetic drift, and selection), and natural selection as the basis of adaptation, as well as the philosophical and practical aspects of defining species and reconstructing phylogenetic relationships. Students critique (individually and in groups) current papers in evolutionary biology on topics such as punctuated equilibrium theory, Darwinian medicine, human origins, co-evolutionary arms races, systematics and biodiversity, and the evolution of sex. Three lectures, one lab. (Prerequisites: BI 170, 171, and 172) Four credits.

BI 366 Ornithology
This upper-level lecture, laboratory, and field course on avian biology has an emphasis on ecology and evolution. The course familiarizes students with the staggering diversity of birds and the adaptations that have contributed to their success. Laboratory activities include: 1) a multi-week student investigation of avian diversity of form and function, and 2) a series of field trips that emphasize unique adaptations and means of identification of birds found in Connecticut. Three lectures, one lab (Prerequisites: BI 170, 171, and 172) Four credits.

BI 368 Plant Biology: Evolution, Diversity, and Environment
This course covers the evolutionary process before moving on to evolution and diversity of land plants from bryophytes and ferns to gymnosperms and angiosperms. Students examine the environmental impact of using plants for food production and are expected to assemble a field plant collection. Three lectures, one lab. (Prerequisites: BI 170, 171, and 172) Four credits.

BI 369 Plant Biology: Morphology, Biochemistry, and Physiology
This advanced study of gymnosperms and angio-sperms emphasizes morphology, biochemistry, and physiology, including the structure, function, and development of conifers, monocots, and dicots. The course relates biochemistry and physiology of plant processes to contemporary topics in genetic engineering of plants. Three lectures, one lab. (Prerequisites: BI 170, 171, and 172) Four credits.
BI 370  Environmental Health and Safety
This course focuses on the environmental health and safety aspects associated with use of and exposure to biologicals, chemicals, and radiation, examining the risks, hazards, and environmental impact associated with hazardous materials. The course reviews methods to minimize risk and environmental pollution; federal and state regulations associated with hazardous materials; conducting safety audits and inspections in the lab context; and proper methods of hazardous material disposal. Two lectures, one lab. (Prerequisites: CH 11-12) Three credits.

BI 375  Biochemical Ecology
In this course, students investigate the breadth of chemical compounds used by organisms for feeding, reproduction, defense, and communication and place these in an appropriate ecological and evolutionary context. In the laboratory, students gain experience in field and laboratory methods necessary for understanding chemically-mediated interactions among plants, animals, and their environments. Three lectures, one lab. (Prerequisites: BI 170-171-172, CH 211, 212) Four credits.

BI 382  Principles of Aquaculture Seminar/Lab
This course introduces students to the rapidly-growing science of aquaculture or fish farming. Using a comprehensive approach, the course includes discussions of the following topics: historical development, culture and rearing techniques, diseases, regulations, and permitting and marketing of aquatic plants and animals. Course format: seminar in which students read, analyze, and present scientific and technical papers from the primary literature. In the laboratory, students are responsible for the set-up, operation, and maintenance of small-scale aquaculture production systems for growing tilapia. This course satisfies the capstone requirement for biology majors and can be used as an elective for the marine science minor. Three lectures, one lab. (Prerequisites: BI 170, BI 172 or permission of the instructor) Four credits.

BI 383  Coral Reef Ecology Seminar
Students study the complex ecological relationships found in coral reef ecosystems. Topics include discussions of reef development, coral symbiosis and growth, reef trophic dynamics, ecology and behavior of coral reef fish and invertebrates, and effects of natural and human disturbance on coral reef communities. Course format: seminar in which students read, analyze, and present scientific research papers from the primary literature. This course satisfies the capstone requirement for biology majors and can be used as an elective for the marine science minor. (Prerequisites: BI 170, BI 172 or permission of the instructor) Three credits.

BI 385  Molecular Mechanisms of Human Disease Seminar
This seminar covers the molecular and cellular events that underlie complex human diseases. Students learn to critically analyze and interpret primary literature on the molecular aspects of such diseases as cancer, diabetes, heart disease, Alzheimer’s, and AIDS. Students summarize and present selected articles at each meeting and use these acquired skills to investigate a particular topic of their choice in the form of a grant proposal for their final project. (Prerequisites: BI 170, 171, and 172, CH 211-212, and one additional upper-level course in the molecular/cellular block. Permission of the instructor is also required) Three credits.

BI 386  Bacterial Pathogenesis Seminar
This course examines the role of prokaryotes in disease, with an emphasis on the genetics and physiology of disease mechanisms. Topics include aspects of the human immune response, host-parasite relationships, and the epidemiology and evolution of infectious disease. (Prerequisite: BI 352) Three credits.

BI 388  Ecology of the North Atlantic Coast
This seminar examines the processes that generate ecological patterns in North Atlantic coastal ecosystems with a focus on the ecology of salt marshes, tidal rivers, sandy beaches, and rocky shores, and the human impact on these systems. The course centers on student-led discussions of readings from scientific literature and satisfies the biology capstone requirement. (Prerequisites: BI 170, 171, and 172, CH 11-12, one additional course from Block 2 or permission of the instructor) Three credits.

BI 395/396  Independent Research I and II
This course requires a research thesis involving laboratory investigation. Seniors and qualified juniors obtain the consent of the professor supervising their research interest area prior to registering for this program. Past topics include aquatic ecology, bacterial ecology and physiology, biochemistry, cell-wall biosynthesis, evolution of marine invertebrates, genetic regulation of animal development, mammalian physiology, plant biostimulants, plant/insect ecology, population and disease dynamics of shellfish, and signal transduction/gene regulations. Three credits.

BI 397/398  Internships
Available for junior- and senior-level biology majors in good academic standing. Internships are available, subject to individual arrangement, for students interested in allied health, environmental science, marine science, medicine, dentistry, biotechnology, and emergency medicine. Students provide their own transportation and must discuss their internships with the department chair and obtain consent of the supervising professor prior to registering for this course. Credit by arrangement.
This program explores the African Diaspora and its interaction with culture and society in the Americas. Interdisciplinary in nature, the program combines humanities courses from literature, music, and film, together with the sciences, social sciences and history, to provide students with an understanding of the far-reaching impact of race and ethnicity across continents. It explores the reality of African-Americans in the United States, but in a broader historical and comparative perspective that is informed by the experiences of people of African descent throughout the Americas.

Requirements
For an 18-credit minor in Black studies, students must complete the following:

- Five courses drawn from the sciences, social sciences, history and from the humanities; no more than three courses can come from any one of these areas. The five courses must represent three different disciplines. At least three must be “focus” courses; the other two may be “component” courses.

The final 3 credits will be taken at the 300 level and requires writing and defending a research paper dealing with some aspect of the African Diaspora before the Black Studies committee. They can either sign up for BL 398 Independent Study/Research or select one of the 300 level courses listed under the previous section. If they select one of the existing 300 level offerings, students would be required to declare it as their capstone course to one of the program directors and take on the added responsibility of meeting with the directors and participating in a final defense of their work.

Focus Courses

**English**
- EN 253 The African-American Literary Tradition
- EN 288 Colonial/Postcolonial West African Novel
- EN 339 African-American Literature and Culture, 1900 to 1940
- EN 341 Early African-American Literature
- EN 344 African-American Fiction, 1940-1980
- EN 347 African-American Fiction, 1980-Present
- EN 371 African-American Women’s Writing

**History**
- HI 262 African-American History, 1619 to 1865
- HI 263 Inventing Themselves: African-American Women in U.S. History
- HI 264 African-American History, 1865 to Present
- HI 291 Africans in the New World, 1500 to 1800
- HI 292 History of the African Diaspora
- HI 293 West Africa and the Making of the Atlantic World, 1444-1880

**Philosophy**
- PH 288 Critical Race Theory

**Politics**
- PO 141 African Politics
Catholic Studies

Sociology
SO 165 Race, Cities, and Poverty

Visual and Performing Arts
AH 165 The Black Experience: African American Art and Criticism in the Twentieth Century
MU 101 The History of Jazz
MU 112 The Music of Black Americans

Component Courses

Biology
BI 71 Identity and the Human Genome

English
EN 295/FR 295 Caribbean Literature: History, Culture, and Identity
EN 337 Race, Culture, and American Realism
EN 348 Contemporary Women Writers of Color
EN 396 Caribbean Women Writers

History
HI 238 The United States, 1850 to 1900
HI 239 20th-Century United States
HI 342 Immigration, Ethnicity, and Race in U.S. History
HI 376 The Spanish Caribbean: Cuba, Santa Domingo, and Puerto Rico from Columbus to Castro

Politics
PO 143 Caribbean Politics
PO 153 Politics of Race, Class, and Gender

Psychology
PY 350 Seminar in Psychology of Race and Ethnicity

Religious Studies
RS 235 Liberation Theology

Sociology
SO 162 Race, Gender, and Ethnic Relations
SO 163 Urban/Suburban Sociology
SO 185 Introduction to International Migration

Visual and Performing Arts
AH 12 Introduction to the Art History of Asia, Africa, and the Americas
MU 100 American Popular Music
MU 122 World Music History and Ensemble

A list of approved courses for the minor is available from the program directors.

DEPARTMENT OF CATHOLIC STUDIES

Faculty

Director
Lakeland (Religious Studies)

Advisory Board
Behre (History)
Carolan (Modern Languages)
Dreyer (Religious Studies)

Catholic Studies is an inter-disciplinary inquiry into the intellectual tradition, history and culture, both "high" and popular, of the Catholic Christian tradition. While the field of study includes religious questions and theological issues, it primarily follows a "cultural studies" model. In addition to courses on the Catholic Church and issues in Catholic theology, it examines the role of the Catholic tradition in history, in literature and the arts, in the history of science, and in cultural and ethical issues related to many fields of professional practice. Its purpose is to raise awareness of the distinctive contributions of the Catholic Church to religious, cultural intellectual issues throughout the last two thousand years.

The minor in Catholic Studies will explore the texts, traditions, themes, teachings, and cultural role of the Catholic Church from its inception to its contemporary expression. Particular attention will be paid to its place in contemporary America. This interdisciplinary program will enable students to study the Catholic tradition, its ethos, identity, and mission, as made tangible in history, philosophy, literature, theology, the fine arts, the social and behavioral sciences, and the natural sciences.

Requirements

For a 15-credit minor in Catholic studies, students:

- Complete five three-credit courses

One course must be RS 115 “Introduction to Catholicism”

At least two additional courses in the Department of Religious Studies

At least one course outside of the Religious Studies department.
Courses offerings

Art History
AH 120 Medieval Art
AH 121 The Celtic World and Early Irish Art
AH 130 Early Renaissance Art in Italy
AH 131 High Renaissance and Mannerism in Italy
AH 135 Renaissance and Baroque Architecture
AH 140 Baroque Art
AH 242 The Arts of Spain and Its World, 1474-1700

English
EN 257 Dante
EN 352 Chaucer
EN 360 Medieval English Drama

History
HI 215 Ireland from the Middle Ages to the Present
HI 218 The Renaissance and Reformation
HI 317 Religious Outsiders in Early Modern France and Europe

Honors
HR 202 Honors Seminar: Dante

Italian
IT 289 Dante

Peace and Justice Studies
PJ 120 Prophets of Nonviolence
PJ 123 The Praxis of Faith and the Transformation of Culture

Philosophy
PH 209 Augustine, Pascal, and Camus
PH 210 The Problem of God
PH 212 Plato to Machiavelli
PH 215 Metaphysics
PH 217 Mysticism and Western Philosophy
PH 218 History of Medieval Philosophy
PH 219 Aquinas
PH 287 Philosophy of Religion

Politics
PO 115 Introduction to the Study of Peace and Justice
PO 147 Northern Ireland: The Politics of War and Peace
PO 151 Politics of the Immigrant: The Irish Catholic and the East European Jewish Communities

Religious Studies
RS 112 The Problem of God
RS 115 Introduction to Catholicism
RS 117 Jesus Christ, Yesterday and Today
RS 122 Grace and the Christian Life
RS 123 The Church
RS 126 The Sacraments in Christian Life
RS 175 Contemporary Moral Problems
RS 197 Evil
RS 202 Finding God in All Things: The Spiritual Legacy of Ignatius Loyola
RS 204 Voices of Medieval Women: Silent No More
RS 205 Selected Topics in the Catholic Tradition
RS 207 The Reformation Era
RS 224 The Papacy
RS 235 Liberation Theology
RS 238 American Catholic Theologians
RS 239 Lay Perspectives on Christian Spirituality
RS 266 The Reinterpretation of the New Testament
RS 280 Morality and Law
RS 282 Catholic Social Teaching
RS 296 Saints & Sinners
Modern chemistry is an interdisciplinary subject that integrates its own knowledge with that of physics and mathematics, and applies the result to solve problems in a wide variety of areas including the biological sciences and technology. The curriculum for chemistry majors emphasizes fundamental principles and applications. Courses develop critical thinking, problem-solving skills, and experimental technique, and provide ample preparation for future study at the graduate level or in professional programs.

A bachelor of science in chemistry is a very flexible undergraduate major. In addition to a career in chemistry, this degree provides a base for study and practice of medicine, environmental science, forensic science, pharmacology, materials science, business, law, and more. Effectively, a student who pursues a chemistry degree has many career options.

The Department of Chemistry and its curriculum are certified by the Committee on Professional Training of the American Chemical Society. Certified programs are defined by high quality faculty, curriculum, facilities, and available resources.

### Requirements
The bachelor of science degree in chemistry can be achieved by following one of three tracks. Following the first track, students earn a B.S. in chemistry. This basic degree track would be suited to those students interested in medical, dental, law, or business schools. Students choosing the second track receive a B.S. in Chemistry that is certified by the American Chemical Society and features more in-depth laboratory work and research experience. The third track is referred to as the biochemistry option. The ACS certified tracks are recommended for students seeking employment in the chemical industry or wishing to pursue a Ph.D. program in chemistry or biochemistry.

- Students intending to enter primary or secondary school teaching should consult annually with the chairs of the departments of Chemistry and Education to facilitate scheduling of these curricula.
- Students intending to enter medical or dental school should consult with the chair of the Chemistry Department for appropriate modifications of this curriculum, which will include taking BI 170-171 in freshman year in place of PS 15-16, which is then taken in sophomore year.
- Students may elect to take CH 324 Biochemistry in the junior year.
- Note that CH 398 Research and Seminar may be taken for one, two, or three credits. Students may elect to take CH 398 either in the fall or spring. They may also take it both semesters.
- Students are encouraged to participate in summer research experiences on or off campus. At the discretion of the Chemistry Department, involvement in summer research such as a National Science Foundation Research Experience for Undergraduate Programs may be counted toward the research requirement for American Chemical Society certification. Each case will be evaluated individually by the department.

All research for credit will be consistent with the American Chemical Society/Committee for Professional Training guidelines.

*PS 15-16 and MA 121-122 or equivalents are required of all physical science majors.

Course Descriptions

CH 007 Introduction to Forensic Science
This course provides an introduction to the scientific techniques used for the analysis of common types of physical evidence encountered at crime scenes. Using critical thinking and laboratory experiences, students become crime scene investigators. They are charged with the task of solving a mock crime. The investigations include fabric analysis, ink analysis, blood analysis, DNA analysis, fingerprint analysis, ballistics, and/or blood alcohol analysis. The lecture part of the course focuses on exploring the underlying chemical principles behind the techniques and includes discussion of historical case studies. Note: This course counts as a science core course but does not satisfy requirements for the chemistry major or minor. Three credits.

CH 10 Chemistry – Sights and Insights
This course, which fulfills a science requirement and has no prerequisites, presents chemistry via lecture, demonstration, and laboratory work. The course provides students with insights into the microscopic world of atoms and molecules to better understand the macroscopic, observable properties of real substances, and applies the models developed in the course to representative substances from inorganic, organic chemistry, and biochemistry. Note: This course counts as a science core course but does not satisfy requirements for the chemistry major or minor. Three credits.

Minor in Chemistry
A minor in chemistry requires six courses in chemistry. At least four of these courses must carry course numbers of 200 or greater. One of these four courses must be a course in physical chemistry (CH 202 or CH 261).
CH 11-12 General Inorganic Chemistry I and II
This two-semester, sequential course covers atomic and molecular weights, the mole concept, Avogadro's number, stoichiometry, energy relationships in chemical systems, the properties of gases, the electronic structures of atoms, periodic relationships among the elements, chemical bonding, geometrics of molecules, molecular orbitals, liquids, solids, intermolecular forces, solutions, rates of chemical reactions, chemical equilibrium, free energy, entropy, acids and bases, aqueous equilibria, electrochemistry, nuclear chemistry, chemistry of some metals and nonmetals, and chemistry of coordination compounds. Three credits.

CH 11-12 General Inorganic Chemistry and Introductory Inorganic Chemistry Lab
This lab offers the opportunity to explore and experience the rigors of an experimental physical science. Students make and record observations on simple chemical systems while learning fundamental laboratory manipulative and measurement skills. Experiments demonstrate and supplement concepts introduced in lecture. The first semester emphasizes weighing, filtering, titrating, using volumetric glassware, observing data, and recording and synthetic techniques. The second semester integrates these techniques in experimental procedures and explores physical properties and quantitative analysis of selected chemical systems. One credit.

CH 17-18 Introductory Inorganic Chemistry I and II with Lab
Students who exhibit a particularly strong background in chemistry – based on the results of their freshman orientation examinations – are invited to take this two-semester course. Available lab space limits the number of students in the course. Course topics match those of CH 11-12, however, the pace, depth, and order of lecture presentation differs. This course interweaves lab and lecture components as much as possible; experimental student “discoveries” in lab often serve as a departure point for lectures. Students develop the experimental acumen necessary to perform basic chemical operations and use these acquired skills to probe chemical phenomena. Three lectures; one recitation section; one lab. Four credits.

CH 33 Chemistry of Nutrition
This course introduces basic chemical concepts, such as the atom, molecules, chemical reactivity and energy, as well as integrating fundamental biological concepts including cell structure and basic anatomy. Further explored, on a chemical level, are the structure and function of basic nutritional components: proteins, carbohydrate, lipids, vitamins, and minerals. With a scientific foundation established, topics pertaining to nutrition and human evolution, the life cycle, and exercise will be discussed. Current social and health issues such as obesity, food technology, and fad dieting will be incorporated throughout the course. **Note:** This course counts as a science core course but does not satisfy requirements for the chemistry major or minor. Three credits.

CH 83 Survey of Chemistry
This one-semester course presumes no previous chemistry and fulfills a science requirement. The course consists of an introduction to atomic and molecular structure and the correlation of structural models to observable phenomena. The course discusses topics of historical and current relevance to society, including environmental issues, energy sources, natural products, and the application of chemistry in industry and medicine. **Note:** This course counts as a science core course but does not satisfy requirements for the chemistry major or minor. Three credits.

CH 84 General Chemistry for Health Science
This course introduces the general principles of chemistry (matter and measurement, atomic and molecular structure, energetics, acids and bases, oxidation, and reduction) in a manner that prepares students to relate to properties of organic materials and biologically relevant substances such as carbo-hydrates, lipids, peptides, proteins, and nucleic acids. Approximately two-thirds of the course focuses on general principles; the remainder introduces organic and biologically relevant substances. This course is directed primarily to School of Nursing students, who are required to take a lab component. The lecture course satisfies a core requirement. **Note:** This course counts as a science core course but does not satisfy requirements for the chemistry major or minor. Three credits.

CH 84 General Chemistry for Health Science Lab
This lab illustrates lecture concepts of CH 84 and allows students to observe relevant physical systems. One credit.

CH 85 Chemistry, Energy, and the Environment
This course explores the flow of energy in modern society from the perspective of chemistry. Topics include hydrocarbons; biomass; and hydro, solar, tidal, wind, and nuclear energy sources. Students consider the source of energy, how it is harvested, and the short- and long-term environmental consequences of using each energy source and how these consequences are determined. The course uses the concepts of bonding, thermodynamics, kinetics, and work to investigate these related ideas. The course also discusses economic and political forces that shape our use of energy. **Note:** This course counts as a science core course but does not satisfy requirements for the chemistry major or minor. Three credits.

CH 86 Chemistry and Art
This basic chemistry course with a strong orientation to the visual arts fulfills a core science requirement. Basic concepts include atoms, molecules, elements, compounds, the periodic table, chemical bonding and reaction, acids and bases, oxidation and reduction, and polymers. The lab employs these concepts to examine aspects of art media such as light, color, dyes, paint, metals, stone, ceramics, glass, plastics, paper, and fibers. **Note:** This course counts as a science core course but does not satisfy requirements for the chemistry major or minor. Three credits.
CH 87  Molecules of Life
This course explores the modern science of biologically relevant compounds and substances, which exist at the intersection of chemistry, biology, and medicine. We examine the major molecular components of the cell — proteins, nucleic acids, lipids, and more — and illustrate the application of chemical principles to understanding their structure and function. Since our lives are increasingly influenced by the availability of new pharmaceutical agents ranging from drugs that lower cholesterol to those that influence behavior, we develop insights needed to understand drug action and consider the design of new ways to intercede in the disease process. Note: This course counts as a science core course but does not satisfy requirements for the chemistry major or minor. Three credits.

CH 202  Elements of Physical Chemistry
This course, intended primarily for biology majors and students preparing to teach science in secondary schools, emphasizes the laws of thermodynamics, chemical equilibrium, solutions of electrolytes, electrochemical cells, and chemical kinetics, with a special emphasis on the physiochemical properties of living systems. (Prerequisites: CH 11-12, PS 83-84, and MA 121-122, or equivalent) Three credits.

CH 202  Elements of Physical Chemistry Lab
Lab experiments illustrate the principles discussed in class, (thermodynamics, kinetics, chemical equilibrium). (Co-requisite: CH 202 lecture) One credit.

CH 211  Organic Chemistry I
This course, an introduction to the chemistry of carbon compounds, discusses common functional groups from the perspective of molecular structure. Areas of emphasis include structure and characterization, preparation or organic synthesis, and the relations of physical and chemical properties to molecular structure. Stereochemical concepts introduced early in the course are used throughout. (Prerequisite: CH 12 or CH 18) Three credits.

CH 212  Organic Chemistry II
This course is a continuation of CH 211 and presents the chemistry of aromatic, carbonyl, acyl, and nitrogen compounds. The course relates the chemical properties of naturally occurring substances such as carbohydrates, lipids, proteins, and nucleic acids to those of simpler monofunctional compounds. Spectroscopic methods of structure determination are introduced early in the course and used throughout. (Prerequisite: CH 211) Three credits.

CH 211-212  Organic Chemistry I and II Lab
The first semester of this lab emphasizes the manipulative techniques of separation, purification, analysis, and simple syntheses. The second semester emphasizes investigative experiments, more complex synthesis, and qualitative organic analysis. (Co-requisite: CH 211-212 lecture) One credit.

CH 222  Chemical Analysis
This course provides the theoretical basis for the required laboratory. Topics include statistics, chemical equilibria and their analytical applications (acid-base, oxidation-reduction, complex formation, precipitation), electroanalytical chemistry, spectroanalytical chemistry, and chemical separations. (Prerequisite: CH 12 or CH 18; Co-requisite: CH 222 lab) Three credits.

CH 222  Chemical Analysis Lab
Students explore quantitative aspects of chemistry through the analysis of unknowns and the characterization of chemical equilibrium, and pursue classical and instrumental methods of analysis. (Co-requisite: CH 222 lecture) Two credits.

CH 261-262  Physical Chemistry I and II
A two-semester sequential offering for chemistry and physics majors, this course covers thermodynamics of gases, pure liquids, and both electrolyte and non-electrolyte solutions. Additional topics include chemical equilibrium, transport phenomena, reaction kinetics, quantum mechanics, spectroscopy, and statistical mechanics and statistical thermodynamics. (Prerequisites: CH 12, MA 122 or higher, and PS 84 or PS 16) Three credits.

CH 261-262  Physical Chemistry Labs
This course demonstrates and verifies concepts covered in lecture courses CH 261 and CH 262. Each lab meets weekly for three hours, during which students perform experiments with precision and care. The course incorporates current technology into each experiment and uses computers in data acquisition, reduction, and reporting. The course places special emphasis on data handling techniques and the accurate recording of observations. (Co-requisite: CH 261-262 lecture) One credit.

CH 321  Advanced Organic Chemistry
This course moves students closer to the research areas of organic chemistry. Major topics include molecular orbital theory and its applications to molecular structure and reaction mechanisms, and organic synthesis with emphasis on factors contributing to chemoselectivity, regioselectivity, and stereoselectivity. (Prerequisite: CH 212. Co-requisite: CH 262) Three credits.

CH 321  Advanced Organic Chemistry Lab
Students in this lab work, for most of the term, on an assigned project, usually a multistep synthesis, which integrates rudimentary separation, purification, and characterization techniques introduced in CH 211-212. The course requires a written report. Two labs. (Prerequisite: CH 212) Two credits.

CH 324  Biochemistry I
Topics include fundamental concepts of biochemistry such as protein structure and function; metabolism and biosynthesis; and storage, transmission, and expression of genetic information. (Prerequisites: CH 212, CH 261 or CH 202 or department permission) Three credits.
CH 324 Biochemistry I Lab
This course covers fundamental operations in biochemistry including isolation, analysis, and investigation of the function of selected proteins, carbohydrates, lipids, and nucleic acids. One credit.

CH 325 Biochemistry II
This course provides further study of biochemical systems, emphasizing structure and function in macromolecules and multimolecular complexes and interactions in complex physiological systems. (Prerequisite: CH 324) Three credits.

CH 326 Chemical Instrumentation
Students study chemical analysis in detail, using modern instrumentation. Students explore current methods of analysis, theory of transduction, implementation of instrumental principles, and physical theory of chemical systems in the context of the goals of the analytical problem and consider examples of applications. (Prerequisite: CH 222) Three credits.

CH 326 Instrumental-Analytical Chemistry Lab
This course exposes students who have already been introduced to the theory of classical (CH 222 or CH 240) and instrumental (CH 326 or CH 240) methods of analysis to problem solving using a variety of physical and chemical methods. The early portion of this course consolidates the classroom principles of analytical chemistry into a holistic understanding of analytical chemistry, giving students a further appreciation of the general considerations made when designing an approach to problem solving in analysis. Students receive hands-on exposure to the following aspects of analytical chemistry: basic electronics as appropriate to common instrumentation, methodology involved in equipment maintenance and troubleshooting, exposure to solving real-world analytical problems, and use of small computers and interfaces in the lab. The course emphasizes oral communication of results among all lab participants. (Prerequisites: CH 222, CH 326 course) Three credits.

CH 341 Advanced Inorganic Chemistry
This course introduces students to the interdependence of chemical bonding, spectroscopic characteristics, and reactivity properties of coordination compounds and complexes using the fundamental concept of symmetry. The principles of coordination chemistry will be introduced after reviewing atomic structure, the chemical bond, and molecular structure. A basic familiarity with symmetry will be formalized by an introduction to the elements of symmetry and group theory. The students will use symmetry and group theory approaches to understand central atom hybridization, ligand group orbitals, and the construction of qualitative molecular orbital (MO) energy diagrams including both σ- and π-bonding contributions. The students will continue to utilize their understanding of group theory during an introduction of electronic spectroscopy and the use of correlation and Tanabe-Sugano diagrams. MO diagrams will then be used as a starting point for understanding the reactivity properties of coordination complexes. (Corequisite: CH 261) Three credits.

CH 341 Advanced Inorganic Chemistry Lab
The laboratory portion of CH 341 is a synthetic inorganic lab with an emphasis placed on characterization. In the laboratory, students will have the opportunity to synthesize, characterize, and investigate the physical and reactivity properties of coordination, organometallic, and air-sensitive complexes. Students will utilize the following instrumental methods to characterize their compounds: UV-Visible spectroscopy, magnetic susceptibility, polarimetry, infrared spectroscopy, and NMR spectroscopy. The students write formal laboratory reports for every experiment. (Corequisite: CH 261) One credit

CH 363 Advanced Topics
This course, intended for second semester senior chemistry majors, offers a detailed, advanced treatment of topics from any of the four major fields of chemistry, tailoring topics in a given semester to meet the needs and interests of enrolled students. Professors vary based on chosen topics. (Prerequisite: CH 341) One, two, or three credits.

CH 398 Research and Seminar
Students undertake a research project in conjunction with a faculty member and present two seminars: one pertaining to a literature topic, the other focused on their research. (Prerequisite: by departmental permission) One, two, or three credits.

CH 399 Independent Study
This course, designed for students seeking an in-depth examination of a pre-specified area under the close direction of a faculty member(s) presents topics not routinely encountered in the normal course sequence. (Prerequisite: CH 262 or CH 202 or by departmental permission.) Three credits.

Chinese
(see Modern Languages and Literatures)
The Program in Classical Studies provides students with a broad background in the history and culture of classical antiquity, both as an aid to their general cultural education and to assist them in their own major fields. Courses are offered in Latin and Greek, and in English translation.

The Program in Classical Studies offers two minors. The 24-credit bachelor of arts with classics, intended for students wishing to focus on the ancient languages, consists of four courses each in Latin and Greek.

The 15-credit minor in classical studies is a broader program, consisting of five or more courses drawn from the program’s offerings and from related courses in other departments, including the following:

**Art History**
AH 110 The Ancient Near East, Egypt, and the Aegean Bronze Age
AH 111 Greek Art and Archaeology
AH 112 Etruscan and Roman Art and Archaeology
AH 210 Myth in Classical Art

**Philosophy**
PH 236 Plato
PH 237 Aristotle
PH 286 Philosophy and Tragedy

Appropriate courses used for the minor in Classical Studies may also be used simultaneously to fulfill the core requirements in history, philosophy, arts, English literature, and foreign language.

Students may also design a major in Classical Studies as an individually designed major (see page 119).

The program also makes available, as a general service to the University, courses in English and the original languages for those interested in specific aspects of classical antiquity.

---

**Course Descriptions**

**Classical Civilization**

**CL/EN 103/203** Masterpieces of Greek Literature in English Translation
This course surveys major works of ancient Greek literature, emphasizing the content of this literature as a key to understanding classical Greek civilization and as meaningful in a contemporary context. Three credits. *May be taken to fulfill the core requirement in English literature.*

**CL/EN 104/204** Masterpieces of Roman Literature in English Translation
This course surveys major works of Roman literature of the republic and early empire, emphasizing the content of this literature as a key to understanding Roman civilization, and as meaningful in a contemporary context. Three credits. *May be taken to fulfill the core requirement in English literature.*

**CL 115** Greek Civilization
Students study the Greek experience: the social and cultural values, political institutions, and economic structures of the ancient Greeks and their effect on the historical process in the period down to the death of Alexander. Knowledge of Greek is not required. Three credits. **May be taken to fulfill the core requirement in history.**

**CL 116** Roman Civilization
Roman civilization spanned more than 1,000 years of history and culture, and influenced western society in profound ways. This course traces Rome’s development from a small local tribe to a world power, examining how it expanded and conquered the Mediterranean and absorbed into its culture aspects of the peoples it defeated. Knowledge of Latin is not required. Three credits. **May be taken to fulfill the core requirement in history.**

**CL 121** Myth in Classical Literature
This course introduces students to classical mythology through an examination of the diverse ways in which myth and legend are treated in the literatures of ancient Greece and Rome. Students read texts in English translation; knowledge of Greek or Latin is not required. Three credits. *May be taken to fulfill the core requirement in English literature.*

**CL 123** Women in Classical Literature
The course explores the roles of women in ancient Greek and Latin literature through an examination of literary characterizations of women from a variety of genres, including epic poetry, tragedy and comedy. The emphasis of the course will be on the careful reading and analysis of primary texts in translation. Knowledge of Greek and Latin is not required. Three credits. *May be taken to fulfill the core requirement in English literature.*
CL/HI 132/222  The Roman Revolution
This course presents a comprehensive study of the political, social, artistic, literary, and military transformation of Rome from the middle of the second-century B.C. through the reign of Augustus, with special attention given to Rome’s response to the cultural and governmental challenges imposed by its growing empire and how its responses forever changed the course of Western civilization. Three credits.

CL 399  Capstone Project in Classics
Students completing an individually designed major in classical studies develop and carry out a major project that allows them to pull together the multiple threads of their interdisciplinary major. (Prerequisites: at least seven courses in the individually designed major) Three credits.

Greek
GR 111  Elementary Attic Greek
Students study the grammar of Attic Greek. The course employs readings in easier authors to develop a practical reading knowledge of ancient Greek. Three credits.

GR 210/211  Intermediate Greek Readings
This two-semester course includes intensive reading of selected authors of moderate difficulty in various genres, with extensive readings in translation, to give a survey of classical Greek literature. The two-semester course fulfills the core requirement in foreign languages. (Prerequisite: GR 111 or equivalent) Three credits per semester.

GR 325/328  Advanced Greek Readings I-IV
Involves extensive readings of selected works of ancient Greek literature. (Prerequisites: GR 210-211) Three credits per semester.

Latin
LA 111  Basic Latin
The course presents an intensive study of Latin grammar. Students who complete this course normally continue in LA 210-211. Four credits.

LA 210/211  Readings in Latin Prose and Poetry
For students with a high school background or the equivalent in Latin, this course fills out that background through extensive readings in the principal authors and genres not read in high school. The two-semester course fulfills the core requirement in foreign languages. Three credits per semester.

LA 321/322  Latin Poetry
Involves extensive readings of selected authors of Latin poetry. (Prerequisites: LA 210-211) Three credits per semester.

LA 323/324  Latin Prose
Students undertake extensive readings of selected Latin prose authors in this two-semester course. (Prerequisites: LA 210-211) Three credits per semester.

The study of communication at Fairfield University focuses on the description and analysis of how humans acquire, process, and use information in a variety of contexts. As one aspect of a liberal education, undergraduate work in communication helps students:

• become more aware of factors that influence and are influenced by human communication behavior and media practices;

• develop intellectually by providing a basis from which to analyze, synthesize, and critically evaluate messages from varied sources, including the media; and

• learn techniques and strategies to propose policies, advocate positions, and persuasively express themselves in various contexts in the pursuit of a more just society.

Communication majors will acquire a critical understanding of communication processes and contemporary communication media, improve their abilities in oral and written communication, heighten visual awareness, develop quantitative research skills, cultivate media literacy, and learn to make connections between communication theory and communication contexts. Communication courses engage students actively in understanding interaction in interpersonal, organizational, public, mediated, and cultural contexts.

The primary learning outcomes of our courses include:

(1) exploration of alternative theoretical and empirical ways of understanding individual and social behavior,
(2) interpretation of empirical data as presented in the literature of our field, and
(3) systematic analysis of social interaction and issues, using tools and methods appropriate to the discipline to formulate and test
hypotheses, to apply research to social problems, and to develop a comprehensive understanding of media industries, texts, and audiences.

The Major

Requirements
To earn a 30-credit major in communication, students follow a program of study designed to develop breadth and depth of knowledge about communication processes in a variety of contexts. The communication major consists of ten three-credit courses, some specified by the department, others selected by students from approved lists based upon their own interests and objectives. Specifically, all communication majors complete a set of five (three-credit) required courses known as the communication core. In addition, with the aid of the communication faculty, students select one of three areas of emphasis for in-depth study: organizational communication, media studies, or communication and the human condition. Communication majors are strongly encouraged to continue their foreign language beyond the intermediate level, to study abroad, and to pursue internships that allow for applied learning of theoretical material. The requirements of the communication core and the areas of emphasis are detailed below.

Communication Core (15 credits)
Required for all communication majors

- CO 100 Human Communication Theories
- CO 101 Argument and Advocacy
- CO 130 Mass Media and Society
- CO 200 Interpersonal Communication Theories (Prerequisite: CO 100)
- CO 309 Research Projects in Communication: The Capstone (senior majors only)

• CO 100 and CO 101 are the foundational courses in the communication major. Students should plan to take both courses during the same semester, preferably during their sophomore year. CO 100 and CO 101 should be taken before taking the 200- and 300-level communication courses.

• Students should plan to enroll in CO 200 and CO 130 after successful completion of the foundational courses – during the sophomore or junior year. CO 200 and CO 130 need not be taken during the same semester.

• Students should declare their area of emphasis no later than one semester after successful completion of CO 100 and CO 101. Communication faculty advisors will help students create academic programs that best suit their intellectual interests and career objectives.

• Students complete CO 309 – the required capstone course – during their senior year.

Areas of Emphasis
Students select one area of emphasis to complete their major requirements, completing a minimum of five three-credit courses in the selected area. Students select at least two courses (six credits) from a list of communication courses specific to their chosen area. In some cases, with advisor or chair approval, students may take required 200-level communication courses concurrently, even where one is listed as a prerequisite.

The remaining three areas of emphasis courses (nine credits) are based upon students’ interests and objectives, and are selected from an approved course list. Approved lists are published in the regularly updated Department of Communication Handbook, available online on the department’s web site. Students select courses in consultation with their communication faculty advisor. At least one of these must be a CO course.

Area of emphasis courses may not be double-counted toward the University’s general education core curriculum. These courses may, however, fulfill some requirements for related minors, which students should consider completing. Academic minors strongly recommended by the communication faculty are listed in the area of concentrated studies sections below.

The Department of Communication cannot control the frequency with which other University departments offer courses, including those related to the study of organizational communication, media studies, and communication and the human condition.
MEDIA STUDIES
(15 credits, minimum)
The Media Studies emphasis examines the creation, perpetuation, and reception of meaning through media and new communication technologies; the history and practices of the various media industries; and the production of culture.

Required Courses – Select a minimum of two from the following:

- CO 231 Media Institutions (Prerequisite: CO 130)
- CO 236 Gender, Sexuality, and the Media (Prerequisite: CO 130)
- CO 238 Communication and Popular Culture
- CO 239 Consumer Culture (Prerequisite: CO 130)
- CO 331 American Media/American History
- CO 334 International Media Systems (Prerequisite: CO 130)
- CO 335 Globalization, Media, and Culture (Prerequisite: CO 130)
- CO 339 Special Topics in Media Theory and Criticism (Prerequisite: CO 130)

Elective Courses – Select a minimum of three.

Approved elective courses are published in the Department of Communication Handbook, available from the communication faculty advisors. Sample courses include:

- CO 201 Persuasion (Prerequisite: CO 101)
- CO 202 Group Communication (Prerequisite: CO 200)
- CO 239 Consumer Culture (Prerequisite: CO 130)
- CO 240 Intercultural Communication
- CO 248 Health Communication (Prerequisite: CO 220 or 130)
- CO 249 Topics in Organizational Communication
- CO 260 Media Institutions (Prerequisite: CO 130)
- CO 266 Gender, Sexuality, and the Media (Prerequisite: CO 130)
- CO 268 Communication and Popular Culture
- CO 269 Consumer Culture (Prerequisite: CO 130)
- CO 361 American Media/American History
- CO 364 International Media Systems (Prerequisite: CO 130)
- CO 365 Globalization, Media, and Culture (Prerequisite: CO 130)
- CO 369 Special Topics in Media Theory and Criticism (Prerequisite: CO 130)

Relevant courses in applied ethics, economics, English – journalism, information systems, marketing, politics, sociology, and visual and performing arts (new media film, television, and radio; also some music classes).

Related Minors
Communication majors who concentrate their coursework in media studies are strongly encouraged to complete an academic minor in one of the following areas of “applied” communication skills or “allied” communication professions:
Communication

English/journalism concentration; international studies; new media film, television, and radio; politics; sociology; or marketing. Students who plan to complete a minor should choose their major elective courses wisely; courses selected for the major may double count for some minors. It is suggested that students who do not complete a related minor take all 10 of their major courses in the Communication Department.

COMMUNICATION AND THE HUMAN CONDITION
(15 credits, minimum)
The Communication and the Human Condition emphasis critically examines the role of communication in creating, sustaining, and transforming the human condition – past, present, and future.

Required Courses – Select a minimum of two, at least one must be at the 300-level:
- CO 201 Persuasion (Prerequisite: CO 101)
- CO 240 Intercultural Communication (Prerequisite: CO 100)
- CO 246 Family Communication (Prerequisite: CO 200)
- CO 248 Health Communication (Prerequisite: CO 220 or 130)
- CO 342 Technoculture and Information Society (Prerequisite: CO 130)
- CO 345 Communication and the Environment (Prerequisites: CO 100, 130)
- CO 346 Communication and Spirituality (Prerequisites: CO 100, 200)
- CO 349 Special Topics: Constructing Social Identities (Prerequisite: CO 200)

Elective Courses – Select a minimum of three.
Approved elective courses are published in the Department of Communication Handbook, available from the communication faculty advisors. Sample courses include:
- CO 202 Group Communication (Prerequisite: CO 200)
- CO 238 Communication and Popular Culture (Prerequisite: CO 130)
- CO 239 Consumer Culture (Prerequisite: CO 130)
- CO 335 Globalization, Media, and Culture (Prerequisite: CO 130)

Relevant courses in anthropology, applied ethics, international studies, peace and justice studies, politics, and sociology.

Note: Elective courses may not be double-counted toward the University’s general core curriculum.

Related Minors
Communication majors who concentrate their coursework in communication and the human condition are strongly encouraged to complete an academic minor in: environmental studies; peace and justice studies; psychology; sociology/anthropology; or women’s studies. Students who plan to complete a minor should choose their major elective courses wisely; courses selected for the major may double count for some minors. It is suggested that students who do not complete a related minor take all 10 of their major courses in the Communication Department.

Independent Study and Internship Policies
The Department of Communication offers credit for independent study – CO 396 (fall) and CO 397 (spring) – to highly self-motivated communication majors in their junior or senior year of studies. Interested students must discuss and document their independent study proposals with a member of the communication faculty before registering for credit. As an elective course recommended only for the most motivated students, CO 396-397 does not satisfy any requirements in the communication major (or minor), but counts towards graduation.

The Department of Communication also sponsors an active internship program for qualified (3.0 overall GPA) junior and senior majors. Students may earn no more than six internship credits. The internship courses – CO 398 (fall) and CO 399 (spring) – are recommended electives that do not satisfy requirements in any of the areas of concentrated study within the communication major, but do count towards graduation. Communication majors interested in applying for an internship complete the departmental internship application forms before registering for CO 398 or CO 399.

Minor in Communication
To earn a 15-credit minor in communication, students are required to complete the following five three-credit courses:
- CO 100 Human Communication Theories
- CO 101 Argument and Advocacy
- CO 130 Mass Media and Society
- CO 200 Interpersonal Communication Theories (Prerequisite: CO 100)

Any other 200- or 300-level course offered by the Department of Communication except CO 396-397 Independent Study and CO 398-399 Internship. Communication minors may not enroll in CO 396-397 or CO 398-399. Communication majors receive priority registration for all CO courses.
Course Descriptions

CO 100  Human Communication Theories
This course introduces major theoretical perspectives that inform communication scholarship. This foundational course for the major emphasizes understanding human communication as a symbolic process that creates, maintains, and alters personal, social, and cultural identities. Students critique research literature in the communication field in this course, which is a prerequisite for the 200- and 300-level communication courses. This course counts in the social and behavioral sciences core curriculum. Three credits.

CO 101  Argument and Advocacy
This introduction to public speaking and the advocacy process includes topic identification; methods of organization, research, selection, and arrangement of support materials; audience analysis and adaptation; patterns and fallacies of reasoning; uses of evidence; logical proof; and refutation. Students practice and critique informative and persuasive presentations in this course, which is a skill required in all 200- and 300-level communication courses. Three credits.

CO 130  Mass Media and Society
This media literacy course offers theoretical and practical tools to critically analyze media texts, as well as understand different ways in which audiences interact with them. Students will inquire into how the pervasive mediation of human experience through mass communication channels affects almost every aspect of socialization processes and people's symbolic environment. The interplay between structural constraints conveyed in media's messages and humans' capacity to exercise interpretive agency is addressed through lectures, audiovisual examples, hands-on activities, and a variety of assignments aimed at discerning the elements that intervene in the construction and reception of media texts, beyond their apparent components. This course counts in the social and behavioral sciences core curriculum. Three credits.

CO 200  Interpersonal Communication Theories
An examination of one-to-one relationships from a variety of theoretical perspectives, this course focuses on the centrality of communication in building familial bonds, friendships, and work teams. Students examine factors influencing interpersonal communication such as language, perception, nonverbal behavior, power, status, and gender roles. (Prerequisite: CO 100) Three credits.

CO 201  Persuasion
This course develops students' understanding of the major theoretical approaches to the study of persuasion as a particular type of social influence, giving specific attention to the processes of interpersonal influence and the media's role in changing social attitudes. Students construct communication campaigns to apply persuasion concepts and skills. (Prerequisites: CO 100, CO 101) Three credits.

CO 202  Group Communication
This course examines the basic characteristics and consequences of small-group communication processes in various contexts including family, education, and work groups. The course stresses interaction analysis and teambuilding. Because the course involves examining small groups in process, students do a substantial amount of group work. (Prerequisite: CO 200) Three credits.

CO 220  Introduction to Organizational Communication
Taking a historical and communication-centered approach to understanding how business and professional organizations function, this course addresses the analysis of upward, downward, and lateral communication; communication channels and networks; power and critical theory; organizations as cultures; internal and external public communication; and leadership. The course uses a case study approach. (Prerequisite: CO 200) Three credits.

CO 231  Media Institutions
The course concentrates on the economic, political, and legal environment of U.S. mass media. Issues include examination of individual media industries, the economic structure of U.S. media markets, media law and regulation, media watchdogs, advocacy organizations, and media users' forms of collective action. The course's content is approached through an institutional analysis perspective, intended to facilitate students' understanding of institutions as dynamic points of confluence for organizations, norms, and individual agents. As part of the course's requirements, students conduct a research project exploring recent developments and/or decision-making processes within one of the major media institutions covered during the semester. (Prerequisite: CO130) Three credits.

CO 236  Gender, Sexuality, and Media
This course enables students to examine the relationship between the representation of women and the development of personal and social identity. Students explore issues of gender and reception, cultivating consumerism, body image, and developing relevant new images through theoretical readings as well as the analysis of various media, including television, film, magazines, and advertisements. The course also covers the experiences of women in a variety of media professions. This course meets the U.S. diversity core requirement. (Prerequisite: CO 130) Three credits.
CO 238  Communication and Popular Culture
This course takes the cultural artifacts that engulf us, from fashion to television and from music to comic books, and removes these practices and texts from simply being “entertainment” or “diversion” and asks what these things mean, how they constitute power, and how they shape and reflect the lived experiences of consumers. This course takes very seriously those things that are typically discarded as lacking substance and instead suggests that the meanings and impact of popular culture have dramatic consequences for political, social, and cultural life in the United States. (Prerequisite: CO 130 or instructor approval) Three credits.

CO 239  Consumer Culture
This course explores how social meanings are constructed through commodities and material society, how consumer goods and practices create categories of social difference. In particular, the course focuses on the intersections of consumer practices and gender/sexuality, race and class, articulating the relationship between communication and consumption practices and social/cultural identities. Theoretical approaches include Marxism, Postmodernism, and other economic and social critiques, and explore research methods to empirically investigate questions of culture. Students reflect on questions of social justice in relation to an increasingly materialistic society as they seek to become citizens prepared to “consume with a conscience.” This course meets the U.S. diversity requirement. (Prerequisite: CO 130) Three credits.

CO 240  Intercultural Communication
This course deals with challenges to communication between people of different cultural backgrounds, emphasizing the ways communication practices reveal cultural values and the role of communication in creating and sustaining cultural identities. Students discuss how differences in value orientation, perception, thought patterns, and nonverbal behavior cause misunderstanding, tension, and conflict in business, education, and healthcare settings. This course meets the U.S. diversity requirement (registration preference given to Communication and International Studies majors). (Prerequisite: CO 100 or IL 10 or instructor approval) Three credits.

CO 246  Family Communication
In this course students come to understand how families are constituted through symbolic processes and interaction; explore the verbal and non-verbal communication behaviors that are developed and preferred in different kinds of families; learn various theories for understanding family interactions at the individual, dyadic, group, and systems levels; analyze family communication patterns using established theories and methods; connect family dynamics to social trends and processes including the roles of the mass media and popular culture; and explore ways culture, class, gender, and sexuality affect and are affected by family structures, roles, and communication patterns. (Prerequisite: CO 200 or instructor approval) Three credits.

CO 248  Health Communication
This course surveys the multidimensional processes used to create, maintain, and transform complex scientific information into everyday healthcare practices. A major emphasis is on the processes and complexities of communicating health information in a variety of settings (in hospitals, families, insurance companies, policy organizations, etc.) and through different channels (face-to-face, in medical records, through the mass media, etc.). We will study the verbal and non-verbal communication behaviors of providers, patients, families, insurers, and others in healthcare contexts, as well as health-related messages in the mass media, in order to understand effective and problematic communication about illness and health. (Prerequisite: CO 220 or CO 130 or instructor approval) Three credits.

CO 309  Research Projects in Communication: The Capstone
This course allows students to demonstrate their expertise as communication scholars through discussion and evaluation of contemporary research in communication. The course examines qualitative and quantitative methodologies in understanding the research design process. As members of research teams, students design and conduct research projects related to their areas of concentrated study. This is the required major capstone course. (Prerequisites: Senior status and CO 100, CO 101, CO 130, CO 200, at least one intermediate or advanced course in student's area of concentrated study) Three credits.

CO 320  Communication Management: Training and Consulting
This course examines selected aspects of the practice, resources, and issues surrounding communication training and development. It focuses on the techniques and strategies used by business and professional communication trainers and internal and external consultants to assess and diagnose communication problems as part of an overall process of organizational growth and change. Students examine various research methodologies in communication (e.g., interviewing and the communication audit) as diagnostic tools. (Prerequisites: CO 220 and junior or senior status) Three credits.

CO 321  Communication Processes in Organizations: Negotiation
This course reviews and explores, through simulation and experiential learning, negotiation as a communication process in and among organizations. It focuses on core concepts and approaches to negotiation, and exercises the negotiative process in a contemporary context. In this course, which is open to majors and minors in communication and other disciplines related to the study of humans and their organizations in the work world, participants carry out individual and team work, and contribute on time and proportionately to team preparations and class simulations. (Prerequisites: CO 220 and junior or senior status) Three credits.
CO 329 Contemporary Topics in Organizational Communication
This is an upper-level, undergraduate seminar for students in the Organizational Communication emphasis of the major. The course provides an opportunity to examine in depth particular theories of organizational communication, or to conduct research about communication in particular types of organizations. Emphasis is on contemporary theoretical and/or methodological approaches to the close analysis of interpersonal, group, and intercultural communication in organizational settings, or strategic communication practices of organizations with their external audiences/publics. Topics may include: Organizational Communication in the Global Economy; Communication in Healthcare Organizations; Gender and Communication in Organizations; and Communication in Organizational Crisis. (Prerequisites: CO 220 and junior or senior status) Three credits.

CO 331 American Media/American History
This course examines the role of communication media in history, as well as the history of the media industries. From the earliest media of symbolic interaction to the newest technologies, the course examines why different media come into being, how they function in various societies, and their impact. Students come to understand how media have been influential in maintaining social order and as agents of change. The course pays attention to a variety of national media and international perspectives, with special emphasis on the evolution of American broadcasting. (Pre- or co-requisite: CO 130) Three credits.

CO 335 Globalization, Media, and Culture
Globalization, a complex and transformative process that influences our lives at every level, has produced the increased flow of goods, capital, people, knowledge, images, crime, pollutants, drugs, fashion, viruses, and beliefs across territorial and ideological boundaries of all kinds. This course focuses on the role of communication media (radio, television, film, computers) in the processes of globalization and examines the impact of globalization on cultural representations, cultural identity, and international relations. (Prerequisites: CO 130 or IL 10 and junior or senior status) Three credits.

CO 339 Topics in Media Theory and Criticism
This course provides an opportunity to examine in depth particular media theories or to conduct careful media analysis and criticism. The course emphasizes contemporary theoretical and/or methodological approaches to the close analysis of television, radio, newspaper, the Internet, and/or magazine texts so as to understand the ways meaning is constructed and situated within the larger social context. Topics may include mass media and the public sphere; television criticism; sex, lies, and videos; and children and the media. Students may take CO 339 up to two times with different topics. (Prerequisites: CO 130 and junior or senior status) Three credits.

CO 342 Technoculture and Information Society
This course explores phenomena, trends, and theories related to emerging information and communication technologies (ICTs), as well as relationships among those technologies, socio-economic structures, “old” media institutions, media users, and culture. Through a combination of theoretical and practical explorations that emphasize historical, ethical, and critical thinking, the course introduces students to academic and non-academic perspectives on new media. (Prerequisites: CO 130 and junior or senior status) Three credits.

CO 345 Communication and the Environment
This course examines the relationship between communication and the natural environment. We will discover how the media portray the environment, how environmentalism is produced in public opinion, how the news covers environmental stories, how environmental politics is carried out, how advertising relates to environmental issues, and how narratives construct environments. We will also look at environmental advocacy campaigns and environmental communication in the public sphere. Students investigate how values, attitudes, social structure, and communication affect public perceptions of environmental risk and public opinion about the environment. (Prerequisites CO 100, CO 130) Three credits.

CO 346 Spirituality and Communication
This course engages a critical understanding of the way in which spirituality is constructed through communication. Using the unique perspectives and empirical tools of the communication discipline, the course seeks to familiarize students with the variety of ways in which spirituality has been studied both within and outside of religion. Examining various contexts that engage spiritual discourses, from interpersonal communication settings to organizational, health and mass mediated settings, students reflect on the potential for spiritual discourses to transform individuals and society, and consider their own participation in such discourses. (Prerequisites: CO 200 and junior or senior status) Three credits.

CO 348 Risk Communication
Risk Communication examines the communication theories and research that underlie the study of risky behaviors and the development of effective responses to perceived risks. This course provides an understanding of how communication impacts our assessment of risk, critical thinking and policy making about risk prevention and response, and the creation of preventive programs and campaigns. Students will evaluate and explore the multidimensional processes involved in researching and responding to sustained risks or emergency situations, utilize communication theory to develop appropriate campaigns, and assess their success or failure. Topics may focus on health and environmental risks, security, or disaster response. (Prerequisites: ANY of the following: CO 201, 230, 248 or instructor approval) Three credits.
Computer Science

CO 349 Special Topics: Constructing Social Identities
This course focuses on a specific context where social identities are negotiated through particular discursive practices, emphasizing the verbal and nonverbal communication behaviors that are appropriate in this context and through which people constitute and perform their identities. The course examines symbolic practices and communication norms in families, self-help groups, television talk shows, cyber communities, social movements, and genders/sexualities, using approaches such as symbolic convergence theory, social constructivism, ethnography of communication, and conversational analysis. Students may take this course up to two times with difference subtitles. (Prerequisites: CO 200 or CO 340 or instructor approval, and junior or senior status) Three credits.

CO 396/397 Independent Study
This course allows students to thoroughly investigate communication concepts, theories, or issues presented in a previously completed communication course. Independent study does not substitute for any other required course(s) in the communication program and students’ investigations must be scholarly in intent. An independent study may be taken only twice. CO 396 is offered in fall; CO 397 is offered in spring. (Prerequisites: junior or senior status and a communication faculty member’s sponsorship) Three credits per semester; six-credit limit.

CO 398/399 Internship
Communication internships provide students with first-hand knowledge about the field of work, allow them to experience new professional activities and relationships, help them apply conceptual knowledge and skills in communication in the work environment, and allow them to experience the problems and successes of efficiently and effectively communicating within a complex organization. An internship may not substitute for any other required course(s) in the communication program. Students may take an internship twice for credit, one or three credits per semester. CO 398 is offered in fall; CO 399 is offered in spring. (Prerequisites: 3.0 overall GPA, junior or senior status) One or three credits per semester; six-credit limit.

Major in Computer Science

B.A. with a Major in Computer Science
To earn a B.A. students complete:

- CS 141 Introduction to Computer Science I
- CS 142 Introduction to Computer Science II
- CS 231 Discrete Mathematics
- CS 232 Data Structures
- CS 252 Software Design
- CS 342 Theory of Computation
- CS 343 Analysis of Algorithms
- CS 353 Principles of Compiler Design

- One additional 300 level CS course or CS 221
- Two additional courses from 300 level CS courses or approved interdisciplinary electives
- One of MA 122, MA 126, or MA 172

Computational thinking and processes permeate our daily lives, revolutionizing our understanding of both the natural world and of ourselves. Knowledge of computer science has become highly valued in such diverse fields as psychology, biology, and even philosophy. A degree in Computer Science gives one both marketable skills and the intellectual breadth that can be applied to any career choice.

The Computer Science program is dedicated to giving each student a personal, challenging, and thoroughly enjoyable experience.

The Computer Science program offers both a B.A. and a B.S. degree. We also offer a minor, which makes a strong addition to one’s resume. See the course description for CS 397 to learn about internship possibilities. All degrees are received through the Department of Mathematics and Computer Science. We also offer a double major in Mathematics and Computer Science. Please contact Dr. Adam King (king@mail.fairfield.edu) if you have any questions regarding the program.
Course Descriptions

CS/MA 141* Introduction to Computer Science I
Computer science and computational problem-solving have transformed our society — both practically and conceptually. We will study the ideas and methods that make this field so significant and profound. We will also learn how to solve problems by programming — breaking them down, thinking logically and precisely, and then creating algorithms — step-by-step instructions. The building blocks of algorithms, while surprisingly simple, allow us to create and explore a myriad of creative projects, just as musicians create and explore a vast array of beautiful melodies with only twelve notes. This course requires no previous experience. Four credits.
* May be taken to fulfill the core requirement in mathematics.

CS 142 Introduction to Computer Science II
In this continuation of CS/MA 141, we dive deeper into the concepts and methods covered in CS/MA 141. Some of the fascinating topics covered include graphics, artificial intelligence (programs that can learn, much like a human mind), cellular automata (simple two dimensional “creatures” that evolve over time), recursion (algorithms that refer to themselves -- very strange!), interpreters (programs that can create virtual computers), Turing machines (very simple models of a computer), and logic. Programming concepts include an introduction to object oriented programming. (Prerequisite: CS/MA 141) Four credits.

CS 221 Computer Organization
This course introduces computer organization using several levels of abstraction to represent a simple computer, starting with logic gates, progressing to assembly language, and ending with a high-level programming language. The course concludes with the design of an assembler/simulator for the model computer. (Prerequisite: CS/MA 141) Four credits.

CS 231 Discrete Mathematics
For course description see MA 231 Discrete Mathematics.

CS 232 Data Structures
This course presents problem solving with abstract data types such as lists, linked lists, stacks, queues, graphs, and trees. The close connection between data and algorithms is stressed. (Prerequisite: CS/MA 142 or CS 132) Three credits.

B.S. with a Major in Computer Science
B.S. students take the same eight required courses that the B.A. students do. In addition, they take:

CS 221 Computer Organization
CS 354 Theory of Programming Languages

• Two additional 300 level CS courses
• One additional course from 300 level CS courses or approved interdisciplinary electives
• MA 172 (MA 122 or MA 126 with permission)
• One science course that includes a lab

Minor in Computer Science
To earn a minor, students complete:

CS 141 Introduction to Computer Science I
CS 142 Introduction to Computer Science II
CS 232 Data Structures

One of:
CS 252 Software Design
CS 342 Theory of Computation
CS 343 Analysis of Algorithms
CS 354 Programming Languages

One additional CS course numbered 300 or higher.

Interdisciplinary Electives
AE 282 Ethics and Computers; AE 286 Ethics of Research and Technology; HR 101 Minds and Bodies; PH 155 Questions in Modern and Contemporary Philosophy: Philosophy of Science; PH 203 Logic; PH 250 Philosophy of Mind; PY 285 Cognitive Psychology.
CS 252  Software Design
This course focuses on the object-oriented design methods using a modern object-oriented programming language like Java. Students will learn how to design Applets that can be run on web pages as well as Java applications. Topics examined include graphical user interfaces (GUI), inheritance, polymorphism, exception handling, file input/output (I/O), threads, UML, interfaces, graphics, and networking basics. (Prerequisite: CS 232) Three credits.

CS 322  Computer Architecture
This course examines the theory of logic design including gates, timing diagrams, truth tables, design of basic arithmetic operations, and control mechanisms, as well as general properties of major hardware components (central processing unit, arithmetic-logic unit, memory, input/output devices) and communication between them (buses, interrupts). Surveys actual computer systems. (Prerequisite: CS 221) Three credits.

CS 324  Microprocessors
This course reviews conventional logic design using MSI building blocks: multiplexers, decoders, comparators, arithmetic-logic units, registers, and memory. It introduces microprocessor controllers, applying them to the design of several small projects such as a serial-parallel converter, a four-function calculator, and a traffic-light controller. Students design a process controller as a final project. (Prerequisite: CS 221) Three credits.

CS 331  Operating Systems
This course introduces the major system utilities of a general-purpose computer: editors, assemblers, interpreters, linkers, loaders, and compilers. The course then presents the operating system for the computer: command language, access and privacy, management of processes, memory, and input/output devices. (Prerequisite: CS 232) Three credits.

CS 342  Theory of Computation
This course explores what computers can and can’t do by examining simple mathematical models of computation. Topics include finite state machines, regular expressions, non-determinism, pushdown automata, context-free grammars, and Turing machines. We will see that there are limits to what computers can do, and in doing so, we will learn about what a computer really is — you might be surprised. This course is also listed as MA 342. (Prerequisite: CS/MA 231) Three credits.

CS 325  Artificial Intelligence
This course, which examines computer implementation of processes of thought, includes knowledge representation, games, theorem proving, heuristics, symbolic techniques, neural networks, genetic algorithms, and artificial life. (Prerequisite: CS 232) Three credits.

CS 377  Numerical Analysis
For course description see MA 377 Numerical Analysis.

CS 252  Software Design
This course focuses on the object-oriented design methods using a modern object-oriented programming language like Java. Students will learn how to design Applets that can be run on web pages as well as Java applications. Topics examined include graphical user interfaces (GUI), inheritance, polymorphism, exception handling, file input/output (I/O), threads, UML, interfaces, graphics, and networking basics. (Prerequisite: CS 232) Three credits.

CS 322  Computer Architecture
This course examines the theory of logic design including gates, timing diagrams, truth tables, design of basic arithmetic operations, and control mechanisms, as well as general properties of major hardware components (central processing unit, arithmetic-logic unit, memory, input/output devices) and communication between them (buses, interrupts). Surveys actual computer systems. (Prerequisite: CS 221) Three credits.

CS 324  Microprocessors
This course reviews conventional logic design using MSI building blocks: multiplexers, decoders, comparators, arithmetic-logic units, registers, and memory. It introduces microprocessor controllers, applying them to the design of several small projects such as a serial-parallel converter, a four-function calculator, and a traffic-light controller. Students design a process controller as a final project. (Prerequisite: CS 221) Three credits.

CS 331  Operating Systems
This course introduces the major system utilities of a general-purpose computer: editors, assemblers, interpreters, linkers, loaders, and compilers. The course then presents the operating system for the computer: command language, access and privacy, management of processes, memory, and input/output devices. (Prerequisite: CS 232) Three credits.

CS 342  Theory of Computation
This course explores what computers can and can’t do by examining simple mathematical models of computation. Topics include finite state machines, regular expressions, non-determinism, pushdown automata, context-free grammars, and Turing machines. We will see that there are limits to what computers can do, and in doing so, we will learn about what a computer really is — you might be surprised. This course is also listed as MA 342. (Prerequisite: CS/MA 231) Three credits.

CS 325  Artificial Intelligence
This course, which examines computer implementation of processes of thought, includes knowledge representation, games, theorem proving, heuristics, symbolic techniques, neural networks, genetic algorithms, and artificial life. (Prerequisite: CS 232) Three credits.

CS 377  Numerical Analysis
For course description see MA 377 Numerical Analysis.
CS 392  **Computer Science Seminar**  
Students take this course, which was designed to cover topics not in the curriculum, by invitation only and are expected to prepare topics under faculty direction.  
Three credits.

CS 397/398  **Internship in Computer Science**  
The internship program provides computer science majors with an opportunity to gain practical, career-related experience in a variety of supervised field settings. Internships can be in any one of a number of areas, such as software applications or hardware applications. Interns spend a minimum of 10 hours per week in on-site work, complete a required academic component specified by a faculty advisor, and satisfy the University Internship Policy requirements (available from the Career Planning Center). Students may register for internships during the summer session and/or one or two semesters and may earn a maximum of six internship credits. (Prerequisites: Senior standing, completed application form, acceptance by the field placement supervisor, and approval by the Department of Mathematics and Computer Science.) An internship may not replace a computer science elective to fulfill the requirement for a major in computer science. One-to-three credits per semester.

CS 399  **Independent Study in Computer Science**  
Independent study provides students with the opportunity to study areas not covered in the undergraduate curriculum. Under the guidance of a faculty member, advanced students examine an aspect in computer science through reading and research. While the study may focus on a software or hardware project, it must incorporate an analysis of written material comparable to other upper-division elective courses. Students must apply to a professor under whose direction they wish to study and obtain the approval of the department chair. This course does not fulfill the computer science elective requirements for majors. Three credits.

### Non-Major Course Descriptions

**CS 131  Computer Programming I**  
This course provides an overview of computer organization and hardware, and an introduction to the science and theory of object-oriented programming including top-down structured program design, problem specification and abstraction, algorithms, data structures, documentation, debugging, testing, and maintenance. The course presents programming applications including input/output, selection, repetition, arrays, functions, and procedures. The course, which also addresses the ethical and social issues in computing, emphasizes communication skills in documentation and design of user interface. Three credits.

**CS 132  Computer Programming II**  
This continuation of CS 131 covers additional topics in the science and theory of programming including modular design, recursion, program verification, robustness, and portability. The course presents high-level language programming applications including records, sets, files, class design, inheritance, and polymorphism; introduces data structures such as stacks, linked lists, searching, and sorting; and discusses ethical and social issues in computing. The course continues to emphasize the communication skills introduced in CS 131. (Prerequisite: CS 131) Three credits.

**CS 133  Introduction to C Programming**  
This course focuses on the use of C language in top-down structured program design. Topics include C data types, functions, and file input/output. The course introduces software engineering as applied to a project such as a database management system. Three credits.

**CS 233  Introduction to C++ Programming**  
This course introduces object-oriented programming using the C++ programming language. The first part of the course introduces C++ extensions to the C language such as stream input/output, classes, and operator overloading. The second part of the course focuses on design of a graphics interface and illustrates the object-oriented programming concepts of inheritance, object constructors/destructors, and message passing. Three credits.

The curriculum of the Department of Economics blends basic economic concepts and their applications with contemporary issues. Courses develop reasoning capacity and analytical ability in students. By focusing on areas of application, students use economic principles to stimulate their powers of interpretation, synthesis, and understanding. The department’s individualized counseling encourages majors to tailor their study to career and personal enrichment goals. A major in economics provides an excellent background for employment in the business world while maintaining the objectives of a liberal education. The economics major also prepares students for advanced study in graduate or professional schools.

Requirements

Economics majors are urged to take MA 19 Introduction to Calculus, or MA 121-122 Applied Calculus I-II, or MA 171-172 Differential/Integral Calculus to fulfill their core mathematics requirement. Students interested in the bachelor of science degree should take MA 121-122 or MA 171-172, which can be waived with permission of the chair.

Bachelor of Arts Degree

With its focus on policy analysis and business applications, this degree is designed for students who plan to enter the job market in business or government, or who plan to study business or law at the graduate level.

For a 30-credit bachelor of arts degree in economics, students complete the following:
- EC 11 Microeconomics
- EC 12 Macroeconomics
- EC 204 Intermediate Microeconomic Theory
- EC 205 Intermediate Macroeconomics Theory
- Elective Economics Department courses totaling 18 credits.

No more than three 100-level courses may be counted toward the requirements of the major. Additional 100-level courses may be taken as part of the student’s distribution of elective courses.

Bachelor of Science Degree

With its emphasis on quantitative skills and statistical analysis, this degree prepares students for quantitative applications of economic theory as practiced in actuarial work, economic research, or graduate studies in economics. Students who complete this degree are urged to couple it with a minor in mathematics.

For a 33-credit bachelor of science degree in economics, students complete the following:
- EC 11 Microeconomics
- EC 12 Macroeconomics
- EC 204 Intermediate Microeconomic Theory
- EC 204L Intermediate Microeconomics Lab
- EC 205 Intermediate Macroeconomic Theory
- EC 205L Intermediate Macroeconomics Lab
- EC 278 Economic Statistics
- EC 290 Mathematical Economics
- EC 380 Econometrics
- Elective Economics Department offerings totaling nine credits.

A grade of C or better is necessary in the required courses for the bachelor of science degree. No more than two 100-level courses may be counted toward the requirements of the major.

Minor in Economics

For a 15-credit minor in economics, students complete the following:
- EC 11 Microeconomics
- EC 12 Macroeconomics
- Three elective Economics Department offerings totaling nine credits.

No more than one 100-level economics course may be counted toward the minor.
Course Descriptions

EC 11  Introduction to Microeconomics
This course analyzes the behavior of individual consumers and producers as they deal with the economic problem of allocating scarce resources. The course examines how markets function to establish prices and quantities through supply and demand, how resource costs influence firm supply, and how variations in competition levels affect economic efficiency. Topics may include antitrust policy, the distribution of income, the role of government, and environmental problems. The course includes computer applications. Three credits.

EC 12  Introduction to Macroeconomics
This course develops models of the aggregate economy to determine the level of output, income, prices, and unemployment in an economy. In recognition of the growing importance of global economic activity, these models incorporate the international sector. The course examines and evaluates the role of public economic policy, including fiscal and monetary policy. Topics may include growth theory and price stability. The course includes computer applications. (Prerequisite: EC 11 or permission of the instructor) Three credits.

EC 112  Economic Aspects of Current Social Problems
This course uses a policy-oriented approach to study contemporary economic issues. Topics include government spending, the role of federal budgets in solving national problems, poverty, welfare, social security, population, the limits to growth controversy, pollution, energy, and regulation. Three credits.

EC 114  The Economics of Race, Class, and Gender in the American Workplace
This course examines the impact of race, class, and gender differences on decisions made in households and in the workplace. It begins with an in-depth analysis of labor supply decisions and responsibilities of households, moving to an examination of labor demand decisions and wage-rate determination. The course reviews applications of theoretical predictions as they relate to important public policy issues such as child and elder care, social security, pay equity, the glass ceiling, affirmative action, sexual harassment, and poverty. This course meets the U.S. diversity requirement. Three credits.

EC 120  Environmental Economics
This course, which presents an overview of the theory and empirical practice of economic analysis as it applies to environmental issues, first establishes a relationship between the environment and economics. It then develops the concept of externalities (or market failures) and the importance of property rights before exploring the valuation of non-market goods. It examines the practice of benefit-cost analysis and offers economic solutions to market failures, while highlighting pollution control practices, especially those based on incentives. Throughout, the course examines current issues regarding environmental protection around the globe. This course meets the world diversity requirement. Three credits.

EC 125  Global Competition and Competitiveness
This course identifies and explores the factors that make products, firms, and nations competitive, using a strong international, case study, and group discussion emphasis. The course draws on examples from manufacturing and service activities in Asia, Europe, and North America. Three credits.

EC 140  Health Economics
This course applies microeconomic theory to the health sector of the U.S. economy. Topics include the demand for health care and health insurance, managed care and the role of government, physician compensation, and specialty choice, the role of nurses and other healthcare professionals, the hospital sector, and medical cost inflation. Three credits.

EC 152  Economics of Sports
This course develops and examines the tools and concepts of economic analysis as they apply to the sports industry. Topics in professional sports include free agency, salary cap, and new franchises. The course also explores economic issues and institutional structures of sports such as golf and tennis, and the broader industry including the National Collegiate Athletic Association, sports equipment, advertising, minor leagues, and the Olympics. Students gain an increased understanding of how economics affect them through this combination of sports and economics. Three credits.

EC 185  Regional Economic Development
This course includes two key components: a theoretical examination of the basic theories of regional economic development such as growth poles, spillovers, infrastructure requirements, and center-periphery analysis; and an application of these theories to a specific economic issue. Students participate in a comprehensive study of a significant economic issue facing a Connecticut community, in cooperation with a regional agency, resulting in detailed analysis of the issues and potential solutions. Fieldwork is required. Three credits.

EC 204  Intermediate Microeconomic Theory
This course builds upon and expands the theoretical models of EC 11. The course introduces indifference curves to explain consumer behavior; short- and long-run production functions, showing their relationship to product costs; and the efficiency of various competitive market structures. Topics include marginal productivity theory of income distribution, monopoly, and general equilibrium theory. Required for all majors. (Prerequisite: EC 11) Three credits.
EC 204L Intermediate Microeconomic Theory Lab
In this lab, students actively engage in the science of economics. Activities include lectures on mathematical methods, advanced problem-solving projects, collaborative teamwork experiences, and computer simulations. Note: This lab is required of all students pursuing the B.S. in economics; it is optional for students earning the B.A. (Co-requisite: EC 204) One credit.

EC 205 Intermediate Macroeconomic Theory
This course, which includes computer applications, analyzes the determination of national income and output; fiscal and monetary tools; and growth, inflation, and stabilization policies. Required for all majors. (Prerequisite: EC 12) Three credits.

EC 205L Intermediate Macroeconomic Theory Lab
In this lab, students actively engage in the science of economics. Activities include lectures on mathematical methods, advanced problem-solving projects, collaborative teamwork experiences, and computer simulations. Note: This lab is required of all students pursuing the B.S. in economics; it is optional for students earning the B.A. (Co-requisite: EC 205) One credit.

EC 210 Money and Banking
This course covers the commercial banking industry, the money market, Federal Reserve operations and policy making, and monetary theory. (Prerequisite: EC 12) Three credits.

EC 220 Issues in Economic Policy
After examining economic rationales for government intervention in markets, students analyze microeconomic and macroeconomic policy issues using economic concepts and tools. Topics vary depending on current events. Previous policy issues include welfare reform, markets for human organs, alcohol consumption by college students, the extent to which monetary policy has shaped the post-war business cycle, policy-maker reaction functions, the role of discretionary fiscal policy, the Bush tax cut, and the impact of federal government deficits on the economy. (Prerequisite: EC 12) Three credits.

EC 224 Labor Economics and Labor Relations
Nearly 70 percent of income earned in the United States is a return to labor. This course applies the fundamentals of microeconomic and macroeconomic analysis to important decisions that people make in labor markets. From an employee’s perspective, questions include: Should I work in exchange for a wage? If so, how much? How will my work affect my lifestyle and family decisions? Should I go to school to improve my skills? From an employer’s perspective, questions include: Should I hire workers? If so, how many? How should I pick workers out of a pool of applicants? What techniques should I use to provide incentives for these workers? Many of the answers to these questions require complex analysis and an understanding of the impact of government policy on the workplace. The course explores a variety of public policy issues such as minimum wage programs, government welfare programs, workplace regulatory requirements, Title IX, immigration, and the union movement. (Prerequisites: EC 11, EC 12) Three credits.

EC 225 Environmental Economics: Tools and Techniques Applied to U.S. Policy
This in-depth examination of the economic tools used in environmental economics and policymaking builds on basic environmental economic concepts and provides the opportunity to put those concepts into practice. The course explores common externalities and market failures in the United States and analyzes governmental policies used to control them. (Prerequisite: EC 11 or EC 120, or permission of instructor.) Three credits.

EC 230 Comparative Economic Systems
Is communism dead? Is capitalism the only real economic system left? This course explores the various economic systems that are used to distribute resources, i.e., to decide “who gets what” in a nation’s economy. The course considers the differences between alternative distribution mechanisms, what it means to transition from one system to another, and how these economic decisions are affected by political and national realities. Because there are so many international alternatives to be explored, each semester focuses on an economic region of the globe – Asian, Eastern European, African, or Latin American. This course, where appropriate, is available for credit in international studies or area studies programs. (Prerequisites: EC 11, EC 12) Three credits.

EC 231 International Trade
This course covers international trade theory, U.S. commercial policy (tariffs, quotas), common markets, trade of developing nations, balance of payments disequilibria, and multinational enterprises. (Prerequisite: EC 11) Three credits.

EC 232 International Economic Policy and Finance
This course explores international financial relations. Topics include the international monetary system, exchange rate systems, balance of payments adjustment mechanisms, and changes in international finance relations. It treats theoretical concepts and considers governmental policy approaches to the various problems. (Prerequisite: EC 12) Three credits.

EC 233 Economic Development of Third World Nations
This course considers the nature and causes of problems facing low-income nations, with a focus on the impact that various economic policies have on promoting economic development. This course meets the world diversity requirement. (Prerequisites: EC 11, EC 12) Three credits.

EC 245 Antitrust and Regulation
This course examines the relationship between government and business, reviewing antitrust laws and cases in terms of their impact on resource efficiency. It
develops the format of agency command and control regulation with specific examples from the federal sector. (Prerequisite: EC 11) Three credits.

**EC 246 Law and Economics**
This course introduces topics from central areas of the common law: property, contracts, torts, and criminal law. The course is intended for students who desire an understanding of the important role of law in modern society or who are considering graduate study in law. It explains the development of the law and legal institutions in terms of the basic tools of economic reasoning. (Prerequisite: EC 11) Three credits.

**EC 250 Industrial Organization**
Using microeconomic theory, this course examines the economic behavior of firms and industries, identifying factors affecting the competitive structure of markets and using these structural characteristics to evaluate the efficiency of resource use. Topics include mergers, measures of concentration, pricing, entry barriers, technological change, and product development. (Prerequisite: EC 11) Three credits.

**EC 252 Urban Economics T**
This course analyzes the development of modern urban areas by applying the tools of economic analysis to their problems. Topics include transportation, housing, and the provision and financing of public services. (Prerequisites: EC 11, EC 12) Three credits.

**EC 265 Distribution of Income and Poverty in America**
Students examine various theories of economic justice so that the actual distribution of income in the United States can be analyzed. The course considers factors that cause changes in income distribution and in the number of persons in poverty. This course meets the U.S. diversity requirement. (Prerequisites: EC 11, EC 12) Three credits.

**EC 273 History of Economic Thought**
This course examines the development of economic thought from ancient times to the present. (Prerequisites: EC 11, EC 12) Three credits.

**EC 275 Managerial Economics**
Students apply economic concepts and theory to the problem of making rational economic decisions. Topics include inventory control, decision-making under risk and uncertainty, capital budgeting, linear programming, product pricing procedures, forecasting, and economic versus accounting concepts of profit and cost. The course includes computer applications. (Prerequisite: EC 11) Three credits.

**EC 276 Public Finance**
This course examines government expenditure and tax policies with an emphasis on evaluation of expenditures; the structure of federal, state, and local taxes; and the budget as an economic document. (Prerequisites: EC 11, EC 12) Three credits.

**EC 278 Statistics**
This course introduces students to descriptive statistics, probability theory, discrete and continuous probability distributions, sampling methods, sampling distributions, interval estimation, and hypothesis testing. A weekly lab provides opportunities for active exploration and application of course concepts. (Prerequisites: EC 11, EC 12) Four credits.

**EC 290 Mathematical Economics**
This course applies mathematical models and concepts to economic problems and issues. Mathematical techniques include calculus and matrix algebra. Economic applications include the areas of consumer theory, theory of the firm, industrial organization, and macroeconomic modeling. (Prerequisites: EC 11, EC 12, and MA 19 or equivalent) Three credits.

**EC 298 Independent Study**
For economic majors only, this course is open to seniors by invitation or mutual agreement with the instructor. Three credits.

**EC 299 Internship**
Students, placed in a professional environment by the department, use economic and analytical skills acquired from their courses in a non-academic job setting. Students submit a written assignment detailing their internship experience to a faculty sponsor by the end of the term. (By invitation only) Three credits.

**EC 306 Business Cycles and Economic Forecasting**
This course considers the nature and causes of business cycles, developing tools to analyze past fluctuations and to forecast future trends. The course emphasizes theory and practical applications. (Prerequisite: EC 205) Three credits.

**EC 320 Financial Markets and Institutions**
Topics include capital markets, financial intermediaries, equities, bonds, options, futures, security analysis, portfolio theory, and the efficient markets hypothesis. Students manage a hypothetical portfolio and use a computer model. (Prerequisite: EC 210) Three credits.

**EC 327 Econometrics**
This course introduces students to the process used to formulate theories of economic behavior in mathematical terms and to test these theories using statistical methods. The course discusses the technique and limitations of econometric analyses as well as methods available for overcoming data problems in measuring quantitative economic relationships. (Prerequisites: EC 11, EC 12, and EC 278) Three credits.

**EC 398 Senior Seminar**
Limited to senior majors in economics, this seminar seeks to familiarize participants with recent developments in the discipline and sharpen research skills. Students complete a research project concerning a topic of their choice. The course includes computer applications. (Prerequisite: permission of the instructor) Three credits.
We offer preferred admission into our graduate programs to qualified juniors and seniors, regardless of whether they have enrolled in our traditional 4-year undergraduate certification track previously. Qualified candidates will be permitted to enroll in graduate education courses during their senior year and will be mentored by the graduate faculty during their senior year. Candidates accepted for preferred admission to the graduate programs will be offered individually planned programs that blend elements of the traditional undergraduate courses and graduate courses. Please contact Dr. Calderwood, chair of the Curriculum and Instruction Department, for further information.

Our programs for aspiring teachers are organized around reflective inquiry and socially responsible professional practice. We are committed to educating scholar-practitioners who have the knowledge, skills, and dispositions to: enact meaningful connections between theory and practice; promote a developmental model of human growth and learning; exercise ethical professional judgment and leadership; and advocate for quality education for all learners.

As members of an inclusive community of learners, we (university faculty, experienced and aspiring classroom teachers, and community members and leaders) work together to create and sustain exemplary learning environments that empower K-12 students to become engaged, productive citizens in their communities.

Across all programs, our foci for inquiry and action include: the socio-cultural and political contexts of education and schooling; the complexities of teaching and learning; teacher work and professional cultures; culturally relevant understandings of human growth and development; and socially responsible uses of technology in schooling and society.

Decisions for formal admission to the undergraduate teacher education programs are made three times a year. The deadlines for submission of application materials are January 15, April 15, and October 1. Admission information sessions for all programs will be offered each semester, and the faculty of the Curriculum and Instruction Department will be available for personal conferences by appointment throughout the year.

Through our undergraduate and graduate teacher education programs, candidates may be certified in one of the following subject areas:

Secondary (grades 7-12 and departmentalized instruction in grades 4, 5, and/or 6) English (language arts), history/social studies (sociology/anthropology, politics/economics), natural sciences (biology, chemistry, or physics), mathematics, world languages (French, German, Spanish, or Latin), and K-12 music education. (Elementary certification must be completed at the graduate level, but may be started as a senior).
To be admitted to the undergraduate teacher education programs, or to earn preferred admission status to our graduate programs in elementary and secondary education, students:

1. Possess and maintain an overall minimum GPA of 2.67.
2. Pass or waive the Praxis I testing requirement.
3. Major in an appropriate discipline.
4. Submit an application (available in the GSEAP dean’s office, CNS 102).
   a. Attach an essay that examines an understanding of oneself as an educator.
   b. Attach two letters of recommendation.
5. Interview with the faculty.
6. With faculty guidance, determine a plan of study.
7. Submit a declaration of minor form.

To waive the PRAXIS I requirement, a candidate must have a minimum SAT score of 1100, with verbal and mathematics sub-scores of 450 or higher. Note: For candidates who took the SAT prior to April 1, 1995, the overall required SAT score is 1000, with a score of at least 400 in both sub-tests. Applications for admission to the education minor may be obtained from the director of secondary certification programs. Early application to the minor is recommended. While candidates may complete a maximum of six credits in education coursework before formal admission to the minor, they cannot continue past this point until they have been formally declared.

All certification programs include a required student teaching experience. Frequently, this occurs in the spring semester of the senior year. It is also possible to complete student teaching and some other courses as a graduate student. Candidates must complete all coursework and student teaching and pass the appropriate PRAXIS II or ACTFL content test(s) before they receive an institutional endorsement for state certification. Students seeking certification in one of the world languages must pass the appropriate oral and written ACTFL tests at or above the intermediate high level.

In view of the teacher’s role in the school and community, candidates whose relevant academic productivity is marginal or inadequate, who do not embody a socially responsible professional disposition, or who demonstrate unsuitable personal qualities, will not be recommended for continuation in the teacher preparation program, student teaching placement, or state certification. In addition all prospective and admitted candidates to an undergraduate teacher education program are expected to demonstrate the personal and professional dispositions that are embodied in the Mission Statement of the Graduate School of Education and Allied Professions and outlined in the ethical codes of their chosen profession.

Minority Teacher Incentive Grants
The Minority Teacher Incentive Grant Program provides up to $5000 a year for two years of full time study in a teacher preparation program – usually junior or senior year, as long as you are an admitted Education Minor and complete all the requirements.

As an added bonus, you may receive up to $2500 a year, for up to four years, to help pay off college loans if you teach in a Connecticut public elementary or secondary school.

To qualify, you must be a full-time college junior or senior of African-American, Hispanic/Latino, Asian-American, or Native American heritage, and be nominated by the chair of the Curriculum and Instruction Department.

To apply, obtain a nomination form from www.ctdhe.org/mtigp.htm.

Course Requirements for candidates seeking secondary or music certification concurrent with their undergraduate degree
All candidates following the traditional 4-year route in these certification programs must take the following courses leading to initial educator certification. Candidates seeking preferred admission to a graduate program or permission to take graduate education courses will be advised about requirements by the graduate faculty:

- ED 241** Educational Psychology
- ED 329** Philosophy of Education: An Introduction
  (acceptable as third course in Area III provided the student has been admitted and continues to complete the education minor)
- ED 350 Special Learners in the Regular Classroom
- ED 363 Methods of Teaching in Secondary Schools
  OR
- ED 362 Special Methods in Secondary School English
- ED 381 Directed Observation and Supervised Student Teaching (12 credits)
- ED 382 Student Teaching Seminar
- MD 300 Introduction to Educational Technology
- SO 162** Race, Gender, and Ethnic Relations
  History** one semester of a survey course in U.S. history covering 50 or more years. A list of acceptable courses may be obtained from the director of secondary certification programs.

** Double-counts toward core requirements

In addition, candidates must complete all coursework in their major area of study.
Secondary Certification in English
English majors seeking certification must also take the following:

ED 369** Developmental Reading in the Secondary School
EN 305* Literature for Young Adults
EN/W 311* Advanced Composition for Secondary School Teachers
EN/W 317* Traditional and Structural Grammar

* Double-counts toward English major
** ED 369 is offered through the Graduate School of Education and Allied Professions

Certification in History/Social Studies
Candidates majoring in history can earn this certification by:

• completing the history major (including study in U.S. history, western civilization or European history, and non-western history); and

• earning a total of 18 credits in the social sciences; coursework must be selected from each of the three following disciplines: economics, politics, and sociology/anthropology. Note: SO 162 Race, Gender, and Ethnic Relations must be taken and may be counted as one of the social science courses. It will also count toward the core requirement in the social sciences.

Candidates majoring in economics, politics, or sociology/anthropology may earn this certification by:

• completing all coursework in their major;

• earning a total of 18 credits in history, including courses dealing with U.S. history, western civilization or European history, and non-western history (such courses can include HI 30 and the second core requirement in history); and

• completing one additional three-credit social science course (economics, politics, or sociology) outside of their major. Note: This course may be double-counted toward the core requirement. SO 162 Race, Gender, and Ethnic Relations must be taken and may be counted toward this requirement. It will also count toward the core requirement in the social sciences.

Certification in the Natural Sciences
Candidates majoring in one of the natural sciences (biology, chemistry, or physics) may earn certification in that science by completing their major coursework. A certification in integrated science (includes coursework in biology, chemistry, physics, and earth science) is also available through Fairfield University.

Certification in Mathematics
Candidates must complete a major in mathematics, including study in calculus and geometry.

Certification in World Languages: Modern (French, German or Spanish) or Ancient (Latin)
Candidates must complete the major coursework in the language of the intended certification (modern or classical). When a valid secondary world language certificate is held, the holder can add an elementary world language endorsement by successfully completing an additional six credits: three semester hours of credit in language acquisition in young children and three semester hours of credit in methods of teaching a world language at the elementary level. Courses satisfying these content areas are available at the graduate level. Seniors may take these courses with permission from the CAS Dean's office and the instructor.

Certification in Music
Candidates seeking music certification are required to take all education courses as other candidates with the following exceptions:

• In place of MD 300 Introduction to Educational Technology, music candidates will take MU 363 Music Technology for Music Educators

• In place of ED 363 Methods of Teaching in Secondary Schools, music candidates will take MU 360 Elementary General Music Methods, MU 361 Choral Conducting Methods, and MU 362 Secondary Instrumental Methods.

Music candidates must also complete an Instrumental Practicum.

Academic Advisement Note
Candidates must also seek academic advisement from the special advisor for education certification in their subject area to insure that planned program requirements are fulfilled for both the education minor and their specific certification content area and core.

Descriptions of the education courses leading to initial certification are found below. Descriptions for all other courses are found under appropriate departmental course listings.
Undergraduate Teacher Education Course Descriptions

(graduate teacher education course listings are available in the GSEAP catalog)

ED 241   Educational Psychology
This course considers a particular application of the more important psychological principles to educational theory and practice, embracing a systematic study of the educable being, habit formation, phases of learning, intellectual and emotional growth, and character formation. The course, which includes a 15-hour field experience in an approved, ethnically diverse public school setting, also examines individual differences, transfer of training, interest, attention, and motivation insofar as they influence the teaching process. Three credits.

ED 329   Philosophy of Education: An Introduction
This course applies the basic concepts of philosophy to education in general and to contemporary education theory in particular to acquaint educators with philosophical terminology, to improve the clarity of their thinking, and to encourage personal commitment to their own life philosophies. This course includes a 15-hour field experience in an approved, ethnically diverse public school setting. Three credits.

ED 362   Special Methods in Secondary School English
This course focuses on the organizational pattern in which English can best be taught and analyzes the effectiveness of various methodologies in bringing about changes in the language usage of young people. The course also considers such factors as appropriate curricula materials; methods of organization; approaches to the study of literature; and procedures most cogent in the field of grammar, composition, oral communication, and dialogue. The course includes working with a practicing teacher and visiting his or her classroom at least three times in a secondary school setting. (Prerequisite: submission of a résumé, a one-page writing sample on your philosophy of education, and completion of a data form, all of which are submitted to the Director of Secondary Certification Programs) Three credits.

ED 363   Teaching Methods for Secondary School
This course includes a comprehensive study of the principles, methods, and materials necessary for teaching in the middle, junior, and senior high schools. Candidates explore effective elements of instruction as they relate to practical applications in the classroom. The course addresses teaching specific subject areas through readings, subject-area reports, and a unit of work. Candidates practice teaching techniques in videotaped mini-teaching sessions. This course requires a field service component consisting of 15 hours working with a classroom teacher. Guidance on certification issues is provided. Throughout the semester, candidates will participate in subject-specific methods labs. These labs introduce candidates to curriculum and pedagogy in their certification area and provide opportunities for candidates to design subject-specific learning experiences for diverse learners. Taught by content area specialists in the certification subject, the Methods Lab engages candidates with up-to-date curriculum and best practices in the field. (Prerequisites: Submission of a résumé, a one-page philosophy of education writing sample, a data form, and permission of the coordinator of the graduate secondary education program) Three credits.

ED 369   Developmental Reading in the Secondary School
Topics include methods and materials for improving reading and study skills at the secondary level and the application of developmental reading skills in all curriculum areas. Three credits.
ED 381 Directed Observation and Supervised Student Teaching
This course offers a semester-long experience in a local public school for qualified candidates for secondary teaching. Candidates engage in observation and teaching five days each week. Emphasized concepts include classroom management dynamics, teaching techniques, lesson plan organization, and faculty duties. Candidates participate in group seminars one afternoon each week where they discuss their experiences and attend presentations on reading methods, audio-visual aids, and other topics. Candidates participate in individual conferences and receive assistance from their University supervisors and the cooperating teacher(s) who is BEST trained. Candidates must submit an application for placement with the director of student teaching placement in the prior semester. (Prerequisite: formal acceptance into the education minor) Twelve credits.

ED 382 Student Teaching Seminar
This weekly seminar is taken concurrently with student teaching. The seminar focuses on the issues and problems faced by student teachers and on the culture and the organization of schools. Although much of the subject matter of the seminar flows from the on-going student teaching experience, attention is paid to issues such as school governance, codes of professional conduct, standards for teaching, CAPT, school and district organizational patterns, classroom management, conflict resolution, communication with parents, sensitivity to multicultural issues, and dealing with stress and inclusion. The job application process, including résumé writing, interviewing, and the development of a professional portfolio, are also addressed in the seminar. Three credits.

EN 305 Literature for Young Adults
During the past two decades, adolescent literature has proliferated, grown more diverse, and improved in richness and quality. The course explores the major current authors, poets, and illustrators of works written for young adults. Topics include theories and purposes of reading literature in the classroom; criteria development for evaluating adolescent literature; reader response in the classroom; reading workshop; and adolescent literature integration across the curriculum. Three credits.

EN/W 311 Advanced Composition for Secondary School Teachers
This course helps candidates to develop mature writing skills through intense study of the essay and other non-fiction forms and introduces candidates to research in composition that will help them teach writing in their own classrooms. Candidates read and write a broad range of non-fiction forms, including personal narratives, “familiar” essays, argument, and humor. Candidates also read articles on composition theory. Three credits.

EN/W 317 Traditional and Structural Grammar
This course provides a solid background in traditional and structural grammar so that candidates can apply this background to what they write and how they write it. Therefore, candidates apply to their own writing what they learn about the parts of speech and about phrases, clauses, and sentences. To achieve greater linguistic sensitivity and mastery, candidates also learn how to analyze the smaller components of language (sounds and word segments) and the more complex and elusive elements of style. Three credits.

MD 300 Introduction to Educational Technology
This course covers the principles and applications of technology literacy in education. Topics include designing effective teaching strategies and environments conducive to learning; application of media and computer technologies in teaching; the use of the Web in teaching K-12; MSOffice 2000 applications; developing home pages; evaluating software; and examining new technologies for education. A field experience is included in this course. Lab fee: $45. Three credits.

The English Department offers a lively and diverse program with courses in literature and writing. As an academic discipline, the study of English has the following goals:

- To acquaint the student with the various types of imaginative literature such as the novel, the short story, poetry, and drama.
- To develop the student’s analytic and organizational skills through the interpretation of literature and through an individual’s own writing.
- To give the student further training in the organization and effective articulation of ideas in writing, including in some cases preparation for careers as professional writers or for careers where strong writing skills will be an asset.

Requirements

English Major

For a 30-credit major in English, students must take 10 English courses beyond EN 11-12. Of these ten courses, five must be designated as core literature courses and five must be designated as department electives.

Department Core Courses

The purpose of the department core requirement is to expose students to the relationship between the experience of literature and the contexts of history, genre, theory, and societal position, and to provide all majors with a shared but flexible pattern of study. In order to fulfill the core requirement, each major must take at least one course from each of the following five literature areas.

Area I  pre-1800 literature
Area II  19th-century literature
Area III  20th-century literature
Area IV  the ways in which genre affects the production and reception of literature
Area V  the ways in which theoretical and/or societal positions affect the production and reception of literature

If a course is listed as fulfilling more than one of these core requirements, the student may use it to fulfill only one of those requirements.
Concentration 1: Creative Writing
This sequence is designed for those students seriously committed to becoming fiction writers, poets, or non-fiction writers, and for those students who want to pursue a career in the field of publishing or editing. Recent Fairfield students have had their work published in such national literary magazines as Quarterly West, Indiana Review, The Spoon River Poetry Review, and Writer's Forum. Students have interned at magazines such as The New Yorker and Cosmopolitan, and at publishers such as Greenwood Press, Harper-Collins, and St. Martins. In addition to outside internships, students can, with permission of the editor, receive academic credit for working on Fairfield’s national literary magazine, Dogwood: A Journal of Poetry and Prose.

The concentration includes the following:

**Introductory courses** –
Students take two of the following:
- EN/W 200 Creative Writing
- EN/W 202 Creative Writing Poetry I
- EN/W 205 Creative Writing Fiction I

**Specialized courses** –
Students take at least one of the following:
- EN/W 204 Creative Writing Drama
- EN/W 302 Creative Writing Poetry II
- EN/W 305 Creative Writing Fiction II
- EN/W 340 The World of Publishing: Working on Fairfield’s Dogwood Magazine

**Capstone course** –
Students take one of the following:
- EN/W 345-EN/W 346 Internship
- EN/W 347-EN/W 348 Independent Writing Project (can be taken twice; one semester experience with The Mirror and EN/W 220 are prerequisites)

Students also must complete a fifth EN/W course of their own choosing.

Concentration 2: Journalism
The journalism sequence is designed for students interested in strengthening their news gathering, reporting, and writing skills. Many such students pursue careers at newspapers, magazines, radio/television stations, Web sites, and marketing and publishing companies. Students interested in careers in public relations especially find it useful.

The concentration includes the following:

**Introductory courses** –
Students take two of the following:
- EN/W 220 News Writing (must be taken before any other journalism course)
- EN/W 222 Journalism Editing and Design

**Specialized courses** –
Students take at least one of the following:
- EN/W 320 Writing the Feature Story
- EN/W 321 Broadcast News Writing
- EN/W 322 Sports Reporting
- EN/W 324 Political and Government Reporting
- EN/W 325 Environmental Reporting
- EN/W 326 Contemporary Journalism
- EN/W 330 Literary Journalism
- EN/W 340 World of Publishing

**Capstone course** –
Students take at least one of the following:
- EN/W 345-EN/W 346 Internship
- EN/W 347-EN/W 348 Independent Writing Project (can be taken twice; one semester experience with The Mirror and EN/W 220 are prerequisites)

Students also must complete a fifth EN/W course of their own choosing. Students can start the journalism sequence as early as spring semester in their freshman year. After completing EN 11 (the freshman writing course), they can take EN/W 220 News Writing simultaneously with EN 12 (the freshman literature course). This makes it easier for students to complete all journalism coursework by the end of the junior year and concentrate on internships in the senior year.
Concentration 3: Professional Writing
The professional writing sequence is designed for students who want to strengthen their writing and speaking skills as preparation for careers in business, technology, industry, government, or education. People who make information accessible, usable, and relevant to a variety of audiences are professional writers. To some extent, effective professional writing is an art because it requires an instinct for clear writing and good visual design. More importantly, however, professional writing is a science in that it is a systematic process that involves key principles and guidelines. Internships are available to students in the professional writing concentration, including placements in corporate communication, technical writing, Web design, and the mass media.

The concentration includes the following:

**Introductory course** – required
EN/W 332  Business Writing

**Specialized courses** –
Students take at least three of the following:

EN/W 214  Professional Presentations: Writing and Delivery
EN/W 222  Journalism Editing and Design
EN/W 310  Advanced Composition
EN/W 335  Technical Writing
EN/W 336  Issues in Professional Writing
EN/W 338  Persuasive Writing
EN/W 339  Grant and Proposal Writing
EN/W 345
-346  English Internship

Students must also complete a fifth EN/W course of their own choosing.

**English Minor**
The English minor can be completed in two different ways:

1. At least five English courses beyond EN 11-12 must be taken. These may all be in literature, all in writing, or a mixture of the two. The core requirement of a third English course, in literature, can count toward this minor.
2. Any of the three writing concentrations, as outlined above, may be taken. EN 11, EN 12, and the core requirement of a third English course, in literature, cannot count toward a writing sequence.

**Course Descriptions**

**EN 11  Composition and Prose Literature**
This course introduces students to the writing and reading skills and strategies that best prepare them for the writing tasks they will encounter at the university level and beyond. The course accomplishes its goals through student-generated writing and the study of essays and other forms of literary nonfiction. **Note:** EN 11, or its equivalent, is a prerequisite for EN 12. **Designated sections meet the U.S. diversity requirement.** Three credits.

**EN 12  Introduction to Literature and Writing the Research Paper**
This course provides a study of drama, fiction, and poetry as they reflect literary and cultural approaches to the individual’s experience and society. EN 12 covers critical writing as an extension of composition in EN 11. This course also teaches students to write a thesis-driven, coherently developed research paper that incorporates and documents sources. **(Prerequisite: EN 11 or its equivalent)** **Designated sections meet the U.S. diversity requirement.** Three credits.

**Literature Courses**

**EN/CL 203/103  Masterpieces of Greek Literature in English Translation**
This course surveys major works of ancient Greek literature with an emphasis on the content of this literature as a key to understanding classical Greek civilization and as meaningful in a contemporary context. **(Prerequisite: EN 12 or equivalent)** Three credits.
EN/CL 221/121 Myth in Classical Literature
This course introduces students to classical mythology through an examination of the diverse ways in which myth and legend are treated in the literature of ancient Greece and Rome. Students read texts in English translation; knowledge of Greek or Latin is not required. (Prerequisite: EN 12 or equivalent) Three credits.

EN 248 Allegory and Fantasy
In EN 11 and EN 12, students experience several modes of essay writing and the genres of fiction, drama, and poetry. This course offers advice and practice in responding to allegory, another genre of literature, which can be found in prose and in epic poetry. Understanding allegory is an enjoyable and liberating task. The dramatized metaphors of allegorical characters, places, objects, and events are best viewed in ways that are neither reductive nor simplistic, but are flexible, non-doctrinaire, and open to transformation. Fantasy literature at its best is also more allegorical, provoking the reader not to escape reality but to engage reality more fully. Authors in this course may include E. M. Forster, Nathaniel Hawthorne, Barbara Kingsolver, C. S. Lewis, Flannery O’Connor, J. R. R. Tolkien, Voltaire, and Kurt Vonnegut. (Prerequisite: EN 12 or equivalent) Three credits.

EN 249 Literacy and Language
This course examines the concept of literacy in the United States. Students explore four questions: How did they become literate? How has literacy been defined in U.S. history? How do children learn to write? and, Why do 30 million American adults have severely limited literacy? As part of the Ignatian College program, the course encourages students to reflect on their own experience with literacy and consider their responsibility towards those who lack literacy skill. (Prerequisite: EN 12 or equivalent) Service-learning option. This course meets the U.S. diversity requirement. Three credits.

EN 250 The Epic Hero
This course ranges from Homer to J. R. R. Tolkien. The epic writer employs a vast canvas in telling his story, giving us a picture of an entire civilization. His hero embodies the highest values of his society and represents that society against the forces of chaos and evil. The course focuses, then, on the changing image of the hero, particularly as presented in the *Iliad*, *the Odyssey*, *the Aeneid*, and *The Lord of the Rings*. (Prerequisite: EN 12 or equivalent) Three credits.

EN 251 British Literature Survey I
This course introduces the major styles, themes, genres, authors, and periods of British literature from the Middle Ages to the 18th century. (Prerequisite: EN 12 or equivalent) Three credits.

EN 252 British Literature Survey II
This course introduces the major styles, themes, genres, authors, and periods of British literature from the romantic period through the 20th century. (Prerequisite: EN 12 or equivalent) Three credits.

EN 253 The African-American Literary Tradition
African-American literature exemplifies and challenges the humanist tradition; in fact, its diversity of voices, modes of representation, and the conditions of its production interrogate the very concept of tradition. This survey course examines the development of African-American literature from 1770 to the present, as well as its place within the American literary canon. The course uses themes of literacy, identity, and authority to trace this literature’s history from Phillis Wheatley’s 18th-century role in defining American poetry through the slave narrative to the New Negro Renaissance, the Civil Rights movement, and African-American postmodernism. *This course meets the U.S. diversity requirement.* (Prerequisite: EN 12 or equivalent) Three credits.

EN 254 Chivalric Romance
The knight of chivalric romance is one of the most enduring legacies of medieval culture. He is warrior and lover, loyal to his lord and to his lady, even when, as is so often the case, these loyalties collide. This course traces the history and development of this enormously popular and enduring genre, beginning with the invention of courtly love and the formation of the legend of King Arthur. It focuses on the seminal 12th-century French romances and important, representative works from Germany and England, and concludes with the challenges posed to the genre and its values by late medieval and early modern culture, as represented by Malory and Cervantes. Issues include narrative structures and motifs; the depiction of nature and civilization; the stylized representation of gender and class; the interplay of reality and fantasy; theories of authorship and audience; and connections to history-writing and to other literature. Students read all texts in modern English translations. (Prerequisite: EN 12 or equivalent) Three credits.

EN 255 Shakespeare
Students study Shakespeare’s career as dramatist using plays drawn from his farces, romantic comedies, history plays, tragedies, and romances, including *The Taming of the Shrew*, *Richard III*, *A Midsummer Night’s Dream*, *Hamlet*, *Othello*, *King Lear*, and *The Tempest*. (Prerequisite: EN 12 or equivalent) Three credits.

EN 256 Myths and Legends of Ireland and Britain
This course examines the literature of early medieval cultures of Ireland and Great Britain, with special attention to Celtic culture. Divided into four parts, the course focuses on the Irish Táin Bó Cualnge, the Welsh Mabinogion, the Latin Christian legends of English and Irish saints, and the Old English epic Beowulf. Critical issues include paganism and Christianity; conceptions of law, kinship, and nationhood; warrior culture and the idea of the hero; the status of art and poetry; morality and literacy; the natural and the supernatural; and the construction of gender. The course also pays attention to the arts and artifacts from these medieval cultures. Students read all texts in modern English translations. (Prerequisite: EN 12 or equivalent) Three credits.
EN 257  Dante
This course examines the works of Dante Alighieri, including the Vita nuova, in addition to the “Inferno,” “Purgatorio,” and “Paradiso” from the Divine Comedy. Students are introduced to the political, linguistic, theological, and poetic ideas that make Dante’s works not only significant in the medieval context, but also continue to challenge and inform modern debates. This course, which is conducted in English, counts towards the core requirement in literature. Cross-listed with IT 289. Three credits.

EN 258  Special Topics in Literature
Special topics are offered on an experimental or temporary basis to explore literature topics or approaches that are not included in the established curriculum. Course content varies from semester to semester, depending on the professor, and may range from texts by one single author, to emergent, global literatures, and innovative or experimental ways of combining authors, periods, and genres in literature. Students are allowed to take this course twice under different rubrics. Designated sections meet the U.S. diversity requirement. (Prerequisite: EN 12 or equivalent) Three credits.

EN 260  Understanding Poetry I
Offered for students with no previous knowledge of poetry, those who wish to develop and enrich their understanding of the genre, and students who have experienced difficulty understanding poetry in the past, this course includes selections from narrative, epic, and lyric poetry, with concentration on shorter lyric poems. The course also includes readings and discussions with visiting poets. (Prerequisite: EN 12 or equivalent) Three credits.

EN 261  Understanding Poetry II
This course concentrates on reading longer narrative and lyric poems to study the work of individual poets. The course includes readings and discussions with visiting poets. EN 260 is an appropriate, but not a necessary, prerequisite; students who have not taken EN 260 should read Perrine’s Sound and Sense or any other introduction-to-poetry text in preparation for the course. (Prerequisite: EN 12 or equivalent) Three credits.

EN 262  Understanding Drama
By means of close reading of selected plays representing the major types of drama, students are introduced to both these types and the general work of drama as a special way of presenting the self in everyday life, as well as illuminating the human condition in a local-particular way. Drama is essentially a literary blueprint for theatre or performance, which is, in turn, the ideal end or fulfillment of drama. Therefore, where available, audio-visual resources are used to augment the reading of plays. Students are also encouraged to attend play productions by theatres in the immediate area, Theatre Fairfield included. (Prerequisite: EN 12 course with section on drama or equivalent) Three credits.

EN 263  Introduction to Contemporary World Literature
This course reviews recent fiction from around the world, including works from such places as Africa, Latin America, the Caribbean, New Zealand, and the Middle East. Students learn strategies for comparing stories and narrative styles from different cultures, subject positions, and sociopolitical frameworks in order to develop a stronger awareness of different types of subjectivity in a global context. Non-majors seeking to fulfill the English core requirement and beginning English majors may take this course. This course meets the world diversity requirement. (Prerequisite: EN 12 or equivalent) Three credits.

EN/TA 264/120  American Drama
See TA 120 for course description. This course meets the U.S. diversity requirement. Three credits.

EN 265  Major Works of World Literature
This course surveys major works of world literature from ancient times to the present. Because the works are chosen from a broad span of cultures and periods, the course focuses on the function of literature: What kinds of stories do people tell about their societies? What are their major concerns, and how are these represented in fiction? How can we compare stories from one culture or period with those from another? The course discusses genre and style as well as content. Books include The Epic of Gilgamesh, Boccaccio, Marguerite de Navarre, Madame de Lafayette, and Gabriel Garcia Marquez. (Prerequisite: EN 12 or equivalent) Three credits.

EN 266  The Russian Novel and Western Literature
This comparative study of major Russian authors of the 19th century and their contemporaries in France, Germany, England, and America begins with short fiction and moves to novels such as Père Goriot, Crime and Punishment, A Hero of Our Time, and Madame Bovary. Russian writers include Pushkin, Gogol, Lermontov, Dostoevsky, Turgenev, and Tolstoy. Topics include the role of marriage and attitudes towards the family, urban versus rural existence – especially the role of the city – the fantastic in literature, narrative technique, and the development of 19th-century fiction. (Prerequisite: EN 12 or equivalent) Three credits.

EN 267  Modern British Literature
Students study Conrad, Joyce, Lawrence, and Virginia Woolf, who profoundly changed the shape of the novel, a change also reflected in the writings of Evelyn Waugh, Graham Greene, George Orwell, and Aldous Huxley. (Prerequisite: EN 12 or equivalent) Three credits.
EN 268 The Irish Short Story
This course examines the Irish short story, stressing its development from 1903, with the creation of a national literature in English, to the present. The course focuses on the deeply rooted oral tradition, the Anglo-Irish tradition, and the native Irish tradition. Topics include the Irish literary revival, Irish family life, and the Irish revolution as treated in the short story. Authors include George Moore, James Joyce, Liam O'Flaherty, Maria Edgeworth, Elizabeth Bowen, Edna O'Brien, Mary Lavin, Daniel Corkery, Frank O'Connor, Sean O'Faolain, and William Trevor. Students view several films including Man of Aran, The Dead, and Michael Collins. (Prerequisite: EN 12 or equivalent) Three credits.

EN 269 Modern Irish Drama
This introductory survey course in 20th-century Irish drama includes the plays of Sean O'Casey, J.M. Synge, W.B. Yeats, Lady Gregory, Samuel Beckett, Brian Friel, Theresa Deeevey, Frank McGuinness, and Sebastian Barry. The course considers the work of Irish repertory theatre groups from the Abbey and Gate theatres of Dublin, the Lyric of Belfast, and the Irish Language Theatre of Galway. Students view videos from the Lincoln Center Performing Arts Library with renowned Irish performers such as Siobhan McKenna, Barrie Fitzgerald, and Jack McGowan and attend Irish plays performed at the Irish Arts Center and the Irish Repertory Theater in New York City. (Prerequisite: EN 12 or equivalent) Three credits.

EN 270 Studies in American Literature
This course begins with a survey of the Puritan background to American literature and the writings of the early republic. The course emphasizes the early national period and the romantic phase in American literature leading up to the Civil War. Writers studied include Irving, Cooper, Melville, Poe, Emerson, Thoreau, Hawthorne, and Whitman. (Prerequisite: EN 12 or equivalent) Three credits.

EN 271 The Frontier in American Literature
For the last five centuries, the frontier — understood as the place where humanity comes into contact with its apparent absence in the shape of alien beings and landscapes — has been the subject of some of the most lasting and powerful American stories. In this course, students concentrate on some of the major representations of the frontier produced between the 1820s and the present to learn how to recognize and talk about the position that the American western has occupied in our culture. Authors include Cooper, Twain, Cather, and McCarthy; filmmakers include Ford, Peckinpah, and Eastwood. Formerly EN 385. (Prerequisite: EN 12 or equivalent) Three credits.

EN 272 Development of the American Short Story
This course traces the development of the American short story from its emergence in the literary-historical context of 19th-century America to its maturity in the 20th century. It explores most intensively the writings of Poe, Hawthorne, James, and Hemingway, but considers, as well, the contributions to the genre of Irving, Crane, and numerous other writers. (Prerequisite: EN 12 or equivalent) Three credits.

EN 273 Irish-American Literature
This course examines the Irish voice in American literature during the past 200 years. Rooted in the 18th century, proliferating in the 19th, and flourishing in the 20th century, Irish-American literature is one of the oldest and largest bodies of ethnic writing produced by a single American immigrant group. The course focuses mainly on Irish-American writing of the 20th century, although a sampling of earlier works is also studied. The authors include Finley Peter Dunne, F. Scott Fitzgerald, Eugene O'Neill, John O'Hara, James T. Farrell, J.F. Powers, Edwin O'Connor, Maureen Howard, J.P. Donleavy, Peter Hamill, William Kennedy, Mary Gordon, Frank McCourt, Alice McDermott, and Dennis Smith. Formerly EN 373. (Prerequisite: EN 12 or equivalent) Three credits.

EN 274 American Literature and the Environment
This course examines the Irish voice in American literature in the context of 19th-century America to its maturity in the 20th century. It explores most intensively the writings of Poe, Hawthorne, James, and Hemingway, but considers, as well, the contributions to the genre of Irving, Crane, and numerous other writers. (Prerequisite: EN 12 or equivalent) Three credits.

EN 275 Victorian Poetry and Poetics
This course examines the poetry and theories of poetry posited by Victorian men and women who explored concepts of identity, vis-à-vis Victorian notions of culture, religion, science, politics, and sexuality. Beginning with Arnold and ending with Wilde, the course covers both poetry and literary movements such as Pre-Raphaelitism, Decadence, aestheticism, and symbolism. Formerly EN 367. (Prerequisite: EN 12 or equivalent) Three credits.

EN 276 Life and Print Culture in Eighteenth-Century London
What was it like to live in eighteenth-century London? This course will explore daily life in London from the Great Fire to the French Revolution, using novels alongside other forms of popular literature — pamphlets, ballads, broadsides, cookbooks, and newspapers — to trace what ordinary people talked about and cared about in their workaday world. Popular art such as Hogarth's engravings will show us what London and its people looked like. The course will investigate how to evaluate and discuss all forms of popular print culture within the larger context of literature. (Prerequisite: EN 12 or equivalent) Three credits.
EN 278 Irish Women Writers

A study of Irish women writers, both Anglo and Gaelic, from 19th-century fiction to 20th-century poetry. The course focuses on the cross-cultural differences between these two groups, one privileged, the other marginalized, and perhaps who share only a common language. Besides women's issues — education, emigration, marriage, motherhood, and equality — the themes include the Big House, colonization, the Literary Revival, folklore, mythology, the tradition of the storyteller, and the roles of religion and politics in the society. Among the authors to be explored are Maria Edgeworth, Lady Morgan, Somerville and Ross, Elizabeth Bowen, Lady Gregory, Marina Carr, Peig Sayers, Mary Lavin, Edna O'Brien, Edel Ni Dhubhain, Eavan Boland, Nuala Ni Dhomhnaill, and Medbh McGuckian. A contemporary film is shown as well. (Prerequisite: EN 12 or equivalent) Three credits.

EN 279 Irish Literature

This course surveys Irish literature, including drama, poetry, and prose, from the eighth century to the present. The course includes a study of the Irish Literary Renaissance (Yeats, Synge, Lady Gregory, the Abbey Theatre) as well as the work of more recent Irish writers (Seamus Heaney, Eavan Boland, Brian Friel, Edna O'Brien) and some study of contemporary Irish film. Formerly EN 369. (Prerequisite: EN 12 or equivalent) Three credits.

EN 282 Modern German Literature in Translation

This course introduces students to a variety of German literature and genres (novel, short story, and poem) written in the 20th century. All works are heavily influenced by the two world wars. The literary canon includes a text by Kafka, portraying hope and despair, an Anna Seghers novel written in exile, poems and short stories portraying the various social and political changes in West Germany, and essays by the East German writer Christa Wolf that deal with loyalty and dissidence. The course also addresses narrative strategies and the challenges faced by the translator. Furthermore, we talk about the different roles literature can play, including its influence and value in furthering the understanding of one’s own culture. The instructor provides background material to contextualize the readings. Particular interest is paid to the portrayal of social and political issues. (Prerequisite: EN 12 or equivalent) Three credits.

EN 283 The Modern Italian Short Story

This course explores the Italian short story, focusing on the major writers of the 20th century. The course emphasizes neorealism, a term applied to a group of writers and filmmakers who emerged in 1945 and dealt in a forthright manner with everyday life. Topics include World War II, Mussolini, fascism, and the Italian family. The works of Italo Calvino, one of Italy’s most imaginative storytellers, receive special attention. Other writers include Pirandello, Svevo, Parvese, Moravia, Ginzburg, Vittorini, and Soldati. Students view two neorealist films: Rossellini’s Open City and De Sica’s The Bicycle Thief. (Prerequisite: EN 12 or equivalent) Three credits.

EN 284 Writers of the Asian Diaspora

This course examines the phenomenon of the explosion of Asian fiction/cinema in the west, particularly in the United States, in an effort to understand the concepts of diaspora, colonial histories, border identities, and cultural and ethnic representations. Students read novels, see films, and view artworks that deal with the interpellation, for example, of contemporary Indian, Pakistani, Chinese, Japanese, Bangladesh, Vietnamese, and Sri Lankan writers/artists into western culture to analyze the burdens of traditions and the arbitrariness of modernity. This course meets the U.S. diversity requirement. (Prerequisite: EN 12 or equivalent) Three credits.

EN 285 The Modern Tradition: International Short Fiction

Students study important works of short fiction from around the world written during the last century. The degree to which — and the specific manners in which — these works contribute to a characteristically modern sense of human existence and the function of narrative art forms the basis for text selection. Through textual analysis, students compare and contrast various versions of the modern experience as produced by such authors as Gogol, Melville, Mansfield, Joyce, Lawrence, Cather, Tolstoy, Chekhov, Kafka, Hemingway, Lessing, Borges, Barth, Boll, Mishima, Achebe, Erdrich, and Atwood. (Prerequisite: EN 12 or equivalent) Three credits.

EN 286 Asian America: The Challenge to Citizenship

Asian American writers, artists, and filmmakers are complicating the notion of identity to explore new ideas and critical questions around citizenship. This is a notable shift that broadens the concept of both political and cultural belonging for the second-largest immigrant minority. The course will examine how Asian American filmmakers are adapting genre categories such as realism (documentary), romance (musicals), and comedy (animated/silent film) to both stress their historical presence in the U.S., to claim American citizenship, and to challenge racist stereotypes of “aliens” as outsiders and foreigners. This course meets the U.S. diversity requirement. (Prerequisite: EN 12 or equivalent) Three credits.
EN 287  Globalization Theories and Narrative Critiques
This course will teach students how globalization is defined by major theorists, and to interpret the effects of its massive and random forces. Students will grasp the differences between economic, political, and cultural explanations and actual impact of globalization. The theories will be tested against new literatures to see how novelists manipulate the forces of globalization—such as explaining the feminization of poverty, ethnic cleansing, human rights violations, access to natural resources like water and land, terrorisms and proliferation of nuclear arms, religious fundamentalisms—through their characters. One of the crucial and consistent foci of class discussions will be on exploring ethical ways to deal with globalization, the potential for civic engagement, and the responsibility we all share in creating a global civil society. This course meets the world diversity requirement. (Prerequisite: EN 12 or equivalent) Three credits.

EN 288  African Literature
While this course does not preclude the study of poems, plays, autobiographies, and other kinds of fictional and non-fictional African writing in English, its main matter or text is short and long narrative fiction – that is to say, short stories and novels. The context of this course is mainly, but not exclusively, Africa south of the Sahara, and as such, its central themes revolve around traumatic colonialism or white dominance and the equally difficult post-colonialism or black self-rule that came tumbling after. The primary focus, however, is literature, but as pertaining to and qualified by the specific conditions of seeing and being in (sub-Saharan) Africa. This course meets the world diversity requirement. (Prerequisite: EN 12 or equivalent) Three credits.

EN 289  Modern Women Writers
The study of works by English, American, British, and Australian writers of the 20th century emphasizes their efforts to address the conflicts encountered by women of diverse backgrounds in their various roles and stages in life. The genres include fiction, memoir, and autobiography with continuing attention to the literary traditions established by women authors such as Virginia Woolf, Charlotte Perkins Gilman, Edith Wharton, Kate Chopin, Sylvia Plath, Susanna Kaysen, Jill Ker Conway, Maya Angelou, Carolyn Chute, Anne Tyler, and Harriett Doerr. (Prerequisite: EN 12 or equivalent) Three credits.

EN 290  Literature of the Holocaust
After an introduction to the historical, political, and social backgrounds of the Holocaust, this course investigates through literature the systematic genocide of Jews and other groups by Germany (1933-1945). The course seeks to discover how the Holocaust came about and what it means now to our understanding of human nature and of our civilization. Readings and films include Appelfeld’s Badenheim, 1939, and Weisel’s Night; Borowski’s This Way to the Gas, Ladies and Gentlemen; Levi’s Survival in Auschwitz; Epstein’s King of the Jews, Ozick’s The Shawl, and Spiegelman’s Maus. (Prerequisite: EN 12 or equivalent) Three credits.

EN/FR 295/295 Caribbean Literature: History, Culture, and Identity
This course serves as an introduction to the field of Caribbean literatures in English and English translation, with a focus on the French-speaking Caribbean. When read in the context of African diasporic literatures, it coincides with what has been called “African American Literatures” or literature written by peoples of African descent in the New World. This course examines a wide range of theoretical and fictional texts that introduce students to the debate surrounding the formation of Antillean cultural identity/identities. It examines Caribbean literatures with respect to their language of origin (English, French, Spanish, Dutch, Creoles and patois), colonization, slavery, racial experience, landscape, creolization, migration, and diaspora specifically in Haiti, Martinique, Guadeloupe, Barbados, Trinidad, Cuba, and the Netherlands Antilles/Surinam. Therefore this course is a survey that engages the historical, political, and cultural contexts out of which these literatures have emerged. This course meets the world diversity requirement. (Prerequisite: EN 12 or equivalent) Three credits.

EN 305  Literature for Young Adults
This course introduces students to a body of literature that is appropriate for young adults. Topics considered include theories and purposes for reading literature in the classroom; developing criteria for evaluating adolescent literature; reading workshops; and integrating adolescent literature across the curriculum. (Prerequisite: EN 12 or equivalent) Three credits.

EN 335  Gender and Sexuality in Film and Literature
This course examines the way gender and sexuality are represented in film and literature, beginning with an overview of lesbians and gays in film history with Vito Russo’s The Celluloid Closet. The course then moves through popular films and novels from the 1960s to the present day, looking at the ways attitudes about gender are enmeshed with representations of homosexuality. Themes and topics include: What is the relationship between gender and sexuality? How are concepts of masculinity and femininity presented in novels and on screen? How have these representations changed as our culture’s rules about gender and sexuality have become less rigid? The course aims to develop an analysis of current cultural assumptions about gender and sexuality, as they are revealed in film and fiction. (Prerequisite: EN 12 or equivalent) Three credits.
EN 336  Pleasurable Decadence
This course discusses and debates the meaning of “decadence” as an aesthetic and literary category. Beginning with the works of the pre-Raphaelites in mid-19th-century England, moving to Walter Pater and Oscar Wilde in the Victorian era, and then into Europe with Baudelaire, Flaubert, and Mann, the course focuses upon the role of pleasure in European cultures. Paintings by Moreau, Delacroix, and Ingres complement the understanding of the literary texts. The course treats metaphors of Salome as a femme-fatale and literary characters such as Huysmans’ Des Esseintes or Wilde’s Dorian Gray as models for behavior – figures in a typology of unorthodox self-fashioning. (Prerequisite: EN 12 or equivalent) Three credits.

EN 338  Seminar: Gender Theory
This course continues the work of EN 335 by looking more closely at the way attitudes toward gender are enmeshed with representations of sexuality and homosexuality. Topics include the debate over origins (nature versus nurture), changing historical ideas about gender and sexuality, and political issues. The course focuses on theoretical material, fictions, and film. This course requires familiarity with some basic elements of gender and sexuality theory. (Prerequisites: EN 335, WS 101, or PO 119, or permission of instructor) Three credits.

EN 339  African American Literature and Culture, 1900 to 1940
This course examines African American literature from Booker T. Washington’s Up From Slavery and W.E.B. Du Bois’s The Souls of Black Folk through the 1920s and from the Depression’s advent to the eve of U.S. participation in World War II. Grounded in the history of the first four decades of the 20th century, the course explores fiction, autobiography, poetry, and other forms of cultural production such as painting, sculpture, film, and music. It examines the aftermath of Reconstruction, the effects of the Great Migration, and the responses to Du Bois’s call for a “Talented Tenth.” The Harlem Renaissance provides a major focus, as do the debates surrounding whether there was indeed such a movement at all. The course looks towards the contemporary development of a Black tradition in literature and the arts. This course meets the U.S. diversity requirement. (Prerequisite: EN 12 or equivalent) Three credits.

EN 341  Early African American Literature
This course surveys some of the major works of African American literature produced before the publication of W.E.B. Du Bois’s The Souls of Black Folk in 1903. The course begins with a section on slave narrative and African American poetry, briefly reviews the representations of Black people in 19th-century literature by white people, and concludes with an examination of the major fiction and non-fiction of the second half of the 19th century, with particular emphasis on works from the 1890s. Authors include Wheatley, Douglass, Jacobs, Chesnutt, Harper, Dunbar, Washington, and Du Bois. (Prerequisite: EN 12 or equivalent) Three credits.

EN 342  Voices and Visions: Five American Poets
Students undertake an intensive study of five major American poets: Walt Whitman, Emily Dickinson, Robert Frost, T.S. Eliot, and Langston Hughes. The course examines significant themes in the work of these poets and explores the ways in which the poetic process develops structures and meanings through patterns of imagery and the complex resources of language. The course gives attention to the poets’ biographies and the historical periods in which they worked. (Prerequisite: EN 12 or equivalent) Three credits.

EN 344  African American Fiction, 1940 to 1980
Students undertake a comparative study of novels by African American men and women, beginning with Richard Wright’s Native Son and Ann Petry’s The Street, and ending with works published in the 1970s. Authors include Ralph Ellison, Gwendolyn Brooks, James Baldwin, Alice Walker, Charles Johnson, and Toni Cade Bambara. Exploring race and gender in the United States from male and female perspectives, the course focuses on topics such as family, religion, enslavement, urban experience, education, and history. This course meets the U.S. diversity requirement. (Prerequisite: EN 12 or equivalent) Three credits.

EN 345  Representations
This course focuses on “ways of seeing” and the “gaze” that are constructed and maintained in contemporary culture within the concept of representation. The course balances on the margins of textual and visual materials (paintings and films); offers an interdisciplinary theoretical base; examines the presentation and representation of self, subject, and identity as narrative, biography, and autobiography; and focuses on the notion of realism and politics of realism (or between traditional ways of seeing and deconstructed ways of seeing). By reading theoretical tracts on the ways of seeing and by using films and art slides to test these theoretical materials, students critique contemporary notions of seeing and being seen. Cross-listed under visual and performing arts as VPA 345. Students may not take this course under both designations. (Prerequisite: EN 12 or equivalent) Three credits.

EN 346  The Woman Question: Early Feminism and 19th-Century American Literature
This course examines the issue popularly known as the Woman Question through some of the major works of 19th-century American literature, beginning in the 1850s, a time when American feminists began to intensify their questioning of the status of woman – philosophically and politically – and when a group of “domestic feminists,” led by Harriet Beecher Stowe, became the most popular writers in the country. The course ends in the 1890s when the conventions of sentimental fiction were being superseded by realism and regionalism, and when an explicitly anti-domestic image of womanhood began to be formulated around the figure of the New Woman. Authors include Stowe, Fern, Hawthorne, Jacobs, Alcott, Gilman, Jewett, and Chopin. (Prerequisite: EN 12 or equivalent) Three credits.
EN 347  African American Fiction, 1980 to Present
This course studies contemporary fiction, offering a mix of now-canonical authors such as Toni Morrison, Ernest Gaines, and John Edgar Wideman, along with emerging writers such as Helen Elaine Lee and Paul Beatty, and includes a number of first novels by award-winning writers. The course begins with a neo-slave narrative paired with a novel that illustrates how the legacies of enslavement persisted into the twentieth century. The course explores both urban and rural experience in primarily African American towns and neighborhoods, and analyzes the consequences of desegregation in different locales. Gay and lesbian lives have become more prominent in Black fiction over the past two decades, as depicted in several of the novels. Narrative techniques also offer a main thread of discussion throughout the course. This course meets the U.S. diversity requirement. (Prerequisite: EN 12 or equivalent) Three credits.

EN 348  Contemporary Women Writers of Color
This course offers a perspective on American literature that continues and challenges its multi-voiced tradition. The course focuses on works by Native, Asian American, African American, and Latina writers from the 1980s to the present, considering issues of race, gender, ethnicity, class, and sexuality, especially as these contribute to concepts of identity — for the individual and the community. Authors may include Sandra Cisneros, Leslie Silko, Louise Erdrich, Sky Lee, Lan Cao, Nora Okja Keller, Esmeralda Santiago, Cristina Garcia, Sandra Cisneros, and Danzy Senna. This course meets the U.S. diversity requirement. (Prerequisite: EN 12 or equivalent) Three credits.

EN 349  Introduction to Cultural Studies
This interdisciplinary course examines the concept of culture as it is constructed, sustained, and contested within the United States and the United Kingdom. Readings focus on the history, theory, and practice of culture (high and mass) in the two countries. Class discussions focus on the interactive impact of our understanding of the term “culture” upon contemporary societies as it factors into nationhood, race, gender, class, and media. As a way of understanding the various theories that undergird the experience of culture, students read critical/cultural theory, attend a play in New York City, and view films and art slides. This course meets the U.S. diversity requirement. (Prerequisite: EN 12 or equivalent) Three credits.

EN 350  Special Topics in Literature
Special topics, offered on an experimental or temporary basis, explore literature and/or approaches that are not included in the established curriculum. Courses offered under this rubric change from semester to semester, and may range from a study of texts by a single author, to studies of emergent, global literatures, to innovative or experimental ways of combining authors, periods, and genres in literature. (Prerequisite: a 200- or 300-level literature course) Three credits.

EN 352  Chaucer’s Canterbury Tales
The course introduces students to Middle English language and literature through a close study of the poetry of Geoffrey Chaucer, focusing on his Canterbury Tales. Students analyze the stylistic forms and representations of 14th-century society through tales, selected for their generic and stylistic variety, that include the tragic and the comic, the sacred and the profane. (Prerequisites: EN 11, EN 12) Three credits.

EN 353  Gender and Western Values: Literature of Early Modern Europe
Traditionally conceived as a collection of great names — Shakespeare, Rabelais, Cervantes, Machiavelli, Thomas More — early modern literature of England and the Continent includes recently recovered and rediscovered works by women such as Anna Huyers, Madeleine and Catherine des Roches, Gaspara Stampa, and St. Theresa. Using current knowledge of gender constructs, students re-examine familiar Western values established by the traditional texts: the individual, social tolerance, religious pursuit of the ideal, and sense of humor. In the context of the new texts and theories, the course asks: Are these Western values universally true or culturally constructed? (Prerequisite: EN 12 or equivalent) Three credits.

EN 354  Queer-Straight-Love in Renaissance Texts
“True Love,” invented in the late Middle Ages, was a widespread topic in Renaissance literature. The descendant of True Love, or “romantic love,” is assumed today to be heteronormative (positing a heterosexual prince-and-princess love as “normal”). Yet the True Love of Renaissance texts is not so confined. Written centuries before Western society, in the late 1800s, began identifying individuals by their sexual desires, Renaissance texts have a more fluid conception of love and sexuality than our contemporary “definitions.” The poems of Shakespeare, Katherine Philips. Spenser, Michelangelo, Mary Wroth, Donne, Apha Behn, and others, along with Plato’s Symposium, provide a fertile ground to critique and problematize, or “queer” (as a verb), today’s supposedly simple concept of “straight,” orthodox, or heteronormative love. Renaissance texts reveal a wide range of non-heteronormative representations of love. Genuine or “true” love, still an ideal for many, is today assumed to be individually chosen and nuanced. Renaissance love texts help us understand our complex choices, as do classical texts and recent scholarly theory. (Prerequisite: EN 12 or equivalent) Three credits.

EN 355  Shakespeare I: The Elizabethan Age
Participants study Shakespeare’s earlier comedies and history plays. Works include The Taming of the Shrew, A Midsummer Night’s Dream, Richard III, and Henry IV, Part I. Students also study Romeo and Juliet as an early tragedy. (Prerequisite: EN 12 or equivalent) Three credits.
EN 356  Shakespeare II: The Jacobean Age
Participants study Shakespeare’s later comedies and the tragedies. Plays include romantic comedies (As You Like It, Twelfth Night), tragedies (Hamlet, Othello, King Lear), problem comedies (Measure for Measure), and romances (The Tempest). (Prerequisite: EN 12 or equivalent) Three credits.

EN 357  All About Eve
This course surveys the literary and artistic representation of the legendary first woman of the Judeo-Christian tradition from Genesis to the present. The course centers on a reading of Milton’s Paradise Lost. Others authors include Christine de Pizan, Aemilia Lanyer, Mary Wollstonecraft, and Ursula Le Guin. Students find and interpret depictions of Eve in contemporary popular culture during this course, which emphasizes a variety of possible interpretations of Eve, including feminist and anti-feminist traditions. Non-English sources are read in English translation. (Prerequisites: EN 11, EN 12) Three credits.

EN 360  Medieval English Drama
This study of medieval dramatic literature and the history and theory of its performance, focuses on the Corpus Christi cycles and the miracle and morality plays of late medieval England. The course examines critical issues such as civic and commercial contexts, intermingling of the sacred and the profane, unique symbolic language of medieval drama, orality and literacy, and the dramatization of contemporary social conditions. The course includes a performance component that takes the form of a research paper on performance history or a historically and theoretically informed stage production of a medieval dramatic text. (Prerequisite: EN 12 or equivalent) Three credits.

EN 361  18th-Century English Literature
This selective survey of 18th-century English literature includes authors such as Pope, Swift, Gray, Johnson, Boswell, Goldsmith, Burns, and Montague. (Prerequisite: EN 12 or equivalent) Three credits.

EN 362  Autobiography
Autobiography holds a special fascination in its presentation of the writer’s self to the reader. The author’s revelation draws the reader into a unique partnership: the reader’s belief joined to the author’s “confession” creates the autobiographical self. This course examines autobiographical writings from St. Augustine to the 20th century and considers their purpose: What do the authors reveal about themselves and why? How much is convention, how much the truth? This course meets the U.S. diversity requirement. (Prerequisite: EN 12 or equivalent) Three credits.

EN 364  The Rise of the British Novel: The Beginnings to Dickens
An intensive study of the novel as a developing literary form over the first 150 years of its existence, this course considers stylistic and thematic aspects of this earliest or traditional phase of the novel with regard to their historical evolution. Authors include Daniel Defoe, Henry Fielding, Laurence Sterne, Jane Austen, Emily Bronte, and Charles Dickens. (Prerequisite: EN 12 or equivalent) Three credits.

EN 365  The Romantic Movement
This course concentrates on the greatest poems and shorter lyrics by Blake, Wordsworth, Coleridge, Byron, Shelley, and Keats. Infused with high emotion, reverence for nature, imaginative symbols, and innovative forms of expression, these poems are among the richest treasures of English literature. The course also includes Mary Shelley’s Frankenstein, a hauntingly provocative novel. (Prerequisite: EN 12 or equivalent) Three credits.

EN 366  20th-Century Russian Novel
This course assumes some knowledge of 19th-century Russian writers. Students read works by Russian and Soviet authors while studying parallel texts by Western and East European novelists. The course begins with the Silver Age and moves to post-Revolutionary fiction and versions of dystopias before considering problems of exile and dual identity — including the effects of the Stalin years — and ending with contemporary fiction from the post-Soviet era. (Prerequisite: EN 12 or equivalent) Three credits.

EN 368  Imperial Fictions and Colonial Voice-overs
This course examines the tenor and temper of some British novels that are also tales of colonization, measuring the tales against the responses from peoples in those colonized nations. Specifically, the course focuses on theoretical questions that address colonized subjectivities by raising questions on issues of nation/narration, minority discourse/canonical injunctions, imperial/colonial subjectivity, identity, home, and location/dislocation. The foundational and over-arching premise of “orientalism” (as a gaze turned upon the colonized) undergirds most of the class discussion. (Prerequisite: EN 12 or equivalent) Three credits.

EN 370  Victorian Novels
This course forges a sense of continuity from the emergence of the novel in the 18th century to the development of the modern novel in the 20th century. By examining the various narrative strategies employed by writers during the 19th century, it re-addresses central Victorian concerns such as tensions between the classes and contentions between the sexes. This course also helps situate the origins of ideological, psychological, and social issues that come to dominate the modern novel by deconstructing the discourses of self, woman, sexuality, and family/marriage. Authors include Sand, Eliot, Dickens, Thackeray, Pater, Hardy, and Michel Foucault. (Prerequisite: EN 12 or equivalent) Three credits.
EN 371  African American Women's Writing
This course offers a comprehensive study of writing by African American women from the mid-19th century to the present, focusing on autobiography and fiction. Beginning with a narrative of enslavement, the course moves to the turn of the century and the Harlem Renaissance. Later writers may include Hurston, Petry, Lorde, Marshall, Walker, Morrison, Naylor, Sapphire, and Youngblood. This course meets the U.S. diversity requirement. (Prerequisite: EN 12 or equivalent) Three credits.

EN 372  Comedy
This course surveys various forms of literary, dramatic, and film comedy, emphasizing how comic writers and directors use structure, character, tone, and convention to create comic forms, including festive comedy, satire, comedy of manners, farce, and black comedy. (Prerequisite: EN 12 or equivalent) Three credits.

EN 374  20th Century British Fiction
The course analyses significant developments in the British novel that occurred between the end of the 19th century and the contemporary period, paying particular attention to the experimental novelists whose innovations radically changed the novel as a literary form. Writers include such figures as Joseph Conrad, D.H. Lawrence, James Joyce, A.S. Byatt, Kazuo Ishiguro, Salman Rushdie and Zadie Smith, and Virginia Woolf. (Prerequisite: EN 12 or equivalent) Three credits.

EN 376  Modern and Contemporary Drama
This course covers the modern and contemporary (post-modern) periods of drama, which is to say, from the 1850s to the present. Students read plays by such major Western dramatists as Buchner, Ibsen, Shaw, Pirandello, Chekhov, and Brecht, as well as the odd minor, non-canonical, and/or non-Western writer. Run mainly as a seminar, this course emphasizes close reading and requires participation in class discussions in which students demonstrate grasp of dramatic conventions, form, structure, themes, as well as context and/or the cultural-material conditions under which each play was written and produced. (Prerequisite: EN 12 or equivalent) Three credits.

EN 378  The Spirit of Place: Environment as a Shaper of Identity in America
This course explores the psychological, sociological, and physical effects of the American environment from the East to the West coast through essays, drama, novels, and poetry. Through the writings of Arthur Miller, Tennessee Williams, Robert Frost, Emily Dickinson, Willa Cather, Edith Wharton, Nathaniel West, Wendell Berry, Philip Levine, M. Scott Momaday, among many others, students study the connection between place and soul as the sociological history of America unfolds chronologically. Students better understand their identity rooted in a particular place through the mirror of the literature. (Prerequisite: EN 12 or equivalent) Three credits.

EN 379  Film and Literature
This course surveys the film industry's historical dependency upon literary properties and conducts a comparative analysis of specific films adapted from novels, plays, short stories, and poems. The course provides students with a historical and critical perspective on the film as an art form. (Prerequisite: EN 12 or equivalent) Three credits.

EN 381  American Romanticism
An introduction to selected transcendentalists and the flowering of intellectual and social life in America from 1830 to 1865, this course examines the relationship between literature and the cultural and political history of the period, including a study of paintings, photographs, and other material culture. Authors include Emerson, Thoreau, Poe, Hawthorne, Melville, Douglass, Davis, Whitman, and Dickinson. (Prerequisite: EN 12 or equivalent) Three credits.

EN 382  American Literature: 1865 to 1920
This course traces the development of post-Civil War realism and the subsequent naturalistic movement in American literature. Topics include the rise of social activism, literary journalism, and documentary photography; theories of social elevation and the Black intellectual; changing roles of women and the construction of gender; neurasthenia and theories of medical treatment; and the impact of economic theory and technology on literature. Authors include Twain, James, Crane, Washington, Du Bois, Norris, Wharton, Chopin, and Gilman. (Prerequisite: EN 12 or equivalent) Three credits.

EN 383  American Literature: 1920 to 1950
This course traces the development of the modern American writer from the post-World War I era through the Depression and to the period immediately following World War II. Authors include Fitzgerald, Hemingway, Faulkner, Frost, Steinbeck, O'Neill, Mailer, Lowell, Bellow, and others. (Prerequisite: EN 12 or equivalent) Three credits.

EN 384  American Literature: 1950 to Present
This course examines significant developments in American fiction and poetry from the period immediately following World War II to the present. Authors include Salinger, Updike, Bellow, Vonnegut, Malamud, Barth, Pynchon, Ginsberg, Ferlinghetti, Sexton, and others. (Prerequisite: EN 12 or equivalent) Three credits.

EN 386  Native-American Literature
This course focuses on novels, short stories, and poems written by Native-American writers during the 20th century. For purposes of background, the course also covers a number of significant works composed prior to this century. Students examine texts primarily for their literary value, but also consider the broad image of Native-American culture that emerges from these works. The course also examines the philosophical, historical, and sociological dimensions of the material. This course meets the U.S. diversity requirement. (Prerequisite: EN 12 or equivalent) Three credits.
EN 387  The American Novel
This course traces the American novel from its imitative beginnings to its development as a unique literary form, examining representative novels by Hawthorne, Melville, James, Faulkner, Bellow, and others. (Prerequisite: EN 12 or equivalent) Three credits.

EN 388  Jewish Literature
Called the “People of the Book” by Mohammed, the founder of Islam, written narrative has been central to Jewish identity and the Jewish search for meaning since with the story of God giving the law to Moses on Mt. Sinai was first told. This course surveys Jewish literature (sacred and secular) from Torah (the Hebrew Bible) to the modern day, concentrating on modern writings, and focuses on the ethical, historical, imaginative, philosophical, and humorous richness of Judaism. Authors include Maimonides, Sholom Aleichem, Franz Kafka, I.D. Singer, Bernard Malamud, Philip Roth, Aharon Appelfield, and other American, European, and Israeli writers. (Prerequisite: EN 12 or equivalent) Three credits.

EN 389  Literature and Religion: The American Experience
This course surveys the relationship of literature to religion in the history of American letters. Beginning with the moral didacticism of early Puritan literature, American writers have manifested a persistent concern with religio-ethical matters and the impact religious institutions have in shaping our social and cultural environments. Using literary texts by major American writers, the course evaluates the critical perspective and relevance of the imaginative writer’s treatment of religious questions. (Prerequisite: EN 12 or equivalent) Three credits.

EN 390  Modern Poets and Belief
Students read Yeats, Hopkins, Eliot, Frost, and Stevens. These poets – important in themselves – adopt various strategies in confronting the modern industrial and technological world. Their individual beliefs offer a momentary stay against confusion and provide striking contrasts. (Prerequisite: EN 12 or equivalent) Three credits.

EN 391  The City in Literature
This course explores literary evocations of the city, focusing on different material each semester, from an interdisciplinary perspective. In many ways, a city is as much a mental landscape as a physical one; books on the city refer to it as image, idea, metaphor, vision, myth, and catalyst. The course considers how these terms apply to a representation of a metropolis, as well as how the city can be viewed as artifact, fiction, construct. The course examines the traditional dichotomy of country versus city, the relationship between gender and urban representation, and the connections between literature and other fields. (Prerequisite: EN 12 or equivalent) Three credits.

EN 392  The City in Literature
This course explores literary evocations of the city, focusing on different material each semester, from an interdisciplinary perspective. In many ways, a city is as much a mental landscape as a physical one; books on the city refer to it as image, idea, metaphor, vision, myth, and catalyst. The course considers how these terms apply to a representation of a metropolis, as well as how the city can be viewed as artifact, fiction, construct. The course examines the traditional dichotomy of country versus city, the relationship between gender and urban representation, and the connections between literature and other fields. (Prerequisite: EN 12 or equivalent) Three credits.

EN 393  James Joyce’s Ulysses
This course analyzes and interprets James Joyce’s comic novel, Ulysses, emphasizing intensive reading of the text and extensive reading of related criticism and scholarship. (Prerequisites: Reading of Dubliners and Portrait of the Artist as a Young Man, EN 12 or equivalent) Three credits.

EN 394  The Adolescent in Literature
This course focuses on readings that depict the lives of adolescents from an array of culturally diverse perspectives. In examining salient issues characteristic of this period of emerging adulthood, this course explores how differences in class, race, ethnicity, gender, sexual orientation, and physical appearance further complicate the already difficult “coming of age” process. Readings include works by Richard Wright, Toni Morrison, Jamaica Kincaid, Maxine Hong Kingston, Sandra Cisneros, Lucy Grealy, Khaled Hosseini, Marjane Satrapi, and Ishmael Beah. Students are encouraged to analyze works from interdisciplinary perspectives rooted in psychology and mythology as well as in race, gender, gay/lesbian, and disability studies. This course meets the U.S. diversity requirement. (Prerequisite: EN 12 or equivalent) Three credits.

EN 395  Caribbean Women Writers
This course explores the writing of women from a range of locations throughout the Caribbean, focusing primarily on contemporary fiction. Setting the novels in a context that begins with the Middle Passage or comparable forced migration to the Americas, a history marked by colonialism and enslavement, we examine the interconnections between those traumatic experiences and the arrangements of relation established and demanded by imperialism. Topics for discussion include the following: spaces and languages of resistance; genealogies, family trees, roots, and other ways to excavate the past and forge relationships; memory and exile; political activism and its consequences; forms of labor and socioeconomics; the role of education in colonialism and in immigrant life; and challenges to conventional categories of identity (such as those based on “race,” gender, and sexuality). (Prerequisite: EN 12 or equivalent) Three credits.

EN 396  Modernism in World Literature
The comparative study of the period from roughly 1885 to 1940 focuses on fiction but also includes poetry and developments in the other arts (painting, architecture, music, film). The course considers various concepts of modernism and the avant garde, beginning with Baudelaire. Authors include Hamsun, Kafka, Proust, Gide, Woolf, Stein, Olesha, Barnes, Bulgakov, Beckett, Hurston, Pirandello, Nabokov, Ellison, Garcia Marquez, and Morrison. Discussion topics include changing views of time and space, experiments with narrative development and presentation of character, the role of technology in 20th-century culture, and new theories of language and the psyche. (Prerequisite: EN 12 or equivalent) Three credits.
WRITING COURSES

EN/W 200 Creative Writing
This course fosters creativity and critical acumen through extensive exercises in the composition of poetry and fiction. (Prerequisite: EN 12 or equivalent) Three credits.

EN/W 202 Creative Writing:
Poetry I
This workshop course concentrates on the analysis and criticism of student manuscripts, devoting a portion of the course to a discussion of major trends in contemporary poetry and significant movements of the past. The course considers traditional forms, such as the sonnet and villanelle, as well as modern experimental forms and free verse. Students learn how to prepare and submit manuscripts to publishers. (Prerequisite: EN 12 or equivalent) Three credits.

EN/W 204 Creative Writing:
Drama
This course teaches the writing of one-act plays for the stage in a workshop format that involves envisioning, writing/drafting, and regular revision of seed-ideas and subjects. The process requires skillful, imaginative handling of the formative elements of drama, including plot, character, language or speech-action, envisaged staging, and form. It also involves timely submission of assignments and drafts of scenes and whole plays for periodic in-class readings and feedback. Students are expected to submit at specified times midterm and final drafts that demonstrate the technique or art of playwriting as well as conform to the general requirements of the course. (Prerequisite: EN 12 that includes a section on drama and/or theatre or equivalent) Three credits.

EN/W 205 Creative Writing:
Fiction I
This course for the student who seeks an intensive workshop approach to fiction composition emphasizes the short story and focuses on the analysis of student manuscripts. It includes some discussion of the work of significant authors (past and present) as a way of sharpening student awareness of technique and the literary marketplace for fiction. (Prerequisite: EN 12 or equivalent) Three credits.

EN/W 214 Professional Presentations:
Writing and Delivery
The ability to speak confidently and convincingly is an asset to everyone who wants to take an active role in his or her workplace and community. This interdisciplinary and writing-intensive course provides students with the necessary tools to produce audience-centered presentations and develop critical-thinking skills. It also introduces the techniques of argumentation and persuasion, and the use of technology in presentations. (Prerequisite: EN 12 or equivalent) Three credits.

EN/W 220 News Writing
This introductory course emphasizes the techniques used by reporters to collect information and write stories for newspapers, magazines, the Internet, and broadcast outlets. Students learn to gather information, interview sources, write leads, structure a story, and work with editors. Students analyze how different news organizations package information, hear from guest speakers, and visit working journalists in the field. Students develop a higher level of media literacy and learn to deal with the news media in their careers. (Can be taken simultaneously with EN12). Three credits.

EN/W 222 Journalism Editing and Design
Editing skills are in high demand in today's journalism job market both for traditional and online sources of information. This intermediate level course emphasizes conciseness, precision, accuracy, style, and balance in writing and editing. The course includes researching and fact-checking, basic layout and design, headline and caption writing, and online editing. (Prerequisite: EN/W 220 or permission of instructor) Three credits.

EN/W 290 Writing and Responding
This course introduces the field of contemporary composition theory. Composition theorists consider ways of responding to the words of other people in a manner that is thoughtful, careful, and provocative. At the same time, they learn that by responding to the work of others, they ultimately become better writers and better thinkers themselves. This course focuses specifically on the response types appropriate for one-to-one work with writers. Students also gain hands-on experience in the course by writing extensively, sharing writing with other class members, critiquing student texts, and engaging in trial tutoring sessions. This course is a prerequisite for anyone wishing to apply for a paid position as a peer tutor in the Fairfield University Writing Center. (Prerequisite: EN 12 or equivalent) Three credits.
EN/W 295 Composition and Style
This intermediate course in basic non-fiction prose expands the writing skills gained in EN 11, emphasizing cultivation of an individual style in short essays on everyday topics. (Prerequisite: EN 12 or equivalent) Three credits.

EN/W 302 Creative Writing: Poetry II
In a workshop setting, the class discusses six assignments, writing about a painting or writing in a structured form such as a sonnet. In addition to looking at models that illustrate individual assignments, the class reads collections by six poets and discusses a book on traditional forms. (Prerequisite: EN/W 205) Three credits.

EN/W 305 Creative Writing: Fiction II
This advanced workshop further develops skills begun in EN/W 205 by looking closely at the craft of fiction. Students produce a substantial body of quality work such as several full-length short stories or substantial revisions, a novella, or several chapters of a novel. In addition to reading selections from published fiction writers, students read and comment extensively on their peers' work. (Prerequisite: EN/W 205 or permission of instructor) Three credits.

EN/W 309 Topics and Techniques for Women Writers
In response to feminist commentaries on the problems encountered by women writers, students seek to understand those problems through selected readings from eminent critics and contemporary authors, and to overcome them in weekly writing assignments with a gender orientation. These may be familiar essays, personal memoirs, fictional vignettes, persuasive argument, or literary criticism. The seminar, consisting of workshop discussions in which peers evaluate each other and themselves in terms of their individual writing goals and their techniques for achieving them, encourages students to develop their special assets as writers on feminist topics. (Prerequisite: EN/W 205 or permission of instructor) Three credits.

EN/W 311 Advanced Composition for Secondary School Teachers
This course prepares students to teach writing in grades 7-12. The course explores four significant questions: How do students learn to write? What assignments encourage good writing? What do state standards [2006 English Language Arts Framework] require students to know about writing? And, how should writing be assessed? We will also examine topics such as censorship, the “achievement gap,” and the ethical responsibilities of a writing teacher. (Prerequisite: EN 12 or equivalent) Three credits.

EN/W 317 Traditional and Structural Grammar
This course provides students with a solid background in traditional and structural grammar. Students apply to their own writing what they learn about the parts of speech and about phrases, clauses, and sentences. To achieve greater linguistic sensitivity and mastery, students also learn how to analyze the smaller components of language (sounds and word segments) and the more complex and elusive elements of style. (Prerequisite: EN 12 or equivalent) Three credits.

EN/W 320 Writing the Feature Story
Students learn how to generate and develop feature story ideas, including human-interest stories, backgrounder, trend stories, personality profiles, and other softer news approaches for use by newspapers, magazines, and web sites. The course stresses story-telling techniques and use of alternative leads. Interviewing, web research and rewriting techniques are stressed. (Prerequisite: EN/W 220 or permission of instructor) Three credits.

EN/W 321 Broadcast and Web Writing
Students learn how to plan, write, and edit hard news and feature news stories for broadcast outlets. This course will also focus on story presentation on the Internet. Topics include basic broadcast news writing, copy preparation and style, broadcast terminology, and how to write to pictures to create broadcast news pieces. Students hear from broadcast professionals and visit news operations. Prerequisite of EN/W 220 News Writing is strictly enforced. Three credits.

EN/W 322 Sports Reporting
Students learn to capture the drama of sports events, on and off the field. They write traditional game stories and profiles while strengthening skills in interviewing, writing under deadline pressure, and analyzing statistics. Students go beyond spot stories to explore and write about the bigger picture, newer issues, and the overall allure of sports. (Prerequisite: EN/W 220 or permission of instructor) Three credits.

EN/W 323 Photojournalism
Photography is derived from the Greek words for light and writing. Just as a journalist masters the art of words, a photographer masters the art of writing with light. A photographer tells a story with a single image, or multiple images, which impact the readers with a wide variety of human emotions. This course is about reporting with a camera, the visual aspect of journalism. Some technical aspects will be covered, but the majority will be hands-on assignments that are typical of newspapers, magazines, and web sites. There is substantial reading on photojournalism, plus a variety of writing assignments. By semester’s end, you will emerge with a portfolio of photojournalism assignments that you can use to help market yourself. EN/W 220 News Writing or photography experience recommended. Three credits.
EN/W 324 Political and Government Reporting
Students gain experience in reporting on campus and local government events, state and federal government activities, public opinion polls, and political campaigns. Guest speakers from politics and journalism help students deepen their understanding of the role of the press as a government watchdog. (Prerequisite: EN/W 220, comparable politics coursework, or permission of instructor) Three credits.

EN/W 325 Environmental Reporting
From land use disputes to problems with air, land, and water pollution, environmental concerns touch the lives of everyone. This course gives students experience in reporting and writing about the environment and related science and health concerns. Students meet with environmental reporters for newspapers and magazines, visit environmental sites, and write about environmental issues at the local, state, national, and possibly international level. Students also report on case studies of past environmental issues to examine the challenges of covering this field. Students interested in this course are encouraged to complete some coursework in journalism, environmental science, environmental studies, or an environmental course in applied ethics prior to enrolling. (Prerequisite: EN 12 or equivalent) Three credits.

EN/W 326 Contemporary Journalism
This course sharpens student news-gathering, writing, and editing skills and prepares them for the demands of journalism jobs in the 21st century. Students write longer story packages in conventional print formats and in HTML language for World Wide Web distribution. Students cover on-campus and off-campus events and discuss libel and ethical concerns that can affect their writing and careers. (Prerequisite: EN/W 220 or permission of instructor) Three credits.

EN/W 330 Literary Journalism
This course focuses on the use of story-telling techniques in writing creative nonfiction. Students learn how to make factual articles come alive by incorporating techniques such as narrative, dialogue, scene-setting, pacing, conflict, and resolution. The course emphasizes interviewing and advanced research techniques used in writing these creative nonfiction articles for newspapers. There will be in-depth analysis of form and substance of the literary journalism genre with readings of works by such authors as Tom Wolfe and Hunter S. Thompson. While there are no formal pre-requisites beyond EN 11-12, students are encouraged to have completed EN/W 220 News Writing, EN/W 320 Writing the Feature Story, or have taken several literature courses. Three credits.

EN/W 332 Business Writing
This course investigates the demands of business writing, including designing documents that visually display information and invite readers to read either quickly or thoroughly. The course stresses theoretical issues as well as practical skills. Students practice writing skills on a variety of projects including memos, proposals, reports, collaborative writing, and writing as part of the job-hunting process. Learning goals include understanding the purposes of writing in business and industry, writing with a clear sense of audience, becoming familiar with document design and electronic communication, ethical and cross-cultural issues, and reviewing scholarly writing and research in this academic field. (Prerequisite: EN 12 or equivalent) Three credits.

EN/W 335 Technical Writing
This course investigates the theory and practice of writing in technical fields, introducing students to types of oral, written, and hypertext communication that technical writers use in workplace settings. In-class writing activities, workshops, and lengthier projects familiarize students with the styles, organizations, and formats of various documents, and prepare students for the special demands of technical writing. The course also introduces students to research and scholarly writing in the academic field. This course is suitable for advanced undergraduate students preparing for writing-intensive careers or graduate school, as well as technical writing professionals and practitioners who wish to plan, research, and write more effectively. (Prerequisite: EN 12 or equivalent) Three credits.

EN/W 336 Issues in Professional Writing
This course investigates a variety of issues relevant to contemporary professional writing. In addition to surveying theoretical positions in the discipline, the course emphasizes preparing effective written products for academic and professional settings. In-class writing activities, workshops, and lengthier projects prepare students to think critically in this dynamic and ever-changing profession while familiarizing them with the writing styles, organizations, and formats of various documents. Topics include international technical writing; gender, writing, and technology; and technical and professional editing. This course is suitable for advanced undergraduate students preparing for writing-intensive careers or graduate school, as well as professional writing practitioners who wish to plan, research, and write more effectively and efficiently. Students may take this course twice under different subtitles. (Prerequisite: EN 12 or the equivalent) Three credits.
EN/W 338 Persuasive Writing
This course sharpens student skills in argument and encourages a clear, forceful prose style. Students practice writing skills in a variety of projects including resumes and cover letters, editorials, formal proposals, and public service announcements designed for video podcasts. Students will learn how to analyze an audience and use key features of persuasion such as concessions, disclaimers, rebuttals, and effective leads. The course examines the ethical responsibilities of a persuasive writer in business and civic life. (Prerequisite: EN 12 or equivalent) Three credits.

EN/W 339 Grant and Proposal Writing
This course prepares students to write effective proposals and reports. Students learn to define and write problem statements, objectives, plans of action, assessment documents, budget presentations, and project summaries. In addition, they sharpen their teamwork, editing, writing, audience awareness, and design skills as they engage in collaborative projects with non-profit organizations in the community. Relevant historical and ethical considerations are discussed. A service-learning component is included in this course. (Prerequisite: EN 12 or equivalent) Three credits.

EN/W 340 The World of Publishing: Working on Fairfield's Dogwood Magazine
This course introduces students to the field of publishing, particularly book and magazine publishing. It provides students with a solid foundation in the publishing field (e.g., selecting and editing manuscripts, book/magazine production, and marketing) and offers students practical hands-on experience similar to that of an internship position at a magazine or publishing house. In addition to attending lectures and participating in discussion, students work on the University's national literary magazine, Dogwood. (Prerequisite: EN 12 or equivalent) Three credits.

EN/W 345/346 Fall/Spring Internships
The internship program allows students to gain on-site experience in the fields of journalism, publishing, literary archives and libraries, business writing, English education, non-profit agencies, and public relations through supervised work for local newspapers, magazines, publishers, and news agencies. These positions are available upon recommendation of the department intern supervisor, under whose guidance the students assume the jobs, which require 10 to 15 hours a week. Students may take one internship for credit toward the English major. Students may take a second internship for elective credit. (Prerequisites: EN 12 or equivalent and permission of department intern supervisor) Three credits.

EN/W 347/348 Fall/Spring Independent Writing Project
Students undertake individual tutorials in writing and can obtain credit for writing for The Mirror, The Sound, or for other projects of personal interest. Only one independent writing project can be counted toward fulfilling the five field electives required to complete an English major. The department will consider exceptions only if multiple Independent Writing Project courses cover different subject areas and approval in advance is obtained. (Prerequisites: EN 12 or equivalent and permission of instructor) Three credits.

EN/W 350 Special Topics: Writing
This course is an umbrella under which a variety of courses can be taken on an experimental or temporary basis, exploring different writing styles and approaches. (Prerequisite: EN 12 or equivalent) Three credits.
Requirements
Program on the Environment
Students will complete an 18-credit series that focuses on the environment and includes a capstone experience.

Program on the Environment Curriculum
A. one course from each of the three major areas of study:
   1) Humanities (one of the following):
      AE 275 Global Environmental Policy
      EN 274 American Literature and the Environment
   2) Natural Sciences (one of the following):
      BI 76 Environmental Science
      CH 85 Chemistry, Energy, and the Environment
   3) Social Sciences (one of the following):
      BU 220 Environmental Law and Policy
      EC 120 Environmental Economics
      EC 225 Environmental Economics: Tools and Techniques

B. two elective courses from the list of elective courses below (can include courses from above).

C. a capstone course (which could include EV 399)

List of Elective Courses:
AE 271 Sacred Balance
AE 275 Global Environmental Policy
AE 276 Ethical Aspects of Global Business Policy
AE 283 Environmental Justice
AE 284 Environmental Ethics
AE 297 Ecofeminism
EN 274 American Literature and the Environment
ENW 325 Environmental Reporting
HI 362 The Frontier: Man, Nature, and the American Land
BI 75 Ecology and Society
BI 76 Environmental Science
BI 78 Introduction to Marine Science
BI 79 Rainforest Ecosystems
BI 270 Environmental Health and Safety
BI 368 Plant Biology: Evolution, Diversity, and Environment
CH 85 Chemistry, Energy and the Environment
EV 150 Earth Environment
PS 93 Energy and the Environment
BU 220 Environmental Law and Policy
EC 120 Environmental Economics
EC 225 Environmental Economics: Tools and Techniques
EV 300 Seminar on the Environment
EV 399 Independent Study/Internship

Students may double-count courses with all core and major requirements. Students who study abroad in an environmental program can work with the director or their advisor in the Program to match courses taken overseas within the Program requirements.
Course Descriptions

AE 275  Global Environmental Policy
A survey of environmental issues on the global scale, exploring ethical and economic dilemmas of liberty and law, justice and welfare, conflicts of cultures, race, and gender, as they arise in the increasing interaction of developed and developing nations. The course focuses on the role of science – with special reference to scientific uncertainty – in the articulation of issues like global warming, the depletion of the ozone layer, and species extinction. The ethical dilemmas and environmental implications of the work of multinational corporations are examined through case studies and group discussion; term projects focus on selected areas and industries. This course meets the world diversity requirement. (Prerequisite: one course in philosophy or religious studies) Three credits.

EN 274  American Literature and the Environment
This course aims to explore the ways in which ideas about the physical, "natural" environment have been shaped in American literature. The course will survey a variety of important texts in this tradition and introduce students to the scholarly perspective known as "Ecocriticism." Texts may include those by Austin, Cather, Leopold, Muir, Silko, Thoreau. (Prerequisite: EN 12 or equivalent) Three credits.

BI 76  Environmental Science
The science of the environment is presented through examination of the interconnections among physical, chemical, and biological fields of inquiry. This course looks at how the global environment is altered by the human population, technology, and production of fuels and food. In this course, students will acquire a scientific understanding of current issues in environmental science and learn to evaluate claims about current environmental problems. This course satisfies the Natural Sciences core requirement but does not satisfy requirements for the biology or chemistry major or minor. Three lectures. Three credits.

BU 220  Environmental Law and Policy
This course surveys issues arising out of federal laws designed to protect the environment and managelresources. It considers in detail the role of the Environmental Protection Agency in the enforcement of environmental policies arising out of such laws as the National Environmental Policy Act, the Clean Water Act, and the Clear Air Act, among others. The course also considers the impact of Congress, political parties, bureaucracy, and interest groups in shaping environmental policy, giving special attention to the impact of environmental regulation on business and private property rights. Three credits.

CH 85  Chemistry, Energy, and the Environment
This course explores the flow of energy in modern society from the perspective of chemistry. Topics include hydrocarbons; biomass; and hydro, solar, tidal, wind; and nuclear energy sources. Students consider the source of energy, how it is harvested, and the short and long-term environmental consequences of using each energy source and how these consequences are determined. The course uses the concepts of bonding, thermodynamics, kinetics, and work to investigate these related ideas. The course also discusses economic and political forces that shape our use of energy. Note: This course counts as a science core course but does not satisfy requirements for the chemistry major or minor. Three credits.

EC 120  Environmental Economics
This course, which presents an overview of the theory and empirical practice of economic analysis as it applies to environmental issues, first establishes a relationship between the environment and economics. It then develops the concept of externalities (or market failures) and the importance of property rights before exploring the valuation of non-market goods. It examines the practice of benefit-cost analysis and offers economic solutions to market failures, while highlighting pollution control practices, especially those based on incentives. Throughout, the course examines current issues regarding environmental protection around the globe. This course meets the world diversity requirement. Three credits.

EC 225  Environmental Economics: Tools and Techniques Applied to U.S. Policy
This in-depth examination of the economic tools used in environmental economics and policymaking builds on basic environmental economic concepts and provides the opportunity to put those concepts into practice. The course explores common externalities and market failures in the United States and analyzes governmental policies used to control them. (Prerequisite: EC 11 or EC 120, or permission of instructor) Three credits.

EV 150  Earth Environment: Introduction to Physical Geography
This course examines spatial patterns of the natural forces that build up and break down the earth’s exterior and their impact on human life. It studies spatial patterns of human behavior and their impact on the earth. The course stresses the use and understanding of maps in considering continental drift, oceans, earthquakes, volcanoes, soil formation, weather systems, natural resources, and the impact of population growth, agriculture, urbanization, and mass migrations. Three credits.

BI 75  Ecology and Society
This course focuses on environmental issues raised by modern society’s conflicting needs for land, water, a livable environment, and renewable/nonrenewable resources. Students examine the available scientific evidence and are encouraged to draw their own conclusions concerning these environmentally sensitive issues, which are presented in lectures, readings, films,
and occasional, off-campus field trips (by arrangement). This course is open to all except biology majors. Note: This course counts as a science core course but does not satisfy requirements for the biology major or minor. Three lectures. Three credits.

**BI 79 Rainforest Ecosystems**
This course introduces the non-science major to the rainforest, examining the ecosystems of temperate (North American) and tropical (South American, African, and Asian) rainforests from a botanical and environmental perspective. It emphasizes the importance of biological diversity and natural products, and analyzes solutions for saving rainforests. This course is sometimes offered as part of the interdisciplinary learning community, Latin American Studies: The Rainforest Community. Note: This course counts as a science core course but does not satisfy requirements for the biology major or minor. Three lectures. Three credits.

**PS 93 Energy and Environment**
This course introduces topics relating to work, energy, and power, and explores many of the environmental consequences resulting from our use of energy. Students examine the finite nature of our fossil fuels as well as energy resource alternatives including solar, wind, tidal, and geothermal energy; nuclear fission; and nuclear fusion. Knowledge of arithmetic and simple algebra are required. Three credits.

**AE 275 Global Environmental Policy**
A survey of environmental issues on the global scale, exploring ethical and economic dilemmas of liberty and law, justice and welfare, conflicts of cultures, race and gender, as they arise in the increasing interaction of developed and developing nations. The course will focus on the role of science – with special reference to scientific uncertainty – in the articulation of issues like global warming, the depletion of the ozone layer, and species extinction. The ethical dilemmas and environmental implications of the work of multinational corporations will be examined through case studies and group discussion; term projects will focus on selected areas and industries. Prerequisites include one course in Philosophy or Religious Studies, background in environmental science and economics preferred. Three credits.

**AE 284 Environmental Ethics**
This course describes the controversies and dilemmas surrounding the understanding, use, and preservation of the natural environment. A preliminary study of the scientific, legal, and ethical principles governing our approach to nature and the complex interrelation of these principles precedes an examination of salient environmental issues. The course explores conservation of resources, population growth, energy use, pollution, and global climate change from biological, economic, political, and philosophical perspectives. Students have opportunities to pursue problems of special interest. (Prerequisites: one course in philosophy and one course in religious studies) Three credits.

**AE/EV/LAC 384/384/384 Seminar on the Environment: Environmental Issues in Latin America and the Caribbean**
This seminar examines environmental, ethical, and socio-economic issues of Latin America and the Caribbean. It integrates the hard sciences (biology, chemistry, physics, and physical geography), the social sciences (sociology, politics, economics, and business), and the humanities (history, ethics, theology, and literature). The capstone experience provides students with an overview of multiple perspectives on the environment of Latin America and the Caribbean with a focus on some specific countries and issues. Students conduct independent research projects that demonstrate their mastery of at least one component of each disciplinary group. This seminar counts for the capstone requirement for the minor in Applied Ethics, the minor in Environmental Studies, and the minor in Latin American and Caribbean Studies. Three credits.

**EV 299/399 Independent Study on the Environment**
Students undertake an interdisciplinary project on environmental issues. Student proposals require support from one faculty member and approval by the dean prior to registration. EV 299 may be taken at any stage in the student’s career; EV 399 is reserved for seniors earning a minor in environmental studies or environmental sciences and is conjoined with an internship or other voluntary service with an organization involved in preserving or managing the natural environment. Three credits.

**Film**
(see New Media Film, Television, and Radio)

**French**
(see Modern Languages and Literatures)

**German**
(see Modern Languages and Literatures)

**Greek**
(see Classical Studies)

**Greek and Roman Studies**
(see Classical Studies)

**Hebrew**
(see Modern Languages and Literatures)
The Department of History introduces students to the richness and complexity of the human experience. The discipline of history trains students to understand history as process: to research, analyze, synthesize, and critically evaluate evidence. To the historian, factual information is never an end in itself, but a means to understand how the conditions of our own day evolved out of the past. Those who major or minor in history receive a broad preparation for entrance into graduate school and the traditional professions of law, government, foreign service, journalism, business, and teaching. The department participates in interdisciplinary programs, including American studies, Asian studies, Black studies, environmental studies, Judaic studies, Latin American and Caribbean studies, international studies, Russian and East European studies, women’s studies, and University honors. Students who attain high standards of scholarship are sponsored for membership in the department’s Psi Theta Chapter of Phi Alpha Theta, the International Honor Society for History, and participate in the special programs under its auspicies.

Requirements

Bachelor of Arts in History
For a 30-credit major in history students complete the following:

- HI 30 Europe and the World in Transition
- A minimum of nine upper-division history courses (200 level and above)
  - Four upper-division courses must be designated advanced (300 level).
  - At least two of the advanced courses must involve a major research paper. The research seminar requirement may be fulfilled through HI 399 Independent Study.
  - Two upper-division courses must be in European history; two must be in U.S. history; and two must be in non-Western history (Africa, Asia, Latin America, Middle East).
  - At least one upper-division course must focus on a period prior to 1750.
  - At least one upper-division course must focus primarily on a period after 1750.

History Minor
For an 18-credit minor in history, students complete the following:

- HI 30 Europe and the World in Transition
- A minimum of five upper-division courses
  - Two upper-division courses must be designated advanced (300 level).
  - One upper-division course must be in European history, one must be in U.S. history, and one must be in non-Western history (Africa, Asia, Latin America, Middle East).

To ensure a well-planned and coordinated program, students are required to work closely with their history faculty advisor.

Introductory Courses
All Fairfield University students take two history courses as part of their liberal arts core curriculum requirement. This requirement is fulfilled by HI 30 plus one 200-level course.
Course Descriptions

**HI 30  Europe and the World in Transition**
The course, which examines the history of Europe and its relationship to the world from the end of the Middle Ages through the 19th century, emphasizes the cultural, social, economic, and political forces and structures that led to the development of commercial and industrial capitalism, and the effects of this development on Europe, the New World, Asia, and Africa. Topics include the Renaissance and Reformation; the Transatlantic Slave Trade; European expansion and colonialism; the development of strong nation states; the Enlightenment; the Industrial Revolution and conflicting ideological and political responses; changing social, family, and gender relationships; and the increasing interaction of Europeans and non-Europeans. Critical analysis of primary and secondary sources develops skills in historical methodology that are of great value in many other academic pursuits. Written assignments and class discussions enhance these skills. Three credits.

**HI 200  The Birth of the Postmodern World, 1850 to 1950**
In the second half of the 19th century, industrial, social, and scientific progress enables the West to conquer the globe. But the increasing mechanization of society brings the alienation of the individual and the growth of class and racial antipathies. A wave of isms (Marxism, nationalism, imperialism, etc.) increases the stress. Ultimately the impact of two world conflicts demonstrates the fragility of Western supremacy and raises major problems of relationships with the Third World and the social revolutions within the old system. (Prerequisite: HI 30) Three credits.

**HI 203  European Society in the Middle Ages**
This course examines the social history of Europe from the barbarian migrations of the fifth century until the end of the Hundred Years War. From feudalism and the concept of courtly love, to the bitter power struggles of popes and monarchs, the course emphasizes emerging institutions - secular and religious – that came to define Western Europe in this and subsequent ages and to provide its most enduring rifts and hatreds. The course offers in-depth consideration of the role of women in medieval society, the persecution of Jews and other minorities, the Crusades, and the Black Death, with particular focus on their impact on the lives of average Europeans. Students read from primary and secondary sources. (Prerequisite: HI 30) Three credits.

**HI 205  Jews and Christians in Europe: A Social History**
This course surveys the history of Jewish-Christian interaction in Europe from late antiquity until the Dreyfus Affair, with emphasis on the 10 centuries between the ninth and the 19th. Using primary and secondary sources, literature, and film, students explore the complex relationships between Jews and Christians in these years, including often overlapping instances of persecution, segregation, disputation, coexistence, assimilation, and cooperation. The major political events, social shifts, and intellectual trends that profoundly altered European society in this extended period provide the backdrop against which the changing lives of Jewish and Christian Europeans are studied. (Prerequisite: HI 30) Three credits.

**HI 210  The Third Reich**
This course examines the origins and legacy of the Nazi dictatorship of 1933 to 1945. Students explore the wide range of factors that paved the way for Nazism by examining the long-term peculiarities of German history, the short-term crises of the years 1918 to 1933, and the pivotal role of Hitler and the German people in bringing the Nazis to power. Thereafter, students examine the social, economic, political, and cultural life of the Third Reich before turning to Hitler’s unleashing of World War II and the Holocaust. The course concludes by surveying the lingering legacy of the Third Reich in postwar German and European memory. Formerly HI 310. (Prerequisite: HI 30) Three credits.

**HI 212  Modern Germany II**
This course examines the turbulent history of modern Germany from the Second German Empire, or Kaiser Reich, to the present-day Federal Republic. Themes include the destabilizing emergence of Germany as a great power in the late 19th century, the outbreak of World War I, the collapse of the Empire, and the revolutionary upheaval of 1918 to 1919. The course examines the birth of the ill-fated Weimar Republic, the rise of Nazism, and the establishment of the Third Reich before moving to Hitler’s unleashing of World War II, his genocidal campaign against the Jews, and Germany’s ensuing wartime devastation, occupation, and division. The course concludes with an examination of the postwar political, social, and cultural development of West and East Germany through the nation’s unification in 1990. (Prerequisite: HI 30) Three credits.

**HI 213  In the Wake of Destruction: Europe Since World War II**
This course surveys the major political, social, and cultural trends that have swept Europe since 1945. Themes include the struggle to reconstruct a stable political order in the immediate aftermath of WWII, the conservative retreatment of the 1950s, the New Left radicalism of the 1960s, the neo-conservative reaction of the late 1970s and 1980s, the alleged “end of history” following the revolutions of 1989, and the question of Europe’s political future in an anxious, post 9/11 age of globalization. Against the backdrop of these political trends, we examine how the trauma of war, the achievement of economic prosperity, the upsurge in anti-establishment radicalism, the emergence of a multicultural European society, and fears of decline have affected a wide range of cultural realms, spanning literature, philosophy, art, architecture, and film. (Prerequisite: HI 30) Three credits.
HI 215  Ireland from the Middle Ages to the Present
This course examines political, religious, economic, and social developments in the Irish island from early medieval times to the present day. Topics include Celtic culture and civilization, the coming of Christianity, the Viking and Norman invasions, the English conquests in the 16th and 17th centuries, the 18th-century Protestant ascendency, the subsequent struggle for Catholic emancipation and home rule, the Potato Famine of 1845 to 1850, the struggle for independence during the early 20th century, the ultimate establishment of the Irish republic, the current problems in Northern Ireland, and the historical ties between Ireland and the United States. (Prerequisite: HI 30) Three credits.

HI 216  Rise of the British Empire
This course examines British overseas expansion between 1500 and 1815: the Tudor-Stuart conquest of Ireland; the establishment of the North American colonies and West Indian plantations; the growth of British power in India during the 18th century; and the early phases of British rule in Canada, Australia, and South Africa. Students study the causes and effects of imperial expansion from the standpoints of British political development, British society, the English-speaking colonists, and the native peoples of the empire. (Prerequisite: HI 30) Three credits.

HI 217  Britain and its Empire Since 1800
This course examines the British Empire from its great 19th-century expansion into Africa and Asia to its eventual crumbling under the impact of 20th-century independence movements and global war. Students compare the various independence movements, from the relatively peaceful transitions of Canada and Australia to the more violent ones by Ireland, South Africa, and India. The course finishes with an examination of the current racial and cultural conflicts that beset Britain’s former colonies, with particular focus upon Ireland and South Africa. (Prerequisite: HI 30) Three credits.

HI 218  The Renaissance and Reformation
This course examines the invention of the individual in the Italian Renaissance and further developments by the great Northern humanists (Petrarch, Boccaccio, Castiglione, Erasmus, Montaigne, Cervantes). Topics include visions of society and the realities (Dante, Marsiglio of Padua, Machiavelli, More, Rabelais); God and man (Erasmus, Luther, Calvin, Trent, the Jesuits, the Radicals); and the expanded universe – the discovery of America and the new astronomy. (Prerequisite: HI 30) Three credits.

HI 219  Italy from Renaissance to Revolution, 1559-1848
In this class, we begin by studying the Renaissance, interrupted by wars on Italian soil between France and Spain, the culture of the counter-reformation Church, Austrian influence, and end with the impact and legacy of Napoleon Bonaparte. We cover artistic currents in painting, architecture, music, decadence, regionalism, nascent nationalism, urban and rural economies, politics, rich and poor, and religion and science of Early Modern Italy. (Prerequisite: HI 30) Three credits.

HI 220  History of the Ancient Near East and Egypt
This course surveys the vast array of civilizations arising in the ancient Near East and Egypt from 3000 to 330 B.C.E. The course examines the history and culture of these fascinating peoples and, through the many texts recovered and translated from their myriad ancient languages, sees once again through their eyes the vivid and turbulent times in which they lived. (Prerequisite: HI 30) Three credits.

HI 222  The Roman Revolution
This comprehensive study of the political, social, artistic, literary, and military transformation of Rome from the middle of the second century B.C.E. through the reign of Augustus gives special attention to Rome’s response to the cultural and governmental challenges imposed by its growing empire and how its responses forever changed the course of Western civilization. (Prerequisite: HI 30) Three credits.

HI 230  Early Modern France: Passion, Politics, and the Making of National Identity
This course covers material from the coming of the streets of Paris, aid in considering if a French republic, the current problems in Northern Ireland, and the historical ties between Ireland and the United States. (Prerequisite: HI 30) Three credits.

HI 232  Jefferson’s America: 1760 to 1850
This course covers material from the coming of the American Revolution through the Age of Jackson, including the Constitutional Convention, the Federalist era, Jeffersonian republicanism, and Jacksonian democracy. The course emphasizes the development of political parties in this era of alternating cohesion and division, giving special attention to the religious and reform movements of the ante-bellum period, including Shakerism, transcendentalism, Mormonism, abolitionism, and feminism. The role of outsiders – free and enslaved Africans, women, and American Indians – is stressed. This course meets the U.S. diversity requirement. (Prerequisite: HI 30) Three credits.
HI 237 The American Prophetic Tradition
This Ignatian Residential College course explores the experiences of individuals and social movements throughout U.S. history, who from a variety of religious and philosophical traditions found meaning in their lives and made an impact on U.S. society. Individuals range from Mary Dyer and Roger Williams to Lucretia Mott, Walter Rauschenbusch, Dorothy Day, John Cardinal Murray, and Jonathan Kozol, from the abolitionists to the anti-war movement. (Prerequisite: HI 30) Three credits.

HI 238 The United States, 1850 to 1900
Participants study the major transformations in U.S. economy, society, and politics from the decade of the crisis that led to the Civil War until the beginning of the Progressive Era. The course analyzes forces of change in the United States - urbanization, industrialization, the maturation of corporate capitalism, and the growing importance of international affairs - and their effects on the way people lived, thought, and acted. The experiences of African-Americans, immigrants, and women receive special attention. (Prerequisite: HI 30) Three credits.

HI 239 20th-Century United States
The course surveys developments in American social, political, and economic life since 1900. Major themes include problems of advanced industrial society, the growing government role in the economy, America's growing role in the world, and social movements of the 1930s and 1960s. Ethnic and cultural diversity within American society receive attention. The course meets the U.S. diversity requirement. (Prerequisite: HI 30) Three credits.

HI 240 The Personal is Political: Women's Activism in the 1960s
Little fanfare and much derision accompanied the re-emergence of a women's movement in the mid-1960s. Within less than a decade, massive changes were underway. From the dismantling of gendered employment ads to the identification of domestic violence as a crime, few argued that Second Wave Feminism was meaningless. Students in this course discuss the depth and range of women's草 roots activism as well as the features of a social movement; they trace the development of consciousness, the growth of different ideologies, and the formation of agendas. The course also explores movement fault lines such as the fictive category of woman, racism, and "structurelessness;" in addition to the difficulties of sustaining coalition. From the Montgomery bus boycott in 1955 to the Houston Conference 22 years later, students encounter the women who illuminated the political nature of issues once relegated to the private arena. Course material includes extensive use of autobiography. This course meets the U.S. diversity requirement. (Prerequisite: HI 30) Three credits.

HI 241/TA 241 Examining the Sixties: History, Art, and Legacy
This course, offered by two historians who specialize in 20th-century American history, explores the 1960s from the dual perspectives of history and the arts. Political and artistic change happened concurrently in this era, and was often instigated by people who promoted societal change via the creation of art. The course approaches the period as "the long '60s," beginning in the early 1950s and ending in 1975 with the U.S. withdrawal of forces from Vietnam. Class sessions combine lecture, discussion, and experiential events as a means of understanding how art and activism worked hand-in-hand. Students may choose to take this course for either visual and performing art or history core credit. Also listed as TA 241. This course meets the U.S. diversity requirement. Three credits.

HI 243 American Constitutional and Legal History I, 1776 to 1900
This course covers the origins of the American constitutional tradition, the manifold heritage of the American Revolution, Jeffersonian republicanism and federal judicial power, nationalism and the centralization of the Marshall court, the reaction on the Taney court, slavery and sectionalism, the Civil War, Reconstruction, the Second American Constitution, and the Gilded Age turn in American law. (Prerequisite: HI 30) Three credits.

HI 244 American Constitutional and Legal History II, 1900 to Present
This course examines the latter portion of the Fuller court, Imperialism and the Constitution, governmental efforts to restore economic competition, the police power, economic reform, progressivism, the tradition of national supremacy, new turns in civil liberties, the New Deal and the old Supreme Court, civil rights and the incorporation theory of the 14th amendment, and new roads back to legal conservatism. (Prerequisite: HI 30) Three credits.

HI 245 Feminism in America
Participants study feminism based on the premise that it is a multi-faceted struggle for women's autonomy and self-determination. The course focuses largely on the United States, birthplace of the first organized women's movement; however, it periodically expands its view beyond the United States for purposes of comparison. Students analyze the development of the feminist movement as well as feminist theory during the 19th and 20th centuries and explore the discourse on gender mediated by race and class, and its impact on women's lives. Using primary and secondary sources, students work toward a historical definition of feminism. Formerly listed as HI 143. This course meets the U.S. diversity requirement. (Prerequisite: HI 30) Three credits.
HI 246 Excellent Women, Deviant Women: The Female Experience

This course surveys American women's history from the colonial era to the present, exploring the impact as well as the interdependence of gender, race, and class on experience. Although the term social history describes the course approach, it uses biography to illuminate key issues and enrich student perspectives. Through careful examination of primary and secondary sources, the course pursues two themes: the interplay of gender constructs through the myths and realities of women's lives, and the crucial role women played in transforming public and private space. The course views women as agents whose testimony and actions are vital to understanding our history. Formerly listed as HI 142. *This course meets the U.S. diversity requirement.* (Prerequisite: HI 30) Three credits.

HI 250 America Enters the World: United States Foreign Relations, 1763 to 1900

Students explore the foundation of U.S. foreign relations from independence in 1776 to the outbreak of World War I in 1914. This course looks closely at the interrelationship between ideals and reality as the new United States struggled to protect and confirm its independence, establish a constitutional basis for foreign policy, and expand its borders and influence across the North American continent and around the world. The course discusses such questions as manifest destiny, the Monroe Doctrine, the Mexican War, the displacement of Native Americans, southern expansionism and the Civil War, the Spanish American War, and the open door policy as the United States became a world power on the eve of World War I. (Prerequisite: HI 30) Three credits.

HI 251 The American Century?: The United States and the World since 1900

This course examines the development, crises, and turning points in U.S. relations with the world from Woodrow Wilson to the present, exploring issues such as U.S. reactions to the Russian Revolution, World War I, isolationism and the coming of World War II, the Grand Alliance, the origins and development of the Cold War, the nuclear arms race, the Vietnam War, the United States and Latin America, U.S./Soviet relations, the Middle East and Persian Gulf crises, and the post-Cold-War world. (Prerequisite: HI 30) Three credits.

HI 253 Colonial America, 1584 to 1760

This study of the foundations of American civilization compares the colonial systems of Spain, France, and England. The course stresses the development of the British colonies in New England, the mid-Atlantic, and the South, with special emphasis on such topics as Puritanism, the Great Awakening, and the Enlightenment in America. The course also explores Native American/white relations and the development of white attitudes towards people of African American descent. (Prerequisite: HI 30) Three credits.

HI 254 American Military History

Through a study of America’s wars from the 17th century to Vietnam, this course examines the role of the military in a democratic society and its effects on our nation’s political, economic, social, cultural, and environmental institutions. Students analyze the changing nature of warfare through strategy and tactics, logistics, technology and weaponry and investigate geopolitics, the military-industrial complex, wars of national liberation, and counterinsurgency. Formerly HI 354. (Prerequisite: HI 30) Three credits.

HI 255 The United States in World War II

This course investigates the origins of World War II from the failures of the World War I peace settlements, the League of Nations, and collective security to the eruption of war in Europe and the Japanese attack on Pearl Harbor. The course examines important diplomacy of the wartime alliance; the major theaters of war; the military campaigns of Europe, Russia, North Africa and the Mediterranean, Asia, and the Pacific; use of the atomic bomb; and failure to make a satisfactory peace. Formerly HI 355. (Prerequisite: HI 30) Three credits.

HI 257 Who Built America? Working People in American History

This course explores the history of working people’s lives and social movements in the U.S. from the pre-industrial era, through the Industrial Revolution, to today’s “post-industrial” society. This is not an Industrial Relations course. We look at three broad areas of historical change: 1) work itself; 2) the making and re-making of the American working class; and 3) the definitions of social justice that working people constructed for themselves and that informed their social movements. Our goal is to understand how and why the “Labor Question” was at the heart of American reform movements in the 19th and 20th centuries. Special attention will be given to the experiences of women, African Americans, and other racial and ethnic groups. *This course meets the U.S. diversity requirement.* (Prerequisite: HI 30). Three credits.

HI 260 American Indian History

After a broad survey of prehistoric Indian cultures in North America as they existed before contact with Europeans, this course focuses upon European contact and its effects on Native-American culture. The course explores the Native American’s role in the colonial period of eastern North America history and the ways in which Native American societies west of the Mississippi River responded to U.S. expansion in the 19th century and to that of the Spanish earlier. The evolution of federal Indian policy from the American Revolution to the late 20th century is a major topic. *This course meets the U.S. diversity requirement.* (Prerequisite: HI 30) Three credits.
HI 262  African-American History, 1619 to 1865
This course examines the role that Africans played in the building of America after their forced migration to these shores. It emphasizes the rise of the plantation system, the cultural transformation of Africans into African-Americans, and the essential roles that slaves and slavery played in the emergence of the United States as an independent nation and its political and economic consolidation into a modern nation-state. Slaves and free blacks figure in this history, not just as tools and backdrop, but as social and political actors, rebels, and major builders of American civilization. This course meets the U.S. diversity requirement. (Prerequisite: HI 30) Three credits.

HI 263  Inventing Themselves: African-American Women in U.S. History
At the intersection of race, gender, and class, African-American women often challenged the codification of blackness and femaleness as well as a limited conception of class consciousness. From the diaspora to the present, they created forms of resistance, devised survival strategies, and transmitted cultural knowledge while defying racial/gender stereotypes. The multiple roles assumed by African-American women during their struggle from slaves to citizens in the United States represent a complex study of the relational nature of difference and identity. This course focuses on African-American women as subjects and agents of pivotal importance within the family, community, and labor force. This course meets the U.S. diversity requirement. (Prerequisite: HI 30) Three credits.

HI 264  African-American History, 1865 to Present
This course examines the role people of African descent played as freed people and free people during Reconstruction, the Gilded Age, and the 20th century. It emphasizes the Southern origins of African America, the politics and economic activism of common people, and the recurring theme of struggle against racial injustice. This course meets the U.S. diversity requirement. (Prerequisite: HI 30) Three credits.

HI 270  History of Global and Humanitarian Action
This course, an intermediate (second core) history course, surveys the history of global humanitarian action in the face of famine, war, plague, natural disaster, refugees and other crises, since the middle of the nineteenth century. We will focus on intervention by European powers, the United States, the international community, and non-governmental actors. Special focus in case studies will be on 20th century war, famine, and genocide. Each student will research a case study with a focus on potential points of life-saving intervention. (Prerequisite: HI 30) Three credits.

HI 272  Russia, 700-1700: History and Myth
This course is a survey of the eastern forest-steppe frontier of Europe (the territory of what is now Russia, Ukraine, and Belorussia) from its first pagan rulers up to Russian Tsar Peter the Great, covering such themes as Russian Orthodoxy, the Mongol invasion, the growth of the Russian State and the founding of the Russian empire. This course meets the world diversity requirement. (Prerequisite: HI 30) Three credits.

HI 273  History and Culture of Central and Eastern Europe since 1945
This core history course explores the extraordinary story of accommodation, resistance, and oppression in Central and Eastern European societies during the second half of the 20th century and the crucial role that cultural and intellectual forces played from the period of fascist and wartime occupation, through the communist period to the overthrow of communism and the development of new societies in the period 1985 to the present. The course interweaves film from Poland, the Czech and Slovak Republics, and Hungary, historical texts and documents, and memoirs and writings of key dissident intellectuals, such as Vaclav Havel. (Prerequisite: HI 30) Three credits.

HI/IL 274/260  Historical Perspectives on Contemporary Global Crises
This course examines, using topical, geographic, and critical approaches, the interaction of the United States and western Europe with the rest of the world in the 20th century, giving considerable attention to non-Western perspectives such as those of Asia, Africa, Latin America, the Arab world, Russia, and Eastern Europe. The course also includes an introduction to the history of U.S. foreign relations, international organizations, social change in the developing world, and world systems theory. (Prerequisite: HI 30) Three credits.

HI 275  Russia's Road to Revolution, 1689 to 1917
Topics in this course include the modernization of Russia since Peter the Great; the impact of Western culture in the 18th century; Catherine the Great as reformer; intellectual protest against autocracy and serfdom; revolutionary ferment: Slavophiles and Westerners; from populism to Marxism-Leninism; the revolution of 1905; the industrialization of Russia to 1914; and the revolutions of 1917. This course meets the world diversity requirement. (Prerequisite: HI 30) Three credits.
HI 276  St. Petersburg in Russian History
Students explore the history of Russia from Peter the Great to the present through the political, social, and cultural heritage of Peter’s city – St. Petersburg – Russia’s “window on the west.” St. Petersburg served as imperial Russia’s capital from 1703 to 1918. After the consolidation of Soviet power, St. Petersburg (as Leningrad) continued to play a key role in 20th-century Russian social, political, and cultural history. The collapse of the Soviet Union in 1991 led to the rebirth of St. Petersburg as a cultural center. The course emphasizes historical sites and cultural accomplishments of St. Petersburg through the use of slides, video, and music. This course meets the world diversity requirement. (Prerequisite: HI 30) Three credits.

HI 277  Mexico: Cortés to NAFTA
Topics in this course include Aztec society on the eve of the Spanish conquest; the nature and techniques of Spanish imperialism; Colonial society – church, state, hacendados, castas, indios; the revolutions for independence (1810-1821); the failure of liberalism in the mid-19th century and the subsequent dictatorship of Porfirio Diaz (1876-1911); the Mexican revolution, 1910 to 1940; and post-revolutionary Mexican society, 1940 to present. This course meets the world diversity requirement. (Prerequisite: HI 30) Three credits.

HI 278  Tradition, Imperialism, and Revolution in Mainland Southeast Asia
Participants study the mainland Southeast Asian cultures of Kambuja, Laos, Myanmar, Thailand, and Vietnam, noting the historical Indian and/or Chinese influences on each. Topics include the different forms of western colonial rule on the native cultures, the legacy of imperialism, World War I, the conquest of Japan and World War II on the rise of nationalist and Communist movements, post-war independence and modernization attempts in the Cold War milieu. The course searches for the answer to the question: Why Vietnam? (Prerequisite: HI 30) Three credits.

HI 279  China from Classical Time to the 1800s
To many people China is one of the most mysterious and intriguing civilizations. Its fascinating concepts of philosophy, government, religion, art, and science that formed several thousand years ago continue to influence the modern world. This course examines the history, culture, self-image, worldview, and the ideas and institutions that shaped China and its people from the classical time to the 1800s. It is difficult to cover several thousand years of Chinese civilization in one semester. However, after this course, students should emerge with basic knowledge of Chinese culture and people. This course is an analytical survey of major topics and themes in Chinese history and culture. The format of the course includes lectures, group discussion, debate, and audio-visual presentation. This course meets the world diversity requirement. (Prerequisite: HI 30) Three credits.

HI 280  The West and the Middle East
This course examines Western and Middle Eastern relations from the 18th century to the present, relating recurring upheavals of the Middle East, including conflicts between ethnic-religious groups and economic classes, to structural transformations that have developed across two centuries. Topics include Western colonization and conquest; Middle Eastern nationalism; the Arab-Israeli conflict; the economics and politics of oil; and the Islamic revival. This course meets the world diversity requirement. (Prerequisite: HI 30) Three credits.

HI 281  Portrait of the Arab
This interdisciplinary course provides a broad introduction to Arab culture and society in the past and present, using novels, poetry, films, and scholarly studies to investigate contemporary issues and their relationship to a complex historical legacy. Topics include the formation of Arab identity; the relationship of city and countryside; women and the family; literature; the arts and architecture; and nation building. This course meets the world diversity requirement. (Prerequisite: HI 30) Three credits.

HI 282  Social and Cultural History of China and Japan
The course examines the traditional institutions of the classical and imperial ages of China and Japan to 1800. Topics include the Confucian basis of society, state, and education; the diffusion of Sinic culture among China’s neighbors; arts and aesthetics; Japanese feudalism and the samurai tradition; early western contacts with China and Japan. This course meets the world diversity requirement. (Prerequisite: HI 30) Three credits.

HI 283  China, Japan, and the West, 1600 to Present
A study of the transformation of traditional civilizations of East Asia since 1800, course topics include the impact of the West and the opening of China and Japan, Japan’s Meiji reform and rise to a world power, imperialist rivalry in China, and nationalism and Communism in the 20th century. This course meets the world diversity requirement. (Prerequisite: HI 30) Three credits.

HI 284  20th-Century Russia
This course covers such major themes as the impact of the 1905 and 1917 revolutions; Lenin, War Communism, and the new economic policy; Stalin, collectivization, and the Great Purges; the Russian war experience and the Cold War; Khrushchev, reform, and de-Stalinization; Brezhnev, stagnation, and detente; Gorbachev, glasnost, perestroika, and political and economic crisis; the Revolution of 1987 to 1991; and post-Soviet Russia. Formerly HI 384. This course meets the world diversity requirement. (Prerequisite: HI 30) Three credits.
HI 285  Modern China: 1800 to Present
This course examines the major developments in modern Chinese history from about 1800 to the present to show China's transformation from a semi-colonial country in the 19th century to a major player in world affairs today. Topics include the Opium Wars, the impact of imperialism on China and China's response to it, the revolutionary movements of the first two decades of the 1900s, the rise of nationalism and Chinese Communism, the anti-Japanese War, the history of the People's Republic of China, the current economic reform movement and social changes, and China's role in the new world order. This course meets the world diversity requirement. (Prerequisite: HI 30) Three credits.

HI 286  The Rise of Modern Japan: 1800 to Present
This course examines the transformation of Japan from the late Tokugawa period in the 1800s to the emergence of Japan as a post-industrial society. It focuses on historical forces and events, and on the efforts of Japanese women and men that have shaped Japan's transition from a late developing industrial nation during the Meiji period (1868-1912) to a great economic power in the 20th century. The dramatic social, political, economic, and cultural changes of the 1980s and 1990s receive attention. Students compare Japan's path to modernization with that of the West. This course meets the world diversity requirement. (Prerequisite: HI 30) Three credits.

HI 287  A Green History of Latin America
This course covers the understanding and treatment of human and natural resources in Latin America from the time of triumphant indigenous empires in the 1500s through the colonial Spanish and Portuguese empires, the unstable 19th-century independent republics, the modernizing 20th-century republics, and the neo-liberal empire of the new world order. The course examines how the ruling elites throughout these eras understood and used human and natural resources, how voices of dissent responded to the policies of those ruling elites, and how those voices fared under the elites. This course meets the world diversity requirement. (Prerequisite: HI 30) Three credits.

HI 288  Colonial Latin America, 1492 to 1800
The course examines Indian cultures, Portuguese and Spanish institutions, and values on the eve of the conquests, including the clash of cultures and interests, and three ensuing centuries of New World dialectics: conquistadores, viceroyes, colonists, priests, friars, Indian caciques and peasants, black slaves, and free mulattos mutually interacting and forming, by 1800, a new civilization composed of varying hybrid cultures from the Rio Grande to Tierra del Fuego. The course also considers the Iberian colonies on the eve of the 19th-century revolutions for independence. This course meets the world diversity requirement. (Prerequisite: HI 30) Three credits.

HI 289  Modern Latin America, 1800 to Present
This course examines the successful overthrow of the colonial establishment from 1808 to 1826, two centuries of ensuing political, economic, social, and cultural instability, and the search for a viable social order, emphasizing the elusive search for reform in the 20th century—a revolution, counter-revolution, and persistent oligarchies. The failure of the revolutionary experience in Mexico, Chile, and Nicaragua; the current ascendency of neo-liberalism; and the great cultural achievements of the 20th century receive special consideration. This course meets the world diversity requirement. (Prerequisite: HI 30) Three credits.

HI 290  Central America: Conquistadores to Democracy
Topics include the indigenous cultures of Central America in 1500; the conquest culture of the Spanish, 1524 to 1821; the failure of the Central American union after independence; the consolidation of old elites through liberal and conservative regimes; attempts at modernization in the late 19th century and the beginnings of U.S. hegemony; 20th-century modernization under U.S. auspices; failed revolutions in Guatemala, El Salvador, and Nicaragua; the 1990s peace accords; and attempts at reconciliation and creation of civic societies. (Prerequisite: HI 30) Three credits.

HI 291  Africans in the New World, 1500 to 1800
Topics include the experience of Africans in the colonies of the New World from 1500 to 1800; the economic origins of modern slavery; the traffic in African slaves; perceptions of Africans by Europeans; slave systems imposed on the Africans; the response of Africans to slavery and subjection; and the role of freed Africans in the Spanish colonies, Portuguese Brazil, the British West Indies, French St. Dominique (Haiti), and British America/United States. Students make extensive use of primary sources. This course meets the world diversity requirement. (Prerequisite: HI 30) Three credits.

HI 292  History of the African Diaspora
This intermediate-level course considers how slaves were taken to Europe and the Americas where their knowledge, skills, and labor shaped Western social, cultural, and economic development. Africans were not merely enslaved to exploit their labor. Slaveholders targeted Africans who possessed knowledge and skills they wanted. This knowledge made slavery more profitable and successful than it otherwise would have been. Slaves carried African customs and beliefs with them to Europe and the Americas, which provided their lives with structure, meaning, and purpose. They also introduced these African customs and beliefs to their enslavers, transforming Western culture in the process. This course meets either the U.S. diversity requirement or the world diversity requirement. (Prerequisite: HI 30) Three credits.
HI 293  West Africa and the Making of the Atlantic World, 1444-1880
Traditionally, historians have treated West Africans as passive or unwilling participants in the Atlantic slave trade and the development of the Americas. West Africans have been depicted as pawns who were manipulated and kidnapped into slavery by Europeans. However, since the 1970s, scholars have increasingly recognized the fallacies of these assumptions. Prior to European contact, numerous West African kingdoms, empires, confederations, and smaller polities had developed. These polities were militarily powerful enough to resist European imperial designs until the late 19th century, to prevent Europeans from kidnapping their citizens into bondage and control the slave trade. This course will explore how West Africa contributed to the cultural and economic development of the Atlantic world and consider how European contact and interaction contributed to West Africa's development and underdevelopment. This course engages several historiographical debates to explore how West Africa influenced the cultural and economic development of the Atlantic world. This course meets the world diversity requirement. (Prerequisite: HI 30) Three credits.

HI 302  History and Memory: Coming to Terms with Traumatic Pasts
Genuine historical understanding requires not only knowledge of what transpired in the past but an appreciation of how perceptions have changed over time. This course introduces students to the complex relationship between history and memory by examining how divisive pasts have been remembered, politicized, and, if at all possible, come to terms with the 20th century. The pasts in question are historical legacies that have been marked by extremity rather than normalcy. They include cases of genocide, such as the Nazi Holocaust and the decimation of Native Americans in the New World, as well as episodes of military conflict such as World War II and the American Civil War. Marked by war, criminality, and death, these historical events have left deep scars upon the collective memories of the nations involved. They are thus excellent case studies for understanding how the past has evolved into the present. (Prerequisites: HI 30 and one 200-level course) Three credits.

HI 303  What If? Alternate History and the Historical Imagination
What if the American Revolution had failed? What if the South had won the Civil War? What if Hitler had never been born? This seminar investigates why these and other counterfactual questions have increasingly been posed in works of Western popular culture in the last generation. In exploring the recent emergence of “alternate history” as a cultural phenomenon, we examine a wide range of counterfactual novels, films, television shows, comic books, plays, and historical essays in comparative analytical fashion. In the process, we attempt to arrive at general conclusions about how counterfactual narratives help us better understand the roles of causality and morality in history, as well as the broader workings of collective memory. (Prerequisites: HI 30 and one 200-level course) Three credits.

HI 304  The Holocaust in History and Memory
The Holocaust demands, yet stubbornly resists, historical understanding. This course addresses the Nazis' genocidal assault upon European Jewry and others by examining a wide range of factors that contributed to it. The course explores the roots of modern German anti-Semitism, the origins of Nazism, the establishment of the Nazi dictatorship, the sharpening of anti-Jewish measures during the Third Reich, and the escalation of persecution following the outbreak of World War II that culminated in the so-called Final Solution. Students consider the legacy of the Holocaust after 1945 by examining the postwar struggle to preserve its lessons in memory, the difficulty in finding adequate cultural means of representing its extreme dimensions, and the challenge of understanding the lessons that the event left for the postwar world. (Prerequisites: HI 30 and one 200-level course) Three credits.

HI 314  Peasant Toil, Peasant Revolt: Daily Life in Rural Europe before 1900
This course examines European peasant life from the Middle Ages until roughly 1900, with particular emphasis on historians’ views of the topic. Based on historical studies of the peasantry, beginning with those of a pivotal group of 20th-century French scholars who transformed the study of European history and of history in general, the course considers how peasants lived, worked, and raised families; how they practiced religion; and how they related to political change in their communities. The course introduces students to various important scholars’ treatments of peasant culture, and when and how peasants were moved to acts of violence. (Prerequisites: HI 30 and one 200-level course) Three credits.

HI 315  Ireland Since the Famine
This course is an in-depth examination of political, social, religious, and economic developments in Ireland from 1850 to the present day. Up to 1921 the focus is on the entire island including Ulster. After 1921 the focus turns to the Irish Free State and later Republic (Eire), although developments in Northern Ireland are studied as they compare with the history of the southern republic and as they bear upon relations with it. Students examine the interaction of politics with religious and ethnic divisions, international relations, economic conditions, and cultural patterns, including education and social mores. (Prerequisites: HI 30 and one 200-level course) Three credits.
HI 316 The French Revolution and Napoleon
The course considers the causes of the Revolution, the move from moderate to radical change, the dynamics of the Terror, the roots of counterrevolution, and the reaction that led to military dictatorship. It also analyzes Napoleon’s career, the basis of his empire and its relationship to the satellite kingdoms, and the effects of French hegemony upon Europe. (Prerequisites: HI 30 and one 200-level course) Three credits.

HI 317 Religious Outsiders in Early Modern France and Europe
The course explores the role of religious minorities, including Protestants, Jews, and Catholic splinter groups, from 1492 to the French Revolution, with emphasis on the political and social aspects of each group’s existence. Students examine images of religious minorities and forms of oppression and persecution to determine the boundaries of authority and the nature of belonging in European society, and how these aspects were changing during this period. Students use primary and secondary sources. (Prerequisites: HI 30 and one 200-level course) Three credits.

HI 319 The European Enlightenment
Students obtain an extended introduction to the classic philosophies of the European Enlightenment: Montesquieu, Voltaire, Helvetius, Diderot, Rousseau, d’Holbach, Hume, Beccaria, Lessing, and Kant, and their notions of empiricism, utilitarianism, liberalism, and human rights. Students undertake primary source readings on the philosophers’ views of women and human sexuality, the other (Jew, African, Muslim, American Indian), and colonialism (Adam Smith). Major texts of Diderot, Gibbon, and Condorcet conclude the survey. (Prerequisites: HI 30 and one 200-level course) Three credits.

HI 320 European Romanticism, 1770 to 1840
Students undertake primary source readings in the late 18th-century founders of European romanticism (Rousseau, Goethe, Blake, Schiller, and Lessing) and extended readings in the classic romantics (Chateaubriand, Constant, de Maistre, Byron, Shelley, Büchner, Mazzini, and Newman). The course requires further primary source readings to consider the romantics’ views of society, religion, women, Negroes, slavery, American Indians, and Arabs. Shelley’s Defense of Poetry and a Balzac novel complete the survey. (Prerequisites: HI 30 and one 200-level course) Three credits.

HI 323 Tudor-Stuart Britain, 1485 to 1714
This course examines the changes in church, state, and society that took place in the British Isles from the accession of Henry VII to the death of Queen Anne. These centuries saw the unification of England, Ireland, and Scotland under a single government, the development of that government from feudal kingship into Parliamentary-based bureaucracy, and the shattering of medieval Catholicism into a variety of different churches and doctrines. The course also examines the structure of Tudor-Stuart society and the cultural changes resulting from the Renaissance and the Scientific Revolution. (Prerequisites: HI 30 and one 200-level course) Three credits.

HI 331 Era of the American Revolution, 1763 to 1800
An examination of the coming of the American Revolution and the transition from colonial to national status, this course discusses the military struggle itself and provides an assessment of the political, social, and economic effects of the Revolution. Topics include the Confederation period, the forming of the 1787 Constitution, and the Federalist era. Figures such as John Adams, Tom Paine, Jefferson, Hamilton, Madison, and Washington receive special attention. (Prerequisites: HI 30 and one 200-level course) Three credits.

HI 340 Reconsidering the New Deal Order, 1930 to 1980
This research seminar explores the history of U.S. society and politics from the Great Depression to the Great Society and considers the reasons for the successes and failures of public policy during these times. After considering economic and social changes from 1930 to 1980, the course examines the history of domestic social policy topics such as unemployment relief, economic planning, industrial relations, and the welfare state. The course also considers initiatives generated by politicians, business groups, government planners, labor movements, and community movements. (Prerequisites: HI 30 and one 200-level course) Three credits.

HI 342 Immigration, Ethnicity, and Race in U.S. History
This thematically arranged intensive reading, writing, and discussion seminar on the history of U.S. immigration in the 19th and 20th centuries situates the United States within the context of global migration patterns and economic development. Students investigate patterns of migration and community settlement, family strategies of survival and adaptation, and immigrant cultures. They analyze how successive groups of immigrants were received by U.S. society by examining the origins and effects of recurrent waves of racism, nativism, and ethnic and class antagonism that pervade American history. This course meets the U.S. diversity requirement. (Prerequisites: HI 30 and one 200-level course) Three credits.
HI 348 Social Movements in 20th-Century U.S. History
This research seminar explores the social history of grass-roots movements in the 20th-century United States and their effect on the contours of formal politics in American history. The course examines political processes such as pressure-group activity within the two-party structure, grass-roots political action, the rise of third parties and alternative ideologies, as well as the development, transmission, and change of popular political culture; the effects on politics of organization in other arenas; and the importance of racial and ethnic identities in American politics. (Prerequisites: HI 30 and one 200-level course) Three credits.

HI 356 History of the Cold War
This intensive reading, writing, and discussion seminar focuses on the origins, deepening, and decline of the Cold War between the United States and the Soviet Union from 1917 to 1991, covering such issues as Lenin-Wilson ideological antagonism, the shift from Grand Alliance to Cold War, the arms race, the rise and fall of detente, and the collapse of the Cold War order in Europe and the Soviet Union from 1989 to 1991. The course attempts to approach the topic by understanding both sides of the conflict, studying decisions, policies, and actions in a bilateral fashion. (Prerequisites: HI 30 and one 200-level course) Three credits.

HI 362 The Frontier: A Green History of North America
This course considers the interaction of man and the American land from the earliest colonial settlements to the present and includes an analysis of the Turner thesis; a survey of regional evolution (New England and the Southwest, for instance); the westward movement; the experience of pioneer women; and mining, cattle, and farming frontiers. The course also examines changing attitudes toward the environment as reflected in the writing of American naturalists; man and the environment in different eras of the American past. (Prerequisites: HI 30 and one 200-level course) Three credits.

HI 363 China in Revolution
The course begins with the 19th-century imperialist legacy that gave rise to Chinese nationalism and the Chinese revolution of 1911. Major topics include Sun Yat-sen’s vision for China, the struggle between the nationalists and Communists for control of China, the impact of Japanese imperialism and World War II, and the founding of the People’s Republic of China in 1949. Students analyze PRC’s domestic and foreign policies through the “Great Leap Forward,” the thought of Chairman Mao, the Great Proletarian Cultural Revolution, Sino-Soviet bloc relations, Korea, Vietnam, and the “two Chinas issue” with the United States. This course meets the world diversity requirement. (Prerequisites: HI 30 and one 200-level course) Three credits.

HI 366 Gender, Culture, and Representation: Women in China and Japan 1600 to Present
Are Chinese and Japanese women mere victims of a patriarchal society? Do socialist revolution and industrial modernization liberate women? This seminar examines those questions by studying the historical changes and continuities in the experience of women in China and Japan from approximately the 17th century to the present. The construction and representation of gender relations in China and Japan represent complex processes with many changes. Using verbal and visual texts, this course considers women’s lives and their struggles to represent themselves in both societies as well as the historiography on those subjects. This course meets the world diversity requirement. (Prerequisites: HI 30 and one 200-level course) Three credits.

HI 367 East Asia in 20th-Century American Wars
During the 20th century the United States fought three wars in East Asia: the Pacific War, the Korean War, and the Vietnam War. How did the East Asians perceive and react to the wars? How did the wars affect people’s lives and societies in East Asia? How did the wars affect the postwar relations between the United States and East Asia? Did race, culture, and ethnicity play significant roles in these wars? This course examines those questions by studying East Asia in the three American wars as an oral and social history. The course focuses on the human dimensions of the wars as experienced by those East Asians who fought and lived through them. This course meets the world diversity requirement. (Prerequisites: HI 30 and one 200-level course) Three credits.

HI 370 The Jews of the Middle East and North Africa
Students examine Jewish history within the Middle East and North Africa from the rise of Islam until the creation of Israel. The course analyzes the development and key features of Judeo/Arab societies and the factors that contributed to their disintegration and destruction. Topics include Arab/Jewish relationships before Islam; the Prophet Muhammad and the Jews; the legal, social, and economic status of Jews in the Arab/Islamic Middle Ages; Jewish cultural development within an Arab/Islamic context; and Jews of the Arab and Turkish worlds in the 19th and 20th centuries. This course meets the world diversity requirement. (Prerequisites: HI 30 and one 200-level course) Three credits.

HI 371 Arab-Israeli Conflict
The course traces the Arab-Israeli conflict from the end of the 19th century until the present, emphasizing the political and socioeconomic transformation of Palestine as Zionists and Palestinian Arabs struggled for political sovereignty in the same land. Topics include Anti-Semitism and the Birth of Zionism; the British Mandate; the creation of Israel; the relationship between Israel and the Arab states; the Israeli occupation of the West Bank and Gaza; the rise of the Palestinian resistance; Israel’s war in Lebanon; and prospects for the future. (Prerequisites: HI 30 and one 200-level course) Three credits.
HI 372  Terrorism in History
This course examines terrorism as it has been perpetrated by individuals, political-military groups, and states of varying political ideologies. Topics include political violence in antiquity and medieval times; the French Revolution; terrorism, anarchism, and Marxism; terrorism and national liberation; and terrorism and religion. (Prerequisites: HI 30 and one 200-level course) Three credits.

HI 376  The Spanish Caribbean: Cuba, Santo Domingo, and Puerto Rico from Columbus to Castro
Topics in this course include the Spanish conquest; the demise of the Caribbean Indians; colonial institutions and plantation slavery; Toussaint L'Ouverture and the establishment of the first Black republic in Latin America; economic growth and revolutionary currents in 19th-century colonial Cuba; 20th-century anarchy and dictatorship in Haiti and the Dominican Republic; U.S. economic domination of Puerto Rico and the emergence of a Puerto Rican identity; the final stages of Cuba's Hundred Years War of liberation from Spain and the United States: Fidel Castro and Marxist Revolution; and Haiti after the destruction of the Aristide revolution. This course meets the world diversity requirement. (Prerequisites: HI 30 and one 200-level course) Three credits.

HI 385  Comparative Russian Revolutions
An intensive reading, writing and discussion seminar studying in some depth the background, origins, development, and outcomes of two Russian revolutionary periods of the 20th century: the interrelated upheavals of 1905 to 1917, resulting in the overthrow of the tsarist regime and its replacement by the Bolsheviks; and the reform, collapse, and transformation of the Communist government of the Soviet Union from Mikhail Gorbachev to the present. In the process of two in-depth examinations, the course explores contrasts among the social, economic, political, and cultural forces at work in the two revolutionary periods. (Prerequisites: HI 30 and one 200-level course) Three credits.

HI 391  The Meanings of History
This upper-division seminar for juniors and seniors analyzes the ideas of seminal Western and non-Western thinkers - historians and philosophers who have had a profound influence on historical understanding and the practice of historians. Topics include the following questions: What is history? To what extent has the understanding of history changed in various times, places, and cultures? Are “scientific” history and the discovery of objective truth possible? Do stable civilizational identities exist and what value do such concepts have for historical understanding? The course examines the contemporary political, social, and cultural relevance of these and comparable questions through intensive readings, discussions, and analytical papers. (Prerequisites: HI 30 and one 200-level course) Three credits.

HI 395  History Internship
Candidates work a minimum of eight hours per week during the semester at the Fairfield Historical Society, Greenwich Historical Society, or Bridgeport Public Library Historical Collections. An intern’s work at these sites may include researching and mounting an exhibit, cataloging manuscript and artifacts collections, or organizing and conducting historical walking tours. Training in required skills is provided at the site. Under the direction of a member of the history faculty, interns write a research paper based on the work of the internship. Open to juniors and seniors by arrangement as available. (Prerequisites: HI 30 and one 200-level course) Three credits.

HI 397  Special Topics in History
This course offers an in-depth investigation of a significant historical problem or topic, conducted in a seminar format. The professor teaching the course chooses the topic. The course is limited to 15 junior- or senior-level students. (Prerequisites: HI 30 and one 200-level course) Three credits.

HI 399  Independent Study
Open to juniors and seniors only, this course provides an opportunity for advanced students to develop critical reading skills and writing ability in a tutorial arrangement with a chosen professor. Normally, the course results in a serious paper of publishable quality in student-centered journals (15 to 20 pages). Students arrange for independent study during registration period of the semester prior to the one in which they wish to take the course by applying to a professor under whose direction they wish to study. Students should obtain a copy of the “Department Policy for Independent Study” from the chairperson prior to applying. All independent study must have the concurrence of the department chairperson. Students may take only two independent studies. (Prerequisites: HI 30 and one 200-level course) Three credits.
The Honors Program at Fairfield University is an interdisciplinary course of study open to invited freshmen and sophomores from all of the University’s undergraduate schools. Since the program offers a curriculum of team-taught courses and small seminars, it is highly selective. Students who pursue Honors study at Fairfield are highly motivated, passionate about learning, and willing to engage their professors and fellow students in lively discussions about the great ideas that have shaped our culture and world cultures. Honors students at Fairfield also are invited to attend intellectual and cultural events outside the classroom such as Broadway plays, guided museum tours, operas, and faculty-led colloquia on a variety of topics.

The Honors curriculum challenges students to achieve the following educational goals:

1. to become culturally literate in the Western tradition by studying some of its “great ideas” as expressed in the humanities, the arts, and the social and natural sciences;
2. to appreciate challenges to the Western intellectual tradition either by considering critical voices traditionally marginalized in that culture or by investigating the assumptions of a non-Western culture;
3. to learn to make connections between disciplines, and to learn to ask the larger questions that transcend any single discipline; and
4. to bring the honors experience to bear on the field of their chosen major at a high level of accomplishment through the completion of a research project appropriate to the particular discipline.

Curriculum
The Honors Program comprises 23 credits. Twenty credits are earned through six honors courses completed in the first three years of the program (HR 100, HR 101, HR 200 or HR 201, 2 sections of HR 202, HR 300); the program recognizes three credits earned through an independent study usually undertaken in the student’s major during the senior year.

Students who complete the Honors Program are exempt from 21 credits in the core curriculum.

Students who enter the program as freshmen are exempt from the 3 English core courses (9 credits). They also may exempt themselves from 4 courses chosen from the following 6 areas or disciplines, with no more than 1 exemption claimed in any area or discipline: Natural Science, History, Social/Behavioral Science, Philosophy, Religious Studies, and Visual and Performing Arts (4 courses, 12 credits). In choosing to fulfill their remaining core requirements in Applied Ethics, History, Philosophy, and Religious Studies, Honors students may enroll in 200-level courses without having taken the stipulated prerequisites.

Students who enter the program as sophomores and who have completed EN 11 and EN 12 are exempt from the third English core course (3 credits). They are also exempt from 1 course in each of the following 6 areas or disciplines: Natural Science, History, Social/Behavioral Science, Philosophy, Religious Studies, and Visual and Performing Arts (6 courses, 18 credits). In choosing to fulfill their remaining core requirements in Applied Ethics, History, Philosophy, and Religious Studies, Honors students may enroll in 200-level courses without having taken the stipulated prerequisites.

The student’s second year of Honors course work will satisfy either the U.S. diversity requirement (HR 200) or the world diversity requirement (HR 201) depending on the course the student completes. Apart from fulfilling 1 diversity requirement and replacing 7 core courses, Honors courses cannot be double-counted to satisfy any other curricular requirement.

Students who complete the Honors Program in good standing have their achievement noted on their final transcripts. Those who complete the program with an average grade of B+ in honors courses receive the designation “University Honors Program Completed with Distinction.” Those who complete the program with an average of A in honors courses receive the designation “University Honors Program Completed with High Distinction.”

Fulbright Track in Honors
The Honors Program offers an alternative ordering of courses to support Honors students who apply for the prestigious Fulbright Scholarship. This “Fulbright track” in the Honors curriculum allows Fulbright applicants to complete their Senior Honors Projects in their junior year so that this research can provide a foundation for their Fulbright applications. Honors students who are interested in the Fulbright track should speak to the Honors Program Director.
In the second year of honors coursework, students complete either HR 200 or HR 201. This course meets the world diversity requirement. Three credits.

**HR 202 Honors Seminar**
This seminar, offered in one of the traditional disciplines, seeks to cultivate the skills of critical thinking, cogent argumentation, and effective writing, all by attending to a particular subject matter. Honors students earn six credits in HR 202 by completing one version of the seminar in their second year of honors coursework and another version of the seminar in their third year of honors coursework. A complete title, reflecting the seminar’s particular subject matter, appears on the student's transcript. Students may not enroll in any section of HR 202 offered in a discipline in which they major or minor. Three credits.

**THIRD YEAR:**
**Interdisciplinary Inquiry**

**HR 300 Interdisciplinary Inquiry**
This team-taught course stresses the value of interdisciplinary approaches to scholarly inquiry by investigating a wide-ranging theme from the perspective of at least two disciplines. Possible themes treated in a given year are progress and its critics, genius and creativity, and the city in the American imagination. Three credits.

**HR 202 Honors Seminar**
This seminar, offered in one of the traditional disciplines, seeks to cultivate the skills of critical thinking, cogent argumentation, and effective writing, all by attending to a particular subject matter. Honors students earn six credits in HR 202 by completing one version of the seminar in their second year of honors coursework and another version of the seminar in their third year of honors coursework. A complete title, reflecting the seminar’s particular subject matter, appears on the student's transcript. Students may not enroll in any section of HR 202 offered in a discipline in which they major or minor. Three credits.

**HR 399 Senior Honors Project: Independent Study**
The senior honors project provides an opportunity for students to engage in mature research under the supervision of a faculty mentor. The senior honors project is not a course in its own right but an independent study of three credits, typically conducted in the student’s major field of study, which is recognized toward the completion of honors requirements. In the humanities, the project should be a paper of at least 25 to 50 pages in length. In studio art and creative writing, the project should take the form of a significant portfolio. In the natural sciences, mathematics, social sciences, nursing, and in the various areas of business, the finished project should conform to the discipline’s acceptable format and length for publication. Three credits.
The Individually Designed Major allows qualified students in the College of Arts and Sciences, under appropriate direction of at least two faculty advisors, to design and pursue an interdisciplinary major presently not available in the College.

The Individually Designed Major is, as its name implies, a major designed by the student. It must be a true major, with a progression of courses, including an appropriate number of advanced courses. It cannot be a simple collection of introductory courses in several disciplines. The major may be an extension of a presently existing interdisciplinary minor, or it may be a wholly new subject (e.g., Nineteenth-Century Europe).

Courses already taken may be included in the major, but the Individually Designed Major should be, as a whole, a planned endeavor, not simply the pulling together of courses already taken. For this reason application is required in the student's second year, though in special circumstances a review panel may allow application in the first semester of the student's third year.

Course Requirements

The major requires a minimum of ten courses.

1. The major must be truly interdisciplinary. While there may be a primary department, at least four courses must be taken outside that department.
2. The major requires a suitable number of advanced courses.
3. The major also requires a senior project (seminar, capstone course, supervised lab, or whatever is appropriate for the relevant disciplines). The purpose of this project is to allow students to pull together the multiple threads of the interdisciplinary major.
4. Finally, the major requires that the student maintain a portfolio for the purpose of a reflective review and self-assessment of the progress and changes in direction, if any, of the major. The student will use these materials as part of a progress review with advisors at least once a semester. The student must also submit a final assessment of the major to the review panel as a requirement for graduation.

Eligibility

To be eligible, the student must have a GPA of at least 3.0 at the time of application. Applications and instructions may be obtained from the office of the Dean of the College of Arts and Sciences.
International Studies Major

Requirements
Students majoring in International Studies begin with foundational coursework in international relations, economics, geography, and sociology/anthropology, and complete their degree requirements with a senior research project. To prepare for this, they develop their own specialization drawing on courses in the thematic areas of Global Development; Conflict, Diplomacy and Peace Building; and Social Justice and Humanitarianism. The challenges and perils that face the global community are multifaceted and complex. Students acquire different sets of knowledge, tools, and perspectives to deal with the complexities that face local to global communities.

Complementary Studies and International Opportunities
Students complement their International Studies major with coursework in related departments like politics, economics, sociology or foreign languages, and in the Dolan School of Business. Many students also pursue related interdisciplinary programs, such as environmental studies, women’s studies, peace and justice, and area studies. They also study economics and business emphasizing multinational organizations and regional trade pacts, economic and political systems, socio-cultural structures, microfinance and diversities that have operational significance for community and economic development and international business.

The International Studies Program reinforces multidimensional learning with real-world experience through language studies, service learning, Model United Nations, internships, and study abroad opportunities, and through work with our faculty in research projects and as student teaching assistants.

Graduation with Honors in International Studies
Students with a GPA of 3.5 or greater in international studies major courses or in overall course work and no less than a 3.2 GPA in either area are candidates for graduation with honors in international studies. Students earn honors status by writing and orally defending a superior paper in IL 300 Senior Capstone Seminar. Fairfield University has a campus chapter of Sigma Iota Rho, the national honor society for international studies. Students must have attained a junior standing and completed at least twenty-one hours of course work toward the International Studies/Business major. Students with an overall GPA of 3.2 or greater and a GPA of 3.3 or higher in their International Studies/Business major are nominated for membership.

Requirements

International Studies Major
For a major in International Studies through the College of Arts and Sciences, students:

1. Complete the following foundational courses in the major:
   - IL 50 World Regions
   - IL 51 Challenges of Global Politics
   - IL 52 Culture and Political Economy
   - IL 53 Introduction to Economics
     (or EC 11 and EC 12, as required for International Business majors)
   - IL 300 Senior Capstone Seminar

2. Complete 15 credits of electives selected from any three thematic areas, with at least two theory and two applied courses, to develop a specialization in International Studies. These electives may be taken any time during the student’s undergraduate studies, though students may wish to spread these courses over their junior and senior year. Students in study abroad may take approved courses to satisfy these electives. However, students are encouraged to complete IL 50, 51, 52, and 53 in their Freshman and Sophomore years, as described below. Students may also complete 15 credits of electives through a self-designed study, with approval of the director.

Suggested Course of Study

Freshman Year
- IL 50

Sophomore Year
- IL 51 or 52 (take both in sophomore year if studying abroad in junior year)
- IL 53 (usually offered in the Spring Semester)

Junior Year
- IL 51 or 52
- Choose 5 electives from the thematic areas (at least two theory and two applied courses)

Senior Year
- IL 300 Capstone
- Complete any remaining electives from the thematic areas (at least 2 theory and 2 applied)
International Studies Minor

The College of Arts and Sciences offers a six-course, 18 credit minor in International Studies consisting of:

- IL 50 World Regions
- IL 51 Challenges of Global Politics
- IL 52 Culture and Political Economy
- IL 53 Introduction to Economics
  (or EC 11 and EC 12)
- Two electives from the thematic areas, with one theory and one applied course.

International Business Major

For B.S. in International Studies through enrollment in the Dolan School of Business, please see p.

Course Offerings

For students majoring in the new curriculum introduced with this 2008-2009 Catalog, please see these course listings below.

Foundational Courses

IL 10 Introduction to International Studies:
IL 50 World Regions
IL 51 Challenges of Global Politics
IL 52 Culture and Political Economy
IL 53 Introduction to Economics
IL 300 Capstone

Electives – Theory Courses

IL 197 UN Security Council Simulation
IL 295 Seminar: Human Rights
IL 295 Seminar: International Refugee Law
IL 295 Seminar: International Organizations
IL 295 Seminar: Non-state Actors and Transnational Communities

Applied Ethics

AE 288 Ethical Dimensions of Global Humanitarian Policy
AE 293 Ethics of War and Peace
AE 393 Seminar on War, Peace, and Public Policy

Economics

EC 230 Comparative Economic Systems
EC 231 International Trade
EC 233 International Economic Policy and Finance
EC 235 Economic Development of Third World Nations

Management

MG 360 Negotiation and Dispute Resolution
MG 385 Managing People for Global Business

Politics

PO 12 Comparative Politics
PO 115 Introduction to Peace and Justice
PO 130 International Relations
PO 134 Globalization: Who Rules the World?
PO 149 Third World: Common Fate?
  Common Bond?

Religious Studies

RS 235 Liberation Theology

Sociology and Anthropology

SO 190 Globalization
SO 191 Social Change in Developing Nations
AY 163 Culture and Inequality

Electives – Applied Courses

IL 150 International Operations of Non-Profits
IL 260 Historical Perspectives on Contemporary Crises
IL 298 Internship
IL 299 Independent Studies

Economics

EC 120 Environmental Economics

History

HI 251 The American Century? U.S. Foreign Relations since 1900
HI 273 Cultural and Historical Aspects of Post-Communist Transition
HI 284 20th Century Russia
HI 285 Modern China: 1800 to Present
HI 289 Modern Latin America, 1800 to Present
HI 366 Gender, Cultures, and Representation: Women in China and Japan

Latin American and Caribbean Studies

LAC 300 Justice and the Developing World

Management

MG 360 Negotiation and Dispute Resolution
MG 385 Managing People for Global Business

Politics

PO 133 U.S. Foreign Policy
PO 144 Middle Eastern Politics
PO 141 African Politics
PO 147 Northern Ireland: The Politics of War and Peace

Sociology and Anthropology

SO 185 International Migration and Refugees
AY 152 Islamic Societies and Cultures
AY 180 International Research Practicum
Course Descriptions

Foundational Courses:

IL 50  World Regions
This course introduces students to some of the fundamental concepts of International Studies through a detailed overview of world regions. Major world regions and selected countries within them are discussed with respect to their physical, demographic, cultural, political, and economic characteristics. Several concepts and themes are explored, among which the physical environment, conflict, inequality, global interconnectedness, and the movement of goods and people across borders are central. This course will emphasize contemporary events, particularly as they relate to the fundamental themes covered. The course meets the world diversity requirement. Three credits.

IL 51  Challenges of Global Politics
Global politics is multifaceted and has many different kinds of players, ranging from states and international organizations, to transnational social movements and illicit networks. The course examines how these players work together or confront each other over issues in: (1) global development; (2) global justice and humanitarianism; (3) diplomacy and peace building. The course draws from international relations theories and related disciplines and methodologies to understand the challenges of shaping narrow or multidimensional solutions, and the ethical concerns, and consequences – both intended and unintended. Three credits.

IL 52  Culture and Political Economy
This course examines the ways in which global political economic dynamics impact local cultures. Students will begin with classic texts in social theory, examine how this theory informs contemporary debates, and look to small-scale societies in the Global South for an intimate, ethnographic perspective of our global era. Three credits.

IL 53  Introduction to Economics
This course introduces the fundamentals of economic analysis from individual consumer behavior to the choices firms make, as well as framing the aggregate economy and indicators that measure global economic activity. It will cover the basics of both micro and macro economic study. Supply and demand, market structures, international trade, fiscal, and monetary policy are introduced. Three credits.

IL 300  Senior Capstone Seminar
This course requires students to theorize and analyze emerging trends in the political, socio-cultural, economic, and business dimensions of global affairs, and develop the implications in a particular context or setting. Students undertake a major research project as a central activity in this course drawing on the expertise and research methodologies they have developed in International Studies. This course is offered the senior year after students have completed all core courses in international studies. Three credits.

IL 197  United Nations Security Council Crisis Simulation
This course gives students a hands-on learning experience in world diversity by simulating a United Nations Security Council crisis in international peace and security. The objective is to introduce students to the challenges of global governance in light of the different perspectives they encounter representing different constituencies of the UN Security Council who come from diverse cultural, historical, and geopolitical regions of the world. A key goal of the course is to bring to light whether and how power disparities limit the global south’s effective representation, and the stakes in reform of the Security Council. While the topic of the simulation will vary, the focus is on a crisis in a non-Western region of the world. This course meets the world diversity requirement. Three credits.

IL/HI 260/274  Historical Perspectives on Contemporary Crises
Using topical, geographic, and critical approaches, this course examines the interaction of the United States and Western Europe with the rest of the world in the 20th century, giving considerable attention to non-Western perspectives such as those of Asia, Africa, Latin America, the Arab world, Russia, and Eastern Europe. The course includes an introduction to the history of U.S. foreign relations, international organizations, social change in the developing world, and world systems theory. Three credits.

IL 299  Independent Study
Students pursue an independent research project on international issues under the supervision of a faculty member. Open to juniors and seniors with the director’s permission. Three credits.

Students completing the pre-2008-2009 curricular requirements for a major or minor in International Studies, are advised to consult with the director or the associate director of International Studies.

The Irish Studies program explores various aspects of a culture that has produced the oldest vernacular literature in Europe, a rich tradition of Celtic art, and a devotion to scholarship that perhaps was crucial in saving Western civilization. As a nation, Ireland has had a long, turbulent, and fascinating history and politics. In the last fifty years, Ireland has changed from a conservative, agricultural country to a modern, technologically innovative one, from a colony of Great Britain to a free, democratic republic, and from one of the poorest nations in the world to one of its most prosperous.

Irish Studies at Fairfield affords students the opportunity to investigate the contributions of Ireland to the world in terms of its literature, history, politics, film, and art. Now affiliated with the National University of Ireland, Galway, the Irish Studies program, through study abroad, also allows students to take Irish-focused courses in archaeology, economics, the Irish language, music, sociology, and politics.

Requirements

For a 15-credit minor in Irish studies, students:

• Complete five three-credit courses including one of the following:
  • EN 279 Irish Literature, HI 215 History of Ireland, Middle Ages to the Present, or HI 315 Irish History from the Famine to the Present.
  • Those who choose EN 279 may take up to two additional English courses and must take the remaining two courses in different fields.
  • Those choosing HI 215 or HI 315 may take up to three additional courses in English, with the remaining course in a field other than English or history. At least these courses must be taken at Fairfield.
  • Note: Students may apply no more than two courses taken while studying abroad in Ireland during the fall or spring semesters toward the minor’s requirements. This restriction does not apply, however, to English credits earned during Fairfield University’s two-week Galway Summer Experience at the National University of Ireland, Galway (EN 369).

While studying abroad is not required for completion of the Irish studies minor, students are encouraged to do so.

Studies courses are offered in a variety of fields and disciplines. Please contact the program director for a course list and course descriptions. Some available courses are:

AH 121 The Celtic World and Early Irish Art
AS 327 The Irish in American Film
EN 256 Myths and Legends of Ireland and Britain
EN 268 The Irish Short Story
EN 269 Modern Irish Drama
EN 273 Irish-American Literature
EN 278 Irish Women Writers
EN 279 Irish Literature
EN 393 James Joyce’s Ulysses
HI 215 Ireland from the Middle Ages to the Present
HI 315 Irish History from the Famine to the Present
PO 147 Northern Ireland: The Politics of War and Peace
PO 151 Politics of the Immigrant

Italian

(see Modern Languages and Literatures)
While study abroad is not required for completion of the minor, participation in the University's programs in Florence or Siracusa, Italy (fall, spring, or summer sessions) is strongly encouraged. Italian studies courses are offered in a variety of fields and disciplines. A complete list of Italy-focused and Italy-component courses is available from the program director.

### Course offerings:

#### Modern Languages and Literatures
- IT 110-111  Elementary Italian
- IT 210-211  Intermediate Italian
- IT 223  Italian Composition and Oral Expression
- IT 253  Contemporary Italian Culture
- IT 262*  Rome in the Cultural Imagination
- IT 289/EN 257*  Dante
- IT 271*/FM 103  Italian Cinema
- IT 355  The Novella
- IT 381/IT 382  Coordinating Seminar/Independent Study
- IT 393**  Italian American Experience
  *Taught in English
  **Counts toward the U.S. diversity requirement

#### History
- HI 203  European Society in the Middle Ages
- HI 218  The Renaissance and Reformation
- HI 219  Italy from Renaissance to Revolution, 1559-1848

#### Philosophy
- PH 212  Political Philosophy: Plato to Machiavelli

#### Politics
- PO 123  Modern Political Ideologies
- PO 140  European Politics

#### Religious Studies
- RS 204  Voices of Medieval Women: Silent No More
- RS 224  The Papacy

#### Visual and Performing Arts
- AH 112  Etruscan and Roman Art and Archaeology
- AH 130  Renaissance Art in Italy
- AH 135  Renaissance and Baroque Architecture
- AH 140  Baroque Art
- AH 191  Art and Mythologies of Nazi Germany, Fascist Italy, Bolshevik Russia

#### English
- EN 283  The Modern Italian Short Story

### Japanese

Judaism is a fundamental study for all who wish to understand the roots of Western civilization. The Jewish religion is the oldest monotheistic faith and remains a vital tradition as well as the foundation for Christianity and Islam. In addition, the history of the Jewish people is a rich tapestry that extends almost 4,000 years in time and throughout most of the world.

The Judaic Studies minor is an interdisciplinary program, primarily based in the Department of Religious Studies. The Carl and Dorothy Bennett Center for Judaic Studies, which houses the office of the program director, a seminar room, and student lounge, serves as the program’s physical locus.

Requirements

For a 15-credit minor in Judaic studies, students:

• Complete five three-credit courses. At least two of these courses must be taken in the Department of Religious Studies; at least one course must be taken outside of the department.

Students may structure their own course of study in consultation with the program director, but they are expected to gain an understanding of basic Jewish religious beliefs and practices as well as those political, social, and cultural forces that have helped shape the historical experiences of the Jewish people.

Independent study and internships are encouraged and can be substituted for any course (other than the two required religious studies courses) with the approval of the program director. Students are also encouraged to apply for summer, and semester – or yearlong programs in the United States or Israel, especially those offering Hebrew language study. Students receiving credit for such programs and/or Judaic studies courses taken at another university may count up to six Hebrew language credits and three additional credits toward the Judaic studies minor.

Courses offerings:

Religious Studies
RS 10 Introduction to Religious Studies: Common Questions, Jewish Responses
RS 10 Introduction to Religion: Sacred Writings and Their Representations
RS 100 Introduction to Judaism
RS 101 History of the Jewish Experience
RS 150 Jewish Interpretations of Scripture
RS 203 Women in Judaism
RS 242 Jews and Judaism in America
RS 244 Faith After the Holocaust
RS 251 Old Testament/Hebrew Scriptures
RS 255 Second Temple Judaism and the Dead Sea Scrolls
RS 340 Modern Jewish Theology

English
EN 290 Literature of the Holocaust
EN 388 Jewish Literature

History
HI 205 Jews and Christians: A Social History
HI 210 The Third Reich
HI 212 Modern Germany II
HI 304 The Holocaust in History and Memory
HI 317 Religious Outsiders in Early Modern France and Europe
HI 342 Immigration, Ethnicity, and Race in U.S. History

Modern Languages and Literatures
HE 11 Basic Hebrew I
HE 12 Basic Hebrew II
HE 101 Intermediate Hebrew I
HE 102 Intermediate Hebrew II

Visual and Performing Arts
AH 109 Jewish Art: Moses to Modernity (H)
AH 191 Art and Mythologies of Nazi Germany, Fascist Italy, Bolshevik Russia: Comparative Systems/Outcomes

Fairfield University's commitment to a humanistic perspective and to the concept of social justice requires that Fairfield students be introduced to the “other” Americans who inhabit this hemisphere. The vibrant cultures of the Caribbean and Central and South American nations, blending indigenous, European and African influences, provide a rich field of study that can be approached from many points of view.

The Program in Latin American and Caribbean Studies offers students an interdisciplinary approach to the study of the multifaceted aspects of the Latin American and Caribbean countries, including the political and economical involvement of the United States. The pre-Columbian indigenous cultures, the systems of African slavery, economic dependency, 20th-century revolutions in politics, poetry, painting, literature, the churches, and the reassertion of negritude and Indian rights are some of the themes considered in the courses offered in the program.

Requirements

Language Proficiency
Student may demonstrate language proficiency in several ways.

• Student passes the Fairfield University Placement Test in French, Portuguese, or Spanish and is waived of taking a language skills course.
• Student takes 1 language skill course. The following are acceptable:
  • Student takes one of either SP 221, SP 222, or any other Spanish elective.
  • Student takes one of either FR 221 or FR 222.
• Student takes one to two skills courses in Portuguese that are accepted by the department.

Electives

• Students who demonstrate proficiency with one language skills course must complete two electives.
• Students who demonstrate proficiency with one skills course must complete three electives.
• NOTE: Students may take a maximum of TWO elective courses in any one discipline including French, Spanish, and Portuguese. When students have taken two required skill language courses, they cannot count any language elective course. When students have taken one language skill course, they may count one language elective course.

Capstone Requirement
All students must complete an interdisciplinary capstone course selected from LAC 300, 301, 302, or the cross-listed course LAC/EV/AE 384.

Students may count courses taken for the Latin American and Caribbean studies minor toward their core course or major program requirements.
Course Offerings:

Art History
AH 242  The Arts of Spain and Its World, 1474-1700

Biology
BI 79  Rainforest Ecosystems
BI 235  Coral Reef Seminar

Economics
EC 230  Comparative Economic Systems
EC 235  Economic Development of Third World Nations

English
EN/FR 295  Caribbean Literature: History, Culture, and Identity
EN 396  Women Caribbean Writers

History
HI 277  Mexico: Cortés to NAFTA
HI 287  A Green History of Latin America
HI 288  Colonial Latin America, 1492 to 1810
HI 289  Modern Latin America
HI 290  Central America: Conquistadores to Democracy
HI 291  Africans in the Americas, 1500 to 1800

International Studies
IL 295  Seminar in International Studies

Latin American and Caribbean Studies
LAC 300  Justice and the Developing World
LAC 301  Latin America and the United States
LAC 302  The Human Condition in Latin America
LAC 373  Internship in Latin America and the Caribbean
LAC/AE 384  Seminar on the Environment

Music
MU 122  World Music and Ensemble

Politics
PO 142  Latin American Politics
PO 143  Caribbean Politics

Religious Studies
RS 235  Liberation Theology

Sociology and Anthropology
AY 111  Cultural Anthropology
AY 130  Societies and Cultures of Africa and Latin America
SO 185  Introduction to International Migration
SO 191  Social Change in Developing Nations

Spanish
SP 221  Spanish Composition
SP 222  Spanish Conversation
SP 245  Analysis and Interpretation of Hispanic Literature
SP 253  Spanish American Civilization
SP 262  Translation from Written Spanish into English
SP 271  Hispanic Film
SP 303  From Empire to Modernization in Spanish Literature
SP 305  Popular Culture in Latin America
SP 346  Spanish American Drama
SP 353  Spanish American Narrative
SP 359  Culture, Civilization, and Literature in the Spanish-American Caribbean Region
SP 360  Dictatorship and Revolutionary Movements in Contemporary Latin America
SP 371  Images of Latin
SP 377-378  Internship

See departmental listings for course descriptions.

Course Descriptions

LAC 300  Justice and the Developing World
This interdisciplinary course combines the insights of history, politics, philosophy, anthropology, sociology, business, and economics to examine problems of poverty and justice in the developing world – including health, education, and environmental sustainability – with particular focus either on Central or South America, or the Caribbean. Significant to the course is a one-week immersion in one country, which is not required but strongly encouraged. Students plan and carry out a research project asking the critical questions and using the research methodologies of their academic major or minor. The immersion trip provides students with an intensive field research opportunity, the findings from which they incorporate into their papers. This course meets the world diversity requirement. Four credits.

LAC 301  Latin America and the United States
This interdisciplinary course is NOT a course in diplomatic relations. Rather it considers the ways in which Latin Americans have perceived, analyzed, depicted, reacted to, and dealt with the United States. The course considers essayists, poets, film makers, social scientists, statesmen, journalists, revolutionaries, artists, vendepatrias, and diplomats. This course, which fulfills the requirement for the capstone seminar in Latin American and Caribbean studies and counts as a history course, includes research papers and oral presentations. Three credits.
LAC 302  The Human Condition in Latin America
This seminar presents the human condition in Latin America through a multidisciplinary approach that combines history, sociology, anthropology, politics, literature, economics, and the arts. The central theme of "community" serves as the base for the exploration of a variety of topics, such as tensions between rural and urban; struggles over land; gender roles; the place fantasy; spirit; and obsession with music, dance, sport, religion, etc. The countries studied vary depending on the expertise of the seminar leader and invited guests. The most recent seminar focused on Mexico and Brazil, but other likely choices include Colombia, Haiti, and Cuba. The course includes research papers and oral presentations. Three credits.

LAC 373  Internship in Latin America and the Caribbean
Short-term internships in the field of Latin American and Caribbean Studies combine academic work with service that answers a community-identified need, and critical reflection. Such internships are offered in a Latin American or Caribbean country generally during the summer for a four to six-week period. Three credits.

LAC/EV/AE 384/384/384 Seminar on the Environment: Environmental Issues in Latin America and the Caribbean
This seminar examines environmental, ethical, and socioeconomic issues of Latin America and the Caribbean. It integrates the hard sciences (biology, chemistry, physics, and physical geography), the social sciences (sociology, politics, economics, and business), and the humanities (history, ethics, theology, and literature). The capstone experience provides students with an overview of multiple perspectives on the environment of Latin America and the Caribbean with a focus on some specific countries and issues. Students conduct independent research projects that demonstrate their mastery of at least one component of each disciplinary group. This seminar counts for the capstone requirement for the minor in Applied Ethics, the minor in Environmental Studies, and the minor in Latin American and Caribbean Studies. This course meets the world diversity requirement. Three credits.

Poincelot (Biology)
Steffen (Chemistry)

As with all areas of science, study of the marine environment has become increasingly interdisciplinary in nature. This program provides interested students with the opportunity to explore the interface between their discipline and the study of marine science through coursework, internship, and research experiences. Fairfield University’s geographic location, minutes from Long Island Sound, provides a unique opportunity for students to study marine science in a natural laboratory, and many of the courses described below integrate field trips into the curriculum. The marine science minor is open to students of any major but probably appeals primarily to science students interested in pursuing some area of marine or environmental science in graduate school or as a career in research, consulting, or education.

Requirements
For a 17-credit minor in marine science, students:

- Complete BI 78 Introduction to Marine Science
- Complete three three-credit elective courses
- Complete one four-credit elective course

Students are encouraged to include up to six credits of research and/or internship experience in their minor. Faculty-directed research projects include topics in marine shellfish pathology; marine invasion ecology; marine product biostimulant research; and ecosystem structure and function in aquatic systems. Marine internships are available in Connecticut through the Maritime Aquarium, Norwalk; Bridgeport Regional Vocational Aquaculture School; Westport Nature Center; National Marine Fisheries Laboratory, Milford; Mystic Marinelife Aquarium; Audubon Coastal Center, Milford; and SoundWaters, Stamford.
Course Offerings:

**Required Course**
BI 78  Introduction to Marine Science

**Elective Courses:**
- BI 80  Tropical Marine Biology
- BI 362  Marine Invertebrate Zoology
- BI 382  Principles of Aquaculture Seminar/Lab
- BI 383  Coral Reef Ecology Seminar
- BI 388  Ecology of the North Atlantic Coast
- BI 391-
- BI 392  MUSE Research
- BI 393-
- BI 394  MUSE Internship
- BI 395-
- BI 396  Independent Research I and II
- BI 397-
- BI 398  Internship
- PS 220  Pollution in the Environment

*Note: Students interested in marine science often take credit-approved courses through off-campus institutions, either during the summer or as a semester exchange program (e.g. SeaSemester Program, School for Field Studies). Students may receive credit toward the elective portion of the marine science minor for such courses having a significant marine component.

**Marine Undergraduate SoundWaters Experience**
Undergraduates engaged in upper-level studies of marine science, biology, environmental studies, and/or education have the unique opportunity to enroll in Marine Undergraduate SoundWaters Experience, or MUSE, an integrated program that combines coursework, research, independent study projects, and opportunities to teach younger students using the resources of Fairfield University and SoundWaters, a nonprofit organization dedicated to the protection of Long Island Sound and its watershed. Students use the Sound as a living laboratory and sail aboard the 80-foot schooner SoundWaters, which serves as a floating classroom for a variety of environmental education programs. By working in this program students increase their understanding of many environmental issues and their ability to lead and promote responsible efforts to preserve marine life in and around the Sound.

**The MUSE Program**
Students take two courses in marine science at Fairfield (six to seven credits), complete BI 393 MUSE Internship during the fall semester or BI 394 MUSE Internship during the spring semester at SoundWaters (six credits), and complete BI 391 MUSE research during the fall semester or BI 392 MUSE Research during the spring semester (three credits) at SoundWaters.
For the student of the humanities, the social sciences, or business, mathematics at Fairfield University offers training in basic mathematical skills and their application to real world problems. However, more importantly, it attempts to make the student aware of the relationships between mathematics and other branches of knowledge, while imparting a sense of its historical and cultural value, as well.

The Department of Mathematics and Computer Science offers majors and minors in both areas. Information about computer science can be found in the computer science section of this catalog.

Requirements

The typical mathematics major curriculum consists of 39 courses and 122 credits, although a student may, instead, take a 4-credit free elective, reducing the totals to 38 and 120, respectively. The typical major must take:

- 14 mathematics courses: MA 171, 172, 231, 235, 271, 272, 334, and 371, along with six 300-level mathematics electives;
- CS 141;
- Two semesters of a laboratory science (which also fulfills the natural science core);
- The mathematics comprehensive examination.

Although physics is the usual science taken by majors in mathematics and computer science, another laboratory science may be substituted with permission of the chair.

All mathematics majors take the mathematics comprehensive examination in their senior year as a capstone experience. A grade of Passed with Distinction, Passed, or Failed is recorded on their transcripts.

Students who wish to double major in mathematics and another area are encouraged to meet with the chairs of the respective departments so that appropriate modifications to the requirements can be made to allow these students to graduate in four years.

Because graphing calculators and computer software are integrated as much as possible into the mathematics curriculum, mathematics majors are required to have a graphing calculator at least as powerful as a TI-83.

Honors Seminar

Students who take the MA 390 or MA 391 Honors Seminar receive three credits for one of their mathematics electives upon completion of one semester of MA 390-391. Students who complete two semesters of MA 390-391 earn six credits: the first semester counts as a 3-credit math elective, while the second counts as a 3-credit free elective.
Student Teaching
Students who take ED 381 Directed Observation and Supervised Student Teaching and ED 382 Student Teaching Seminar may have one mathematics elective waived if they also have taken MA 383 Modern Geometry. Those planning a career in secondary education should consult with the chair, and with the coordinator of the program in education, as early as possible.

Internships
The intern program provides mathematics majors with opportunities to gain practical, career-related experience in a variety of supervised field settings. Internships may be available in actuarial science, financial analysis, statistics, or other areas. Students may complete one or two semesters of internships. Interns work a minimum of 10 hours per week at their placement site and complete the required academic component specified by the faculty advisor. An internship may not replace a mathematics elective to fulfill the requirements for a major.

Bachelor of Science – Double Major in Mathematics and Computer Science
A specific curriculum has been developed in order to allow students to double major in mathematics and computer science. This curriculum is designed to allow the student to complete the double major in four years. If you are interested, please speak with the chair of the department or the director of the computer science program.

Bachelor of Science – Double Major in Mathematics and Physics
A specific curriculum has been developed in order to allow students to double major in mathematics and physics. This curriculum is designed to allow the student to complete the double major in four years. If you are interested, please speak with the chair of either of these two departments.

Minor in Mathematics
For a 15-credit minor in mathematics, students:

- Complete two mathematics courses at the 100 level; and
- Complete three mathematics courses at the 200 level or higher.

The specific selection of courses must have the approval of the chair of the Department of Mathematics and Computer Science.

Course Descriptions

Mathematics Courses for Non-Majors

MA 10 Mathematics for Liberal Arts
This course presents major mathematical concepts in an historical and cultural setting. Topics include geometry, set theory, logic, and differential and integral calculus. Students explore the interplay between mathematics, philosophy, and the arts in addition to the more traditional relationship between mathematics and the physical sciences. The course treats mathematics as an art for its aesthetic beauty and as a science, providing a mathematician’s view of the subject rather than preparing students for a specific application of mathematics. Three credits.
MA 17  Introduction to Probability and Statistics
This introduction to the theory of statistics includes measures of central tendency, variance, Chebychev's theorem, probability theory, binomial distribution, normal distribution, the central limit theorem, and estimating population means for large samples. Students who have received credit for any mathematics course at the 100-level or higher may not take this course for credit without the permission of the department chair. Three credits.

MA 19  Introduction to Calculus
This course introduces differentiation and integration, and shows how these ideas are related. The course illustrates how important and interesting applied questions, when expressed in the language of mathematical functions, turn out to be questions about derivatives and integrals and, thus, can be solved using calculus. The course presents the basic concepts numerically, algebraically, and geometrically, using graphing calculators to illustrate many of the underlying geometrical ideas. MA 19 is not a prerequisite for any other course; students who have received credit for one of MA 91 or MA 121 may not take the other for credit. Three credits.

MA 27  Intermediate Statistics
This course covers the tools and techniques of statistics most commonly seen in business applications and meets the third semester of the Dolan School of Business' quantitative requirement. Topics include (multi)linear regression and correlation; inference, including t-tests and chi-square tests; and analysis of variation. Students who have taken MA 121-122, MA 125-126 or MA 171-172 should take MA 217 instead of MA 17 and MA 27. Students who have received credit for MA 217 may not take MA 27 for credit. (Prerequisite: MA 17) Three credits.

MA 121  Applied Calculus I
Topics in this course include: plane analytic geometry; foundations of the calculus; differentiation of algebraic, exponential and logarithmic functions; extrema and curve sketching; and applications of derivatives. MA 121 is not a prerequisite for MA 171; students who received credit for MA 19 or for MA 171 may not take MA 121 for credit. Three credits.

MA 122  Applied Calculus II
Topics in this course include antiderivatives; the Fundamental Theorem of Calculus; integration of algebraic, logarithmic, and exponential functions; differentiation and integration of trigonometric functions; techniques of integration; and applications of the definite integral. MA 122 is not a prerequisite for MA 171; students who have received credit for MA 122 or MA 172 may not take the other for credit. (Prerequisite: MA 121 or equivalent) Three credits.

MA 125  Calculus I: Engineering and Physics Majors
This course covers analytic geometry, continuous functions, derivatives of algebraic and trigonometric functions, product and chain rules, implicit functions, extrema and curve sketching, indefinite and definite integrals, and applications of derivatives and antiderivatives. Three credits.

MA 126  Calculus II: Engineering and Physics Majors
This course covers exponential and logarithmic transcendental functions, their derivatives and their integrals; the Fundamental Theorem of Calculus; applications to area, arc length, and volumes of revolution; hyperbolic functions, inverse trigonometric functions; methods of integration by substitution and parts; and indeterminate forms and improper integrals. (Prerequisite: MA 125 or MA 171 or equivalent) Three credits.

MA/CS 141  Introduction to Computer Science and Programming I
Please see description under CS/MA 141 in the computer science section of the catalog. Students may take this course to satisfy the non-calculus portion of the mathematics core curriculum. (See also below, under Mathematics Courses for Majors.) Four credits.

MA 211  Applied Matrix Theory
Mathematics majors. Students may receive credit for only one of MA 211 and MA 235. Mathematics majors may not take this course as a mathematics elective. Three credits.

MA 217  Accelerated Statistics
This introductory, calculus-based statistics course focuses on applications in business, statistics, and everyday events. Topics include descriptive statistics including mean, median, mode, standard deviation, histograms, distributions, box plots, and scatter plots; probability theory including counting rules, random variables, probability distributions, expected values, binomial and normal distributions, and the central limit theorem; inferential statistics including point estimates, confidence intervals, and hypothesis testing; and regression theory. Students learn to analyze data with the aid of common software packages. Mathematics majors may not take this course as a mathematics elective. Students who have received credit for one of MA 217 or 352 may not take the other for credit. (Pre- or co-requisite: MA 122 or MA 126 or MA 172 or equivalent) Three credits.
MA 225  Applied Calculus III
This course covers partial differentiation, multiple integrals, infinite series, and first order differential equations. (Prerequisite: MA 122 or MA 126 or MA 172 or equivalent) Three credits.

MA 227  Calculus III: Engineering and Physics Majors
Topics include infinite series, tests for convergence, power series, Taylor series; geometry in three-space; partial differentiation of continuous functions; chain rule, exact differentials, maxima and minima; multiple integration; application to volumes, center of gravity; and polar, cylindrical, and spherical coordinates. (Prerequisite: MA 126 or MA 172 or equivalent) Three credits.

MA 228  Calculus IV: Engineering and Physics Majors
Topics in this course include: vector arithmetic and algebra, dot and cross products, parametric equations, lines and planes; gradient, directional derivative, curl, divergence; line integrals, work, Green’s theorem, surface integrals; Stokes’s and divergence theorems. (Prerequisite: MA 227 or MA 271 or equivalent) Three credits.

MA 321  Ordinary Differential Equations
This course presents the solution of first order differential equations and of higher order linear differential equations; power series solutions; Laplace transforms; and a multitude of applications. Mathematics majors may not take this course as a mathematics elective. Students may receive credit for only one of MA 321 and MA 331. (Prerequisite: MA 225 or MA 227 or MA 271 or equivalent) Three credits.

MA 332  Partial Differential Equations
For the description of MA 332, see below, under “Mathematics Courses for Majors.” This course may be taken by non-majors as well. (Prerequisites: MA 228 or MA 272 or equivalent, and MA 321 or MA 331 or equivalent) Three credits.

Mathematics Courses for Majors and Other Interested and Qualified Students

MA/CS 141  Introduction to Computer Science and Programming I
Please see description under CS/MA 141 in the computer science section of the catalog. Mathematics majors are required to take this course. However, as mentioned above, it is open to non-majors and is one option for satisfying the non-calculus portion of the mathematics core. Four credits.

MA 171  Differential Calculus
MA 171-172 is our most rigorous first-year calculus sequence. However, students are not expected to have had calculus before taking this course. Topics include functions; limits, continuity, and derivatives; applications; relative maxima, minima, and curve sketching; absolute maxima and minima; related rates; Rolle’s Theorem and the mean value theorem. Students who have received credit for MA 121 or MA 125 or MA 171 may not take any of the others for credit. Four credits.

MA 172  Integral Calculus
This course presents anti-differentiation; the definite integral and the Fundamental Theorem of Calculus; applications; area, volume, and arc length; exponential, logarithmic, trigonometric, and hyperbolic functions; integration techniques; indeterminate forms; Taylor’s Theorem; and infinite sequences and series. Students who have received credit for MA 122 may not take MA 172 for credit. (Prerequisite: MA 125 or MA 171 or equivalent) Four credits.

MA 231  Discrete Mathematics
Topics in this course include logic; sets; functions; equivalence relations and partitions; mathematical induction; and countability. Course is also listed as CS 231. Three credits.

MA 235  Linear Algebra
Students examine linear spaces and subspaces; linear independence and dependence; bases and dimension; linear operators; matrix theory; determinants and systems of linear equations; eigenvalues and eigenvectors. Students may receive credit for only one of MA 211 and MA 235. (Prerequisite: MA 231 or permission of the department chair) Three credits.

MA 271  Multivariable Calculus I
Topics in this course include vectors in the plane and in three-space; arc length, curvature, equations of lines and planes; vector functions; parametric equations; functions of several variables, differentiability, gradient, directional derivatives; tangent planes, normal lines; total differential, extrema; and Lagrange multipliers. (Prerequisite: MA 225 or MA 227 or MA 271 or equivalent) Three credits.

MA 272  Multivariable Calculus II
This course covers multiple integration: volume and surface integrals in cartesian, cylindrical, and spherical coordinates; line integrals; Green’s theorem; divergence and curl, Jacobians; change of variables; Stokes’s theorem; and divergence theorem. (Prerequisite: MA 227 or MA 271 or equivalent) Three credits.

MA 331  Applied Mathematics
This course covers the theory and solution of ordinary differential equations: first-order equations, linear equations of arbitrary order, and linear systems; power series solutions; Laplace transforms; and existence and uniqueness of solutions. Students may receive credit for only one of MA 321 and MA 331. (Prerequisites:
MA 235 and MA 272, or permission of the department chair) Three credits.

MA 332 Partial Differential Equations
Topics in this course include solution of constant and variable coefficient linear equations; separation of variables in two and three variables; eigenvalue problems; Fourier series solution of the heat equation, the wave equation, and the Laplace equation; Fourier transforms; Gamma and Bessel functions; Legendre, Hermite, and Laguerre polynomials. (Prerequisites: MA 228 or MA 272 or equivalent, and MA 321 or MA 331 or equivalent) Three credits.

MA 334 Abstract Algebra
Students study group theory, rings and ideals, integral domains, and fields. (Prerequisites: MA 231 and MA 235 or permission of the department chair) Three credits.

MA 337 Number Theory
This study of the integers includes but is not limited to: primes and their distribution, divisibility and congruences, quadratic reciprocity, special numerical functions such as Euler’s one-function, and Diophantine equations. Students consider the influence number theory has had on the development of algebra and the interplay between the two. (Prerequisite: MA 231 or permission of the department chair) Three credits.

MA 341 Linear Programming
Topics in this course include convex sets, extreme points, theoretical basis of the simplex method for linear programming, the simplex computational procedure, duality theory, and sensitivity analysis. The course also covers the transportation problem and network applications as time permits. (Prerequisites: MA 235 and MA 272, or permission of the department chair) Three credits.

MA/CS 342 Theory of Computation
This course explores what computers can and can't do, although it does not require any background in computer science or programming. Topics include finite state machines, push-down automata, Turing machines and recursive functions; mechanisms for formal languages, such as regular grammars, context-free grammars, context-sensitive grammars; and decidable versus undecidable problems. Also listed as CS 342. (Prerequisite: MA 231 or permission of the department chair) Three credits.

MA 351 Probability and Statistics I
Topics in this course include counting techniques; axiomatic probability theory; discrete and continuous sample spaces; random variables, cumulative distribution functions, probability density and mass functions; joint distributions; expected value and moments; common distributions like the normal, binomial, and Poisson distributions; and limit laws. (Prerequisites: MA 231 or ME 241 and MA 227 or MA 271, or permission of the department chair) Three credits.

MA 352 Probability and Statistics II
This course covers transformations of random variables; statistical application of probability; theory of sampling and the Central Limit Theorem; variances of sums and averages; estimation and hypothesis testing; and least squares, curve-fitting, and regression. (Prerequisite: MA 351 or permission of the department chair) Three credits.

MA 361 Topics in Algebra
This course investigates three topics in greater depth than can be done in the first linear or abstract algebra course. Topics may include canonical forms for matrices, metric linear algebra, ideal theory, finite non-abelian groups, and Galois theory. The course typically includes one linear and one abstract algebra topic. (Prerequisite: MA 334 or permission of the department chair) Three credits.

MA 371 Real Analysis
This course examines the set of real numbers as a complete, ordered, archimedean field; R as a linear vector space equipped with inner product and norm; metrics, particularly Euclidean, on R, topological concepts: continuity, connectedness, and compactness; the intermediate value, extreme value, monotone convergence, Bolzano/Weierstrass and Heine/Borel theorems; convergence and uniform convergence of sequences of continuous functions; differentiation: the mean value, implicit and inverse function theorems. (Prerequisites: MA 231 and MA 272 or permission of the department chair) Three credits.

MA 373 Complex Analysis
Topics in this course include algebra of complex numbers, Cauchy-Riemann equations and analytic functions, complex differentiation, integration in the complex plane, Cauchy’s Theorem and integral formula, conformal mapping, Laurent series and residue theory, and applications. (Prerequisite: MA 371 or permission of the department chair) Three credits.

MA/CS 377 Numerical Analysis
This course investigates computer arithmetic, round-off errors, the solution of nonlinear equations, polynomial approximation, numerical differentiation and integration, and the solution of systems of linear equations via student-written code to implement the algorithms and/or the use of available software. Also listed as CS 377. (Prerequisites: MA 172, MA 235 and proficiency in a computer language, or permission of the department chair) Three credits.

MA 383 Modern Geometry
Topics in this course include: foundation for plane geometries; theorems of Menelaus, Ceva, Desargues, Poncelet, Brianchon, and Feuerbach; inversion and reciprocation transformations; projective, Riemannian and Lobachevskian geometries; and Poincaré model. (Prerequisites: MA 231 and MA 235 or permission of the department chair) Three credits.
MA 385  Point Set Topology
This course considers topological spaces, continuous functions; product, metric, and quotient spaces; countability and separation axioms; existence and extension of continuous functions; compactification; metrization theorems and complete metric spaces. (Prerequisite: MA 371 or permission of the department chair) Three credits.

MA 390/391  Honors Seminar
Participation is open to senior mathematics majors with a 3.50 or higher GPA in mathematics and invited junior and senior mathematics majors with demonstrated ability who have been recommended by the mathematics faculty. This seminar provides talented students with an opportunity to undertake individualized study under faculty direction. Participants present several reports on their findings before a group of peers. The seminar’s subject matter varies each semester. Three credits.

MA 397/398  Internship in Mathematics
The internship program provides senior mathematics majors with opportunities to gain practical, career-related experience in a variety of supervised field settings. Student interns select from a variety of placements, especially those requiring applications of mathematics, numerical methods, and statistics. Interns spend a minimum of 10 hours per week working at the placement site and complete the required academic component specified by their faculty advisor. Internship credits vary; interns may register for a summer session and/or one or two semesters for an overall maximum of six credits. In addition, an internship must satisfy the requirements outlined in the University Internship Policy, which is available from the Career Planning Center. An internship may not take the place of a mathematics elective. (Prerequisites: senior standing, completed application form, acceptance by the field placement supervisor, and approval by the Department of Mathematics and Computer Science.) One to three credits per semester/session.

MA 399  Independent Study in Mathematics
Independent study provides students with the opportunity to examine areas not covered in the undergraduate curriculum. Under the guidance of a faculty member, advanced students learn about an area in mathematics through reading and research. Independent study includes written work in the form of exercises or papers. Students apply to a professor under whose direction they wish to study and obtain the approval of the department chair. This course may not replace a mathematics elective to fulfill the requirements for the major, unless special permission is given by the department chair. Three credits.

The study of modern foreign languages, as well as cultures and literatures in their original languages, is an intellectual experience that offers students another point of view on life. Knowledge of a language other than English frees students from the restraints of seeing but one reality, and the new perspectives gained from understanding the expression of another people are the essence of a liberal education.
The Department of Modern Languages and Literatures stresses proficiency in all language skills to prepare students for careers in business, communication, education, government, health sciences, social work, and related professions.

The department offers instruction in the following languages: Arabic, Chinese, French, German, Hebrew, Italian, Japanese, Russian, and Spanish. Currently, majors and minors are available in French, German, Italian, and Spanish.

In addition to its own programs, the Department of Modern Languages and Literatures participates in the International Studies program and the minor programs in Asian Studies, Italian Studies, Judaic Studies, Latin American and Caribbean Studies, Russian and East European Studies, and Women’s Studies.

Select language courses may count toward those programs. A limit of one course taught in English and approved by the Department may count toward the major or minor. Several courses are cross-listed with the English Department. See separate catalog entries for details.

The 300-level courses are conducted in the language, and students are encouraged to consult with a member of the department when selecting them.

Note: Education minors need a minimum of 30 credits in the language area, of which at least three credits must be in literature and three in culture/civilization.

Language Core Requirements

Core requirements may be fulfilled by successfully completing two semesters at the intermediate level of any language listed among the offerings of the Department of Modern Languages and Literatures.

Core mission statement
The study of languages is a key element in working and learning across cultures and geographical boundaries. Language in the Core Curriculum focuses on the acquisition of the skills of reading, listening, speaking, and writing, though the emphasis varies according to the chosen language. Students in core language study acquire knowledge about other cultures, literatures, and historical periods. It is expected that students will use the skills and knowledge acquired in language courses in practical and intellectual pursuits.

Through their study of foreign languages, students will:
- be able to read a passage of moderate difficulty in their chosen language and be able to communicate with a native speaker;
- learn grammatical and syntactical rules which will facilitate oral and written expression in the language;
- become acquainted with the life, customs, and cultural traditions where the language is spoken.

Requirements

French or Italian Major
French and Italian majors elect a minimum of 24 upper-division credits in their language of concentration (i.e., eight three-credit courses at the 200 and 300 level).

These courses typically include:
- four courses in literature
- one course in composition
- one course in conversation
- one course in culture, which can be waived in favor of summer study abroad or junior year abroad (both of which the department encourages) and
- one course selected from any of the above areas.

The study of a second or third language is encouraged.

All majors are urged to work closely, as soon as possible, with an advisor of their choice to plan a program.

Special credit notes:
FR 211 and IT 211 with a grade of B or better count toward their respective major.

An Advanced Placement (AP) score of 4 or 5 on the AP French Literature examination earns credit for FR 211. Students who take a high school AP exam in French should take the University's French placement exam nonetheless.

French or Italian Minor
Students seeking a minor in French or Italian complete 15 credits in the language beyond the intermediate 210 level. Students select their courses in consultation with a departmental advisor.

An Advanced Placement (AP) score of 4 or 5 on the AP French Literature examination earns credit for FR 211. Students who take a high school AP exam in French are strongly advised to take the University’s French placement exam nonetheless.

German Major
Students seeking a major in German complete 24 credits in the language beyond the intermediate 210 level.

These courses typically include:
- GM 211 (if the final grade is B or above)
- one course in composition
- one course in conversation
- one course in culture
- three courses in literature
Study abroad with Fairfield’s Baden-Württemberg exchange program for one or two semesters is strongly encouraged. All majors are urged to work closely and as soon as possible with an advisor of their choice to plan a program. The final course for the German major must be taken at Fairfield University.

An Advanced Placement (AP) score of 4 or 5 on the AP German Literature examination earns credit for GM 211. Students who take a high school AP exam in German should take the University’s German placement exam nonetheless.

**German Minor**

Students seeking a minor in German complete 15 credits in the language beyond the intermediate (210) level. If a student receives a B or above in GM 211, that course then counts towards a minor and only four more courses have to be taken. Students select their courses with a departmental advisor.

**Spanish Major**

A total of 30 credits is required for the Spanish major. Students who wish to major in Spanish must complete ten courses at the 200-300 level.

The required courses for the major are in the following order:

- SP 221 Composition
- SP 222 Conversation (Native and Heritage speakers are ineligible and therefore exempt from taking this course.
- SP 245 Analysis and Interpretation of Hispanic Literature (prerequisite for all advanced Literature. This course may be taken at Fairfield University or abroad.)
- SP 251 Spanish Civilization and Culture or SP 253 Spanish-American Civilization and Culture
- SP 381 Exit Research Study. Students must take this course during their senior year.
- Electives to reach 30 credits.

Some requirements may be waived with permission of the Chair of the department.

**Notes:**

- If you have placed out of the CORE language requirement, either by the University placement exam or by receiving a 4 or 5 on the Advanced Placement (AP) exam, you can directly enroll into SP 221 or SP 222 and start your major.
- SP 221 and SP 222 are prerequisites for all subsequent Spanish classes.

**Spanish Minor**

Students who wish to minor in Spanish must complete five courses (15 credits) at the 200-300 level.

The required courses are:

- SP 221 Composition
- SP 222 Conversation (Native and Heritage speakers are ineligible and therefore exempt from taking this course.)
- SP 245 Analysis and Interpretation of Hispanic Literature (prerequisite for all advanced Literature. This course may be taken at Fairfield University or abroad.)
- SP 251 Spanish Civilization and Culture or SP 253 Spanish-American Civilization and Culture
- Any elective

Some requirements may be waived with permission of the Chair of the department.

**Notes:**

- If you have placed out of the CORE language requirement, either by the University placement exam or by receiving a 4 or 5 on the Advanced Placement (AP) exam, you can directly enroll into SP 221 or SP 222 and start your minor.
- SP 221 and SP 222 are prerequisites for all subsequent Spanish classes.
- Native and Heritage speakers are exempt from taking SP 222 (Conversation). They will still need to take five classes to reach 15 credits, however.
Modern Languages and Literatures

- Once all prerequisites have been fulfilled (SP 221, SP 222, SP 245), all other requirements (SP 251 or SP 253) and electives can be taken at any time.
- **Study abroad:** It is strongly recommended that any Spanish major or minor study abroad in a Spanish speaking country. For your courses taken abroad to count toward your Spanish major or minor two conditions must be met: 1) that the courses are taught entirely in Spanish; and 2) the content is related to some aspect of Latin American or Spanish culture, history, politics or literature.

Course Descriptions

### Arabic

**AR 110-111 Elementary Modern Standard Arabic**

This two-semester sequence teaches the essentials of phonology, script, structure, and usage, allowing students to acquire the skills of listening, speaking, reading, and writing in the standard means of communicating in the Arab world. Teaching is proficiency-based, implying that all activities within the courses are aimed at placing student learners in the context of the native-speaking environment. Four credits per semester.

### Chinese

**CI 110-111 Elementary Chinese**

Designed for students with no prior experience with Chinese or whose placement scores are in the range for this course level. This two-semester sequence teaches the essentials of pronunciation, structure, and usage, allowing students to acquire the skills of listening, speaking, reading, and writing. Language cultures are explored through a variety of media. Students attend three classes per week and do mandatory online work determined by the instructor. Four credits per semester.

**CI 210-211 Intermediate Chinese**

Designed for students who have completed CI 110-CI 111 or whose placement scores are in the range for this course level. This two-semester sequence prepares students to continue the study of language on a more advanced level, and includes review of essential points of grammar, vocabulary building, and regular practice in speaking and writing. The language cultures are explored through a wide variety of materials (literary texts, press articles, films, etc.) Students attend three classes per week and do mandatory online work determined by the instructor. Four credits per semester.

### French

**FR 110–111 Elementary French**

Designed for students with no prior experience with French or whose placement scores are in the range for this course level. This two-semester sequence teaches the essentials of pronunciation, structure, and usage, allowing students to acquire the skills of listening, speaking, reading, and writing. Language cultures are explored through a variety of media. Students attend three classes per week and do mandatory online work determined by the instructor. Four credits per semester.

**FR 210-211 Intermediate French**

Designed for students who have completed FR 110-FR 111 or whose placement scores are in the range for this course level. This two-semester sequence prepares students to continue the study of language on a more advanced level, and includes review of essential points of grammar, vocabulary building, and regular practice in speaking and writing. The language cultures are explored through a wide variety of materials (literary texts, press articles, films, etc.) Students attend three classes per week and do mandatory online work determined by the instructor. Four credits per semester.

**FR 221 Grammar and Composition**

This course emphasizes improved proficiency in the written language. Students build vocabulary and improve grammar through readings and exercises designed to prepare them for weekly compositions. These readings and exercises expose students to a variety of genres. Following peer review and instructor’s comments, students rewrite compositions, incorporating them into a final portfolio project. Three credits.

**FR 222 French Conversation and Phonetics**

This course emphasizes developing language skills for self-expression and communication. A wide range of authentic cultural materials, such as press articles, films, short stories, television broadcasts, etc., forms the basis for class discussions. Students write weekly oral assignments to improve grammar and vocabulary. The course introduces the phonetic alphabet and stresses pronunciation exercises. Three credits.

**FR 251-252 Culture and Civilization of France and the Francophone World**

This two-semester sequence explores France and French people in a cultural, social, and historical context. The exploration moves into regions that comprise the francophone world in the second semester. Students use multimedia, Internet, and audio-visual resources extensively and submit frequent oral and written reports. This course meets the world diversity requirement. Three credits per semester.
FR 265 French Translation Workshop
In this course, students develop expertise in the art and craft of translation. The course presents terminology and procedures that assist the translator in describing and solving translation problems. It uses real and simulated case studies in a variety of fields including commercial correspondence, tourism, food, transportation, telecommunications, social science, and literature. Students practice with native script, giving attention to individual interests and majors, using French-to-English and English-to-French translations. The class, which is conducted in both languages, uses human, computer-based, and print resources. (Prerequisite: FR 221 or permission of instructor) Three credits.

FR 267 French Commercial Culture
This introduction to the business practices and economic situation of France in the context of the European Union emphasizes commercial vocabulary and business situations presented through extensive use of authentic material and documents. This course, which is of particular interest to students seeking a career in international business or international affairs, uses multimedia, Internet, and audio-visual resources extensively, and includes regular practice in speaking and writing. Three credits.

FR 271 Contemporary French Press and Media
Students read and discuss articles from representative magazines and newspapers in French, and reports from television news broadcasts and the Internet. The course considers how the media and technology are shaping French society in the 21st century and discusses a wide range of topics such as politics, education, religion, the arts, science, privacy, and censorship. Students complete frequent oral and written reports. Three credits.

FR 295 Caribbean Literature: History, Culture, and Identity
This course serves as an introduction to the field of Caribbean literatures in English and English translation, with a focus on the French-speaking Caribbean. We survey a wide range of theoretical and fictional texts (poetry, short stories, novels, theatre), and introduce students to the debate surrounding the formation of Antillean cultural identity/identities. This course examines “Caribbean literatures” with respect to their language of origin, colonization, slavery, racial experience, landscape, migration, and diaspora, specifically in Haiti, Martinique, Guadeloupe, Barbados, Trinidad, Cuba, and the Netherlands Antilles/Surinam. No prerequisite for French majors. Cross-listed with EN 295. This course meets the world diversity requirement. (Prerequisite for English: EN 12 or its equivalent) Three credits.

FR 301-302 Survey of Literature in French
The two-semester sequence presents a chronological view of French literature, emphasizing the most important writers and major literary movements and themes. The first semester considers varied genres from the Middle Ages through the 17th century. The second semester studies the forces unleashed by the Revolution and considers the development of modern French literature. Three credits per semester.

FR 305 French and Francophone Women Writers
The course explores a wide range of literary genres produced by women writers from France and the francophone world, investigating women’s issues such as race, gender, class, status, and power within the historical, political, and cultural contexts of their regions of origin. The course introduces French feminist theories. Students read and conduct discussions in French and complete frequent oral and written assignments. Three credits.

FR 321 18th-Century Literature
Students undertake readings and discussions of works by Voltaire, Marivaux, Diderot, Rousseau, Beaumarchais, and others. The course emphasizes class discussion and student participation, and requires frequent papers. Three credits.

FR 337 Novels of the 19th Century
This course examines the important novelists of the 19th century: Balzac, Stendhal, George Sand, Flaubert, Zola, and others, and requires frequent oral reports and critical papers. Three credits.

FR 346 Modern French Theatre
This course introduces students to the history of French theatre and its various genres, and to the theory and practice in contemporary France. Participants study full-length works by major modern dramatists from France and the francophone world, viewing these works on videos or in local theaters. The course requires frequent oral reports and critical papers. Three credits.

FR 347 Modern French Novel
Students in this course read and discuss important modern novelists such as Mauriac, Malraux, Sartre, Beauvoir, Camus, Duras, Le Clezio, and others. The course requires frequent oral reports and critical papers. Three credits.

FR 366-367 Film and Literature in French
This two-semester sequence examines the relationship between film and literature. Students view the film version of each work, which serves as a basis for class discussion. The course requires frequent oral and written works. Three credits per semester.

FR 377-378 Internship
The internship program gives students first-hand experience in the fields of translation, interpretation, cataloging, public relations, advertising, teaching, etc., in the language of their specialization. Department members, who agree to guide the endeavor, supervise student work. When required by a faculty supervisor, an evaluation of student interns may be required from the institution where students work. The student’s work should demand no less than one full day per week, or its equivalent. Three credits per semester.
Modern Languages and Literatures

FR 381-382  Coordinating Seminar
Students undertake readings and studies in a specialized area of French, under the direction of a staff member. Designed to fill the special needs of specific students, this course is offered at the discretion of the department chair. Hours by arrangement. Three credits per semester.

German

GM 110-111  Elementary German
Designed for students with no prior experience with German or whose placement scores are in the range for this course level. This two-semester sequence teaches the essentials of pronunciation, structure, and usage, allowing students to acquire the skills of listening, speaking, reading, and writing. Language cultures are explored through a variety of media. Students attend three classes per week and do mandatory online work determined by the instructor. Four credits per semester.

GM 210-211  Intermediate German
Designed for students who have completed GM 110-GM 111 or whose placement scores are in the range for this course level. This two-semester sequence prepares students to continue the study of language on a more advanced level, and includes review of essential points of grammar, vocabulary building, and regular practice in speaking and writing. The language cultures are explored through a wide variety of materials (literary texts, press articles, films, etc.) Students attend three classes per week and do mandatory online work determined by the instructor. Four credits per semester.

GM 221  Stylistics and Composition
This course emphasizes improved proficiency in the written language. Students build vocabulary and improve grammar through readings and exercises designed to prepare them for weekly compositions. These readings and exercises expose students to a variety of genres. Following peer review and instructor’s comments, students rewrite compositions, incorporating them into a final portfolio project. Three credits.

GM 222  German Conversation
This course develops and improves student conversational abilities. The course provides students with opportunities to sound their knowledge and opinions, and to share their ideas as they learn from their peers in non-threatening, small-group discussions on contemporary topics. Three credits.

GM 251-252  German Culture and Civilization
In the first semester, this course examines the main currents of German culture and civilization through lectures, films, the Internet, and literary and cultural readings. Students complete frequent oral and written reports. During the second semester, the course examines German immigration, especially to the United States, considering in-depth the German-American experience through lectures, films, the Internet, and literary and cultural readings. The first semester is conducted in German; the second semester is conducted in English. Both semesters require frequent oral and written reports. Three credits per semester.

GM 261-262  Survey of German Literature
This two-semester sequence offers an overview of German works and literary movements from the Middle Ages to 1945, providing students with the fundamentals of literary analysis in the genres of poetry, drama, novellas, novels, short stories, and film. The course requires frequent oral and written reports. Three credits per semester.

GM 271  18th-Century German Literature
This course covers the development of German literature from the Sturm und Drang movement through the classic period of Goethe and Schiller, including Henrich von Kleist and an analysis of the Romantic literary theory (Eichendorff, Novalis, Hoffmann). Three credits.

GM 281  19th-Century German Literature
This course focuses on fairy tales. We explore the tales by the Brothers Grimm, but also meet such suspenseful writers as E.T.A. Hoffmann, Hauft, and others. Numerous stories have been written and filmed that enable us to connect 19th-century tales with life today. We immerse ourselves in these stories by listening, telling, reading, writing about, and watching them. Three credits.

GM 287  Modern German Literature
This course introduces students to a variety of German literature and genres (novel, short story, and poem) written in the 20th century. All works are heavily influenced by the two world wars. The literary canon includes a text by Kafka, portraying hope and despair, and Anna Seghers’ novel written in exile, poems and short stories portraying the various social and political changes in West Germany, and the essays by the East German writer Christa Wolf that deals with loyalty and dissidence. The course also addresses narrative strategies and the challenges faced by the translator. Furthermore, we talk about the different roles literature can play, including the influence and value in furthering the understanding of material to contextualize the readings. Particular interest is the portrayal of social and political issues. This course is also offered as EN 282. Three credits.

GM 377-378  Internship
The internship program gives students first-hand experience in the fields of translation, interpretation, cataloging, public relations, advertising, teaching, etc., in the language of their specialization. Department members, who agree to guide the endeavor, supervise student work. When required by a faculty supervisor, an evaluation of student interns may be required from the institution where students work. The student's work should demand no less than one full day per week, or its equivalent. Three credits per semester.
Modern Languages and Literatures

College of Arts and Sciences

GM 381-382  Coordinating Seminar
Students undertake readings and studies in a specialized area of German under the direction of a staff member. Designed to fill the special needs of specific students, this course is offered at the discretion of the department chair. Hours by arrangement. Three credits.

Hebrew

HE 110-111  Elementary Hebrew
Designed for students with no prior experience with Hebrew or whose placement scores are in the range for this course level. This two-semester sequence teaches the essentials of pronunciation, structure, and usage, allowing students to acquire the skills of listening, speaking, reading, and writing. Language cultures are explored through a variety of media. Students attend three classes per week and do mandatory online work determined by the instructor. Four credits per semester.

HE 210-211  Intermediate Hebrew
Designed for students who have completed HE 110-111 or whose placement scores are in the range for this course level. This two-semester sequence prepares students to continue the study of language on a more advanced level, and includes review of essential points of grammar, vocabulary building, and regular practice in speaking and writing. The language cultures are explored through a wide variety of materials (literary texts, press articles, films, etc.). Students attend three classes per week and do mandatory online work determined by the instructor. Four credits per semester.

Italian

IT 110-111  Elementary Italian
Designed for students with no prior experience with Italian or whose placement scores are in the range for this course level. This two-semester sequence teaches the essentials of pronunciation, structure, and usage, allowing students to acquire the skills of listening, speaking, reading, and writing. Language cultures are explored through a variety of media. Students attend three classes per week and do mandatory online work determined by the instructor. Four credits per semester.

IT 210-211  Intermediate Italian
Designed for students who have completed IT 110-IT 111 or whose placement scores are in the range for this course level. This two-semester sequence prepares students to continue the study of language on a more advanced level, and includes review of essential points of grammar, vocabulary building, and regular practice in speaking and writing. The language cultures are explored through a wide variety of materials (literary texts, press articles, films, etc.). Students attend three classes per week and do mandatory online work determined by the instructor. Four credits per semester.

IT 223  Italian Composition and Oral Expression
This course improves proficiency in written and oral expression in Italian. Students develop advanced writing and speaking skills while concentrating on grammar, style, and appropriateness. Weekly compositions, based primarily on the genres studied (short story, theater, memoir), allow students to identify and correct grammatical mistakes. Students present speeches in class and conduct situational dramas (job interviews, television reporting, courtroom trials) in Italian. Various films and cultural artifacts (comic strips, proverbs, music) familiarize students with idiomatic Italian. (Prerequisite: IT 121 or equivalent) Three credits.

IT 253  Contemporary Italian Culture
This course examines aspects of contemporary Italian culture in the arts, film, music, media, and literature. Students analyze the debates that inform the political, social, and cultural dimensions of Italian society today. Readings include magazine and newspaper articles, print advertisements, novels, short stories, and comic books. Students view television news reports, soap operas, commercials, and movies, and listen to various types of contemporary Italian music. The course is conducted in Italian. (Prerequisite: IT 121-122 or equivalent) Three credits.

IT 262  Rome in the Cultural Imagination
The city of Rome has been a source of wonder and amazement throughout recorded history. This course examines the foundation myths of the Eternal City in contrast with the historical accounts, discusses early accounts of the life of the city, evaluates the reasons for its decline and fall, considers the riches of Renaissance and Baroque periods, reads poetry by the Roman people, and examines Rome’s centrality for the world of art. This course also focuses on the political importance of the city from its inception through the Risorgimento (Italian Unification), to Fascism and World War II, to present day. Three credits.

IT 271  Italian Cinema
This survey of Italian films as textual, cultural, and historical artifacts analyzes movements such as neorealism, commedia all’italiana, the spaghetti western, and new Italian cinema through the works of selected directors. The course follows a chronology from the silent period to present day, with special emphasis on the “golden ages” of Italian cinema, neo-realism of the postwar period, the 1960s’ comedy of manners, and the new Italian cinema of the ’80s and ’90s. Students analyze the works of Rossellini, De Sica, Fellini, Visconti, Germi, Antonioni, Wertmuller, Leone, Pasolini, Moretti, Benigni, and others. The course is conducted in English. Three credits.
IT 289  Dante
This course examines the works of Dante Alighieri, including the Vita nuova, in addition to the “Inferno,” “Purgatorio,” and “Paradiso” from the Divine Comedy. Students are introduced to the political, linguistic, theological, and poetic ideas that make Dante’s works not only significant in the medieval context, but also continue to challenge and inform modern debates. This course, which is conducted in English, counts towards the core requirement in literature. (Cross-listed with EN 257) Three credits.

IT 355  The Novella
This course analyzes the most successful genre in Italian literature, the novella (short story), as it evolved from the medieval era through the Renaissance to present day. Students read selections from Boccaccio, Basile, Bandello, Verga, Pirandello, Deledda, Morante, Moravia, Calvino, and others. The course is conducted in Italian. Three credits.

IT 381-382  Coordinating Seminar/Independent Study
Students undertake readings and studies in a specialized area of Italian, under the direction of a staff member. Designed to fill the special needs of specific students, this course is offered at the discretion of the department chair. Hours by arrangement. Three credits per semester.

IT 393  The Italian-American Experience
This course analyzes the concept of nationality and national identity in literature, film, and critical essays by and about Italian-Americans. The course also discusses the concept of ethnicity together with the phenomenon of emigration and the difference in roles for men and women in this subgroup of American society. The success of Italian-Americans in various sectors of society reveals the vitality and determination of this particular ethnic group in the face of prejudice and economic hardship. Students examine the contributions of Italians who left their native land for a new beginning and discuss the perception and reality of America as the “promised land” in the Italian-American community. The course is conducted in English. This course meets the U.S. diversity requirement. Formerly IT 293. Three credits.

Japanese

JA 110-111  Elementary Japanese
Designed for students with no prior experience with Japanese or whose placement scores are in the range for this course level. This two-semester sequence teaches the essentials of pronunciation, structure, and usage, allowing students to acquire the skills of listening, speaking, reading, and writing. Language cultures are explored through a variety of media. Students attend three classes per week and do mandatory online work determined by the instructor. Four credits per semester.

JA 210-211  Intermediate Japanese
Designed for students who have completed JA 110-JA 111 or whose placement scores are in the range for this course level. This two-semester sequence prepares students to continue the study of language on a more advanced level, and includes review of essential points of grammar, vocabulary building, and regular practice in speaking and writing. The language cultures are explored through a wide variety of materials (literary texts, press articles, films, etc.) Students attend three classes per week and do mandatory online work determined by the instructor. Four credits per semester.

Russian

RU 110-111  Elementary Russian
Designed for students with no prior experience with Russian or whose placement scores are in the range for this course level. This two-semester sequence teaches the essentials of pronunciation, structure, and usage, allowing students to acquire the skills of listening, speaking, reading, and writing. Language cultures are explored through a variety of media. Students attend three classes per week and do mandatory online work determined by the instructor. Four credits per semester.

RU 210-211  Intermediate Russian
Designed for students who have completed RU 110-RU 111 or whose placement scores are in the range for this course level. This two-semester sequence prepares students to continue the study of language on a more advanced level, and includes review of essential points of grammar, vocabulary building, and regular practice in speaking and writing. The language cultures are explored through a wide variety of materials (literary texts, press articles, films, etc.) Students attend three classes per week and do mandatory online work determined by the instructor. Four credits per semester.
Spanish

SP 110-111 Elementary Spanish
Designed for students with no prior experience with Spanish or whose placement scores are in the range for this course level. This two-semester sequence teaches the essentials of pronunciation, structure, and usage, allowing students to acquire the skills of listening, speaking, reading, and writing. Language cultures are explored through a variety of media. Students attend three classes per week and do mandatory online work determined by the instructor. Four credits per semester.

SP 210-211 Intermediate Spanish
Designed for students who have completed RU 110-RU 111 or whose placement scores are in the range for this course level. This two-semester sequence prepares students to continue the study of language on a more advanced level, and includes review of essential points of grammar, vocabulary building, and regular practice in speaking and writing. The language cultures are explored through a wide variety of materials (literary texts, press articles, films, etc.) Students attend three classes per week and do mandatory online work determined by the instructor. Four credits per semester.

SP 211 Career-Oriented Spanish
This course, for students who wish to acquire a skill that provides a career asset and who want to continue their work in written and spoken Spanish, uses papers and classroom discussion to emphasize Spanish vocabulary that relates to business, law, medicine, social work, and other professions. Three credits.

SP 221 Spanish Composition
Students improve their proficiency in the written language in this course, which provides opportunities for practice in accurate use of vocabulary, grammar, and syntax. Three credits.

SP 222 Spanish Conversation
This course develops and improves student conversational abilities via classroom discussion on a variety of contemporary topics. The course includes opportunities to improve pronunciation, increase vocabulary, and correctly use grammar. Three credits.

SP 245 Analysis and Interpretation of Hispanic Literature
The course provides students with the fundamentals of literary analysis in the genres of poetry, narrative, theater, and film. It uses materials from around the Hispanic world to present a broad historical-cultural context for further reading and to sharpen the skills of analysis, argumentation, speaking, and writing. Focused on a literary study whose critical terms derive from the structure of literature itself (plot, scene, shot, verse, etc.), the course includes a survey of the periods of literary history. Students complete critical papers. (Prerequisite: SP 221 or permission of instructor) Three credits.

SP 251 Spanish Civilization and Culture
This course presents the main currents of Spanish civilization by means of lectures and student participation in written and oral reports. Studies of the geography, history, literature, and fine arts of Spain underscore class discussions. Three credits.

SP 253 Spanish-American Civilization
This course presents a general view of Spanish-American civilization from pre-Columbian times to the present. Participants study the culture, social history, and politics of Spanish-America through select literary readings, articles, documentaries, films, newspapers, and Internet research. The course includes a special topic covering the globalization in Latin America and its impact in the 21st century. Students complete exams, oral presentations, written papers, and a final paper. This course meets the world diversity requirement. Three credits.

SP 262 Translation from Written Spanish into English
Students in this course learn to translate from Spanish into correct, clear, and fluent English. The course assumes a solid command of both languages. Practice includes translation of newspaper and magazine articles, commercial announcements, chapters from guidebooks, and literary selections. The broad range of materials provides exposure to different styles and levels of written Spanish. The course requires numerous short papers and one long project. Three credits.

SP 271 Hispanic Film
This course examines and analyzes film by Spanish and Latin-American directors (Buñuel, Saura, Littin, Sanjines, etc.). Students initially study films as an independent genre using specific structural form as the means of analysis (close-up, soundtrack, frame, etc.). Students then begin to formulate interpretations that move between the formal, technical composition of films and the concrete socio-historic and cultural reality to which each film refers. Course activities include screening of films, discussion of articles that deal with literary theory and analysis of film, and writing short papers. This course meets the world diversity requirement. (Prerequisite: SP 221 or permission of the instructor) Three credits.

SP 301 Love, Life, and Death in Spanish Literature
This course, open to juniors and seniors only, presents a thematic view of Spanish literature from its origins to the end of the 18th century. When possible, students analyze and discuss complete works in class. Students are advised to complete SP 245 or a course similar to the content of SP 245 prior to enrolling in SP 301. (Prerequisite: permission of instructor) Three credits.
Modern Languages and Literatures

SP 303 From Empire to Modernization in Spanish American Literature
This critical study of the principal authors and works from European contact with indigenous cultures to the end of the 19th-century provides students with an understanding of the origins and some of the preoccupations of Spanish-American literature through critical analysis of documents of travel, discovery, descriptions of the struggles for independence, rural versus urban life, and modernismo. The course may require critical papers and oral reports. Open to juniors and seniors only. Students are advised to complete SP 245 or complete a study abroad course similar to the content of SP 245 prior to enrolling in SP 303. (Prerequisite: permission of the instructor) Three credits.

SP 305 Popular Culture in Latin America
This course examines the interaction among mass, elite, traditional, and indigenous art forms, their relationship with the dynamics of national/cultural identity in Latin America in the 19th and 20th centuries, and globalization. Forms of expression include oral poetry and narrative; the folletin (19th-century melodramas by installment) to 20th-century “fotonovelas,” “radionovelas,” and “telenovelas”; broadsides; comics; musical and political movements such as neo-folklore, new song, Nueva Troba, and Rock Latino; artistic movements such as Mexican muralist; traditional and popular crafts; cooking; popular dance; and film. Open to juniors and seniors only. (Prerequisites: SP 253 and permission of the instructor) Three credits.

SP 311 Glory, Splendor, and Decay: Spanish Golden Age Literature
This course studies the most important literary manifestations of the 16th- and 17th- centuries’ Golden Age Spanish culture, with emphasis on Cervantes, Tirso de Molina, Lope de Vega, Quevedo, Góngora, and Calderón de la Barca. Open to juniors and seniors only. (Prerequisite: permission of the instructor) Three credits.

SP 331 Love and Deception in 19th-Century Spanish Literature
Students study and analyze representative works of the romantic and realist movements. The course emphasizes theatre and poetry, or the novel, depending on students’ needs. Juniors and seniors only. (Prerequisite: permission of the instructor) Three credits.

SP 341 20th-Century Spanish Literature
This course examines works and literary movements from the early part of the 20th century (Generation of ’98) to present times. Representative authors include Unamuno, Baroja, Valle-Inclán, García Lorca, J.R. Jiménez, Cela, Lafosse, Delibes, and Matute. Open to juniors and seniors only. (Prerequisite: permission of the instructor) Three credits.

SP 353 Spanish-American Narrative
This critical analysis and discussion of key words of the narrative genre emphasizes the 20th-century development of the novel and short story. Authors include Azuela, Quiroga, Borges, Bombal, Somers, Cortázar, García Márquez, Fuentes, Ferré, and Allende. The course also considers experimental writing, the short story of fantasy, testimonio, and others, and requires critical papers and oral reports. Open to juniors and seniors only. (Prerequisite: permission of the instructor) Three credits.

SP 355 Short Prose Fiction of Spain
This course explores the development of short prose fiction in Spain from translations of Hindu fables in the beginnings of the Middle Ages to the Golden Age (Cervantes’ Novelas ejemplares) and through its full development in the 19th and 20th centuries. Open to juniors and seniors only. (Prerequisite: permission of the instructor) Three credits.

SP 357 The Spanish Novel
This course studies the novel of Spain from its first tentative manifestation with the picaresque through its major development with Cervantes and into the 20th century, emphasizing the works of more important writers. Open to juniors and seniors only. (Prerequisite: permission of the instructor) Three credits.

SP 359 Culture, Civilization, and Literature in the Spanish-American Caribbean Region
This study and explanation of distinctive elements of Puerto Rico, Cuba, Dominican Republic, and Central American countries focuses on the fusion of indigenous, Black, and Hispanic as manifestation in the Spanish-American Caribbean Region. Students will read, study, and critically analyze relevant documents, and cultural materials from pre-Columbian populations until the contemporary period. Juniors and seniors only. This course meets the U.S. and World diversity requirement. (Prerequisite: permission of the instructor) Three credits.

SP 360 Dictatorships and Revolutionary Movements in Contemporary Latin America
This course will analyze various revolutionary movements in Latin America as well as the dictatorships that emerged in early 20th Century and ended almost at the turn of the century. We will discuss the new “neo socialist” governments that have emerged in XXI Century Latin America since the end of the Socialist Block (1990’s), under the dominant global economy. In this class we will read, analyze, and discuss critical essays and literature (narrative, poetry, and testimonies), and other cultural forms (such as fiction and documentary films, art, music, etc.). (Prerequisite: Spanish 245 and Spanish 253 or Spanish 359) World Diversity Course. Three credits.
The Peace and Justice Studies program is an expression of the Jesuit educational commitment, which is fundamentally identified with the promotion of the values of peace and justice. The program is based on the principle that true peace is not only the absence of hostilities, but also requires the establishment of a just social order providing a decent and dignified life for all.

Accordingly, the minor provides students with an opportunity for the systematic study of a variety of issues in world peace and social justice, as well as an examination of how religions and philosophical traditions have thought about these values.

For a 15-credit minor in peace and justice studies, students:

- complete PO 115 Introduction to the Study of Peace and Justice,
- complete three electives from the University curriculum chosen in consultation with the director of the minor, and
- complete PJ 398 Capstone Research Seminar.

SP 371 Images of Latin American Indians
This course examines the vision of Latin American Indians from the first letters of the “discoverers” and conquistadores (Colón, Cortés, Bernal Díaz del Castillo), and missionaries (Bartolomé de las Casas) through relevant novels, short stories, and films of the 19th and 20th centuries. To understand the post-discovery vision of the Indians, this course also studies the major pre-Columbian civilization of Mesoamerica and the Andean region. Authors include: Matto de Turner, Icaza, Arguedas, Castellanos, and others. Open to juniors and seniors only. This course meets the world diversity requirement. (Prerequisite: permission of the instructor) Three credits.

SP 377-378 Internship
The internship program gives students first-hand experience in the fields of translation, interpretation, cataloging, public relations, advertising, teaching, etc., in the language of their specialization. Department members, who agree to guide the endeavor, supervise student work. When required by a faculty supervisor, evaluation of student interns may be required from the institution where students work. The student’s work should demand no less than one full day per week, or its equivalent. Open to juniors and seniors only. Three credits per semester.

SP 381 Coordinating Seminar: Exit Research Study
Students in their senior year, fall or spring, must complete a research study paper for the major. The student chooses from a list of topics or books offered by professors from the Spanish section. (Prerequisite: permission of the instructor) Three credits.

SP 382 Coordinating Seminar/Independent Study
Students undertake readings and studies in a specialized area of Spanish, under the direction of a staff member. Designed to fill the special needs of specific students, this course is offered at the discretion of the department chair. Hours by arrangement. Open to juniors and seniors only. Three credits per semester.

Music
(see Visual and Performing Arts)

New Media Film, Television, and Radio
(see Visual and Performing Arts)
Students pursuing a peace and justice studies minor may also elect PJ 298 Internship in Advocacy and Community Organizing. This internship provides students in the minor with the opportunity to understand, through direct participation, how citizens organize to empower their communities and promote policies that will benefit them. Interns are placed with community organizations in the greater Bridgeport area and some placements include advocacy work in the state legislature in Hartford. The internship is currently an elective and not required of students in the minor.

The introductory course, PO 115, and the concluding seminar, PJ 398, are required for the minor. Students may select their own three electives, with approval of the director, from any relevant courses in the University curriculum. Examples of courses students have taken in fulfilling the elective requirement are listed below.

This list is suggestive only. There are numerous other courses that may also serve as electives; consult with the director for additional information.

AE 297 Eco-feminism
BI 75 Ecology and Society
EN 290 Literature of the Holocaust
HI 288 Colonial Latin America, 1492 to 1800
HI 289 Modern Latin America, 1800 to Present
PH 288 Social and Political Philosophy
PO 125 Homelessness: Causes and Consequences
PO 135 Peace and War in the Nuclear Age
PO 153 The Politics of Race, Class, and Gender
PO 116 Utopian Politics
PO 147 Northern Ireland: The Politics of War and Peace
RS 237 Christian Feminist Theology
SO 161 American Class Structure
SO 181 AIDS in the United States
SO 162 Race, Gender, and Ethnic Relations

Course Descriptions
Below are descriptions of PO 115 and PJ 398. Both courses are required for the minor in Peace and Justice Studies.

PO 115 Introduction to the Study of Peace and Justice
This course introduces students to the concepts of peace and justice, and the connection between them. It focuses on case studies, beginning with an analysis of the crisis of America’s cities, and finds the causes in de-industrialization and its resulting poverty. The course views poverty as the effect of unjust economic and social structures including exaggerated military budgets at home and the militarization of developing countries. Examining these fundamental problems in justice and peace according to the principles of Catholic Social Teaching, as well as other political traditions, provides a theoretical basis for the study. Each of these traditions has its own perspective for understanding these problems and for responding to them. In this way the course provides an awareness of the major problems in justice and peace as well as an understanding of the different ways to think about them. The course concludes with an examination of citizen responses to these problems. The major assignment in the course is the keeping of a personal journal in which students record their responses to the course material. Three credits.

PJ 125 Homelessness: Causes and Consequences
In this seminar, students spend several hours each week in shelters, soup kitchens, or day programs, learning first-hand about homelessness. In class, journals, and short papers, students reflect on their community-based learning experiences and integrate them with readings and theory. Students discuss the causes and consequences of homelessness and critically analyze, from a variety of perspectives, its effects on individuals, families, and society. This course meets the U.S. diversity requirement. Three credits.

PJ 398 Capstone Research Seminar
This course provides opportunities for students to examine the connection between their major and the values of peace and justice. Students undertake a major research project representing a concept, issue, or case study in their major and investigate the justice and peace dimension of the topic. Students make oral and written presentations of the research project and discuss it in the seminar. The course is very much student-driven. While faculty members assist in the selection of topics and readings, and join in the discussion, the course gives students much of the responsibility for their learning. Three credits.

Requirements

Philosophy Major
For a 30-credit major in philosophy, students:
• complete PH 10 Questions in Ancient and Medieval Philosophy;
• complete one 100-level philosophy course;
• complete two courses that provide an intensive study of a major philospher such as Plato, Aristotle, Augustine, Kant, Aquinas, or Nietzsche, and that emphasize primary sources;
• complete PH 203, Logic
• complete five philosophy or applied ethics courses numbered 200 or greater.

Philosophy Minor
For a 15-credit minor in philosophy, students:
• complete PH 10 Questions in Ancient and Medieval Philosophy;
• complete one 100-level philosophy course; and
• complete three philosophy or applied ethics courses chosen with guidance and some concentration (e.g., art, politics, history, ethics, etc.)
Course Descriptions

PH 10  Questions in Ancient and Medieval Philosophy
This introductory course considers the philosophical questions of several significant thinkers from the dawn of Western philosophy to the 17th century. The course introduces students to the vocation of incessant questioning by acquainting them with the rich and stimulating variety of ancient and medieval philosophical thinking and by developing their own thinking, reading, and critical writing skills. Three credits.

PH 150 Questions in Modern and Contemporary Philosophy: Descartes to Derrida
This introductory course considers the philosophical questions of several significant thinkers from the 17th century to the present. It introduces students to new ways of thinking ushered in by the revolutionary era of scientific reasoning and the enlightenment, as well as the reaction to modernism by contemporary thinkers. The course also introduces students to the vocation of incessant questioning by acquainting them with these new ways of philosophical thinking while continuing to develop their own thinking, reading, and critical writing skills. (Prerequisite: PH 10) Three credits.

PH 155 Questions in Modern and Contemporary Philosophy: Philosophy of Science
This introductory course considers the philosophical questions of several significant thinkers from the 17th century to the present. It introduces students to new ways of thinking ushered in by the revolutionary era of scientific reasoning and the enlightenment, as well as the reaction to modernism by contemporary thinkers. The course focuses on the philosophy of science (both natural and social) within the context of modern and contemporary philosophy. It also introduces students to the vocation of incessant questioning by acquainting them with these new ways of philosophical thinking while they continue to develop their own thinking, reading, and critical writing skills. (Prerequisite: PH 10) Three credits.

PH 156 Questions in Modern and Contemporary Philosophy: Ethical Theory
This introductory course considers the philosophical questions of several significant thinkers from the 17th century to the present. It introduces students to new ways of thinking ushered in by the revolutionary era of scientific reasoning and the enlightenment, as well as the reaction to modernism by contemporary thinkers. The course focuses on ethical theory and a comparative study of the various schools of ethical theory in modern and contemporary philosophy. It also introduces students to the vocation of incessant questioning by acquainting them with these new ways of philosophical thinking while they continue to develop their own thinking, reading, and critical writing skills. (Prerequisite: PH 10) Three credits.

PH 157 Questions in Modern and Contemporary Philosophy: Political Philosophy, Ethics, and Human Rights
The course addresses ethical theories, including utilitarianism, deontological ethics, and postmodern ethics. It addresses themes from political philosophy, including rule by divine right, social contract theory, Marxism, and twentieth century analytic and continental political thought. This course also explores the early ideas of international law, the concept of a community of nations, and the tension between idealism and political realism. Finally, the course looks at human rights by touching on different forms of dehumanization: colonization of the indigenous population in the western hemisphere; enslavement of Africans and the history of African-Americans; and the treatment of gays and lesbians. (Prerequisite: PH 10) Three credits.

PH 203 Logic
This course provides a basic acquaintance with prevailing systems and methods of logic, notably traditional (Aristotelian) and modern (standard mathematical) logics. (Prerequisites: PH 10 and one 100-level philosophy course) Three credits.
PH 206 20th-Century Philosophy
This course presents a coherent picture of the main currents of contemporary philosophy in the Western and the non-Western tradition: phenomenology and existentialism, pragmatism and analytic philosophy, Marxism and dialectical materialism, and philosophy of history and culture. (Prerequisites: PH 10 and one 100-level philosophy course) Three credits.

PH 207 Aesthetics
The course examines aesthetic experience and concepts like imitation, expression, and psychic distance; considers the relationships among the various arts; and explores the role of art in life. (Prerequisites: PH 10 and one 100-level philosophy course) Three credits.

PH 209 Augustine, Pascal, and Camus
This course takes as its focus the rich and enduring philosophical synthesis of the Bishop of Hippo as compared with two of his modern/contemporary disciples, Blaise Pascal and Albert Camus. These three thinkers came from three very different eras, and these differences should not be minimized. However, students discover a common strain in their thinking during this course. (Prerequisites: PH 10 and one 100-level philosophy course) Three credits.

PH 211 Epistemology
What is the difference between knowledge and mere belief or opinion? What do we really know, and how do we know it? Epistemology – the study of knowledge – is the branch of philosophy concerned with such questions. The course explores epistemological issues through an examination of some of the important contributions to the field. (Prerequisites: PH 10 and one 100-level philosophy course) Three credits.

PH 212 Political Philosophy: Plato to Machiavelli
This course considers the evolution of political thinking from the golden age of Athenian democracy to the dawn of the modern period. It takes as its focus the changing views of the body politic from Plato through Augustine, Thomas Aquinas, and Marsilius to Renaissance thinkers like More and Machiavelli. (Prerequisites: PH 10 and one 100-level philosophy course) Three credits.

PH 214 The Problem of God
This course studies the problem of the existence of God, including the metaphysical and epistemological issues entailed therein, as developed by such thinkers as Augustine, Anselm, Aquinas, Descartes, Hume, Spinoza, Kant, and Hartshorne. (Prerequisites: PH 10 and one 100-level philosophy course) Three credits.

PH 215 Metaphysics
This course concerns itself with being and our knowledge of being, developing in student minds an operative habit of viewing reality in its ultimate context. (Prerequisites: PH 10 and one 100-level philosophy course) Three credits.

PH 217 Mysticism and Western Philosophy
This course studies and compares the sometimes conflicting, sometimes complementary traditions in the history of Western thought: the intellective and the affective or mystical. One stresses the ability of the reason to know, even something of the divine; the other abandons the reason for the “one thing necessary.” Philosophers include Plotinus, Augustine, Pseudo-Dionysius, Bernard, Bonaventure, Thomas d’Aquino, Eckhart, and Dante. (Prerequisites: PH 10 and one 100-level philosophy course) Three credits.

PH 219 Aquinas
This course focuses on Aquinas’s most mature work, Summa theologiae. This work exemplifies the Christian intellectual reaction to Islamic Aristotelianism, while at the same time bearing witness to Thomas’s belief in the unity of truth. The course examines and analyzes such questions as the existence and intelligibility of God, the nature and powers of the human composite, human destiny, the human act, good and evil, providence and freedom, natural law, and the virtues. (Prerequisites: PH 10 and one 100-level philosophy course) Three credits.

PH 225 The Question of Religion
Nineteenth- and 20th-century continental philosophy calls into question the traditional understanding of religion, God, transcendence, incarnation, sacrifice, responsibility, evil, and ritual. This course explores the transformation of the traditional understanding of these ideas in the wake of thinkers such as Hegel, Kierkegaard, Nietzsche, Heidegger, Bataille, Lacan, Levinas, Girard, Nancy, Derrida, and Marion. (Prerequisites: PH 10 and one 100-level philosophy course) Three credits.

PH 230 Philosophy and Biology of Evolutionary Theory
This course explores the question of evolutionary theory from the perspectives of philosophy and biology. From the biological perspective, the course focuses on Mendelian inheritance, natural and sexual selection, speciation, and human evolution. From the philosophical perspective, the course focuses on questions such as essentialism vs. population thinking, Cartesianism vs. dialectical thinking, the developmental systems critique, self-organization, complexity theory, thermodynamics, human nature, and theology. Three credits.

PH 231 Hume
This course offers an in-depth understanding of the philosophy of David Hume. Hume, one of the most interesting (and influential) of the 18th-century philosophers, made major contributions to our understanding of causation, morality, and the mind, to name just a few. Hume began with principles that seemed quite plausible but, taking these ideas to their logical conclusions, arrived at a philosophy that is, to say the least, surprising. (Prerequisites: PH 10 and one 100-level philosophy course) Three credits.
PH 232 Nietzsche and Kierkegaard
This course concentrates on the major writings and central insights of the two thinkers. It determines and evaluates their contributions to the development of contemporary existentialism and to current radical thinking about God and morality. (Prerequisites: PH 10 and one 100-level philosophy course) Three credits.

PH 233 Introduction to Oriental Philosophy
This course presents a coherently developed account of the salient features of the two philosophical traditions of China and India as contrasted with each other and with the Western tradition. This course meets the world diversity requirement. (Prerequisites: PH 10 and one 100-level philosophy course) Three credits.

PH 234 Hegel
The philosophy of G.W.F. Hegel, the most famous of the German idealists, directly spawned the philosophy of Karl Marx. Hegel is considered the father of existentialism and influenced contemporary schools of critical theory, continental philosophy, and post-structuralism. This course focuses on Hegel’s most famous work, Phenomenology of Spirit. Students learn the mechanics of dialectical reasoning by examining Hegel’s reflections upon time and space, perception, scientific reasoning, the concepts of life and death, the master-slave dialectic, and self-consciousness. The course works through this text in detail, and pays particularly close attention to how Hegel interprets the philosophy of Immanuel Kant. (Prerequisites: PH 10 and one 100-level philosophy course) Three credits.

PH 235 Immanuel Kant
Almost everyone recognizes that through experience the human mind is shaped by the world. Immanuel Kant, however, argued for the revolutionary claim that the world is shaped by the human mind. In developing this position Kant was led to formulate a radical view concerning the nature of space and time. It also led him to draw striking conclusions about our knowledge of ourselves, objects, causation, God, freedom, and immortality – conclusions that changed philosophy forever. In this class we will study Kant’s revolution in philosophy. Three credits.

PH 236 Plato
This course covers central ontological and epistemological themes in selected early, middle, and late Platonic dialogues, paying particular attention to Plato’s inclination to identify virtue with knowledge. (Prerequisites: PH 10 and one 100-level philosophy course) Three credits.

PH 237 Aristotle
This course introduces Aristotle through a selection of his works, exploring their relation to other works, their place in the scheme of the sciences, and thoroughly investigating their subject matter. (Prerequisites: PH 10 and one 100-level philosophy course) Three credits.

PH 238 Descartes
Three years after he finished college, Descartes got stuck in a snowstorm on his way to fight in a war. Alone in his room, he reflected on his education, coming to believe that many of the things he had been taught in college were pretty dubious. He also realized that he had believed many things all his life without giving thought to his reasons for believing them. He decided the best thing he could do was rid himself of all his old beliefs and then, relying only on his own mind, replace them with only those beliefs for which he could find good reasons. This course discusses the development and results of Descartes’ search for truth. (Prerequisites: PH 10 and one 100-level philosophy course) Three credits.

PH 240 G.W. Leibniz
Can everything in the world be rationally explained? Even the existence of the world itself? G. W. Leibniz (1646-1716) thought so. Together with his understanding of the nature of truth, this led him to some startling conclusions, such as nothing causally interacts with anything else, everything internally reflects everything else, and even though evil exists this is the best of all possible worlds. In this course we examine these conclusions as well as Leibniz’s theories about such puzzling topics as the nature of the mind, body, God, freedom, and space. (Prerequisites: PH 10 and one 100-level philosophy course) Three credits.

PH 245 Confucianism
Confucianism is a reflective tradition that for over 2500 years has shaped social norms and moral values in East Asia. It underlies traditional political theory and religious practice and remains the template for social interactions. In this course we examine the Confucian tradition through its major figures and primary texts, from the Analects of Confucius (551-479 BCE) to the writings of contemporary Confucians. Emphasis is given to drawing out the philosophical content of Confucian thought by engaging both traditional commentaries and recent philosophical interpretations. We also assess the appropriateness of regarding certain practices and institutions as Confucian. (Prerequisites: PH 10 and one 100-level philosophy course) This course meets the world diversity requirement. Three credits.

PH 247 Philosophical Daoism and Zen Buddhism
This course explores writings and philosophical influences of Daoism and Zen Buddhism in East Asia and in the West. The key philosophical themes covered are the related ideas of non-action (wuwei) and empty-mind (mushin). Emphasis is given to philosophical exegesis of these themes and their potential application to ideals of personal, moral, and professional integrity. The course includes reading and discussion of historical and contemporary texts. It may also involve exploratory, reflective engagement in Dao and Zen associated activities such as breathing meditation, T’ai Chi exercises, brush-calligraphy, haiku composition, or archery. (Prerequisites: PH 10 and one 100-level philosophy course) This course meets the world diversity requirement. Three credits.
PH 250 Philosophy of Mind
This course acquaints students with the most recent philosophical theories on the workings of the mind. Although it emphasizes philosophical theories of the mind, it also pays close attention to the philosophical implications of recent research in sciences such as psychology and neuroscience. This is an exciting topic; join us on this quest to address the Delphic dictum: Know Thyself! (Prerequisites: PH 10 and one 100-level philosophy course) Three credits.

PH 266 The Concept of Human Rights
Bosnia, Somalia, Guatemala, the Holocaust—the notion of human rights and accusations of human rights violations are a constant presence in our political environment and in the formulation of U.S. foreign policy. This course follows the emergence of this concept from the political and ethical thought of the Greeks, to the Enlightenment, to the explicit formulation of “human rights” in the 20th century as a guiding principle of international relations. Formerly PH 293. (Prerequisites: PH 10 and one 100-level philosophy course) Three credits.

PH 275 Bergson
This course explores the work of Henri Bergson (1859-1911). The course primarily takes the form of a close reading of Time and Free Will (1889), Matter and Memory (1911), and The Two Sources of Morality and Religion (1932). The course will also explore the influence of Bergson’s work on contemporary philosophy, psychology, science, and religion. (Prerequisites: PH 10 and one 100-level philosophy course) Three credits.

PH 280 Heidegger
This course explores the work of Martin Heidegger (1889-1976), one of the most influential philosophers of the 20th century. It primarily takes the form of a close reading of Being and Time (1927) and The Origin of the Work of Art (1936). The course hinges on Derrida’s reading of Heidegger’s existential analysis of death. (Prerequisites: PH 10 and one 100-level philosophy course) Three credits.

PH 283 Ethical Theories in America
This course examines the growth and development of ethical theory in America. America’s first philosophers, Jonathan Edwards, Benjamin Franklin, Thomas Jefferson, et al., distinguished their philosophies in terms of religious, political, and social values. This ethical stance became a tradition in America. The course examines this tradition in the writings of representative American philosophers. (Prerequisites: PH 10 and one 100-level philosophy course) Three credits.

PH 284 Critical Race Theory
Although race can be considered as one of several physical features of an individual, this course will investigate the recent research and literature in the field of Critical Race Theory that critiques this purely biological conception. For the purpose of understanding how race functions in our socio-political world, this body of work treats the concept as a social construction, drawing heavily on the phenomenological and existential traditions. Pertinent themes like lived experience, authenticity, and racial privilege will be explored using key texts (by Jean-Paul Sartre, Franz Fanon, Lewis Gordon, and Robert Bernasconi, to name a few). (Prerequisites: PH 10 and one 100-level philosophy course) Three credits.

PH 285 Philosophy of Literature
This course examines the philosophy “of” literature (the general nature of poetry and prose) and philosophy “in” literature (specific works that harbor philosophical ideas). (Prerequisites: PH 10 and one 100-level philosophy course) Three credits.

PH 286 Philosophy and Tragedy
This course explores various works on tragedy by, for example, Plato, Aristotle, Hegel, Kierkegaard, Nietzsche, Freud, Heidegger, Lacan, Derrida, and Irigaray, which are read alongside various tragedies such as Sophocles’ Oedipus the King and Antigone, and Shakespeare’s Hamlet. (Prerequisites: PH 10 and one 100-level philosophy course) Three credits.

PH 287 Philosophy of Religion
This course inquires into the nature of religion in general from the philosophical point of view. That is, it employs the tools of critical analysis and evaluation without a predisposition to defend or reject the claims of any particular religion. (Prerequisites: PH 10 and one 100-level philosophy course) Three credits.

PH 288 Social and Political Philosophy
This course analyzes the writings of leading social and political thinkers, with special consideration of the movements of protest and dissent. (Prerequisites: PH 10 and one 100-level philosophy course) Three credits.

PH 289 Philosophy of Law
This course examines the major questions of legal philosophy, the nature of legal rights and legal duties, the definition of law, and the grounds of legal authority. (Prerequisites: PH 10 and one 100-level philosophy course) Three credits.

PH 291 Field Being
The emergence of the field concept of being and its closely allied “non-substantialist turn” is the one common thread running through the whole spectrum of 20th-century thought. This course explores the multi-dimensional character of this exciting intellectual phenomenon from a global physiological perspective through an in-depth articulation of the basic concepts of field-being thinking and its applications in contemporary science and philosophy. (Prerequisites: PH 10 and one 100-level philosophy course) Three credits.
Philosophy

**Applied Ethics Courses**

See course descriptions under the Applied Ethics section of this catalog.

- AE 262 Ethics and the Community (*USD*)
- AE 265 Ethics in Education (*USD*)
- AE 270 Global Violence (*WD*)
- AE 275 Global Environmental Policy (*WD*)
- AE 276 Global Business Policy (*WD*)
- AE 281 Ethics of Communications
- AE 282 Ethics and Computers
- AE 283 Environmental Justice
- AE 284 Environmental Ethics
- AE 285 Ethics of Healthcare
- AE 286 Ethics of Research and Technology
- AE 287 Engineering Ethics
- AE 288 Global Humanitarian Action (*WD*)
- AE 289 Global Health Care Policy (*WD*)
- AE 290 Ethics in America: The Telecourse
- AE 291 Business Ethics
- AE 293 Ethics of War and Peace
- AE 294 Ethics of Media and Politics
- AE 295 Ethics in Law and Society
- AE 296 Ethics in Government
- AE 297 Eco-feminism
- AE 298 Ethics and Feminist Perspectives
- AE 299 Special Topics in Applied Ethics
- AE 384 Seminar on the Environment
- AE 391 Seminar in Business Law, Regulation, and Ethics
- AE 393 Seminar in War, Peace, and Public Policy
- AE 395 Seminar in Legal Ethics
- AE 396 Seminar in Ethics and Government
- AE 397 Seminar in Bioethics I: Ethical Issues in Health Care Practice
- AE 398 Seminar in Bioethics II: Ethical Issues in Biomedical Research and Resource Allocation
- AE 399 Special Topics in Applied Ethics

**College of Arts and Sciences**

**PH 294 American Philosophy**

This course examines the origin and development of the American philosophical tradition and its culmination in pragmatism, including the relation of philosophical ideas in America to literature, religion, and politics. The course emphasizes the writings of Jonathan Edwards, Ralph Waldo Emerson, Charles Sanders Peirce, William James, and John Dewey. (Prerequisites: PH 10 and one 100-level philosophy course) Three credits.

**PH 295 19th-Century Philosophy**

This course examines the representative philosophers of the 19th century, notably Kant, Fichte, Schelling, Hegel, Schleiermacher, Schopenhauer, Nietzsche, Kierkegaard, and Marx. (Prerequisites: PH 10 and one 100-level philosophy course) Three credits.

**PH 297 Evil**

This course explores the problem of evil from the perspectives of theology and philosophy. The course considers God and evil, classical theodicies (reasonable justifications of God before the prevalence of evil), modern philosophical accounts of evil, social evil, and the possibility of belief in the face of evil. Within the context of these subjects, the course addresses the following questions: What is evil? What are the roots of evil? What effect does an individual’s understanding of evil have on his or her understanding of the human being, of God, and of religion? What is our responsibility in the face of evil? (Prerequisites: PH 10 and one 100-level philosophy course) Three credits.

**PH 298 Independent Study**

Upon request and by agreement with an individual professor in the department, a student may conduct a one-semester independent study on a specific philosophical topic. (Prerequisites: PH 10 and one 100-level philosophy course, junior or senior status, and permission of professor) Three credits.

**PH 299 Special Topics**

This course explores a specific topic in the discipline of philosophy, in an effort to deepen students’ vocations of incessant questioning not only by exploring a specific thinker, question, or historical period, but also by further developing their own thinking, reading, and critical writing skills. (Prerequisites: PH 10 and one 100-level philosophy course) Three credits.

Minor in Physics

Students who major in an area other than physics can earn a 15-credit minor in physics by completing the following minimum requirements of two courses and an advanced lab beyond the introductory physics sequence:

- Introductory sequence: PS 15-16 General Physics I and II with lab (eight credits)
  OR
- PS 83-84 General Physics for Life and Health Sciences I and II with lab (eight credits)
- Two one-semester three-credit courses chosen among the 200- and 300-level physics courses, with the chairman's approval (six credits). PS 285 Modern Physics is recommended.
- One semester of laboratory course chosen among PS 203 to PS 206, with the chairman's approval (one credit)

Note: Biology, chemistry, and mathematics majors can minor in physics by taking two lecture courses and one laboratory course beyond the requirements of their major.

Course Descriptions

PS 15 General Physics I
(Physics/Engineering Majors)
This introductory course – for students concentrating in physics, mathematics, chemistry, or engineering – covers mechanics, heat, and fluid dynamics. It also includes rigorous mathematical derivations using integral and differential calculus. Topics include velocity and acceleration, Newton's laws of motion, work, energy, power momentum, torque, vibratory motion, elastic properties of solids, fluids at rest and in motion, properties of gases, measurement and transfer of heat, and elementary thermodynamics. Three credits.

PS 15L Lab for General Physics I
(Physics/Engineering Majors)
This lab course engages students in experimental measurements spanning the areas of mechanics and thermal stresses on matter, with the objective of training students in experimental measurements, data manipulation and analysis, error analysis, deductive thinking, and instrumentation, providing depth to students' understanding of the phenomena taught in PS 15. Specific experimental measurements include accelerated motion, periodic motion, gravitational force, ballistics, conservation of energy and momentum, rotational dynamics, and measurements of the coefficient of linear expansion and the heat of fusion. Students complete a weekly lab report. One credit.

PS 16 General Physics II
(Physics/Engineering Majors)
This continuation of PS 15 covers electricity and magnetism, light and optics, and sound. Topics include magnetism and electricity; simple electric circuits; electrical instruments; generators and motors; characteristics of wave motion; light and illumination; reflection; refraction, interference; polarization of light, color, and the spectrum; and production and detection of sound waves. Three credits.

PS 16L General Physics II Lab
(Physics/Engineering Majors)
This laboratory provides students with a greater understanding of electromagnetic phenomena, wave phenomena, and optics, and supports PS 16. Measurements of microscopic quantities, like the charge and mass of the electron, give students an opportunity to explore the structure of matter. Other experiments involve the physics of electrical currents, electric properties of bulk matter, magnetic fields and their effect on beams, wave phenomena, and the nature of light and its interaction with optical materials. This course trains students in experimental measurements, data manipulation and analysis, error analysis, deductive thinking, and instrumentation. Students complete a weekly lab report. One credit.

PS 65 Introduction to Computational Methods in Physics and the Sciences
This course presents an introduction to computational methods in physics and other sciences. Topics covered are problem solving, modeling, and algorithm design. Problem solving techniques are illustrated through iteration, Monte Carlo, and finite difference techniques. These problem solving techniques are applicable in upper division physics and science courses to solve advanced problems. Languages used in this course may include Basic, Mathematical, and Excel. This course does not count as a core course. Two credits.

PS 71 Physics of Light and Color
This course, intended for students who are not majoring in the physical sciences, covers the particle-wave duality of light and the relationship of light to other electromagnetic waves. Additional topics include polarization, vision, color and the perception of color, optical phenomena in nature and in biological systems, color and light in art, simple optical instruments, sources of light and their spectra, lasers, and holography. Three credits.
PS 75  Physics of the Human Body
Designed for the non-science major, this course examines the functionality of the human body from a physics perspective. The course introduces introductory level physical principles and applies them to various body systems. Topics include the mechanical efficiency of the body and its heat management; fluid pressures; flow processes; forces and muscles; skeleton, bones, and lever systems; lungs and breathing; cardiovascular system; sound, speech, and the hearing system; and optical imaging and the vision system. The course, offered in common vernacular language, emphasizes conceptual understanding. Three credits.

PS 76  Physics of Sound and Music
Designed for the non-science major, this course examines the physical principles in the production of sound, with an emphasis on sound produced by musical instruments. Topics include the nature of wave motion as produced by vibrating strings and organ pipes, harmonic content, musical scales and intervals, and the mechanism of the hearing process. The course applies concepts to the construction and characteristics of musical instruments and to the design of auditoriums and concert halls. Three credits.

PS 77  The Science and Technology of War and Peace – The Way Things Work
Designed for the non-science major, this course includes critical discussion and descriptive exposition of the swords and plowshares dilemma, of the concept that science and technology have been used to build up – and tear down – civilization, and of the forces of civilization driving and being driven by the dual nature of our technological heritage. The course begins with the first lever and club and ends with laser surgery and Star-Wars lasers, taking a historical and a thematic approach where appropriate. The course describes, in the simplest terms, the way important real devices (television, telephones, lasers, gas turbines, thermonuclear weapons, etc.) work, examining their illustration of and applications of concepts to the construction and characteristics of devices. The course also considers the technical future from a past, present, and future perspective, asking: What can, could, didn’t, might, and can we not do? The course illustrates the moral and ethical implications of science where appropriate. Knowledge of no more than high school algebra is required. Three credits.

PS 78  The Nature of the Universe
This course, intended for non-science majors, reviews the scientific field of cosmology, or the nature of the physical universe, from a historical perspective. Beginning with the ancients, the course traces the development of cosmological principles through the Greek and Egyptian era of Aristotle, C. Ptolemy, and others; the 16th and 17th centuries of Copernicus, Galileo, and Newton; and the cosmology of the 20th century based upon Einstein’s theories of relativity coupled with several fundamental observations. This leads to an examination of the current model of the universe, which is based upon the Big Bang theory. Three credits.

PS 83  General Physics I  
(Health and Life Sciences)
Designed for students entering the health sciences, this introductory-level course covers classical mechanics of rigid bodies and fluids, Newton’s laws of motion, and the conservation of mechanical energy and momentum form the foundations of this course. The course investigates the elastic nature of materials, simple harmonic motion, and basic wave properties as well as the introductory concepts of heat transfer and thermodynamics. The course uses elementary calculus to describe many of its concepts and stresses conceptual understanding and problem-solving skills. Three credits.

PS 83L  General Physics I Lab  
(Health and Life Sciences)
Same as PS 15L. One credit.

PS 84  General Physics II  
(Health and Life Sciences)
A continuation of PS 83, this course covers the basic concepts of static electric and magnetic forces and fields, potentials, induction, motors, generators, DC circuits, and capacitance. Students investigate geometric and physical optics along with selected topics in modern physics such as special relativity and the wave-particle concept of matter and use introductory level calculus where appropriate. The course stresses conceptual understanding and problem-solving skills for health science students. Three credits.

PS 84L  General Physics II Lab  
Same as PS 16L. One credit.

PS 87  Fundamentals of Astronomy
This course introduces students who are not majoring in science to the principal areas, traditional and contemporary, of astronomy. Traditional topics include a historical background to astronomy, telescopes, the sun, the moon, the major and minor planets, comets, and meteors. After discussing these subjects in detail, the course covers areas appropriate to modern astronomy such as the composition and evolution of stars, star clusters, quasars, pulsars, black holes, and cosmological models. Three credits.

PS 89  Physics of Sport
This course introduces concepts from science, particularly physics, by using illustrations from a wide variety of sports. For example, it explains why a baseball curves, why gears work on a bike, the speeds obtainable by a windsurfer or skier or tennis ball or arrow, how scuba divers survive, and a wide variety of other sports phenomena from football, golf, skiing, climbing, sailing, skating, baseball, scuba, fishing, sky-diving and so forth. The association of sports with motion, forces, and energy is explained by scientific reasoning and analysis. The course includes a small laboratory/experiential component that illustrates the scientific method, where various examples of sports are made quantitative, using readily available equipment. Three credits.
PS 93 Energy and Environment
This course introduces students not majoring in the natural sciences to topics relating to work, energy, and power, and explores many of the environmental consequences resulting from our use of energy. The course examines the finite nature of fossil fuels as well as many alternative energy sources including solar energy; wind, tidal, and geothermal energy; nuclear fission; and nuclear fusion. Students use arithmetic and simple algebra. Three credits.

PS 122 Optics
The fundamentals of geometric and physical optics are covered with an introduction to wave motion and the basic tenets of electromagnetic radiation necessary to support the laws of reflection, refraction, and interference effects. Reflective and refractive, single and double element imaging is included. The principle of superposition is used to introduce various interference phenomena including diffraction effects. The fundamentals of fiber optics, lasers, and active optical devices are also covered. The course is designed for non-physics major science and engineering students and is accompanied by PS 122L. Three credits.

PS 122L Optics Lab
A laboratory companion to PS122, the course includes a variety of experiments to complement PS 122 lectures. Experiments in imaging, diffraction, and interference are included. One credit.

PS 203 Optics and Lasers Lab
In this companion lab course to PS 222, students investigate classical optical experimental methods including experiments in geometrical optics, optical instruments, optical materials, velocity of light, interference, Fraunhofer and Fresnel diffraction, Michelson and Fabry-Perot interferometers, and polarization. The course includes an introduction to spectroscopy, fiber optics, and lasers, and requires comprehensive lab reports. One credit.

PS 204 Modern Experimental Methods I Lab
PS 204 and PS 205 each offer lab experience in modern experimental methods and techniques. They each involve lab investigation of fundamental concepts in modern physics including atomic, nuclear, solid-state, X-ray, acoustic, superconductivity, and quantum physics. Lab procedures emphasize hands-on work with basic experimental equipment such as vacuum systems, power supplies, electronics and instrumentation, detectors, diagnostic techniques, computer interfaces, data acquisition and control, hardware and software, etc. These lab courses give students maximum opportunity to work on their own with minimum supervision. One credit.

PS 205 Modern Experimental Methods II Lab
See PS 204. One credit.

PS 206 Modern Optics Lab
In this lab course, student experiments include measurement of the speed of light, the photoelectric effect, diffraction phenomena, spectroscopy, polarization, interferometry, interference effects, and optical heterodyning. Students may – and are encouraged to – develop relevant experiments. The course requires comprehensive lab reports. One credit.

PS 211 Digital Electronics and Microprocessors
Cross-listed in engineering as EE 245, this lecture and lab course trains students in the practical aspects of digital electronics, beginning with simple digital circuits and advancing to the design and development of microprocessor circuits. Topics include number systems (decimal, binary, octal, hexadecimal, BCD); Boolean algebra; integrated circuits versus discrete components; logic gates; AND/OR/NAND/NOR/XOR circuits; flip-flops; multiplexers and decoders; counters; registers; memory devices; arithmetic and logic units; programmable logic devices; and analog/digital and digital/analog conversion techniques. (Prerequisites: PS 15-16) Three credits.

PS 211L Laboratory for Digital Electronics and Microprocessors
Students learn the use of basic laboratory test equipment such as the digital volt-ohm-amp meter, function generator, and oscilloscope. Breadboard techniques are utilized to assemble and test various digital circuits. Simulation software is introduced. (Corequisite: PS 211) One credit.

PS 212 Circuit Analysis and Analog Systems
Cross-listed under engineering as EE 213, this lecture and lab course introduces students to the theory and practice of basic electronics and linear/analog circuitry. Topics include Kirchhoff’s laws and applications; resistor circuits; concepts of capacitive and inductive reactance; impedance calculation using vector and complex notation: DC, AC, and transient circuit behavior; operation of basic solid state devices (diodes, junction transistors, FETs, SCRs); operational amplifiers; active and passive filters; feedback techniques; and frequency dependent effects. The basic laws and theorems of circuit analysis are introduced. (Prerequisites: PS 15-16) Three credits.

PS 212L Laboratory for Circuit Analysis and Analog Systems
Students learn the use of basic laboratory test equipment such as the digital volt-ohm-amp meter, function generator, oscilloscope, and frequency counter. Breadboarding techniques are utilized to assemble and test various linear/analog circuits. Simulation software is introduced. (Corequisite: PS 211) One credit.
PS 215 Computational Physics
In this course students will learn numerical methods to solve scientific problems and to integrate the use of the computer into their research. The course will cover numerical methods to solve integrals, differential equations, partial differential equations, systems of linear equations, and to model random processes. Problems that will be solved in this class include: Laplace equation, chaotic pendulum, Schrodinger’s equation, and magnetic and electric field calculations. The programming languages that will be used in this course are high level languages, such as C and C++, whose basic syntax will be taught in class. (Prerequisite: PS 65 or equivalent) Three credits.

PS 220 Pollution in the Environment
Cross-listed under chemistry as CH 220, this lecture/lab course introduces students to a range of physical and chemical techniques used to monitor and assess the sources, level, and flux of pollutants in the environment. The course considers the specific pollution sources, pathways by which pollutants travel through the ecosystem, the deleterious effects of pollution, and approaches to pollution prevention and remediation. The lectures present a review of the relevant physical and chemical processes whereby pollutants enter and affect the ecosystem. The lab component gives students hands-on experience in environmental sample collection, analysis, and data interpretation, and features the use of sophisticated analytical instrumentation. (Prerequisite: CH 11-12) Four credits.

PS 222 Modern Optics
Starting with a review of electromagnetic wave theory and the differential wave equation, this course covers the propagation of light from a scattering and an electromagnetic wave phenomena point of view. The course investigates superposition, polarization, interference, and diffraction in detail and discusses the photon theory of light along with the photoelectric effect. The course covers the basic theory of coherence with its contemporary application to lasers and additional selected topics in applied optical devices. It stresses the application of theory to devices and observations, and requires completion of the complementary lab course, PS 203. (Prerequisite: PS 271) Three credits.

PS 226 Theoretical Mechanics
The formulation of classical mechanics represents a major milestone in our intellectual and technological history as the first mathematical abstraction of physical theory from empirical observations. This achievement is rightly accorded to Isaac Newton, who first translated the interpretation of various physical observations into a compact mathematical theory. More than three centuries of experience indicate that mechanical behavior in the everyday domain can be understood from Newton’s theories. Topics in this course include elementary dynamics in one and two dimensions, gravitational forces and potentials, free and forced harmonic oscillations, central fields and the motions of planets and satellites, Lagrange’s and Hamilton’s equations, small oscillations, and normal mode analysis. (Prerequisite: PS 15-16 or PS 83-84) Three credits.

PS 241 Thermodynamics
Thermodynamics, viewed primarily as the science that deals with energy transformations and the relationships between properties of systems, is a fairly modern science. As its name implies, thermodynamics deals with heat and power; originally, this now broad subject dealt almost exclusively with heat engines. This course begins with a review of the three fundamental laws of thermodynamics. Additional topics include the kinetic theory of gasses and modern statistical mechanics. (Prerequisite: PS 285) Three credits.

PS 271 Electricity and Magnetism I
This lecture course covers the foundations of electric and magnetic phenomena. Topics include electrostatics and the concepts of the electric field, flux, and potential; Coulomb’s law and Gauss’s law and their applications; vector and scaler fields and vector operators; electric energy of systems of charges; dipole fields and Laplace’s equation; moving charges and currents; Ampere’s law; and magnetic fields and forces. (Prerequisites: PS 15-16 or PS 83-84 and MA 125, MA 126, MA 227, MA 228) Three credits.

PS 285 Modern Physics
This course introduces modern physics, i.e., the physics of the 20th century. The basic ideas that led to the formulation of quantum mechanics together with Einstein’s theories of relativity provided a means to explore many new aspects of the physical world. This course examines the discovery of quanta of energy; Einstein’s Special Theory of Relativity; the Bohr model of the atom; wave mechanics, angular momentum, and spin; various aspects of quantum mechanics that explain much of the subatomic world; and aspects of atomic and nuclear physics including solid-state physics and superconductivity. The course also examines several of the major experimental observations that support and confirm these new theories. (Prerequisites: PS 15-16 or PS 83-84) Three credits.

PS 371 Electricity and Magnetism II
This lecture course continues PS 271, covering additional topics in electric and magnetic phenomena. Topics include Farady’s laws and induced electromotive force; electric and magnetic fields in matter; methods of solving boundary value problems; Maxwell’s equations in integral and differential form; electromagnetic radiation and wave propagation; and Einstein’s Special Theory of Relativity for electrodynamics. (Prerequisite: PS 271) Three credits.

PS 386 Quantum Physics
This course introduces students to the physical concepts and mathematical formulations of nonrelativistic quantum mechanics. Topics include the Schrodinger wave equation, Fourier techniques and expectation
values, operator formalism, angular momentum, central forces, matrix representations, and approximation methods. (Prerequisites: PS 285, PS 226, MA 228, MA 321, MA 322) Four credits.

PS 390 Special Topics
This course covers the following content: condensed matter physics, numerical analysis and computational physics, and wave phenomena and quantum phenomena. Condensed matter topics include mechanical, thermal, and electric properties of matter; magnetism; superconductivity; and magnetic resonance. Topics in numerical analysis and computational physics include solutions of differential equations, boundary value and eigenvalue problems, special functions and Gaussian quadrature, and matrix operations. Topics in wave phenomena include electric and mechanical oscillators, coupled oscillators, transverse and longitudinal waves, waves on transmission lines, and electromagnetic waves. Quantum phenomena include advanced topics in quantum mechanics with applications in the structure of nuclei, atoms, molecules, metals, crystal lattices, semiconductors, and superconductors. (Prerequisites: PS 15-16 or PS 83-84, PS 285) Three credits.

PS 390 Special Topics
This course covers the following content: condensed matter physics, numerical analysis and computational physics, and wave phenomena and quantum phenomena. Condensed matter topics include mechanical, thermal, and electric properties of matter; magnetism; superconductivity; and magnetic resonance. Topics in numerical analysis and computational physics include solutions of differential equations, boundary value and eigenvalue problems, special functions and Gaussian quadrature, and matrix operations. Topics in wave phenomena include electric and mechanical oscillators, coupled oscillators, transverse and longitudinal waves, waves on transmission lines, and electromagnetic waves. Quantum phenomena include advanced topics in quantum mechanics with applications in the structure of nuclei, atoms, molecules, metals, crystal lattices, semiconductors, and superconductors. (Prerequisites: PS 15-16 or PS 83-84, PS 285) Three credits.

PS 391-392 Theoretical/Experimental Independent Study
This course provides opportunities for intensive investigation – experimental or theoretical – of selected topics at an advanced level under the guidance of a faculty member. Participation in this course is required of all seniors. Credit by arrangement.

PS 399 Independent Study
This independent study, primarily for scientists and engineers, focuses on developing student computer skills. Students select from study projects such as introduction to computer-aided design, Web page design, and computer programming for technical problem solving. No prerequisites. One or two credits.
Minor in Politics
For an 18-credit minor in politics, students:
• complete PO 11 Introduction to American Politics;
• complete PO 12 Introduction to Comparative Politics;
• complete PO 14 Introduction to Political Theory; and
• complete three upper-division (100-level or greater) politics courses taken in any politics subfield or as internships or independent study offered by the department.

Course Descriptions

PO 11 Introduction to American Politics
Students examine the American political system and the American political culture; consider the major political institutions in relation to policy perspectives; examine the ability of the political system to deal with societal problems; and analyze proposals for reform of the political system. Three credits.

PO 12 Introduction to Comparative Politics
This course surveys selected industrialized and non-industrialized nations, exploring the relationship between cultural and socioeconomic conditions and political behavior, and illustrating some of the basic concepts and methods of comparative political analysis. This course meets the world diversity requirement. Three credits.

PO 14 Introduction to Political Theory
This course introduces students to the field of Western political theory. It analyzes the liberal political theories of Thomas Hobbes, John Locke, and J.S. Mill, and compares and contrasts them to a variety of communitarian, socialist, and anarchist political theories. Three credits.

Political Theory Courses

PO 112 Western Political Thought II: Modern
This course focuses on the modern tradition of Western political theory. It carefully examines the work of four thinkers: Karl Marx, Max Weber, Friedrich Nietzsche, and Michel Foucault. Each of these theorists presents a critical assessment of the nature and value of modern society’s cherished ideals of social and economic progress, secularization, and scientific reason, and individual autonomy and liberty. This course explores and evaluates these controversial critiques of life in the modern age. Three credits.

PO 116 Utopian Politics
This course examines the nature and function of utopian thinking and utopian communities. What is the value of utopian reflection? What forms of critical thinking and imaginative speculation does it enable? What are the limits to or dangers of utopian thought and practice? What kinds of challenges do utopian communities face? This course explores and critically assesses utopian, dystopian, and anti-utopian themes from utopian fiction, political theory, science fiction, and popular culture. The course includes an investigation into the possibilities and limitations of some recent attempts to build communities in the United States. Three credits.

PO 118 American Political Thought
This course considers the philosophical roots of American political thought and the influence of the American revolutionaries, constitution-makers, Federalists, Jeffersonians, Jacksonians, Tocqueville, Civil War-makers, examiners of the welfare state, pragmatists, and new frontiersmen on the contemporary American mind and institutions. The course also covers challenges and reform of the American political system within the scope of political science through an application of the concepts of human nature, idealism, constitutional power, and nationalism. Three credits.

PO 119 Introduction to Feminist Thought
This course examines the development of U.S. feminist theory from the 1960s to the present. Students explore the similarities and differences among several approaches to feminist theorizing that emerged from the U.S. women’s movement, including liberal, radical, socialist, and postmodernist feminism, and the feminisms of women of color. This course meets the U.S. diversity requirement. Three credits.
PO 123 Modern Political Ideologies
This course primarily examines the political belief systems in the United States including conservatism, liberalism, democratic socialism, and the idea of industrial policy. It analyzes these “isms” with reference to democracy’s ability to deal with the contemporary problems of American society. It also explores Marxism in terms of the basic political and economic ideas of Marx and Engels as well as the modifications made in their system by Lenin; discusses the basic concepts of racism; and briefly analyzes the meaning of totalitarianism. Three credits.

PO 124 Marxist Political Thought
This course provides a careful treatment and evaluation of the social and political thought of Karl Marx. In addition, the course examines the intellectual environment in which Marx worked and concludes with some discussion of contemporary approaches to Marxist thought. Three credits.

PO 153 The Politics of Race, Class, and Gender
This course investigates how race, class, and gender function in American political culture. Students explore how the theoretical ideas of central thinkers such as Thomas Jefferson, Martin Luther King Jr., and Susan B. Anthony shape the political practices of the people who express themselves in songs, speeches, art, and music. The focus on race, class, and gender enables students to engage with historically challenging questions about equality, freedom, individualism, republicanism, liberalism, and American exceptionalism from alternative perspectives. The course concludes by assessing whether or not the contemporary Hip Hop movement can overcome the barriers of race, class, and gender. This course meets the U.S. diversity requirement. Three credits.

PO 220 Seminar on Feminist Theory
This course explores advanced topics in feminist theory, examining a number of trends in contemporary feminist theory. Topics include conceptions of the female body in Western culture, feminist theories of the family, Third World feminisms, theories of feminist subjectivity and gender performativity, and the intersections among gender, race, class, and sexuality. This course meets the U.S. diversity requirement. (Prerequisite: PO 119 or WS 101, or permission of instructor) Three credits.

International Relations Courses

PO 130 International Relations
This course views the experience of conflict and cooperation among the nations of the modern world in terms of the principles of realpolitik, morality, international law, and international organization, giving special attention to the dynamics of the so-called “new world order” that followed the Cold War. The class simulates possible future conflicts. Three credits.

PO 133 United States Foreign Policy
This course reviews U.S. involvement in world affairs from the 1930s to the present, with special attention to the rigors and logic of the Cold War. Students discuss constitutional and other factors in the making of foreign policy and debate major contemporary policies and commitments. Three credits.

PO 134 Globalization: Who Rules the World?
In a globalizing world, understanding the link between wealth and power is increasingly important. This course seeks to explore the international and global context of the intersection of politics and the economy today. It examines the impact of globalization on states, markets, societies, businesses, and people by posing such questions as “in whose interest?” and “who benefits?” Three credits.

PO 135 Peace and War in the Nuclear Age
This course analyzes the nuclear arms race and efforts to end it. It focuses on the major weapons systems, nuclear strategies, and comparative strengths of the two superpowers. The course re-examines American attitudes toward the Soviet Union including its history and its security concerns; evaluates and debates the various arms control and disarmament proposals; and examines other implications of the arms race including the morality of nuclear weapons policies and the economic impact of large-scale military expenditures. Students consider the role citizens can play in attempting to reverse the arms race and establish peace. Formerly listed as PO 114; closed to students who have taken PO 114. Three credits.

PO 146 Vietnam and the American Experience
This course explores the roots of American involvement in Vietnam, analyzes conflicting theories surrounding America’s involvement, and investigates the clash of cultures raised by the war and the war’s impact on American and Southeast Asian societies. Three credits.

PO 149 Third World: Common Fate? Common Bond?
This course introduces a comparative approach to studying the forces affecting development in the Third World. Examples are selectively drawn from Asia, Africa, Latin America, and the Middle East. It examines the roots of wealth and poverty, obstacles to development, responses to globalization, and current debates over the development prospects of the Third World. This course meets the world diversity requirement. Three credits.

Comparative Politics Courses

PO 140 European Politics
This analysis of political institutions and dynamics of Great Britain, France, Germany, and Italy emphasizes the relationship between the political culture and the political system and analyzes alternate methods of dealing with societal problems. Three credits.
PO 141 African Politics
This course examines political patterns in Africa with an emphasis on the relationships between politics and culture, and politics and economy. Themes and concepts, not country studies, structure the course, which extracts patterns that are universal or typical in sub-Saharan Africa, examines the colonial legacy on which contemporary states build, and considers the political problematic that the colonial experience imparts with respect to cultural issues of identity, tribalism, and ethnicity in Africa. The course also examines the role of force and violence in consolidating political rule, the economic constraints that fetter Africa, and considers prospects for Africa's political. This course meets the world diversity requirement. Three credits.

PO 142 Latin American Politics
Building a strong political system seems an impossibility in a setting of economic underdevelopment and socio-cultural disunity. This course studies the political systems of selected countries of mainland Latin America such as Mexico, Guatemala, Nicaragua, Venezuela, Colombia, Peru, Chile, Argentina, and Brazil. In particular, it examines the revolutionary method of change; reviews the policy dilemmas of land reform, industrialization, and control of natural resources; and reviews U.S. foreign policy toward the area – past and present. Students complete research projects. This course meets the world diversity requirement. Three credits.

PO 143 Caribbean Politics
Racism and ethnic conflict, colonialism and neocolonialism, grating poverty and bustling tourism all have their impact on the politics of these struggling countries. This course examines migration across the first world's borders in countries that include Cuba, Puerto Rico, the Dominican Republic, Haiti, Jamaica, Trinidad, Guyana, and Suriname. Students complete a research project. This course meets the world diversity requirement. Three credits.

PO 144 Middle Eastern Politics
This course offers an overview of important thematic issues in Middle Eastern politics, economy, and society. Themes and concepts, not country studies, structure this course, which makes sense of the modern Middle East by familiarizing students with the most significant contemporary problems and controversies in the region. Students examine the process of state formation and the impact of colonialism in the Middle East; study topics pertaining to religion, family, and sexuality; and analyze the international relations of the region (war and peace), patterns of economic development (economic reforms, migration), and structures of power and prospects for democratization. This course meets the world diversity requirement. Three credits.

PO 145 Asian Politics: East Asia
This course analyzes politics in contemporary China (including Taiwan), Japan, and Korea, emphasizing the relationship between each nation’s political culture and political system and giving considerable time to the different paths to modernization taken by each nation. This course meets the world diversity requirement. Three credits.

PO 147 Northern Ireland: The Politics of War and Peace
This course focuses on the troubles in Northern Ireland from 1969 to the present. The course provides historical background, with an emphasis on Great Britain's role from the 16th century through the current period. It examines the 20th-century conflict primarily as a national liberation struggle against a sectarian regime established in the North and supported by Great Britain, and discusses cultural, economic, and religious theories of the conflict. It follows a chronological format starting with the civil rights marches in the late 1960s before moving to the state repression that followed and the subsequent community responses to the state, including hunger strikes and electoral politics campaigns. In the process, the course assesses the roles played by political parties, paramilitaries, the churches, and community organizations as well as government bodies. The course examines the peace process as a struggle reflecting the conflict and as a possible resolution of it. Three credits.

PO 221 Seminar on Britain
This seminar course uses an interdisciplinary approach, political science, sociology, and modern British drama and novels to look at the structure and changing nature of British society and politics. It focuses on the role of class, racial problems, declining economy, devolution, and secessionist problems, as well as solutions offered to these problems by contemporary Labour and Conservative governments. (Prerequisite: permission of the instructor) Three credits.

PO 246 Seminar on China
This course examines the major problems of contemporary Chinese society, with a particular emphasis on political socialization and the Chinese political culture, and the role(s) of such groups as students, peasants, and women. The seminar analyzes political philosophy, short stories, novels, plays, and biographies by Chinese writers and Western scholars and observers. This course meets the world diversity requirement. (Prerequisite: permission of the instructor) Three credits.
PO 249  Seminar on Russia
This survey of Russian political, economic, and social developments under Communism sets the scene with a review of conditions that preceded the Revolution. The course then examines changes wrought by the Revolution and some of their unanticipated consequences, giving special attention to the dilemmas in Mikhail Gorbachev’s and Boris Yeltsin’s efforts to restructure and open the society. The course reviews United States/ Soviet relations. This course meets the world diversity requirement. (Prerequisite: permission of the instructor) Three credits.

PO 344  Seminar on Middle East Politics
At the beginning of the 21st century, the affairs of the Middle East continue to engage a great deal of international attention. This course offers the opportunity to examine a significant problem or issue concerning politics in the Middle East conducted in a seminar format. In various semesters the seminar may be taught with a different focus. (Prerequisite: PO 144 or permission of the professor) Three credits.

PO 346  Seminar on Vietnam
This seminar analyzes the role of traditional Vietnamese culture in Vietnam’s many wars: with China for 1,000 years, with France from 1946 to 1954, with America from 1962 to 1973, and with Cambodia after 1975. Much of the seminar focuses on America’s war with Vietnam and the impact of American society on that war. The course also analyzes the effect of the events of 1962 to 1973 on America and on those who fought in that conflict. This course meets the world diversity requirement. (Prerequisite: PO 146 or permission of the instructor) Three credits.

American Politics Courses

PO 115  Introduction to the Study of Peace and Justice
This course introduces students to the concepts of peace and justice, the connections between them, and the relationship of these concepts to the idea of faith. The course focuses on case studies beginning with an analysis of the crisis of America’s cities and finds the causes in de-industrialization and its resulting poverty, which is compared to the poverty in developing nations. In both cases, the course views poverty as the effect of unjust economic and social structures including exaggerated military budgets at home and the militarization of developing countries. Examining these fundamental problems in peace and justice, according to the principles of Marxism, liberalism, and Catholicism, provides a theoretical basis for the study. Each of these traditions has its own perspective for understanding these problems and for responding to them. In this way the course provides an awareness of the major problems in peace and justice as well as an understanding of the different ways to think about them. Three credits.

PO 150  Urban Politics
This course examines structures and processes of urban politics and considers the major participants and policy areas of urban political processes. It sets the evolution of urban areas in historical perspective, discusses major contemporary problems, and analyzes alternative solutions. Three credits.

PO 151  Politics of the Immigrant: The Irish Catholic and the East European Jewish Communities
This course explores how two immigrant groups – the Irish and the Jews – adapted politically in the United States. The Irish mobilized locally and were, until late in the 20th century, a major force in big city politics; the Jews largely eschewed local politics and concentrated their efforts on national politics. By examining the two groups, students learn about ethnicity and political mobilization in the United States. Three credits.

PO 152  Weapons of the Weak: Political Tools of the Disadvantaged
This course explores what it means to be politically disadvantaged in the United States, who is politically disadvantaged, why they are disadvantaged, what forms of political participation they practice, and the effectiveness of their somewhat unique forms of political participation. Groups that are studied include different racial minorities, women, the poor, gays, immigrants, and people with disabilities. Forms of political participation include protest, foot-dragging, consumer activism, grassroots mobilizing, picketing, sit-ins, and alternative institution building. This course meets the U.S. diversity requirement. Three credits.

PO 155  Public Administration
The course focuses on the role of the bureaucracy within the political process, examining the problems of efficiency and accountability, and studying the classic models of bureaucratic organization and function in juxtaposition to the reality of bureaucratic operation. It analyzes proposed reforms to determine the viability of change. Three credits.

PO 161  The American Presidency
Participants study the role of the President in the political system, considering the origins, qualifications, and limitations of the office as the President functions as chief executive, legislative leader, and link with the Courts. The course examines obtaining presidential powers and the President’s roles as party leader and politician as a means of evaluating presidential achievement of domestic and foreign policy goals. The course also reviews questions of reform. Three credits.

PO 162  United States Congress
This study of Congress within the context of the political system analyzes its constitutional powers, historical development, processes of recruitment, formal organization, committee system, social make-up, folkways, political leaders, and constituency and interest group influences, and considers its domestic and foreign policy outputs. The course also considers chances for reform and evolution. Three credits.
PO 163  Supreme Court I
This examination of the politics of the Supreme Court analyzes the relationship between the Court and the remainder of the political system; examines the Court's treatment of government power including commerce clause, taxing power, and relations between the branches; and emphasizes the political consequences of Court decisions. Three credits.

PO 164  Supreme Court II
This examination of the individual and the Court pays direct attention to Supreme Court decisions regarding civil liberties, including freedoms of speech, press, religion, and assembly. It also examines the rights of accused persons and the 14th amendment equal protection, emphasizing the political implications of these decisions as well as the political environment in which the Court functions. Three credits.

PO 165  Political Parties, Interest Groups, and Public Opinion
This course examines various linkage models that describe representation of citizens by leaders. Moreover, it examines political parties, interest groups, and public opinion in terms of their contributions to popular control of American politics. What mechanisms do citizens have to gain compliance for their policy preferences? How responsive are decision makers in the American system to citizens' demands? The course considers these and other questions. This course meets the U.S. diversity requirement. Three credits.

PO 166  American Public Policy
This course examines the policy process in the United States by assessing a variety of contemporary policy issues. Students investigate different policy domains to uncover the politics and societal myths affecting different stages of the complicated policy process, paying special attention to people and institutions that formally and informally influence public policy in the United States, including media, elected officials, bureaucrats, consumers, private citizens, workers, political activists, corporations, interest groups, lobbyists, and political parties. Three credits.

PO 167  Media and Politics
This course examines the impact of the media on the American political system and, conversely, how government attempts to influence the media for its purposes, and implications of the electronic media for a democratic and informed society. The course pays close attention to the media's impact on national elections and analyzes the media as an agent of political socialization. Three credits.

PO 168  Politics of Mass Popular Culture
This course surveys the political aspects of American popular culture by examining the relationship between sports and politics, the politics of rock music, political humor, and satire of American politics. Mass popular culture often serves as a regime-maintaining diversion. What values and political positions do organized sports in the United States convey? What is the political impact of American popular music? How have citizens used political humor and satire of American politics to develop an outlook toward government? The course explores these and other questions. Three credits.

Internships and Independent Study Courses

PO 296  State Legislature Internship
Politics majors participate in the Connecticut General Assembly Legislative Internship Program, where students become acquainted with the legislative process by serving as aides to a legislator. Students complete a required research paper. (Prerequisites: 3.0 GPA, completion of PO 11 and two other politics courses, and departmental approval) Six credits.

PO 297  Washington Semester Internship
Politics majors work full-time as interns in a variety of public and private sector positions in the nation's capital, giving them the opportunity to experience governmental problems firsthand and apply what they have learned. Students earn nine credits for working as an intern, three for a course taken in Washington, D.C., and three credits for a major research paper. (Prerequisites: 3.0 GPA, completion of PO 11 and two other politics courses, and departmental approval) 15 credits.

PO 298  Politics Internship
Politics majors gain firsthand experience working off campus in fields related to their major. Typically, an internship requires 10 to 12 hours per week on site. The internship requires a journal and a term paper. An on-site supervisor and a politics professor evaluate student work. (Prerequisites: 3.0 GPA, completion of three politics courses, and departmental approval) Three credits.

PO 398  Independent Study/Research
Upon request and by agreement with an individual professor in the department, a politics major may conduct a one-semester independent study on a defined research topic or field of study. (Prerequisites: 3.0 GPA, completion of PO 11, two additional politics courses, and departmental approval) Three credits.
The Department of Psychology introduces students to the content and methods of the science of psychology. Students survey the foundations of the field, learn about statistics and experimental design, and have an opportunity to pursue specific interests through upper-level seminars, applied internships, and supervised and independent research. The Department offers two degrees (a B.A. and a B.S. degree). Beyond the requirements of the major, students are also given opportunities to develop their interests through specific concentrations that prepare them for graduate work in specific areas of psychology, or prepare them for work in related fields such as medicine, law, education, social work, and public policy. Students with a degree in psychology are also particularly well suited for any entry-level position that demands a solid liberal arts education.

Description of concentrations:
Students who wish to develop their interests within a specific concentration have the opportunity to follow one of four distinct tracks: Mental Health Research and Practice; Behavioral/Cognitive Neuroscience; Social/Developmental Research and Policy; and General Psychology. These concentrations are described below:

- **Mental Health Research and Practice**: For psychology majors who wish to concentrate on the fields of clinical psychology, school psychology, counseling, I/O psychology, or clinical social work.

- **Social/Developmental Research & Policy**: For psychology majors who wish to concentrate on issues related to child and family studies, social justice, multiculturalism, and law.

- **Behavioral/Cognitive Neuroscience**: For psychology majors who wish to concentrate on the biological mechanisms of behavior and/or cognition.

- **General Psychology**: For students who wish to develop their own program by mixing concentrations or by taking advantage of Fairfield’s liberal arts curriculum, filling electives with courses from other disciplines.

With guidance from their advisors, students develop a program of study relevant to their concentration from a list of courses both within and outside of the psychology department.

**Requirements**

**B.A. With a Major in Psychology**

The curriculum for a B.A. degree in psychology is:

<table>
<thead>
<tr>
<th>Required Courses</th>
<th>Suggested Time</th>
</tr>
</thead>
<tbody>
<tr>
<td>PY 101 General Psychology</td>
<td>Semester 1 or 2</td>
</tr>
<tr>
<td>PY 261 Biological Bases for Behavior</td>
<td>Semester 2 or 3</td>
</tr>
<tr>
<td>PY 263/4 Developmental Psychology for Majors with or without Lab</td>
<td>Semester 2 or 3</td>
</tr>
<tr>
<td>PY 203 Statistics for the Life Sciences</td>
<td>Semester 3 or 4</td>
</tr>
<tr>
<td>PY 209 Research Methods</td>
<td>Semester 4 or 5</td>
</tr>
<tr>
<td>One Senior seminar</td>
<td>Semester 7 or 8</td>
</tr>
</tbody>
</table>

Students must also complete four elective courses including at least one from each of the two groups listed below.

**Group I**

<table>
<thead>
<tr>
<th>PY 248 Social Psychology</th>
</tr>
</thead>
<tbody>
<tr>
<td>PY 251 Abnormal Psychology for Majors</td>
</tr>
<tr>
<td>PY 284 Theories of Personality</td>
</tr>
</tbody>
</table>

**Group II**

<table>
<thead>
<tr>
<th>PY 250 Sensation and Perception</th>
</tr>
</thead>
<tbody>
<tr>
<td>PY 265 Conditioning, Learning, and Applied Behavior Analysis</td>
</tr>
<tr>
<td>PY 285 Cognitive Psychology</td>
</tr>
</tbody>
</table>

Permission of instructor is required prior to taking PY 294-295 and PY 398. Students are allowed a maximum of two applied internships and one teaching internship. Students may take PY 298 only once and PY 398 only once.

In their senior year, psychology majors may be required to participate in a departmental assessment, such as an exit questionnaire, interview, focus group, or Major Field Test in Psychology.
Core Course Recommendations

- **Mathematics**: MA 121-122 in the first and second semesters is recommended.
- **Science**: Biology is strongly recommended.

B.S. with a Major in Psychology

The curriculum for a B.S. degree in psychology is:

**Required Courses**

<table>
<thead>
<tr>
<th>Course</th>
<th>Suggested Time</th>
</tr>
</thead>
<tbody>
<tr>
<td>BI 170-171 General Biology</td>

<tr>
<td>PY 209 Research Methods</td>
<td>Semester 4 or 5</td>
</tr>
<tr>
<td>One Senior Seminar</td>
<td>Semester 7 or 8</td>
</tr>
</tbody>
</table>

Students must also complete four elective courses including at least one from each of the two groups listed below.

**Group I**

- PY 248 Social Psychology for Majors
- PY 251 Abnormal Psychology for Majors
- PY 284 Theories of Personality

**Group II**

- PY 250 Sensation and Perception
- PY 265 Conditioning, Learning, and Applied Behavior Analysis
- PY 285 Cognitive Psychology

Permission of instructor is required prior to taking PY 294-295 and PY 398. Students are allowed a maximum of two applied internships and one teaching internship. Students may take PY 298 only once and PY 398 only once.

Minor in Psychology

For a 15-credit minor in psychology, students in other majors:

- complete PY 101 General Psychology
- complete four additional psychology courses (two of these courses also fulfill the behavioral and social science core requirement.)

Students contemplating a minor are urged to consult with a member of the psychology faculty regarding course choices.

Course Descriptions

**PY 101 General Psychology**

This course introduces the science of mental processes and behavior by addressing a range of questions including: How is brain activity related to thought and behavior? What does it mean to learn and remember something? How do we see, hear, taste, and smell? How do we influence one another’s attitudes and actions? What are the primary factors that shape a child’s mental and emotional development? How and why do we differ from one another? What are the origins and most effective treatments of mental illness? Three credits.

**PY 132 Introduction to Industrial/Organizational Psychology**

This course introduces the field, contributions, and methods of industrial/organizational psychology. It covers the history of this branch of applied psychology and the psychologist's role, along with other scientist-practitioners concerned with the world of work, in developing and maintaining human work performances and work environments. The course explores current concepts and methods in several specialties within this field: personnel, organizational behavior and development, counseling, labor relations, consumer, and engineering/ergonomic psychology. Topics include recruitment, selection, training and development, and appraisal of individuals and groups; development and change of organizational cultures; and relations between organizations and their stakeholders. The course emphasizes the unique contributions of psychological science to understanding human work skills, interests, attitudes, motivations, satisfactions and stresses; work careers, management, leadership, communication, group processes, and organization. Three credits.

**PY 138 Psychology and the Law**

Implicit psychological assumptions about human behavior and how it should be controlled form the basis for the legal system, particularly our criminal justice system, from its code to its enforcement. This course examines those assumptions in light of current psychological theory and research. It covers the treatment of traditional psychiatric populations (the mentally ill, mentally retarded, homeless) by the justice system in contrast to that received by normal people; clinical issues such as the insanity defense, predicting dangerousness, the validity of psychiatric examinations and lie detectors; and jury selection, eyewitness testimony, decision-making, sentencing, and parole. Three credits.

**PY 148 Fundamentals of Social Psychology**

This course surveys the major areas of concern in social psychology, emphasizing current issues and research in the fields of social influence and conformity, human aggression, prejudice, interpersonal attraction, propaganda, and persuasion. Students who have taken PY 248 may not take this course. Three credits.
PY 151  Abnormal Psychology for Non-Majors
This course introduces students to the field of abnormal behavior, presenting the classic behavior patterns in the classification system and discussing the possible causes and remediation of such. Students who have taken PY 251 may not take this course. Three credits.

PY 162  Psychology of Death and Dying
Recent biomedical research, psychological theory, and clinical experience provide the foundation for this life-cycle study of death, dying, and bereavement. Some topics include the funeral process, cultural differences, suicide, the hospice approach, end-of-life issues, and euthanasia. Three credits.

PY 163  Developmental Psychology for Non-Majors
The course encompasses a developmental psychology approach to the growth of the individual from birth to old age, tracing motor, perceptual, language, cognitive, and emotional growth and emphasizing normal development. Students who have taken PY 263 or PY 264 may not take this course. Designated sections meet the U.S. diversity requirement. Three credits.

PY 186  Group Dynamics
This course gives students a basic knowledge of the most important theories and research on groups. The course combines sociological and psychological perspectives to give a more integrated picture of the way groups function. Students make use of experiential as well as classroom methods of learning. Three credits.

PY 187  Applications of Industrial/Organizational Psychology
This course reviews selected issues in the characteristics and dynamics of contemporary organizations, and examines, in the context of such issues, contemporary applications and emerging needs for approaches, constructs, research, and methods in industrial/organizational psychology. The course examines the roles and contributions in this field in the context of issues and changes in workforce demographics, diversity, and motivations; regulatory and litigating environments; organizational ethics; organizational values and cultures; management and leadership; globalization; international alliances and competition; environmentalism and consumerism; and technological change. The course is open to students in any discipline related to the study of organizations in the world of work. (Prerequisite: PY 132) Three credits.

PY 203/BI 203  Statistics for the Life Sciences
This introductory course in statistical methodology and analysis includes descriptive statistics such as frequency distributions, central tendency, variability, and correlation as well as an introduction to probability, sampling theory, and tests of significance including the t-test, chi-squared, ANOVA, and non-parametric statistics. This course is open to majors in the behavioral, biological, and physical sciences. The lab complements the course by giving students supervised computation and problem-solving exercises using calculators and computers. Note: this course does not fulfill any core requirements. Four credits.

PY 209  Research Methods in Psychology
Building on PY 203 Statistics, this course teaches students to read, evaluate, design, conduct, and report psychological research. The course emphasizes critical thinking and effective oral and written communication. Students work through several different research projects. (Prerequisites: PY 101, PY 203) Four credits.

PY 248  Social Psychology
This course surveys the major areas of concern in social psychology, emphasizing current issues and research in the fields of social influence and conformity, human aggression, prejudice, interpersonal attraction, propaganda, and persuasion. Students who have taken PY 148 may not take this course. (Prerequisite: PY 101) Three credits.

PY 250  Sensation and Perception
How do we see, hear, touch, taste, and smell? What about individual differences? This course deals with basic sensory mechanisms and with perceptual processing. Students examine color, depth, pattern, and motion perception and complete an integrative final project. Students may do experiential learning to enrich their understanding of individual differences in sensation and perception. (Prerequisite: PY 101) Three credits.

PY 251  Abnormal Psychology for Majors
This advanced course in abnormal behavior offers an in-depth analysis of current research and theories of psychopathology. Building upon the student’s knowledge of developmental psychology, the course examines the biological and psychological antecedents of abnormal behavior. The course emphasizes oral and written analysis. (Prerequisite: PY 101) Three credits.

PY 252  Tests and Measurements
This course offers an introduction to the principles of psychological test construction, administration and interpretation, and reviews the roles that these tests have in a broad clinical assessment and research. Specific evaluation of test reliability and validity are applied to test construction and to various published tests of intelligence, achievement, personality, and neuropsychological functioning. (Prerequisite: PY 101, PY 203/BI 203) Three credits.

PY 261  Biological Bases of Behavior
Understanding the brain is one of the last and most challenging frontiers of science. Our brain functioning determines what we see, hear, know, think, or feel. Starting with the molecular and cellular machinery of neurons and the anatomy of the nervous system, the course proceeds through the neural basis of sensation, perception, memory, emotion, language, sexual behavior, drug addiction, depression, schizophrenia,
etc. The enormous strides made by neuroscience in the last several decades show every sign of continuing and increasing; this course provides the foundation upon which a thorough understanding of brain-behavior relationships can be built. Note: This course can be used by non-psychology majors to fulfill one of the core natural science requirements. Three credits.

PY 263 Developmental Psychology for Majors
Using a research-oriented approach, this course focuses on the principal themes, processes, and products of human development from conception through adolescence. Students who have taken PY 163 or PY 264 may not take this course. (Prerequisite: PY 101) Three credits.

PY 264 Developmental Psychology for Majors with Lab
Although the content of this course is identical to PY 263, it offers psychology majors the opportunity to participate in a laboratory experiential learning component in preschool Head Start classrooms. Specific hands-on assignments complement course material. Students who have taken PY 163 or PY 263 may not take this course. Designated sections meet the U.S. diversity requirement. (Prerequisite: PY 101) Four credits.

PY 265 Conditioning, Learning, and Applied Behavior Analysis (CL&ABA)
CL&ABA focuses on the environmental determinants of behavior and behavior change. The first two-thirds of the course highlight current concepts and research in Pavlovian and operant conditioning, reinforcement, discrimination, extinction, punishment, avoidance learning, etc. The remaining third of the course emphasizes applied behavior analysis (a.k.a. behavior modification) that is, how these learning concepts and principles can be successfully applied to education, parenting, therapy, medicine, and everyday life. During this part, which is run seminar style, each student makes a PowerPoint presentation of one aspect of ABA, from methods to the ethics. (Prerequisite: PY 101) Three credits.

PY 271 Psychobiology Laboratory
This technique-oriented course provides training in the basic elements of small-animal brain surgery including aspirated lesions, stereotaxic procedures, behavioral testing, perfusion, and histological techniques. The course requires a written mini-neurobehavioral report. Three lectures, one lab. (Prerequisite: PY 261 and permission of instructor) Four credits.

PY 272 Hormones and Behavior
This upper level course in psychology will provide students with an overview of behavioral neuroscience, with an emphasis on behavioral endocrinology (hormones and behavior). Topics include the description of major classes of hormones, the techniques used in behavioral neuroscience, and the discussion of hormone-mediated behaviors including male and female reproductive behaviors, stress/fear, memory and cognition, parental behaviors, ingestive behaviors, and circadian rhythms. After weekly mini-review sessions of the relevant text, this course will emphasize primary research (journal) articles with student-led discussions. (Prerequisite: PY 261 or BI 213 (Endocrinology)) Three credits.

PY 284 Theories of Personality
The advanced presentation, analysis, and evaluation of theories of personality from Freud through Skinner broadens student understanding of the normal human personality in terms of theoretical structure, function, and dynamics, while enriching theoretical and historical understanding of the topic. (Prerequisite: PY 101) Three credits.

PY 285 Cognitive Psychology
How can we study the mind? This course surveys topics in cognitive psychology, including attention, memory, thought, imagery, language, problem solving, and decision making. Through lectures, readings, demonstrations, and exercises, students learn about how we think and about scientific explorations of the mind. (Prerequisite: PY 101) Three credits.

PY 290 Drugs and Behavior
This survey course discusses the psychopharmacological properties of the more significant drugs used for research and by society in general. Drug classes include alcohol and nicotine, depressants and stimulants, tranquilizers, opium derivatives, and hallucinogenic compounds. The course emphasizes drug action sites in the central nervous system as well as behavioral alteration in the controlled and uncontrolled environments. (Prerequisite: PY 261 or permission of instructor) Three credits.

PY 291 Cognition, Culture, Race, and Identity
Racism, sexism, classism, and their attitudinal and behavioral corollaries, bias, prejudice, and discrimination are characteristics of American culture that have plagued society and compromised America’s democratic ideals throughout its history. The course explores the notion of race as a social construct and the development of individual cultural and racial identities, as well as ethnocentrism, racism, and ways to counter racism. All cognition takes place in the context of culture. The course also explores the influence of culture on cognition, between people in monocultural race/ethnic groups and within bicultural groups. An experiential component offers multicultural exposure. This course meets the U.S. diversity requirement. (Prerequisite: PY 101) Three credits.

PY 293 Human Neuropsychology
Human neuropsychology is a branch of psychology that focuses on functional structures and systems of the human brain and how they support various higher order psychological processes (e.g., learning, attention, executive functioning, higher-order thinking, memory, language, emotion, and motor skills). This course thus concentrates on the brain-behavior relationships beyond
the cellular-molecular level, with an emphasis on typical life-span development and common neuropsychological syndromes (e.g., strokes, dementia, and traumatic brain injury) in relation to functional structures and systems of the human brain. Assessment and treatment interventions of neuropsychological disorders are addressed within this context. (Prerequisites: PY 163, PY 263 or PY 264; or PY 285; or PY 261; or permission of instructor) Previously listed as PY 397. Three credits.

PY 294-295 Internship in Applied Psychology
Senior psychology majors gain practical, career-related experience in a variety of supervised field settings through the internship program. Student interns choose from a wide selection of placements in traditional psychology-related programs: mental health, social service, school psychology, early childhood special education, probation, and hospital administration. Intern placements in related disciplines include human factors engineering, human resource development, advertising, and public relations. Internships emphasize the integration of learning, both cognitive and experiential. Interns may register for one or two semesters, depending on the availability of appropriate placement sites and qualified supervisors. Interns spend a minimum of 10 hours per week in on-site work and complete the required academic component specified by the faculty coordinator. (Prerequisites: completed application form, acceptance by the field placement supervisor, and approval by the psychology department’s internship program director) Three credits.

PY 296-297 Internship in the Teaching of Psychology
This practicum experience, open to advanced psychology majors, affords students an opportunity to explore teaching psychology as a profession. Under the direct supervision of a faculty mentor, students engage the issues of curriculum development, methods of classroom instruction, selection and use of media resources, test construction, and strategies for the academic and practical motivation of students. Interns observe participating faculty engaged in the profession of teaching and share in some instructional activities (Prerequisite: permission of instructor) Three credits.

PY 298 Supervised Research
The course provides research training experience in a supervised setting in which students work closely with a faculty mentor on various research projects. Such work may include assisting in designing and running lab research, data analysis, field experience, and library research. This hands-on experience enhances students’ understanding of issues in research design and analysis, and prepares them for more advanced research opportunities should they choose to pursue them (e.g., independent research). Student researchers are expected to spend a minimum of 10 hours per week in their faculty mentor’s lab. (Prerequisites: PY 101, PY 209, and permission of instructor) Three credits.

PY 299 Theories in Psychotherapy
This course explores similarities and differences across a wide range of psychotherapeutic endeavors by means of lectures, films, and tapes. The course covers traditional psychoanalytic techniques and more recent innovations. (Prerequisites: PY 101 and PY 251 or permission of instructor.) Three credits.

PY 300 Modern Psychology Senior Seminar: History and Current Issues
This seminar introduces students to the major historical perspectives in psychology; encourages critical thinking and the generation of creative ideas; and helps students engage in thoughtful questioning of the theory and knowledge base that constitutes the science of psychology. Open to senior psychology majors. Permission of the instructor is required for junior psychology majors. Three credits.

PY 350 Seminar in Psychology of Race and Ethnicity
This seminar explores a variety of aspects of the psychology of race and ethnicity. We study the development of stereotypes, prejudice, and discrimination, how to measure them, and methods to counter them. We also learn about the influence of race and ethnicity in judicial and other settings. Students read current literature on these topics and write a review paper. In addition, they design and carry out group projects with an emphasis on changing attitudes and behavior. Open to senior psychology majors; permission of the instructor is required for junior psychology majors. This course meets the U.S. diversity requirement. Three credits.

PY 363 Senior Seminar: Psychosocial Problems of Childhood
This course examines the aspects of a child’s social environment of family, peers, community, and culture that are related to common problems and deviations in development. Emphasis is placed upon evaluating children’s maladjustment within an ecological context. The questions of how developmental theory and research can be used to prevent disorders and to inform effective social policy are explored. Open to senior psychology majors. Permission of the instructor required for junior psychology majors and non-majors. (Prerequisites: PY 163, PY 263, or PY 264.) Three credits.

PY 364 Abnormal Child Psychology Senior Seminar
This course provides a survey of the theory and research in the field of clinical psychology related to children and adolescents. More specifically, the seminar explores: the diagnostic characteristics of the major types of child psychological disorders, the etiology of each disorder from the different theoretical perspectives, and effective approaches to treatment and prevention. Open to senior psychology majors. Permission of the instructor required for junior psychology majors and non-majors. (Prerequisites: PY 163, PY 263, or PY 264.) Three credits.

The Religious Studies curriculum presents a critical but sympathetic inquiry into the religious dimension of human experience. After an introduction to the nature of religion and the methods employed in its study, students can select from a variety of courses exploring specific religious themes – scripture, spirituality, ethics, the problem of faith, etc.

Students, with or without a faith commitment, have the opportunity to acquire an informed appreciation of the motivations and values given expression in religious belief. Students may take courses offered by the Religious Studies Department as part of the required core curriculum, as electives, or as part of a minor or major program in religious studies under the direction of a departmental advisor.

**Core Curriculum Options**

Area III of the core curriculum, described on page 30 of this catalog, requires students to take a minimum of two religious studies courses. All students must take RS 10 Introduction to Religious Studies. Students select the second required course based on their interests, keeping in mind that it may not be a second section of RS 10. A third course may also be chosen in religious studies to complete the five-course requirement of Area III.

---

**PY 365 Human Factors Engineering**

Human factors engineering, or ergonomics, is an interdisciplinary field that attempts to optimize the relationship between technology and humans. Technology includes virtually any aspect of today’s highly mechanized and computerized environments. Thus, while human factors specialists frequently devise methods to maximize efficiency in human-machine systems, they also design safe and efficient workplaces, homes, offices, or other areas where humans must live and work. This course examines the integration of many aspects of psychological science, including perception, learning, motivation, cognition, and human performance, required by this field. Three credits.

**PY 385 False Memories Senior Seminar**

Can people repress memories for childhood trauma? How accurate are eyewitnesses at reporting what they saw? Although most of the time, our memories serve us quite well, many of the strategies and mechanisms that help us remember accurately can also lead to errors. This course examines various types of memory distortions and what they can tell us about the mechanisms of memory. Through readings and class discussions, we will explore research addressing confusions between real and imagined memories, the reliability of eyewitnesses recollections, children’s suggestibility, as well as clinical issues such as repression and dissociation from a cognitive perspective. Open to senior psychology majors. Permission of instructor is required for junior psychology majors. Three credits.

**PY 395 Senior Seminar on Aging**

Students explore multiple aspects of aging and aging people in a seminar that blends reading with community experience and reflection. The course discusses the psychological and physiological causes and consequences of aging from a variety of perspectives. Students explore an aspect of aging and present it to the seminar as an independent final project. Open to senior psychology majors. Permission of instructor is required for junior psychology majors. (Prerequisite: PY 101) Three credits.

**PY 396 Special Topics in Psychology**

In this seminar, students undertake an in-depth study of a current topic in psychology, using mostly primary sources. Coursework emphasizes discussion and writing. Open to junior and senior psychology majors or by permission of instructor. Three credits.

**PY 398 Independent Research**

This course involves a limited number of upper-division students (usually seniors) in all aspects of an advanced research project. Students must obtain the consent of the professor with whom they will work prior to registering for this course. Frequently a research proposal is required prior to acceptance into this course; early planning is essential. Four credits.

---

Radio

(see New Media Film, Television, and Radio)
Requirements
Students interested in a minor, a major, or a double major should contact the religious studies department chair.

Religious Studies Major
For a 30-credit major in religious studies, students:

- complete RS 10 Introduction to Religious Studies,
- complete no more than seven courses at the intermediate (100 to 200) level, and
- complete no fewer than two courses at the advanced (300) level.

- ensure that the intermediate and advanced courses selected include at least one course in each of the five distribution areas: Sacred Texts, Theology and Ethics, History and Tradition, Religion and Society, and Islam and Asian Religions.

Credits earned as a religious studies major satisfy the requirements of the core curriculum. In a comprehensive program of studies, concentration in one of the five distribution areas is possible. The department encourages majors to pursue independent study in their senior year.

Religious Studies Minor
For a minor in religious studies, students complete a minimum of 15 credits in religious studies courses. Courses taken toward a minor satisfy the requirements of the core curriculum. Through consultation with a departmental adviser, religious studies minors may structure programs of study that complement their major fields of study.

Course Descriptions

RS 10 Introduction to Religious Studies
This introduction to the religious achievements of humanity considers the meaning and aims of religion and its dimensions and functions in society and the individual. Employing the principles and methods of the humanities and social sciences, the course examines religious faith, values, and experience, as evidenced in the scriptures, traditions, doctrines, and histories of various religions. The course is offered in sections that each focus on a different aspect of religious achievement. Section subtitles and descriptions follow. Three credits per section.

- Religion and the Critical Mind: This section offers a comparative analysis of several understandings of religion—its nature, function, and purpose—presented in the works of well-known scholars. Through an in-class conversation with these scholars through their writings and in multimedia presentations, students develop a thoughtful, critical appreciation of religion and its role in human life.

- Religion, Culture, and Community: This section explores the role of religion in human culture and community through three test cases: Christianity’s movement from a community of believers to a religious institution, the experiences of women in the religions of the world, and the phenomenon of American civil religion.

- Asian Religions: This section examines the basic religious systems of India and China, including their fundamental differences, performative functions, and worldviews. The course evaluates Euro-American theories of religion in light of Asian religious expressions. This section of RS 10 meets the world diversity requirement.

- The Search for the Just Society: This section investigates the religions of Judaism, Christianity, and Islam by focusing on the understandings of a just society that is woven into their central beliefs.

- A Model of Religion and Religions: This section offers a description of the human condition, disclosing the limits and absurdity to which religions respond. The course describes the ways people come to religious faith and the consequences of their commitment in a model that is applicable to many religions.

- Prophecy and Mysticism: This section focuses on the two fundamental drives of religious sensibility, namely, the urge toward unity with the holy and the concern to make a difference in the world.

- Religious Autobiography: This section considers the themes, issues, and methods of religious studies through a reading of first-person narratives from several religious traditions, and engages students in the task of writing their own religious autobiographies.
• Jerusalem as a Metaphor for the Faith of the West: This section examines the faith traditions of Jews, Christians, and Muslims in contemporary Jerusalem in order to appreciate the richness of their religious heritage and to understand the problems that continue to divide them.

• Christianity and Buddhism: This section examines different kinds of religious experience, doctrine, and practice through a comparison of the Western tradition of Christianity and the Asian tradition of Buddhism.

• Christianity and Islam: This section considers major themes of religious thought and practice in Christianity and Islam. Through the study of scripture, religious texts, autobiographical writings, and film presentations, the course examines concepts and images of God, the human person, evil and human suffering, and the experience of the transcendent in these two religious traditions. Drawing on these themes, the final project engages students in the writing of their own religious histories.

• Issues in Religion: This section examines some of the classical themes in the study of religion. Topics include religion as a search for meaning; how extensively religions differ in their beliefs; the truth in religion; strange beliefs and practices and what they might mean; critiques of religion; and the religious imagination in many expressions.

• Signs of the Sacred: This section engages students in a study of the primary building blocks that make up religion in its theoretical and practical dimensions. In addition to learning about the various methods employed in the study of religion, students gather, analyze, and interpret data from a variety of sources such as interviews, attendance at rituals, reading, discussion, and group projects.

• Common Questions, Jewish Responses: This course explores the major questions addressed by most world religions, with special emphasis on how they are answered in Judaism. It discusses but is not limited to the following topics: the nature of the Divine and its relationship to humankind; the problem of evil and innocent suffering; social responsibility as a concomitant of religion; Sacred Time and Space and the nature and function of ritual; death and what lies beyond.

• Peoples of the Book: Christianity, Judaism, and Islam: This section examines the relationship between sacred text and community in these three scriptural traditions. By focusing on shared narratives, such as Adam and Eve in the Garden, the course illustrates the different ways that texts are interpreted and used in early Christianity, medieval Judaism and modern Islam. The course also examines the various roles that Scripture plays in these communities.

• Major Themes in Islam: This section examines the basic ideas within Islam by exploring its two main axes: the relationship between God and humankind; and the relationship between and among people. Topics include: the nature of God; ritual practices; ethics; and the quest for a just society.

• Sacred Writings and their Representations: This course is an introduction to the academic study of religion. During the first half of the semester, we will establish a working vocabulary and conceptual framework for the study of religion, both of which will prove useful in our semester-long conversation about the nature of the sacred. While there will be some discussion of a number of religious traditions throughout the semester, the last month of this course will focus on the experience of sacred writings within the traditions of Judaism, Christianity, and Islam.

Sacred Texts

RS 150 Jewish Interpretations of Scriptures
This course explores ways in which Jews have understood the Hebrew Bible from the first centuries of the Common Era through today. Focusing on specific biblical texts, the course draws interpretations from early classical, legal, and non-legal rabbinic material; medieval commentaries and codes; mystical literature; and modern literary, theological sources. Three credits.

RS 162 The Good News of the Gospels
This course examines the Gospels of Matthew, Mark, Luke, and John according to contemporary exegetical and literary methodologies. The course examines and compares the theological positions of early Christianity as represented by each writer and by other early Christian gospels. Three credits.

RS 251 Old Testament/Hebrew Scriptures
This course investigates the religious perspectives of the major biblical units, Torah, prophets, and writings as they embody themes that define Judaism and Christianity, employing all contemporary methods of biblical criticism. This course helps students define a form of spirituality from an understanding of these classic texts. Three credits.

RS 254 Prophetic and Apocalyptic Voices
This course studies the major prophetic voices of the Hebrew and Christian scriptures, concentrating on each prophet’s unique vision of God and of the requirements of justice. The course blends these themes with the later apocalyptic consciousness, which demands rectification of the wrongs of hatred and injustice, and offers hope for a better future. Three credits.
RS 255  Second Temple Judaism and the Dead Sea Scrolls
The Dead Sea Scrolls have rightly been called the greatest manuscript discovery of the twentieth century. Discovered in 1947, they have made a tremendous impact on how scholars today understand Judaism and Christianity in antiquity. Our examination of the community, texts, and archeology of the Dead Sea Scrolls will begin with a study of the Second Temple Period (520 BCE – 70 CE), one of the most important in the history of Judaism. This course will examine the political, social, and theological developments of this period so that the community of the Dead Sea Scrolls and their writings may be situated within their proper context. Students will learn to read primary texts closely and secondary texts critically as they consider the influence and relationship between texts and their community. Three credits.

RS 257  From Judaism to Christianity: A Socio-Literary Study
The course explores Christianity’s emergence from an evolving Judaism during a historical period when Greek influence was intense, factions struggled for ascendance, and new forms of literature captured the prevailing moods. Study begins with the Maccabean movement (167 B.C.E.) and traces the pattern of events and thought to the year 90 C.E. by examining the culture and distinctive literature of that period. The course studies the teachings of Jesus and those who followed him, understood in this cultural context, through the gospels they produced, giving particular emphasis to the study of the gospel of Luke as reflective of a new openness to the gentiles of the contemporary Greco-Roman world. Formerly listed as RS 157. Three credits.

RS 260  The Writings of Paul
This course examines the texts and recurring themes of the writings attributed to Paul, with particular emphasis on Paul’s treatment of ethical situations, community, and religious experience. Formerly listed as RS 160. Three credits.

RS 264  The Writings of John
This course examines the text of the gospel and epistles attributed to John, placing particular emphasis upon the recurring themes in these writings, the distinctive view of Christianity they represent, and the development of early Christianity to which they witness. Formerly listed as RS 164. Three credits.

RS 266  The Reinterpretation of the New Testament
This introduction to the critical study of the New Testament and its Christologies reviews the varying titles for Jesus, comparing them with the original Jewish or Greek usage. The course considers the process of reinterpretation of Jesus in the New Testament as a possible model for interpretation today. Three credits.

Theology and Ethics

RS 117  Jesus Christ Yesterday and Today
A systematic treatment of the person and work of Jesus Christ, this course examines different interpretations of the meaning of the Christ event from the scriptural sources to contemporary developments. Three credits.

RS 122  Grace and the Christian Life
This course develops a theology of the everyday life by examining the themes in the New Testament, early monasticism, the Middle Ages, and the Reformation. The course then surveys current explorations of grace, holiness, and the working life, drawing from the insights of psychology and gender studies and attending to concerns for economic and social justice. Three credits.

RS 123  The Church
A study of the development and present-day understanding of the idea of the Church in Roman Catholic theology, this course examines the roots of the concept in scripture and the earlier traditions of the Church, and presents a contemporary ecclesiology through a critical discussion of the First and Second Vatican Councils. Three credits.

RS 126  The Sacraments in Christian Life
A theological investigation of the sacraments as the source of Christian character, involvement, and witness, this course proposes an anthropological theology as a basis for understanding faith and develops a process/model view of the Christian’s relationship with God. The course presents the Eucharist as the focus of Christian self-awareness; baptism, confirmation, and penance as sacraments of reconciliation; and considers special sacramental questions. Three credits.

RS 130  Last Things: The Catholic Belief in Life After Death
This course first explores the Christian understanding of life after death, affirmed in such beliefs as the resurrection of the body, the last judgment, heaven and hell, and the forgiveness of sins. It then goes on to examine the Catholic tradition’s particular contributions to these beliefs in its teachings on purgatory and the communion of the saints. The course asks why these ancient beliefs continue to resonate in contemporary popular culture, and examines modern theological efforts to re-construct these hopeful beliefs for our own times. Three credits.
RS 170 Theological Ethics: The Foundations of Virtue
Ethicians have long realized that a proper understanding of moral character requires a right view of the fundamental human experiences known as the passions — hope, despair, anger, love, and hate. This course initially presents a brief historical overview of various thinkers' reflections on these human qualities, drawing on scientific and philosophical investigations of affectivity. Building on this introductory material, the course considers the moral life from a theological perspective, discovering how theology attempts to define a framework for understanding the affective life's relation to virtue, and how attention to the affective life in turn profoundly influences theological anthropology. Three credits.

RS 172 Contemporary Morality: Basic Questions
This course introduces the fundamental concepts in moral theology, drawing on major traditions in contemporary Christian thought. The course examines the moral foundations of conscience, freedom and responsibility, virtue and character, and methods of moral decision-making. To deepen the study of basic questions in Christian morality, the course concludes by examining selected applied issues in contemporary morality. Three credits.

RS 175 Contemporary Moral Problems
This theological examination of contemporary moral problems considers selected ethical issues in contemporary society and leading approaches to moral decision-making. The course investigates moral problems such as euthanasia and physician-assisted suicide, the death penalty, violence and just war theory, bioethics, sexual and reproductive ethics, global poverty, environmental ethics, and issues in business and legal ethics. Three credits.

RS 197 Evil
This course explores the problem of evil from the perspectives of theology and philosophy. The course considers God and evil, classical theodicies (reasonable justifications of God before the prevalence of evil), modern philosophical accounts of evil, social evil, and the possibility of belief in the face of evil. Within the context of these subjects, the course addresses the following questions: What is evil? What are the roots of evil? What effect does one's understanding of evil have on one's understanding of the human being, of God, and of religion? What is our responsibility in the face of evil? Three credits.

RS 220 Contemporary Christian Anthropology
This course rests on the premise that religion and culture create tools for thinking about what it means to be a self. The course considers the value of process models for understanding Christian suppositions about the nature of the human person and for investigating how human work and play, love and sexuality, and suffering and death contribute toward defining a Christian view of the self. Formerly listed as RS 120. Three credits.

RS 232 Theology and the Problem of Culture
This course offers a theological examination of the relationship between Christian faith and secular culture since the late 18th century. After exploring the Enlightenment criticism of Christianity, the course pursues a historical and constructive study of two divergent directions in modern theology: cultural theology and the theology of culture. The course investigates this typology in the writings of Lessing, Schleiermacher, Barth, Bonhoeffer, and Metz; in the papal encyclicals of Pius X and John Paul II; and in the documents of Vatican I and II. Formerly listed as RS 132. Three credits.

RS 235 Liberation Theology
This course analyzes contemporary theological movements that emphasize the relationship of religious faith and praxis to the sociopolitical realm. The course treats at length the development of the Latin American theology of liberation and examines its theological principles, tracing the influence of this theological outlook on other Third World theologies and on North American and European theological reflection. The course proceeds to a constructive proposal for a contemporary political theology. This course meets the U.S. diversity requirement. Formerly listed as RS 135. Three credits.

RS 237 Christian Feminist Theology
Participants examine some of the key issues being raised in religion by contemporary feminist thinkers. After a brief examination of the history of patriarchy in the Christian tradition and earlier responses by pre-modern feminists, the course considers issues such as feminist methodology, feminist perspectives on traditional Christian doctrines of God, creation, anthropology, Christology, and eschatology. The course concludes with a discussion of the nature of authority and an examination of a feminist theology. This course meets the U.S. diversity requirement. Formerly listed as RS 137. Three credits.
RS 238  American Catholic Theologians
This lecture/reading course gives students insight into the modern development of Catholic theology in America and what makes it specifically American. Discussion/analysis covers the work of Gustav Weigel, John Courtney Murray, George Tavard, Frank Sheed, Walter Burghardt, and Robley Whitson. Formerly listed as RS 138. Three credits.

RS 276  The Morality of Marriage in Christian Perspective
This course explores marital commitments by exploring the many phases of partnership – courtship, marriage, intimacy, parenting, death – and the specialized skills or virtues these phases require. The course considers questions such as: What kinds of communities, especially faith communities, support marital commitments? What are the forces of society and culture that might threaten them? How might vices, such as physical or sexual abuse, alcoholism, and addiction, erode commitments? The course concludes by assessing how virtuous families might promote peace and justice, and developing an integrated theological account of the moral project we call marriage. Formerly listed as RS 176. Three credits.

RS 280  Morality and Law
This course examines the relationship between law and morality, of rights and justice, with illustrative reference to special topics such as racism; sexism; and political, business, and communication ethics. Formerly listed as RS 180. Three credits.

RS 340  Modern Jewish Theology
This course explores ways in which selected 19th- and 20th-century Jewish theologians (Buber, Rosenzweig, Heschel, Hartman, Fackenheim, Blumenthal, Greenberg, Plaskow) attempt to meet challenges of faith and Jewish self-identity. Topics include the nature of the covenant, the role of human autonomy, liturgical images of divinity, and faith after Auschwitz. Formerly listed as RS 240. Three credits.

History and Tradition

RS 100  Introduction to Judaism
This course examines Jewish faith and community from the biblical period through the present, paying particular attention to the concepts of God, revelation, religious authority, divine election, and personhood; the celebration of holidays and observances; contemporary religious movements; and organizations and institutions that continue to support Jewish life. Three credits.

RS 101  History of the Jewish Experience
The course examines the origin and development of Judaism and the Jewish people. It begins with the Hebrew Bible as the source of Judaism and follows its development to the modern era. This overview introduces the Jewish religion, its history, and development. Formerly listed as RS 100. Three credits.

RS 112  The Problem of God
This historical and theological examination of the Christian doctrine of God pays special attention to the problematic aspects of the development of this doctrine through the ages, exploring this development in biblical sources; patristic, medieval, Reformation, and modern times. The course concludes with a consideration of the challenge of post-Enlightenment atheism and of the efforts of contemporary theologians to recast the classical conception of God. Three credits.

RS 115  Introduction to Catholicism
This introduction to the beliefs, doctrines, ideas, and practices that shape the unity and diversity of the Catholic tradition explores theological, devotional, and spiritual forms of expression in their historical and cultural contexts in order to appreciate the particularity of Catholic themes. The course also considers how these themes engage contemporary Catholic life and exercise an influence on the wider culture. Three credits.

RS 202  Finding God in All Things: The Spiritual Legacy of Ignatius of Loyola
The course aims at a deeper understanding of the origins, development, and present forms of Ignatian spirituality. Students are invited to study in an open yet critical fashion: the life and history of Ignatius of Loyola; the founding and development of the Society of Jesus; the historical context of the major themes of Jesuit spirituality and ways in which these have been worked out in history; strengths, weaknesses, and potential lacunae of this particular charism in the church; its relevance to contemporary spiritual needs, especially in the context of university life; its potential for nurturing lives characterized by love for others and justice for the world. Students are also exposed to the dynamics of the Spiritual Exercises; a variety of prayer forms developed by Ignatius; and a service learning project. The course culminates in a creative project designed by each student. Three credits.

RS 204  Voices of Medieval Women: Silent No More
As scholars work to recover the history of women in the Western Christian tradition, they are discovering that medieval women were neither as silent nor as invisible as previously thought. In this class, students read and interpret the works of select medieval women in a critical yet appreciative way. Students gain familiarity with recent discussions on women’s spirituality; a mastery of methods used in the critical analysis of medieval texts (that date from approximately 200-1500); a basic understanding of the social and historical context of these texts; a grasp of the texts’ religious content and meaning; and analyze how this material might be relevant to contemporary interests and concerns. Three credits.
RS 207  The Reformation Era
Participants study the religious reform of the 16th century. The course begins by probing the seeds of reform in the late scholastic tradition and in popular spirituality, and proceeds by tracing the development of the ideas and impact of the reformers: Luther, Zwingli, Calvin, Munzer, and Schwenckfeld. The course concludes with an investigation of the Roman Catholic response to reform in the events of the Council of Trent and the Counterreformation. Formerly listed as RS 107. Three credits.

RS 224  The Papacy
This survey of the Roman Catholic papacy, generally focuses on a single figure, theme, or period, and places that figure, theme, or period within the larger historical, cultural, and ecclesial context. A significant part of the course treats theological issues, using as texts either papal writings, significant encyclicals, or conciliar statements and actions. The course also includes a critical assessment of the role of the papacy within the Roman Catholic Church and a consideration of the role of the papacy in interreligious dialogue and world affairs. Formerly listed as RS 124. Three credits.

RS 242  Jews and Judaism in America
What has it meant and what does it mean today to be a Jew in America? Viewing Judaism and Jewishness as inseparable from one another, Jews remain a distinct though by no means homogeneous religious and ethnic group in American society. This course explores the religious, cultural, social, economic, and political diversity among American Jews as well as distinctive beliefs, concerns, and experiences that continue to unite them. The course gives special attention to issues concerning immigration, acculturation, gender, and Black-Jewish relations. This course meets the U.S. diversity requirement. Three credits.

RS 350  The Quest for the Historical Jesus
This course examines the increasingly public debate over whether an adequate basis exists for reconstructing a description of the life of Jesus of Nazareth. It examines the evidence available from all sources, the criteria by which that evidence has been interpreted, and the resulting, often contradictory, portrayals. The course also discusses the relationship between this “historical Jesus” and the subsequent faith tradition of Christianity. Three credits.

Religion and Society

RS 203  Women in Judaism
This course examines ways in which women have understood and experienced Judaism from the Biblical period through the present, drawing on historical writings, novels, theological essays, and films and giving particular attention to the traditional religious roles and status of women, the many ways in which women have understood Jewish self-identity, and recent feminist efforts to re-evaluate and transform contemporary Jewish life. Formerly listed as RS 103. Three credits.

RS 205  Selected Topics in the Catholic Tradition
This course examines particular themes, events, or individuals in the Catholic tradition, with special regard for their historical contexts and the ways in which they contribute to the self-identity of the Catholic tradition. The course includes close reading of primary sources; the subject matter changes from semester to semester. Students should consult the University registrar’s listing of new courses to determine the specific material treated when the course is offered. Formerly listed as RS 105. Three credits.

RS 236  African-American Religious Strategies
This course takes a historical and theological journey through various religious strategies and practices employed by African-Americans during the last 300 years, focusing on those particular strategies that explicitly defined themselves as religious. The course traces the development of the major Black religious strategies: religious nationalism (Malcolm X, David Walker), existentialist liberationists (Nat Turner, Gabriel Prosser), prophetic Christianity (Martin Luther King Jr., Marcus Garvey), priestly Christianity (Richard Allen, Sojourner Truth), Black mysticism (Howard Thurman), and sectarianism (Daddy Grace, Father Divine). The course evaluates each, based on their starting-points, conceptions of ritual, and notions of God. Three credits.

RS 239  Lay Perspectives on Christian Spirituality
This course examines the foundations and elements of a spirituality of everyday life from a lay perspective. It considers issues related to the spirituality of university life and to one’s broader, future developmental calling on personal, spiritual, and professional levels. Themes of the course include historical overview of Christian spiritual traditions; key theological foundations such as creation, incarnation, doctrine of the Holy Spirit, grace, priesthood of all believers, action, and contemplation; exploration of the practical implications of such a spirituality; and reflection on action for justice. Three credits.

RS/SO 241/151 Sociology of Religion
For this course description, see SO 151 in the sociology section of this catalog. Three credits.
RS 244  Faith After the Holocaust
The course examines the complexity and horror of the Holocaust and its contemporary historical, moral, theological, and political implications. Was the attempted annihilation of European Jewry an historical aberration in German politics or did it represent an eruption of psychic, social, and religious malignancies embedded in Western civilization? Was the Holocaust unique? Could it have been prevented? And, in light of the Holocaust, what does it mean to speak of faith, either in God or in humanity? Formerly listed as RS 144. Three credits.

RS 281  Religious Values and Public Policy
This course explores various understandings of religious values, the public policy process, and the interaction of these values and policies in American public life. While the course deals primarily with Catholic and Protestant religious traditions, it notes the contributions of other religious traditions to particular policy concerns. Issues pertaining to the religion clauses of the First Amendment form a central focus. To underscore the diverse connection between religious values and public policy, the course also considers wider issues of religion, personality, and culture. Formerly listed as RS 181. Three credits.

RS 282  Catholic Social Teaching
This course examines the modern teachings of the Catholic Church on peace and justice; Christian/humanist attitudes towards war; pacifism and the just war theory; and changes in global political and economic structures that seem necessary to ensure a peaceful and just world order. Formerly listed as RS 182. Three credits.

RS 293  Non-Traditional American Churches
This course begins with a critical inquiry into the nature of religion in America and the history that led to the constitutional guarantee of religious freedom. Students develop and defend criteria to evaluate nontraditional forms of “church” that have resulted from this freedom. After reviewing the origin, history, and beliefs of the major non-traditional churches established by Americans, the course explores the development of American evangelism and its impact on modern society through the “Electronic Church.” Formerly listed as RS 193. Three credits.

RS 294  Religion and Psychology
This course examines topics of concern to the fields of psychology and religious studies such as the formation of a personal and communal identity, alienation and guilt, individuality and change, and dependence and freedom. The study considers how psychological understandings interact with personal religious beliefs to form patterns of meaning for the individual. Formerly listed as RS 194. Three credits.

RS 295  Non-Traditional American Religious Groups
This course develops a critical sense regarding the nature of religion as experienced in pluralistic America by investigating a number of groups that illustrate the diversity of religious experience in America such as The Mighty I Am, Jonestown, Morningland, and Theosophy. Students formulate criteria for judging the authenticity of religious movements through an analysis of these examples. Formerly listed as RS 195. Three credits.

RS 296  Saints and Sinners: Images of Holiness in Contemporary Fiction
This course examines the complexity of current understandings of what it is to be holy. It begins with a brief consideration of traditional models of holiness. It turns next to several influential theories of spiritual growth, and then, in the light of these theories, looks at a series of 20th-century novels that examine the idea of holiness. Authors vary but include Georges Bernanos, Shusaku Endo, Mary Gordon, Graham Greene, David Lodge, Flannery O’Connor, Gloria Naylor, Muriel Spark, and Jean Sullivan. Formerly listed as RS 196. Three credits.

RS 298  Religious Values in Film
This course focuses on the search for meaning in human life as experienced and depicted in 12 films by distinguished filmmakers. The first six films mirror this search in personal life, asking in various ways whether we are isolated and alone or linked and dependent on others. They also grapple with the problem of evil and the experience of salvation. The second six films concern themselves with the meaning of life in society. In different historical contexts they ask whether the universe is indifferent or friendly to our community building, and raise the problem of God and the religious significance of secular achievement. Formerly listed as RS 198. Three credits.
RS 299  The Classic: Truth in Religion and the Arts
This course examines the idea of the classic as a model for establishing relationships between religious language on the one hand, and poetic discourse and artistic expression on the other. What truth do classics lay claim to and how do they embody it? The course compares secular and religious classics before investigating the value of the classic model in the process of doing theology. Formerly listed as RS 199. Three credits.

Islam and Asian Religions

RS 105  Introduction to Islam
This course introduces Islam as a global religion and civilization. After a brief historical overview, the course focuses on the foundational concepts of Islam – Quran, Prophet, Ritual and Community, and then analyzes how these concepts are interpreted in the main intellectual traditions, in the ways that Islam is practiced in different cultures and in the works of modern thinkers. Three credits.

RS 284  Buddhist Thought in India
The course investigates the basic Buddhist contributions to philosophical thought in the country of its origin – India. Through the writings of the seminal doctors of the tradition, ideas concerning metaphysics, causation, linguistic deconstruction, and psychological modeling are explored. Each direction is examined in light of the lively and dynamic theoretical environment that provided India with the intellectual sophistication it still enjoys today. This course meets the world diversity requirement. Three credits.

RS 287  Hinduism
This course introduces the seminal texts, concepts, and images of the major religious tradition of India. Topics include Vedic ritualism; Upanishadic mysticism; yoga meditation; the Bhagavad Gita; the caste system; Vedanta philosophy; the cults of Rama, Krishna, Shiva, and the Goddess; and Gandhi's philosophy of non-violent action. The course views Hinduism as a historical phenomenon, a formative influence on Indian culture and society, and a response to the human condition. Formerly listed as RS 187. This course meets the world diversity requirement. Three credits.

RS 288  Buddhism
This course explores the Indian Buddhist tradition, from its beginning in the life of Shakyamuni Buddha through the present revival of neo-Buddhism in the activism of oppressed classes. The course considers the early formative ideas of the Buddha—the Awakened One—as they unfold in the course of Indian history and society, and discusses Buddhist meditation and philosophy as procedures devised to elicit the awakened state. Using written and visual works, the course examines developments in Buddhist religious orders, lay social life, and the rise of the Great Vehicle tradition. Art and archaeology provide a context for Buddhism's compelling missionary activity throughout Central and Southeast Asia. Formerly listed as RS 188. This course meets the world diversity requirement. Three credits.

RS 289  Tantrism
This course covers the medieval formation of tantrism, a pan-Indian approach to religion that was to develop separate but related subcultures in Buddhism, Hinduism, and Jainism. With its ability to sacralize formulations of power and sexuality, it went on to become the most widely spread form of Buddhism, with premodern forms found in Tibet, China, Japan, and Eastern Europe. Recent expressions have been found all over the world. The course examines questions of tantrism's medieval origins, its espousal of antinomian conduct, its geographical spread, attempts at its domestication, and its recent developments in India and abroad. This course meets the world diversity requirement. Three credits.

RS 290  Religions of China
This course primarily investigates the indigenous religious expressions of China: Confucianism, Taoism, and Chinese popular spirit observances. It also covers those forms of Buddhism that are properly Chinese, such as Ch'an, Pure Land, and Buddhist millennialism. The course surveys sources from the earliest oracle bone inscriptions to modern communist literature including modern ethnography and the testimony of no-Han minorities of China. Sacred sites and mountain pilgrimage are important dimensions to the study. This course meets the world diversity requirement. Three credits.

RS 292  North Pacific Tribal Religion
This course investigates the varieties of religious expression found in the hunter-gatherer and semi-pastoralist societies of the Northern Pacific Rim and the steppe areas adjacent to it – Siberia and the American Great Basin/Great Plains – giving particular attention to myths, hunting rituals, tribal rites of passage, renewal rituals, and the specific functions of religious objects. The course explores shamanic structures, spirit communication, and visionary institutions in some depth, and discusses modern transformations of tribal religion in these areas. Formerly listed as RS 192. This course meets the world diversity requirement. Three credits.
Religious Studies

RS 388  Buddhist Spirituality
The course explores the cultivation of meditation and spirituality in the Buddhist tradition, its embodiment in seminal figures in India, China, Japan, and Tibet, and their individual expressions of contemplation and spiritual experience. The association of these Buddhist saints with value systems, specific sites, and sacred activities is examined, especially as the relationships between these persons and their activity in the world reflect their religious path. Particular emphasis is placed on the questions of religious inspiration and creativity, and the manner that these are formed in the process of training in contemplation. This course meets the world diversity requirement. Three credits.

RS 389  Seminar on Tibetan Religions
An examination of the forms of religious expression found on the “Roof of the World,” the course investigates the rise and development of Tibetan Buddhism as well as the indigenous forms of religious expression found in Tibet proper and in the Tibetan cultural areas in China, Bhutan, Sikkim, Nepal, and India. Topics include revealed scripture, village religious culture, monastic systems, the Tibetan theocracy, the institution of religious incarnation, and the sectarian divisions within Buddhism and the Bon religion. This course meets the world diversity requirement. Three credits.

Special Seminars

RS 301  Independent Study
Students, in consultation with a department director, define their course of study. Three credits.

RS 360  Religious Studies Seminar
This seminar offers an in-depth investigation of a significant figure, issue, or problem in religious studies. Enrollment requires the permission of the instructor. Formerly listed as RS 260. Three credits.

RS 390  Major Seminar
This seminar offers religious studies majors an in-depth investigation of a significant figure, issue, or problem in the discipline. Three credits.

Russian
(see Modern Languages and Literatures)
can be substituted for any course with the approval of appropriate faculty and the program director. Students are also encouraged to apply for a junior semester or year abroad in Russia or Central or Eastern Europe from a wide range of affiliated programs, including the Boston University Moscow internship program, the Consortium on International Educational Exchange (Prague, Budapest, St. Petersburg, Yaroslavl, and Fairfield’s own programs at St. Petersburg’s Herzen University, the St. Petersburg State University of Economics and Finance, Pomor University (Arkangelsk), Cherepovets State University (Cherepovets), or Immanuel Kant University (Kaliningrad).

Courses offerings:

**Russian Language**
- RU 110  Basic Russian I
- RU 111  Basic Russian II
- RU 210  Intermediate Russian I
- RU 211  Intermediate Russian II

**History**
- HI 272  Russia, 700-1700: History and Myth
- HI 273  History and Culture of East Central Europe Since 1945
- HI 275  Russia’s Road to Revolution, 1689 to 1917
- HI 276  St. Petersburg in Russian History
- HI 284  20th-Century Russia
- HI 356  History of the Cold War
- HI 385  Comparative Russian Revolutions

**Visual and Performing Arts**
- AH 112  Byzantine Art
- AH 191  Art and Mythologies of Nazi Germany, Fascist Italy, and Bolshevik Russia

**Economics**
- EC 230  Comparative Economic Systems

**Politics**
- PO 249  Russia Seminar

**English (Comparative Literature)**
- EN 266  The Russian Novel and Western Literature
- EN 366  20th-Century Russian Novel

---

**Course Descriptions**

**RES 110  Introduction to Russian Culture and History**
This interdisciplinary course provides a comprehensive introduction to Russian civilization seen through the lens of visual expression, performance, and drama. Students revisit Russian painting, architecture, dance, music, and film at pivotal historical junctures, seeking to comprehend the underlying ideologies of orthodoxy, autocracy, totalitarianism, and perestroika. Images serve as our principle gateway to the deeply religious cultural imagination that has never experienced Renaissance and Reformation. Critical examination of extensive Western and Eastern influences explains the creation of native Russian aesthetic and ideology by way of adaptation, accommodation, and transformation of multicultural and multiethnic input. Three credits.

**RES 310  Capstone Seminar: Current Topics in Russia and Eastern Europe**
This interdisciplinary seminar, team-taught by faculty members from different disciplines or available as an independent project, focuses on current and changing developments in Russia or Eastern Europe and covers culture, politics, business, and economics, enabling students to integrate their different disciplines in a case-study format. The course includes oral and written assignments in addition to a special seminar project, designed by students in close consultation with instructors. Open to juniors or seniors only. Three credits.

**RES 395  Internship in Russian and East European Studies**
Candidates work a minimum of eight hours per week during the semester either for the Russian and East European Studies Program director, helping with publicity, coordination, and public events, or for an organization or business in the area doing work in Russia or Eastern Europe. Under the direction of a faculty member in Russian and East European studies, interns regularly report on their work and write an evaluation of the experience at the end of the summer. The internship is available only to juniors and seniors seeking a minor in Russian and East European studies. Three credits.

Sociology is the scientific study of human society and social behavior. It seeks to understand why individuals form groups and how membership in groups influences a person’s behavior. Why do human beings form families? Why do the rich act, and even think, differently from the poor? What makes some people break social rules and others obey them? What holds societies together? Why do all societies change over time? These are questions that sociologists ponder.

Anthropology asks similar questions, while emphasizing cross-cultural, cross-disciplinary and longer-term perspectives. This discipline’s comparative approach highlights patterns of similarity and difference among human groups and helps people understand their own practices and those of others in a broader cross-cultural context.

The department currently offers a major and a minor in sociology. Students majoring in sociology at Fairfield University begin their study by taking several fundamental courses that provide them with an understanding of the basic concepts and methodology of the field. Students build on this foundation by selecting from a wide variety of elective courses. Students are carefully and individually advised throughout their stay at Fairfield. The faculty strives to clarify career goals and to put together a concentration of courses and experiences that ensure for the student intellectual fulfillment and a viable career.

Requirements

Sociology Major
For a 30-credit major in sociology, students complete:

- SO 11 General Sociology
- SO 221 Statistics: Social and Political Data Analysis
- SO 222 Methods of Research Design
- SO 328 Classical Social Theory
- SO 329 Contemporary Social Theory
- an additional 15 credits in elective sociology and anthropology courses

Sociology Minor
For an 18-credit minor in sociology, students complete:

- SO 11 General Sociology
- SO 222 Methods of Research Design
- OR
- SO 328 Classical Social Theory
- an additional 15 credits in elective sociology and anthropology courses

Internships
Students may elect to take Field Work Placement for one or two semesters in their senior year in addition to fulfilling the basic requirements of their major.

Sociology Major with a Minor in Secondary Education
Students majoring in sociology may also minor in secondary education (see program in education, page 89). Please contact Dr. Renee White in the Department of Sociology & Anthropology or Dr. Patricia Calderwood, Chair of the Curriculum and Instruction Department for additional information for minoring in education.

Course Numberings
Course numbers have changed from prior catalogs; courses listed here, and those cross-listed in other departments, are not open to students who took them for credit under a previous number.
Course Descriptions

SO 11  General Sociology
This introduction to sociology provides students with a sense of sociology’s orientation; its particular way of looking at human behavior in the context of people’s interaction with each other. The course emphasizes the kinds of questions sociology asks, the methods it uses to search for answers, and how it applies the answers to problems of people’s everyday lives and issues of social policy. Three credits.

SO 112  American Society
This course analyzes the dominant ideology and values that have shaped American culture – namely the Protestant ethic – and how and why these values are changing. The course also analyzes major institutional trends that have transformed and continue to transform America and the modern world – bureaucratization, industrialization, urbanization, the rise of the business corporation, science, and technology – and the effects of these institutions in producing new personality types, mass society, and rapid social change. The course provides a macro-sociological framework. This course meets the U.S. diversity requirement. Three credits.

SO 142  Sociology of the Family
The family is a basic social institution of all societies. This course, which examines family systems as they exist in other cultures and in times past, focuses on understanding the contemporary American family system. Students consider American patterns of dating, mate selection, sexual behavior, marriage, parenting, and aging, as well as alternative life styles and family instability. Three credits.

SO 144  Sociology of Sexuality
This course explores the social construction of human sexual behavior, examining the influence of social institutions on sexuality, social responses to variations in behaviors, and the organization of sexual identities. Three credits.

SO/RS 151/241  Sociology of Religion
This course offers a combined theoretical and empirical treatment of the sociology of religion, the character of religious institutions, the relations of religious institutions with other institutions in society, and the internal social structure of religious institutions. It gives particular attention to the process of secularization in the modern world and the crisis this poses for traditional religion. Cross-referenced with RS 241. This course meets the U.S. diversity requirement. Three credits.

SO 161  American Class Structure
This course examines the roots and structure of class in the United States and the consequences of this hierarchical arrangement on everyday life. It focuses primarily on social class; however, the dynamics and consequences of social class cannot be fully understood without addressing the complex interconnections between class, race, and gender. This course meets the U.S. diversity requirement. Three credits.

SO 162  Race, Gender, and Ethnic Relations
This course analyzes sociological and social psychological dimensions of race relations, ethnic interaction, and the changing role and status of women. It focuses on the American scene but also examines problems of women and minorities in other parts of the world and their importance for world politics. It also considers what sociologists and social psychologists have learned about improving dominant/minority relations. This course meets the U.S. diversity requirement. Three credits.

SO 163  Urban/Suburban Sociology
This course explores the nature of the city and growth of metropolitan regions in the contemporary world; the ecological approach and the use of demographic data in the analysis of modern urban communities; social organization of metropolitan regions and the emergence of urban-suburban conflict; big-city politics, community control, and regional government as dimensions of organization and disorganization in city life; and city planning and urban development at local and national levels as efforts to solve the urban crisis. Three credits.

SO 165  Race, Cities and Poverty
The geography of cities is in constant flux. People move in and out, businesses open and close, city government institutes social policy in response to existing changes in different communities. Many of the changes in cities have been influenced by racial-ethnic and economic dynamics. In this course we will examine the ways race has shaped our perceptions of and responses to community. Why are urban areas “racialized”? Why does talk of the underclass imply black Americans and Latinos? We will focus primarily on black Americans, but will also consider white ethnic groups and other ethnic groups in discussion. In our examinations we will focus on case studies of urbanization and race such as post-Katrina New Orleans, southern migration to Chicago, and Bridgeport. Three credits.

SO/WS 166/101 Feminism, Gender, and Everyday Life
This course provides an introduction to the study of gender through a feminist lens. The central themes of the course are the changes and continuities of gender roles within the United States, the social processes that influence our gender identities, and the connections between gender, power, and inequality. The course addresses the ways in which the media, popular culture, work, and schools have been pivotal sites for the creation and maintenance of gender performances, and explores sites of resistance in art and activism. The course pays special attention to the ways in which race, class, and sexualities intersect processes of gender relations and social change. Three credits.
SO 169 Women: Work and Sport
Sex and gender stratification exists in most areas of everyday life throughout American society. This course concentrates on women in the workplace and in sport. It analyzes women’s occupational status and the accompanying roles from the colonial period to the present from a variety of theoretical perspectives. Since sport is a microcosm of society, the course treats the perceptions and experiences of female athletes in 20th-century America as a mirror of the inequality within the larger world. This course meets the U.S. diversity requirement. Three credits.

SO 171 Criminology
This course examines crime rates and crime trends in the U.S. Theories of criminal behavior are critically analyzed. It also explores victimless crime, white collar crime and organized crime. Societal responses to crime and criminals are addressed. Three credits.

SO 175 Sociology of Law
Based in the relationship of law and society, this course explores the meaning of law, civil disobedience, and other challenges, and law as an agent of social change. It takes as its major theme legal equality versus social inequality and analyzes this theme in terms of discrimination against the poor, women, and various racial groups. Students discuss the role of lawyers, the police, and the courts in American society in the second half of the semester. Three credits.

SO 179 Death Penalty in America
This course is an in-depth analysis of capital punishment. The history of the death penalty and its contemporary status in the U.S. is explored. Public opinion and the decisions of the courts, prosecutors, and juries are addressed. Some of the questions raised include the following: Is the death penalty a deterrent? Is it racially biased? Does it victimize the poor? Are the innocent ever convicted and executed? What sociological factors influence clemency decisions? How is the U.S. position on the death penalty perceived by the international community? Three credits.

SO 181 AIDS in the United States
This course covers epidemiological, public health, social scientific, and artistic responses to the AIDS crisis. Topics include the genesis of AIDS and its epidemiological shifts, the global impact of the disease, reproductive health, sexuality, community efforts to “fight AIDS,” policy developments concerning the virus, and the ethical and political implications of such policies. The goal of this course is to address how various factions (politicians, social scientists, health care providers, activists, and so on) have grappled with HIV and AIDS. Three credits.

SO 183 Public Opinion and Polling
The course examines the construction and use of public opinion surveys, explores their impact upon the American political process, and examines in detail the role of public opinion in a democratic system of government. It uses archive data drawn from private polls and the Gallup and Harris polls to illustrate the polling process and as a background to the substantive issues discussed. Three credits.

SO 184 Population: Birth, Death, and Migration
Demography, the study of population, is the basis of this course. It examines the causes and consequences of population change. The course addresses global population problems and those faced by the United States. Students analyze real demographic data during weekly demographic techniques sessions. This course meets the world diversity requirement. Three credits.

SO 185 Introduction to International Migration
This course examines the causes, processes, and concerns of international migration, which are explored through the use of case studies that include a wide range of countries from different world regions. These case studies include international migrants, such as refugees, labor migrants, and undocumented migrants. In addition to studying the migrants and the reasons for their international movement, participants have the opportunity to discuss opposing perspectives on the immigration policies of developed countries. Three credits.

SO 190 Globalization
The single most powerful force transforming the world in which we live is the accelerating process of globalization. Information à la the Internet, ideas, technology, products, services (and even people, the slowest to move) are all moving within and across national boundaries every hour of every day. As Joseph Stiglitz, former chief economist for the World Bank, puts it, “Globalization is like a giant wave that can either capsize nations or carry them forward on its crest.” The goal of this course is to begin to understand the complex causes and effects of globalization. What’s driving it and what kind of future is it likely to bring? Three credits.
SO 191 Social Change in Developing Nations
This course examines the major societal changes occurring in developing countries, seeking answers to two basic questions: To what extent are the current modernization efforts of Third World nations comparable to the earlier experience of the United States and Western Europe? How do existing inequalities and dependencies between developed countries and Third World nations affect their chances of modernizing? Students complete a semester-long Web-based study of a particular country. This course meets the world diversity requirement. Three credits.

SO 192 Social Work: An Introduction
This overview of the social work profession emphasizes the knowledge base, theories, values, and skills that underlie generalist social work practice with individuals, groups, families, and communities. Students consider a range of social problems and social policy concerns as well as the impact of these issues on diverse client populations. The course also conducts a related exploration of the role of the social worker in agency settings and the various fields of practice. Three credits.

The course explores the development of the social work profession within the context of the evolution of social welfare in the United States, emphasizing the political, economic, social, and philosophical forces that have forged social welfare policy and helped shape the social work profession. Exploration of the importance of divisions in American society regarding social justice and issues of class, race, ethnicity, and gender provide a framework through which to view current controversies such as welfare reform and the feminization of poverty. Three credits.

SO 221 Statistics: Social and Political Data Analysis
This course provides a basic introduction to the role of statistical analysis in understanding social and political data, with an emphasis on actual data analysis using the University’s computer facilities. It uses an extensive social and political data archive including 1980 Census data, political polls, and national survey data for computer analysis. (Prerequisite: SO 11) Four credits.

SO 222 Methods of Research Design
This course examines the nature and function of scientific methods as applied to the field of sociology, emphasizing survey research design and secondary analysis of existing data. Student teams design and conduct research projects as part of the course assignments. (Prerequisite: SO 11) Four credits.

SO 279 Seminar: Criminal Justice System
This seminar explores in detail the workings and problems of the criminal justice system in the United States. In addition to investigating the sources of criminal behavior, the course focuses on the arraignment process, probation, the trial, sentencing, prison reform, and parole. Three credits.

SO 328 Classical Social Theory
This first of a two-course sequence in sociological theory concentrates on the writings of Marx, Durkheim, Weber, and Martineau, placing their theories in the context of the social, economic, political, and intellectual turmoil of the late 18th and early 19th centuries. The course includes a focus on the development of sociology as a discipline and the enduring concerns of the perspective. (Prerequisite: SO 11) Three credits.

SO 329 Contemporary Social Theory
This second of a two-course sequence in sociological theory focuses largely on American sociology and its development during the 20th century, examining critical social theory, structural functionalism, symbolic interactionism, ethnomethodology, feminism, world systems theory and social constructionism. Contemporary application is a central concern in the course. (Prerequisite: SO 11) Three credits.

SO 397-398 Field Work Placement
In this one- or two-semester internship program, students are placed in professional and service settings where they work under supervision and acquire experience in the area chosen for placement. In addition, they integrate their experiences with the intellectual foundation acquired in their academic courses. Open to senior majors only. Three or six credits.

AY 110 Physical Anthropology and Archaeology
The study of natural selection, primate evolution, and living primate societies provides a baseline from which to study the evolution of the human species. The course also traces human cultural and social development from the foraging bands of the first humans to the civilizations that appeared at the dawn of written history. Students also examine physical variation among living populations. Three credits.

AY 111 Cultural Anthropology
Why is there such variety among the way members of human societies live, dress, speak, behave toward one another, and worship? This course explores the shared patterns of thought, behavior, and feelings— that is, the cultures— of a number of peoples and offers an explanation for the form they take and the differences between them. The course helps students develop a new perspective on the values and institutions of Western culture. This course meets the world diversity requirement. Three credits.

AY 130 Societies and Cultures of Africa and Latin America
This course introduces the cultural anthropology of two very diverse regions of the world. Africa and Latin America/the Caribbean are continents with several
distinct cultural heritages and a complex blending of the ancient and the modern. The course ranges broadly, exploring the ancient civilizations of each area, the cultural ecology that shapes human behavior and society there, the distinctive cultural patterns that characterize each, the historical and cultural linkages between these two regions, and the similarities and differences in African and Latin American experiences with colonialism, capitalism, and development in an increasingly global system. This course meets the world diversity requirement. Three credits.

**AY 140 Marriage in Cross-Cultural Perspective**
This course explores marriage as a social and symbolic system, analyzing marriage practices in several ethnographic areas including Africa, Asia, Latin America, Oceania, Europe, and the contemporary United States. The course exposes students to a range of theoretical perspectives used in anthropology and guides students to an appreciation of how marriage systems participate in the construction and reproduction of kinship and gender identities, and relations of power, authority, and inequality. This course meets the world diversity requirement. Three credits.

**AY 150 Societies and Cultures of Asia and the Pacific**
This introduction to the cultural mosaic and social dynamics of Asia offers an ethnographic and cultural ecological survey of geographical Asia, focusing mainly on three regions: South Asia, mainland and insular Southeast Asia, and East Asia. In each region students explore the historical development of high civilizations, the transformation of society and culture through the era of colonial domination, and the rapid and profound changes affecting the regions as they modernize and articulate with a global economy. This course meets the world diversity requirement. Three credits.

**AY 152 Islamic Societies and Cultures**
This anthropological inquiry into a number of “Muslim societies,” from Africa and the Middle East to Asia and the Pacific, investigates the cultural, ethnic, and linguistic diversity within these societies, while seeking to understand what they have in common with each other and with their non-Muslim neighbors. This course meets the world diversity requirement. Three credits.

**AY 160 Medical Anthropology**
This course explores the social and cultural dimensions of illness, disease, healing, and health from a cross-cultural perspective. Topics include the relationship between biology and culture; the sociocultural causes and consequences of epidemics and pandemics; social inequality and health-related issues; how different cultures conceive of the body, health, and illness; shamanism and ethno-psychiatry; culture-bound syndromes; birth and reproduction cross-culturally; health and the life cycle; the cultural dimensions of the clinical encounter, especially in pluralistic societies; and aspects of the political economy of medicine in the United States. Three credits.

**AY 163 Culture and Inequality**
This course focuses on the concepts of “culture” and “inequality” — two terms employed to deal with “difference” in a range of intriguingly different, and morally charged, ways. The course explores recent work in anthropology, economics, and sociology using culture and/or inequality as a lens through which to view various issues in contemporary social theory. In the process, students work to discover what kind of lens culture and/or inequality provides, how our implicit understandings of these ideas shape how we think about the world, and how we might better use such ideas to do our thinking. Three credits.

**AY 168 Women and Men:**
**The Anthropology of Gender**
Through a comparison of selected Asian, Middle Eastern, African, and Native American societies, this course explores the ways that culture can mold the biological facts of sexual difference into socially accepted behavior, creating two, and sometimes more, genders. Topics include the allocation of work, power, and prestige between men and women; the belief systems that legitimate gender roles; and some possible causes for the wide variation that exists among cultures. This course meets the world diversity requirement. Three credits.

**AY 180 International Research Practicum**
This will introduce students to the practicalities of international research, with particular emphasis on qualitative social science methods and the eventual aim of producing a viable grant proposal. The course will be taught from an anthropological perspective, but the skills developed should be broadly applicable to the social sciences and humanities. Three credits.

**AY 189 Ethnographic Knowledge and Practice**
This course focuses on the history and practice of ethnographic writing, a form of intellectual production at once art and science, evocation and explication. Emerging in the 20th century as the preeminent form of anthropological expression, ethnographies are one of the few scholarly means of understanding other cultures and societies in meaningful depth. At the same time, ethnographies reveal as much about the disciplines and societies in which they are produced as they do about distant “others.” Three credits.

**Spanish**
(see Modern Languages and Literatures)

**Studio Art**
(see Visual and Performing Arts)

**Television**
(see New Media Film, Television, and Radio)

**Theatre**
(see Visual and Performing Arts)

The Major
The major consists of a minimum of 30 credits of coursework in the Department of Visual and Performing Arts that must be completed in a single area of concentration chosen by the student. Areas of concentration available to majors are art history; music; new media film, television, and radio (requires 33 credits); studio art (requires 33 credits); and theatre (requires 33 credits).

The Minor
A minor in visual and performing arts can be obtained upon completion of 18 credits in one of the five areas of concentration: art history; music; new media film, television, and radio; studio art; or theatre. For further information about the curriculum and areas of concentration, consult the program directors:

Art History: K. Schwab
Music: B. Torff, L. Nash
New Media: J. Mayzik, S.J.
Studio Art: S. Chamlin
Theatre: M. LoMonaco
Department Mission and Goals

The visual and performing arts have always been an integral part of the human experience as they weave together knowledge, skills, and personal and cultural values. Skill expresses knowledge, and personal values drive one’s artistic and aesthetic choices. All students should acquire knowledge of history, context, theory, and the interaction of art, society, and the self. Towards this end, students will become familiar with the major artistic achievements of the visual and performing arts.

The Department of Visual and Performing Arts at Fairfield inculcates the practice of developing intuitive, creative, expressive, and aesthetic faculties and the ability to connect these with reasoning skills. The creative process is a means of giving shape to one’s own experience and requires a certain amount of introspection, experimentation, and risk taking. The aim of the core curriculum requirement is to instill empathy, discernment, and sensitivity to and respect for the expressions of individuals and groups and their visions of the world. With exposure to the visual and performing arts as a major or minor in the department, students have the creative and artistic abilities required for a variety of future professional challenges.

University Core Course Requirement

The core curriculum requires that all Fairfield undergraduate students complete two semesters of coursework in Visual and Performing Arts. Our courses are divided between those that cover material historically and those that involve the use of applied skills with which you actually make or perform works of art. The core curriculum requires that at least one of your two courses in this department be a history course. Courses that fulfill the history requirement for the core curriculum are labeled "(H)"; those that fulfill the applied art requirement are labeled "(A)".

Additional Fees

Studio art; new media film, television, and radio; and some theatre courses require a materials fee. There are also separate charges for private music lessons. Students enrolling in these courses will be billed an additional fee per course.

Facilities and Resources

- The Thomas J. Walsh Gallery, and experimental galleries for student work.
- The Samuel H. Kress Collection of Italian Paintings.
- A long-term loan and gift of plaster casts from the Metropolitan Museum of Art, representing masterpieces from ancient Greece, Rome, and Renaissance Italy, provide students in the Art History and Studio Arts programs additional opportunities for study.
- The Mutrux Visual Resources Collection (VRC) is the primary visual teaching resource and laboratory for the Art History Program, with state of the art computer and digital imaging equipment, and a collection of over 130,000 slides. The VRC is actively engaged in building a digital image library, which is used in conjunction with the university’s subscription to ARTstor, an online repository of over 700,000 digital images.
- A computer-music lab for MIDI and other music-based computer software.
- The Aloysius P. Kelley and Wien Experimental “Black Box” theatres at the Regina A. Quick Center for the Arts host frequent student performances presented by the music and theatre programs.
- The Media Center in Xavier Hall contains exceptional equipment and facilities for students in new media film, television, and radio, including an instructional television studio, a production television studio, a satellite uplink truck, and Campus Television Network head-end. Furthermore, production capabilities are supported by state-of-the-art computer-based digital graphic design and editing production and post-production technology.
- The renovated PepsiCo Theatre, with its intimate theatre, dance studio, and design studio, is the home of Theatre Fairfield, the production wing of the theatre program.
- The Bellarmine Museum of Art with prestigious loans from the Cloisters Museum, the Samuel H. Kress Collection of Italian Paintings, objects from the permanent collections including examples from Asia, Africa and the Americas. Temporary exhibitions will be regularly featured as well.
Internships
Visual and performing arts majors are eligible for internship programs. Students may receive credit for gaining valuable practical experience in a variety of activities. Available internships include work at the University’s Thomas J. Walsh Art Gallery, local galleries, museums, historical societies, television and radio stations, art studios, professional theaters, and production companies.

Performance Opportunities
In addition to its regular courses, the department sponsors a number of student performing groups including the Fairfield University Orchestra, Jazz Ensemble, Chamber Singers, and Varsity Band. Members of these performing groups receive one credit for each semester. Students may apply up to six of these credits toward a music major or minor. However, these credits do not count towards the 38 three-credit courses required for graduation. The Fairfield University Glee Club is a non-credit performing organization sponsored by Student Affairs.

Theatre Fairfield is the production wing of the theatre program. The annual season includes professionally directed and designed productions; a Festival of student-written, directed, and designed plays; performances by On the Spot, our improv company; Director’s Cut or A Class Act, which feature the work of advanced directing and acting students; and independent projects created by junior and senior majors. Participation in Theatre Fairfield productions is open to all members of the University community.

We live in a visual world and the field of art history provides an essential tool for experiencing humanity’s visible achievements. The Art History program offers a complete academic curriculum covering all the major movements and periods of Western civilization, as well as courses on the arts of Asia, the Americas, and Africa.

The Art History program has successfully attracted many motivated and creative undergraduates who demonstrate their broad understanding and appreciation for the visual arts of painting, architecture, sculpture, photography, and new media. Art history students develop critical evaluation skills through a cycle of courses that 1) examine the artistic heritage of the ancient, medieval, Renaissance, baroque, modern, and American cultures in the Western experience and the artistic heritage of Asia, Africa, and the Americas, and 2) explore contemporary developments in art within our increasingly global society.

The Art History program’s goals include:
• Enabling students to develop a visual vocabulary
• Developing multiple perspectives on key paradigm monuments in their cultural contexts
• Establishing an understanding of the cross-disciplinary nature of art history as a gateway connected to the humanities and liberal arts
• Developing students’ abilities to organize ideas, respond, write, and speak coherently about representational issues
• Encouraging students to take advantage of the world-class museums and collections in Connecticut and New York City
• Motivating students to attain direct involvement and aesthetic pleasure from the knowledge and comprehension of world art.
With a strong emphasis on the relationship between historical research, written analysis, and observational interpretation, students of art history come to possess a powerful visual vocabulary. Coursework leads to seminars in the junior and senior years. The skills learned in art history are essential for teaching, museum and gallery curating, marketing and media careers, as well as nearly every job that requires visual analysis. A strong liberal arts education based in art history also prepares students for careers including medicine, law, management, and international relations.

Among the many outstanding resources and programs available to art history students are specially arranged visits to major museums in New York and Connecticut with behind-the-scenes tours by curators; internships at regional museums and cultural organizations; hands-on apprenticeships at the University’s Thomas J. Walsh Art Gallery; ongoing research with the University’s Samuel H. Kress Collection of Italian Paintings and the Metropolitan Museum of Art Plaster Cast Collection, and the art collections in the new Bellarmine Museum of Art. Art history majors are encouraged to participate in the University’s international study opportunities, including the academic semester/year in Florence at the University of the Arts. Most students declare a visual and performing arts major with a concentration in art history after completing the general survey sequence (AH 10-12, 15).

Requirements

Visual and Performing Arts Major with a Concentration in Art History

For a 30-credit visual and performing arts major with a concentration in art history, students:

1. Complete two of the following introductory courses (six credits)

   **Introductory**
   - AH 10 Origins and Transformations in Western Art
   - AH 11 Visual Culture Since 1400: Expression and Experimentation
   - AH 12 Arts of Asia, Africa, and the Americas
   - AH 15 History of Architecture

2. Complete two of the 100-level courses (six credits)

   - AH 100 Arts of India, China and Japan
   - AH 109 Jewish Art: Moses to Modernity
   - AH 110 Ancient Near East, Egypt, Aegean Bronze Age
   - AH 111 Greek Art and Archaeology
   - AH 112 Etruscan and Roman Art and Archaeology

3. Complete one of the 200-level courses (three credits)

   - AH 209 MMA Plaster Cast Collection at Fairfield
   - AH 210 Myth in Classical Art
   - AH 213 Through Egyptian Eyes: Enigmatic Aspects of Ancient Egyptian Art (*UC only)
   - AH 221 The Arts of Ireland and the British Isles, 500-1000
   - AH 242 The Arts of Spain and Its World, 1474 to 1700
   - AH 275 Contemporary Art
   - AH 290 Special Topics Seminar
   - AH 295 Museum/Gallery Curating

4. Complete junior and senior seminars (six credits)

   - AH 320 Junior Seminar (fall semester of junior year)
   - AH 330 Senior Capstone Seminar (spring semester of senior year)

5. Complete three art history courses at the 100-level or higher (nine credits)

6. Other courses available to advanced students (only one can be counted toward the Art History Major)

   - AH 300 Independent Study
   - AH 310 Internship
AH 12 Introduction to the Art History of Asia, Africa, and the Americas (H)
This introductory lecture course examines artworks and architecture from each continent to understand the respective traditions of Asia, Africa, and the Americas, emphasizing a selection of examples within a chronological sequence. It studies material culture from each of the three areas using different art historical approaches. India, China, and Japan form the basis for the study of Asia. Cultures designated by their geographical locations provide a frame of study for African Art. Pre-Columbian, Northwest coast, and Native American visual arts represent the Americas.

The course emphasizes art collections in New Haven and New York City, and one bus trip during the semester affords students a first-hand experience studying original works of art. This course meets the world diversity requirement. Three credits.

AH 15 History of Architecture (H)
This introductory course surveys the major periods and key monuments in the history of architecture – largely in the West – from antiquity to the present. Topics include Greek and Roman temples and civic architecture; Medieval mosques and cathedrals; Renaissance and Baroque cities and their monuments; Early Modern factories and gardens; Machine Age museums and houses; and contemporary architectural developments of all sorts. Students will work with actual buildings in writing assignments, and learn the skills necessary to critique and interpret the built environment of the past and present in the United States and beyond.

Three credits.

AH 100 Arts of India, China, and Japan (H)
This survey of the art and architectural history of three major civilizations in Asia studies sacred and secular material culture in painting, sculpture, and architecture during the formation and development of each civilization, comparing them with their modern achievements. In each instance the scope of history covers at least three millennia. Foci include the Mauryan, Kushan, and Gupta periods in India; the Chou, Han, T'ang, Song, and Ch'ing dynasties in China; and the Nara, Heian, Kamakura, Edo, Tokugawa, and Meiji periods in Japan. The course emphasizes contrasting periods of isolation and open contact between these civilizations and with those in the West and highlights collections of Asian art at Yale University and in New York City during the course and on trips to study these collections. This course meets the world diversity requirement. Three credits.

Course Descriptions
Note: All courses have history/theory credit toward the Visual and Performing Arts component of the University core curriculum.

A = Applied
H = History

AH 10 Origins and Transformations in Western Art (H)
From the mysterious depths of Paleolithic cave painting to the soaring heights of Gothic cathedral vaulting, this course surveys the early history of Western art. The course begins with the origins of art-making in prehistoric, Mesopotamian, Egyptian, Greek, and Roman cultures before viewing the transformations of these ancient arts traditions in early Christian and medieval societies. The course offers students a working vocabulary with which to compose visual analyses of works of art and evaluate them in a social and historical context. One class takes place at the Metropolitan Museum of Art in New York City. Three credits.

AH 11 Visual Culture Since 1400: Expression and Experimentation (H)
This course explores the ways in which people use images to record their world. From the development of linear perspective in the early Renaissance to the assimilation of advances in optical sciences in the baroque period and the incorporation of photography in the 19th century, art has responded to technological advances and created distinct and expressive visual cultures. By exploring painting, sculpture, the graphic arts, and architecture, students learn to analyze how the contemporary world is designed and defined by a visual heritage that incorporates historical images into film, television, and advertising. One class takes place at the Metropolitan Museum of Art in New York City. Three credits.
AH 109  Jewish Art: Moses to Modernity (H)
The earliest known written description of the Jewish people is a visual record on an ancient victory monument. Dated from the 13th century B.C.E., a carved stele dedicated to Pharaoh Merneptah presents a hieroglyphic relief inauspiciously boasting: “Israel is laid waste, his seed is no more.” Tracing 4,000 years of Jewish art, culture, and ritual, this course is a panoramic overview of visual expression of a people wandering through six continents, innumerable styles and artistic identities. How did the ineffable theophany at Sinai spark the complexity of Judaism’s struggle with Greco-Roman pagan idolatry versus attempts at capturing the “spirit of God with wisdom and discernment and the knowledge of workmanship to design designs” [Exodus 35] transforming spirituality into a living art? Three credits.

AH 110  The Ancient Near East, Egypt, and the Aegean Bronze Age (H)
This course surveys the cities and sanctuaries that flourished in Mesopotamia (Ur, Babylon, Nineveh, Persepolis), Egypt (Thebes, Amarna, Karnak, Luxor) and the Aegean basin (the Cycladic Islands, Crete, Thera, Troy, Mycenae, Pylos) as early as 3000 B.C.E. – with the invention of writing – and studies their domination of the eastern Mediterranean into the first millennium B.C.E. The course analyzes the distinctive artistic developments and architectural forms of these three enduring cultures as well as their impact on Western civilization. It emphasizes objects in area museums and includes field trips. Three credits.

AH 111  Greek Art and Archaeology (H)
This course covers the major developments in architecture, sculpture, and painting from the time of Homer to the collapse of the Hellenistic world. The course considers the formation of the Pan-Hellenic sanctuaries of Olympia and Delphi in the geometric and archaic periods and the rise of democracy under the leadership of Pericles in Athens, culminating in the Parthenon of the high classical period and the creation of an empire under Alexander the Great. Students explore the legacy of Greek achievement in the context of its impact on the Roman world and later art. The course emphasizes objects in area museums and includes field trips. Three credits.

AH 112  Etruscan and Roman Art and Archaeology (H)
This course surveys the art of the Etruscans, predecessors to the Romans on the Italica peninsula, and its impact on the Roman Republic. The course traces the development of Roman art and archaeology from the Republic to the late empire, and from the center of Rome and the achievements of Augustus to the official recognition of Christianity by Constantine the Great. Students consider the influence of the Greek legacy and Roman developments. The course emphasizes objects in area museums and includes field trips. Three credits.

AH 113  Art and Archaeology of Ancient Egypt: Images for Eternity (H)
This course, devoted to the history of ancient Egyptian art from the pre-dynastic period (4200 B.C.E.) to its last manifestation in the time of the Roman occupation (100 C.E.), focuses on major themes, important stylistic movements, and selected masterpieces of Egyptian architecture, sculpture, relief, painting, and minor arts. Students consider the formation of major arts in the pre-dynastic period; great monuments of the Old Kingdom such as Djoser, Khufu, and Khafre pyramid complexes; classical art of the Middle Kingdom with the royal temples, pyramids, and tombs at Lisht and Deir el Bahari; New Kingdom temples at Karnak and Luxor; and the splendor and revolution of Amarna art. The course emphasizes objects in area collections, especially in the Metropolitan Museum of Art. Three credits.

AH 115  The Archaeology of Athens (H)
This course comprises a chronological survey of the physical remains of the ancient city of Athens and the Attic peninsula from the Prehistoric age through the Late Roman period (30,000 B.C. - 6th century A.D.). Recent systematic excavations within the modern city have revealed a substantial amount of new information about ancient Athens, particularly during the Roman period. Students study the growing archaeological record including the results of recent excavations to gain an understanding of the ancient city through material finds. One class on location is scheduled at the Metropolitan Museum of Art. On campus, students study the Metropolitan Museum of Art Cast Collection with particular emphasis on important examples from Athens and Attica during the Greek Archaic and Classical periods, and from the Roman period. Three credits.

AH 120  Medieval Art of Western Europe (H)
This introduction to medieval art and architecture in Western Europe – from its Roman, Jewish, and early Christian sources to the Gothic period – explores continuity and change in art and society, including relationships to Islamic and Byzantine art. Themes of the course include the relationship of belief and ritual to religious imagery and architecture, the impact of imperial and ecclesiastical patronage, and the influence of other cultures on art forms and iconography. The course includes a field trip to the Cloisters Collection in New York City. Three credits.
AH 121 Celtic and Early Irish Art (H)
This course explores the art of the Celtic Empire, which at its height encompassed modern-day Greece, Asia Minor, the Balkans, the Holy Land, North Africa and parts of Italy. From Constantinople’s inauguration as the capital of the Roman Empire in A.D. 330 to its fall in 1453, the course traces Byzantine art’s pagan, early Christian, Jewish, and Islamic sources to its impact on the development of the arts of Western Europe and Russia. Major themes of the course include: religious imagery and architecture of the Eastern church; cultural exchange and influence; and the impact of imperial patronage. Three credits.

AH 122 Byzantine Art (H)
This course examines the art of the Byzantine Empire, which at its height encompassed modern-day Greece, Asia Minor, the Balkans, the Holy Land, North Africa and parts of Italy. From Constantinople’s inauguration as the capital of the Roman Empire in A.D. 330 to its fall in 1453, the course traces Byzantine art’s pagan, early Christian, Jewish, and Islamic sources to its impact on the development of the arts of Western Europe and Russia. Major themes of the course include: religious imagery and architecture of the Eastern church; cultural exchange and influence; and the impact of imperial patronage. Three credits.

AH 123 Northern Renaissance Art (H)
This course surveys the arts of painting, printmaking, and sculpture in the northern and southern Netherlands, Germany, and France from 1400 to 1600. Students consider the work of major masters such as Jan van Eyck, Hieronymus Bosch, Albrecht Dürer, and Pieter Bruegel as well as the development of certain themes – the depiction of popular proverbs, landscape scenes, and scenes of daily life, for example – that were particularly popular in northern art. The course emphasizes the relationship of the arts to the rest of society. Students examine works in local collections and travel to the Metropolitan Museum of Art in New York, which has a superb collection of northern Renaissance art. Previously listed as AH 230. Three credits.

AH 124 Early Renaissance Art in Italy (H)
Beyond the introductory survey of the major masters and monuments of the early Italian Renaissance, this course offers an in-depth study of several paradigm projects created between 1300 and 1500. With a diverse tool box of practical and art historical methods, we focus on selected artistic initiatives spanning some major monuments and lesser known, but equally intriguing contributions by second-tier artists. Our task is to study key works of Duccio, Giotto, Lorenzetti, Brunelleschi, Alberti, Ghiberti, Donatello, Masaccio, Fra Angelico, Uccello, Castagno, Piero, Ghirlandaio, Botticelli, Mantegna, Giovanni Bellini, Perugino, Leonardo, and juvenile works by Raphael and Michelangelo. Three credits.

AH 125 High Renaissance and Mannerism in Italy
This course examines the achievements of Italian artists during one of the richest periods in art history. Beginning in Florence and Rome, the course traces the rise of artistic giants such as Leonardo da Vinci, Michelangelo, and Raphael, whose work has come to define the High Renaissance. The course then proceeds to the innovations of Mannerist artists such as Pontormo, Bronzino, Correggio, as well as the reaction to these artists in the wake of religious reforms established in the 1560s at the Council of Trent. Throughout, the course examines works of art within the context of Italian society and culture. Three credits.

AH 126 Renaissance and Baroque Architecture (H)
This survey of the architecture and urbanism of 15th-through early 18th-century Europe and its colonial world addresses topics such as the Renaissance revival of antiquity and its impact on architecture, the changing nature of architectural practice, the role of religious orders like the Jesuits in the dissemination of architectural style and taste, and the importance of illustrated books in advancing theoretical and practical notions about architecture and the city. The course term paper assignment considers the legacy of Renaissance and baroque architecture in the northeastern United States. Three credits.

AH 127 Baroque Art (H)
The 17th century in Europe was marked by profound shifts in politics, religion, and culture, which are reflected in the art produced during then. This course surveys painting, sculpture, architecture, and urbanism of the Baroque era, with a focus on Italy, Spain, and France. Among the themes explored are: the impact of religious reform on the visual arts of Catholic lands; the notion of classicism as an artistic ideal; the role of academies and the market in promoting the arts; the phenomenal output of portraiture and self-portraiture; and the shaping of cities as works of art. Three credits.
AH 150 Neoclassical and Romantic Art (H)
This survey of art and architecture during the turbulent 18th and 19th centuries in Europe and America includes the neo-classical style favored by Napoleon and Jefferson, the dramatic emotionalism of the Romantic era, the clarity of realist style, and the revolutionary invention of photography. This course is recommended as the basis for studying 20th-century painting. Three credits.

AH 152 Modern Art (H)
This course examines the shifting styles and currents of modern art from the realists Courbet and Manet, and their contemporaries, to the rebellious years of the Impressionists. The course explores the 20th century from the Fauvists’ expansion of color to the new spatial-physics of cubism under Picasso, and documents the triumphs and failures of modern civilization in the experimental efforts of the constructivists, Dadaists, surrealists, and abstract expressionists. A principal concern in the course is the question: What is the artist of the 20th century telling us about our world? Three credits.

AH 154 Impressionism and Post-Impressionism (H)
This course studies the 19th-century French art movement that revolutionized painting, covering Monet, Manet, Renoir, and Pissarro along with their contemporaries in Paris, their students, and their followers. It also studies the post-impressionists and their innovations and includes museum trips to study original works. Three credits.

AH 161 American Architecture (H)
This course examines the art of building in America from pre-Columbian times to the present, including tradition, economics, engineering, and environmental factors influencing its development. Students examine the home, the church, the school, the business center, and the sports complex as reflections of the American way of life, emphasizing the architecture of today. The course develops an understanding of the man-made environment and its special relations to individuals and to society. Three credits.

AH 163 American Art: Colonial to Civil War (H)
The first two centuries of American art reflect the dramatic individualism of the early settlers; English, Dutch and Spanish immigrants created varied and vigorous styles of art and architecture. The course examines these styles, from Colonial towns and plantations to Federal architecture commissioned by Washington and Jefferson, as well as vividly realistic images of the Civil War by Winslow Homer and photographer Matthew Brady. American history and American studies students find this course, which includes field trips focused on original architecture, painting, and furniture in public and private collections, useful. Three credits.

AH 164 American Art: Civil War to Civil Rights (H)
This course examines the arts and architecture of the early republic introduced in AH 163, expanding into the major movements and masters of American art from the Civil War to the present. In tracing the themes and artistic statements of American artists the course takes special notice of unifying national myths such as the Founding Fathers, Manifest Destiny, America as the new Eden, the frontier from the Rockies to the lunar surface, heroes from Davy Crockett to Superman, and America as utopia. Through the masterpieces of Church, Cole, Homer, Eakins, Sloan, Hopper, Pollock, Rothko, Wyeth, Warhol, and the Downtown art scene, the course answers the question: What is uniquely American about American art? Three credits.

AH 165 The Black Experience: African-American Art and Criticism in the 20th Century (H)
This course explores Black art and culture in the 20th century, focusing on the art works themselves and how these works use Black culture as subject and context. It traces the development of African-American art from the social upheavals and rapid identity transformations of the Civil War era through World War I, to the emergence of the “New Negro” of the Harlem Renaissance and Jazz Age, to the return of Black folk imagery in Depression and post-Depression art, to the social and political awareness of the Civil Rights era, to the reconsideration of “blackness” explored during the feminist and postmodern decades. The course gives equal consideration throughout to the artistic dialogue including text, criticism, and video. This course meets the U.S. diversity requirement. Three credits.

AH 172 History of Photography (H)
Photography, one of the youngest artistic media, is the medium most evident in and crucial to 20th-century culture. This course traces the history of photography in the 19th and 20th centuries, emphasizing the interplay between the growth of photography as an art form and technological developments of the medium, and the multiple functions photography fills in modern and postmodern culture. The course stresses photographic movements and the work of individual photographers and analyzes the relationship of photography to other art forms. Three credits.
AH 191  Art and Mythologies of Nazi Germany, Fascist Italy, Bolshevik Russia: Comparative Systems/Outcomes (H)
This interdisciplinary approach to the visual Zeitgeist of these major political/national crises in Europe between 1917 and 1945 surveys the visual rhetoric of Nazi Germany, Fascist Italy, and Bolshevik Russia through the widest possible definition of the visual arts. The course includes the traditional fine arts of painting, sculpture, and architecture as well as the mass cultural outlets of film, radio, propaganda posters, and the staging of public events. The class eliminates the distinctions between high and utilitarian mediums of expression; all means of persuasion are fair game. This course allows students to better understand the complexities of these political/nationalist issues; the “window” is the lens provided by the visual arts and mass media. In doing so, students recognize how the symbolic languages of mythology were married to political ideologies and shaped public opinion from the national consciousness. Three credits.

AH 209  The Metropolitan Museum of Art Plaster Cast Collection at Fairfield University (H)
Students will study the history of plaster cast collections in Europe and the U.S. including Fairfield’s growing collection. Emphasis will be given to the Fairfield collection by conducting research on the new gifts of plaster casts. Students will write individual entries for museum labels and the website. Students will clean and apply light restoration to plaster casts in preparation for their eventual display in different areas on campus. Class visits to the Slater Museum, the Institute for Classical Architecture and the Metropolitan Museum of Art will be scheduled. Consultation with curators and sculptors will provide additional guidance to students. Three credits.

AH 210  Myth in Classical Art (H)
Greek and Roman art serve as a rich depository of Greek mythology with a wide range of representations that evolved across the centuries. As a source of information, classical art sometimes preserves myths that are otherwise unknown in the surviving literature. In some cases visual representations date earlier than an extant literary description or differ in the story details. This course focuses on ancient sources – visual and literary – to study the Olympian gods; the heroes, Perseus, Herakles, Theseus, and Odysseus; the Trojan War; and battles such as the gods and giants, Lapiths and Centaurs, and Amazons and Greeks. The course compares the appearance of certain of these myths on specific monuments during certain periods in the classical world, emphasizing examples in the Metropolitan Museum of Art, the Yale University Art Gallery, and the Metropolitan Museum of Art Cast Collection at Fairfield. (Prerequisite: one 100-level or lower art history course or permission of the instructor) Three credits.

AH 213  Through Egyptian Eyes: Enigmatic Aspects of Ancient Egyptian Art (H)
This course examines the conventions, religious functions, philosophical conceptions, symbolism, and magic that underlie ancient Egypt by exploring several puzzling questions: Can we really comprehend ancient Egyptian masterpieces just by looking at them? Can we rely on ancient Egyptian sculpture and painting to reflect Egyptians’ physical appearance, cults, and habits? Can we call Egyptian art “art” or Egyptian portraits “portraits”? What is the difference between Egyptian writing and representations? What could Egyptians themselves appreciate in the art of Akhenaten and Nefertiti: its innovation or its traditionalism? What is the difference between tradition and archaism in ancient Egyptian art? (*UC only) Three credits.

AH 221  The Arts of Ireland and the British Isles, 500-1000 (H)
This course explores the art and architecture produced in Ireland, Northumbria, and Scotland during the early medieval period, often called the “Golden Age” of insular art. It was an era of rich cultural exchange during which Irish and continental monks were instrumental in the spread of Christianity throughout the British Isles; Irish settled in Scotland; the Anglo-Saxon kingdom was established in England; and Vikings invaded Ireland and Britain. Arts in all media combined pre-Christian Celtic and Germanic traditions with new Christian forms. Irish monasteries throughout the British Isles were centers of production for sumptuous manuscripts such as the Book of Kells and liturgical vessels including the Ardagh Chalice. Monastic architecture and high crosses will also be considered, as well as secular objects such as aristocratic jewelry. Three credits.

AH 242  The Arts of Spain and Its World, 1474 to 1700 (H)
This course surveys the art and architecture produced in the complex cultural landscape of early modern Spain. Students examine art traditionally termed Renaissance and baroque in the context of Spain’s multicultural past and its ever-expanding role in the Mediterranean and Atlantic worlds. Topics include the role of art collections in introducing foreign tastes to Spain, Philip II as a patron of the arts, the building and decoration of El Escorial and the Alcázar in Madrid, Diego Velázquez and the notion of a courtier-artist, the architecture of the Churriguera family, and the colonial art and architecture of the viceregalities of Mexico and Peru. Three credits.
AH 275  Contemporary Art (H)
This course offers a historical, critical, and stylistic analysis of major trends in contemporary art in Europe and the United States such as abstract expressionism, pop art, minimalism, conceptual art, neodada, neo-expressionism, postmodernism, and feminist art, giving special consideration to artist dialogue (text and video) and criticism. The course specifically examines artistic dialogue against the broader cultural, political, social, and philosophical context of the artwork. The course emphasizes objects in area museums and includes one class on location at the Museum of Modern Art in New York City. Previously listed as AH 175. Three credits.

AH 290  Special Topics Seminar (H)
Students conduct an in-depth study of a specific subject in the history of art. Open to invited students only. Three credits.

AH 295  Museum/Gallery Curating (H)
This course explores the role of the museum and gallery curator as well as the curator’s responsibilities to the object, the museum, and collectors; and federal and corporate funding. The course includes field trips. Three credits.

AH 300  Independent Study (H)
This in-depth exploration of a specific topic in art history involves students in independent research and field study. Open to students with approval of a faculty member and the director of the Art History program. Three credits.

AH 310  Internship (H)(A)
Qualified art history and studio art majors learn museum planning, and organizational and exhibition techniques by working on gallery exhibits at the Walsh Art Gallery in the Regina A. Quick Center for the Arts. In addition, students may be placed in regional art institutions such as historical societies, museums, auction houses, and art galleries for professional internships. These highly selective internship opportunities require permission from the director of internships in the Art History program before registration. Three credits.

AH 320  Junior Seminar (H)
Required of all art history majors in the fall semester of the junior year. The seminar introduces students to the history of the discipline of Art History. Students learn the different methods and approaches art historians use to study works of art, and apply these approaches through discussion and writing assignments. Three credits.

AH 330  Senior Capstone Seminar (H)
Required of all art history majors in the spring semester of the senior year, this seminar offers rotating topics that reflect the areas of expertise and research among Fairfield’s art history faculty members. Three credits.
Students may earn a major in visual and performing arts with a concentration in classical music, a major in visual and performing arts with a concentration in jazz/popular music, or minors in either concentration. The minors allow talented music students to engage in a serious minor that offers a challenging addition to their chosen major, thus continuing to develop their knowledge and skills in music.

Music Major with a minor in K-12 Music Education

Students majoring in music may also minor in K-12 music education (see program in Education, page 89). Please contact Dr. Laura Nash or the chair of the Curriculum and Instruction department for additional information about minoring in music education. In addition to required ED courses and student teaching, the following Music Courses are required: MU 360, 361, 362, and 363.

Qualified students minoring or majoring in music are given preferred admission status in the graduate education programs and are warmly invited to consult about options with their advisors and with the chair of the Curriculum and Instruction department about this opportunity.

For information about ensemble groups and applied lessons, students are encouraged to contact the following faculty members:

*Orchestra:* Laura Nash  
*Jazz Ensemble:* Brian Torff  
*Glee Club/Chamber Singers:* Carole Ann Maxwell  
*Band:* Duane Melzer  
*Applied Music Lessons:* Laura Nash

Applied Music Lessons

The department provides private lesson instruction for all students and University members in most areas of music performance. Instruction carries an extra charge beyond tuition and includes 10 private lessons per semester. Students may enroll for 45 minute lessons and earn 1 credit or one hour lessons and earn 2 credits. Lesson times are arranged individually with the instructor.

These credits do not count towards the 38 three-credit courses required for graduation. Students interested in registering for lessons must do so before the end of the Add/Drop period as identified on the University Academic Calendar. More information and registration forms are available from the Department coordinator in Canisius Hall, Room 3.

Lesson fees for the 2008-09 academic year are:

- Ten – one-hour lessons: $475 (two credits)
- Ten – 45-minute lessons: $400 (one credit)

Visual and Performing Arts Major with a Concentration in Classical Music

For a 30-credit visual and performing arts major with a concentration in classical music, students complete:

- MU 103 Early Survey of Musical Styles  

**OR**

- MU 104 Late Survey of Musical Styles

- MU 150 Music Theory and Composition I
- MU 250 Music Theory and Composition II
- Three to five additional courses at the 100- or 200-level
- One to two courses at the 300-level, with permission of faculty
- Up to six performance credits (lessons or performing groups) may be applied to the major

Visual and Performing Arts Major with a Concentration in Jazz/Popular Music

For a 30-credit visual and performing arts major with a concentration in jazz/popular music, students:

- Complete two of the following applied music courses:
  - MU 155 Jazz Theory and Improvisation (A)
  - MU 156 Intro to Midi and Music Software (A)
  - MU 158 Introduction to Recording Techniques (A)
- Complete six credits in MU 256 Jazz Ensemble (one credit per semester). Music lessons may be substituted for Jazz Ensemble with permission of Professor Torff.
Visual and Performing Arts

• Complete four to five of the following courses.
  • MU 101 History of Jazz (H)
  • MU 102 History and Development of Rock (H)
  • MU 112 The Music of Black Americans (H)
  • MU 122 World Music History and Ensemble (A)
  • MU 157 Introduction to the Music Industry (A)
  • MU 201 Critical Issues in American Popular Music: Blues to Hip Hop (H)
  • MU 294 Music Industry: Principles and Practices

Visual and Performing Arts Minor with a Concentration in Classical Music

For an 18-credit visual and performing arts minor with a concentration in classical music, students:

• Complete MU 103 OR MU 104
• Complete MU 150 Music Theory and Composition I
• Complete MU 250 Music Theory and Composition II
• Complete one additional elective music course
• Earn six performance credits from music lessons or group performance participation or two additional courses in music theory or music history.

Visual and Performing Arts Minor with a Concentration in Jazz/Popular Music

For an 18-credit visual and performing arts minor with a concentration in jazz/popular music, students:

• Complete MU 101 History of Jazz
• Complete three of the following courses in music history or music theory:
  • MU 102 History and Development of Rock
  • MU 112 The Music of Black Americans
  • MU 122 World Music History and Ensemble
  • MU 156 Introduction to Midi and Music Software
  • MU 157 Music Industry I
  • MU 158 Recording Techniques
  • MU 201 Critical Issues in American Popular Music: Blues to Hip Hop
  • MU 294 Music Industry III

Earn six credits in MU 256 Jazz Ensemble or in individual lessons or take two additional music courses.

Music History Courses

MU 101 The History of Jazz (H)
This course traces the development of American jazz from its origins in African-American musical traditions. Students examine the roots of jazz in ragtime, blues, work songs, and march music and study the development of different jazz styles such as Dixieland in the '20s, swing in the '30s, bop in the '40s, and continuing to the present. The course emphasizes the connection between historical periods and the music of jazz — America's original art music. This course meets the U.S. diversity requirement. Three credits.

MU 102 The History and Development of Rock (H)
This course surveys the musical and social trends that resulted in the emergence of rock and roll as an important musical and cultural force in America. The course traces the roots of rock, blues, and country styles, showing how they merged with popular music. Students examine periods from the 1950s to the present, along with Elvis Presley, Chuck Berry, Little Richard, the Beatles, the British invasion, folk music, Bob Dylan, jazz and art rock, Jimi Hendrix, the west coast movement, and the music industry. Students learn to understand, discuss, and differentiate between stylistic periods and their historical relevance to American culture. Three credits.

MU 103 Early Survey of Musical Styles (H)
From the humble beginnings of prayer set to chant, through the golden age of polyphony, to the masters of the baroque, this course surveys the origin of western art music. Students learn the basic elements of music and chart the evolution of these elements through the centuries. Students also learn about the cultural and intellectual environment that gave birth to different music genres and styles. Three credits.

MU 104 Late Survey of Musical Styles (H)
This course explores the ways in which composers manipulated musical language to meet the growing demands of the middle class. After learning the basic elements of music, students explore the world of the Enlightenment and Haydn, Mozart, and Beethoven. In the romantic period, the course explores the interaction of all the arts and the influence of politics and economics on compositional style. With the dawn of the 20th century, the course explores what “modern” means, learns about attempts to expand and replace musical language, and studies the impact of American culture on music. Three credits.
MU 111  The Life and Music of George Gershwin (H)
This course focuses on the life and music of one of America's greatest composers, George Gershwin. Gershwin is beloved for his popular songs written for Broadway shows and Hollywood musicals, and concert works such as Rhapsody in Blue and An American in Paris. His fascinating life illuminates the decades of the 1920s and 1930s. This course studies his life and music through readings, movies, listening, and class discussion. Three credits.

MU 120  The History of American Song (H)
This course examines the history of our most popular form of American music — the song. It explores the origins of song, as well as popular American songwriters, singers, and styles of songs from a historical perspective and as a mirror of today's society. Three credits.

MU 124  Bach and Beethoven (H)
This course examines the lives and music of two masters. The first half of the course explores the great secular and religious music of Johann Sebastian Bach, the last great exponent of baroque style. The second half of the course investigates the life and works of Ludwig van Beethoven, the composer who, more than any other, represents the struggle for artistic truth. Three credits.

MU 125  Women in Music (H)
This study of the contributions made by women to music includes the work of women from the ninth century through the present, focusing on their work in four main areas: as teachers, composers, performers, and patrons. Studies include women from medieval times through today, with special emphasis on women in music in America. The course considers these women in relationship to their artistic accomplishments and also from an intellectual and cultural historical perspective. Three credits.

MU 126  History of Choral Music (H)
From Palestrina's masses to Verdi's Requiem, this course explores the history of music through choral music. The composers themselves often considered these masterpieces to be the culmination of their compositional development and work. A basic ability to read music is helpful. Three credits.

MU 201  Critical Issues in American Popular Music: Blues to Hip Hop (H)
This upper level lecture course provides an in-depth look at the important musical, social, and racial issues in American popular music, from the media exploitation of the blues in the 1920s through current issues in hip hop. Subject areas will include blues and its origins, jazz and modernism, the obstacles of race in music, the death of rhythm and blues, rock's evolution in the '50s, rap and hip hop culture, and issues in both postmodernism and perverse as seen by many music and art critics. (Prerequisite: MU 101, MU 102, or MU 112.) This course meets the U.S. diversity requirement. Three credits.

MU 242  Music of the Classical Era (H)
During the classical era (about 1750 to 1830), music shifted from an aristocratic concern to the favorite popular art of the middle class. The course examines the lives and music of the three most important composers of this period: Haydn, Mozart, and Beethoven. Three credits.
MU 243 19th-Century Romanticism in Music (H)
This comprehensive survey of 19th-century romanticism in music considers the music of Beethoven, Chopin, Verdi, and Wagner, among others. The music of the romantic era contains some of the richest masterpieces in music history. The course considers the relationship between music and the other arts. Three credits.

MU 244 Music of the 20th Century (H)
This introduction to the mainstreams of music of our time begins with Debussy, Ravel, and the French moderns. After investigating the music of Stravinsky, Bartók, and other European composers, the course concludes with such modern trends as electronic music, film music, jazz, and popular music. Three credits.

Music Theory Courses

MU 113 Introduction to Piano and the Elements of Music (A)
This lab performance class enables students to learn the piano keyboard, basic note-reading, and important fundamental musical concepts. No prior piano experience is required. Students gain an understanding of music in the areas of melody, rhythm, harmony, and form. Keyboard skills, technique, and performance of folk songs, simple classical pieces, blues, boogie-woogie, ragtime, and popular music are covered. Three credits.

MU 150 Music Theory and Composition I (A)
This course introduces students to the basic concepts of music theory and beginning compositional skills. Starting with the notation of pitch and rhythm, the course investigates the major/minor key system, intervals, chord construction, melody writing, and rudimentary harmonization. No background in music is expected. Three credits.

MU 155 Jazz Theory, Keyboard Harmony, and Improvisation (A)
This course, designed for majors and minors in jazz performance, gives students a working knowledge of jazz and pop harmony. Students attain keyboard proficiency through an emphasis on ear-training, voicings, tritone substitutions, and improvisation theory; this proficiency can be used on other instruments. Students learn all upper-structure chords in all keys as well as ways to improvise on various chord structures. Students should be able to play through lead sheet material with reasonable proficiency using jazz voicings and voice-leading techniques. Basic knowledge of the keyboard is recommended, but the course is open to all instrumentalists and vocalists. (Prerequisite: permission of the instructor) Three credits.

MU 250 Music Theory and Composition II (A)
In this continuation of MU 150 students build a theoretical and compositional foundation by studying 7th chords, part-writing, harmonic progressions, and chromatic harmony. In addition, students compose original melodies and learn how to harmonize them, and undertake simple analysis projects to further understand how music is put together. (Prerequisite: MU 150 or permission of instructor) Three credits.

MU 294 Music Industry: Principles and Practices (A)
This course builds on students' knowledge of the music industry in a practical and detailed way. The course briefly revisits the history and process of the music business as explored in MU 157 and uses detailed discussion to apply specific music business knowledge to the decision-making process within the industry. Focused attention includes legal issues and music-industry contracts; licensing; the roles of managers, booking agents, and concert promoters; recording studios; music publishing; distribution in the North American and international territories; and a technology update. Three credits.
Performance Courses

MU 55  Varsity Band (A)
The Varsity Band performs for the men’s and women’s basketball games and is open to all students with a musical background on guitar, bass, keyboard, drums, sax, clarinet, trumpet, trombone, tuba, and flute. The course requires regular attendance at weekly practices arranged with the instructor. One credit.

MU 255  Symphony Orchestra (A)
This ensemble helps instrumental musicians develop their skills further through public concert performances in a symphonic orchestra. Students learn ensemble performance ethics and stylistic interpretation. This course may be taken repeatedly. (Prerequisite: orchestra or symphonic band performance experience) One credit.

MU 256  Jazz Ensemble (A)
Jazz Ensemble is open to musicians who wish to develop their skills in jazz performance. Students rehearse and receive instruction in performing and improvising in different styles of jazz, from swing to fusion. This course may be taken repeatedly. (Prerequisites: instrumental or vocal performance experience; selection through audition) One credit.

MU 257  Chamber Singers (A)
This is a mixed choral ensemble dedicated to the learning and performing of significant chamber choir repertoire. Members of this highly competitive group are drawn from the larger Fairfield University Glee Club. Membership is by audition only. One credit.

MU 259  Concert Band (A)
This ensemble is open to all students with experience performing on wind, percussion instruments, string bass, piano, and harp and allows them to continue developing their ensemble skills. We perform a minimum of two concerts per academic year with literature in a variety of styles including classical, symphonic, popular, and motion picture music. (Prerequisites: Must have some experience on your instrument and playing in an ensemble; permission from the instructor) One credit.
Independent Study
and Internship Courses

MU 300  Independent Study in Music (H)(A)
By arrangement with music faculty, students work independently on special topics within the field of music. Open to music majors and minors only. (Prerequisite: permission of music faculty) Three credits.

MU 301 Independent Study in Music Theory (A)
By arrangement with music faculty, students continue the work of MU 250 with an advanced study of music theory and composition. This course may be taken more than once. Open to music majors and minors only. (Prerequisite: permission of music faculty) Three credits.

MU 305 Performing Arts Management Internship (A)
Internships are available in a number of organizations. Students receive semester credit in exchange for working a minimum of 10 hours per week. Students may count no more than six credits towards a major, and no more than three credits towards a minor. Open to music majors and minors only. (Prerequisite: permission of music faculty) Three credits.

MU 310-311 Senior Capstone Project
The capstone project provides opportunities for majors to work at a very high level, reflecting their expertise and ongoing research. (Prerequisite: permission of music faculty) Three credits per semester.

The New Media Film, Television, and Radio major and minor provide a coherent awareness of the aesthetic, artistic, and communicative power of these varied media by offering courses in theory, history, genres, styles, and structures with hands-on production courses. The program curriculum reflects the convergence of traditional media of film, television, and radio into new media of creative possibilities. Students learn the theory and collaborative practice of all aspects of visual storytelling: writing, moving-image design, producing, directing, cinematography, sound design, digital imaging, and editing.

Students understand the expressive power of these media and experiment with their own creative voices, engaging their imagination and intellect with the tools of these crafts. Many of the program’s faculty members come from the ranks of working professionals, ensuring that information transmitted in the classroom is at the cutting edge of the field.

New Media courses focus on new digital technologies as they relate to the sound and moving image of film, television, and radio. Nonlinear narrative theory and technique, computer graphics, two- and three-dimensional animation, multimedia network communications, CD-ROM, and DVD production are featured.

Film track courses survey the origins and development of motion picture art; analyze periods, genres, and styles of filmmaking; and offer hands-on experience in film production technique. In production courses, students are introduced to the collaborative, creative process of filmmaking, with an emphasis on storytelling through a broad spectrum of aesthetic approaches. Student films produced in these courses are showcased in a campus film festival — Cinefest Fairfield — and are Web-streamed over the University’s Web page.
Television track courses survey the technological and stylistic history of the medium; the particular visual and audio language of television texts; the genres, narrative, and generic conventions of television; and hands-on production experience designed to teach skills in studio and remote television production. In the production courses, students produce programs of a variety of familiar genres but are encouraged to push the creative boundaries of the medium. Student programs air on a regular nightly schedule on the HAM Channel, the student-broadcast television station, and are Web-streamed.

Radio track track courses survey the programmatic and technical development of the medium; sound development and recording techniques; and broadcast production and management. Production courses contribute programming to WVOF, the University’s FM station, and to its Web-streaming address.

The home of the program is in the University’s award-winning Media Center, a 15,000-square-foot facility on the ground floor of Xavier Hall. The Media Center facility consists of two fully equipped television studios and control rooms, a head-end satellite downlink and distribution center, three nonlinear editing suites with more than 30 editing bays, two media class and screening rooms, a digital-imaging lab, and offices for Media Center personnel and equipment distribution. We have a new custom-designed 32-foot Mobile Satellite Uplink Production truck with high definition cameras and a Grass Valley Switcher — for productions of our students and staff. This truck enables Fairfield to produce sports, news, public affairs, and entertainment programs virtually anywhere, with immediate broadcast via satellite to the nation or the world. The Media Center is also home to the student television channel, The HAM Channel, with offices and work areas for their production efforts.

Full-time personnel of the Media Center are professional video and digital producers, writers, editors, and design and repair technicians, and many also teach courses within the program.

The Media Center is the home to the Resource Center for Advanced Digital Exploration. RCADE offers a collaborative setting for University students, staff, and faculty to use new media technologies for research, teaching, and imaginative work. It offers a regular schedule of free workshops on digital hardware, including digital still and video cameras, and digital software products such as Photoshop, Illustrator, Dreamweaver, Flash, Final Draft and digital editing with Pro-Tools, Final Cut Pro and Avid. Students in the New Media Film, Television and Radio program are welcome to supplement their course work with RCADE workshops.

Majors are also encouraged to explore the interconnections between this program and other disciplines of studio art, music, theatre, and art history as offered within the Department of Visual and Performing Arts.

The major concentration is a good introduction for students interested in continuing as professionals in any of these media. Since Fairfield has an excellent reputation and is situated in the greater New York region, many opportunities exist for internships in media production and significant internships are available at the Media Center and in production companies throughout the metropolitan area. After graduation, many students in this program acquire solid entry-level jobs in various media fields or continue to develop their interest through graduate studies.

Requirements

New Media Film, Television, and Radio MAJOR

For a 33 credit major, students must choose one of three tracks (either film, or television, or radio), and complete the following:

FILM TRACK

Required Courses

I. One FOUNDATIONAL COURSE
   NM 10 Introduction to New Media
   Film, Television, and Radio

II. One INTRO COURSE
   FM 11 Art and Language of Film
   (Must be taken first as prerequisite for film track majors)

III. Two HISTORY/THEORY COURSES from the following:
   FM 101 Filmmaker Studies
   FM 102 American Films: Decades
   FM 103 World Cinemas
   TL 102 Nonfiction Film and Television
   FM 110 Special Topics in Film (history/theory)
   FM 200 Film Genres
   FM 301 Independent Study in Film
IV. One WRITING COURSE
   Required:
   FM 120  Beginning Screenwriting for Film and Television

V. Three APPLIED PRODUCTION COURSES
   from the following (FM 11 Art and Language of Film is prerequisite for all production courses)
   All Three are Required:
   FM 130  Filmmaking I
   FM 131  Non-Linear Editing for Film/TV
   FM 132  Directing for Film and Television

VI. Two ELECTIVE COURSES
   a) Choose from following advanced courses in film area:
      FM 110  Special Topics in Film (applied)
      FM 230  Filmmaking II
      FM 301  Independent Study in Film
      FM 302  Filmmaking Internship
   b) or from other courses in film, television, or radio tracks
      c) or from the following VPA courses:
         VPA Electives
         AH 11  Visual Culture
         AH 152  Modern Art
         AH 172  History of Photography
         MU 101  History of Jazz
         MU 156  Intro to MIDI and Music Software
         SA 11  Foundation: Structure, Space and Environment
         SA 133  Photography I
         SA 136  Investigation of Text and Image
         TA 10  Intro to the Performing Arts
         TA 30  Acting I
         TA 230  Acting II
   d) or from approved courses in other departments:
      Electives from Other Departments
      SO 167  Contemporary Media
      RS 298  Religious Values in Film
      PY 250  Sensation and Perception
      SP 271  Hispanic Film
      IT 271  Italian Cinema
      ENW 321  Broadcast News Writing
      EN 379  Film and Literature
      PS 71  Physics of Light and Color
      PS 76  Physics of Sound and Music
   e) or from the following Communication Department courses:
      Communication Electives
      CO 201  Persuasion
      CO 202  Small Group Communication
      CO 220  Intro to Organizational Communication
      (recommended for students with interests in media management)

VII. One NEW MEDIA CAPSTONE PROJECT
   FM 301  Independent Study in Film

11 COURSES total
VI. Two ELECTIVE COURSES
   a) Choose from following advanced courses in television area:
      TL 110  Special Topics in Television (applied)
      FM 132  Directing for Film and Television
      TL 133  Digital Graphics for Film and Television
      TL 301  Independent Study in Television
      TL 302  Television Internship
   b) or from other courses in film, television or radio tracks
   c) or from the following VPA courses:
      VPA Electives
      AH 11  Visual Culture
      AH 152  Modern Art
      AH 172  History of Photography
      MU 101  History of Jazz
      MU 156  Intro to MIDI and Music Software
      SA 11  Foundation: Structure, Space and Environment
      SA 133  Photography I
      SA 136  Investigation of Text and Image
      TA 10  Intro to the Performing Arts
      TA 30  Acting I
      TA 230  Acting II
   d) or from approved courses in other depts:
      Electives from Other Departments
      SO 167  Contemporary Media
      RS 298  Religious Values in Film
      PY 250  Sensation and Perception
      SP 271  Hispanic Film
      IT 271  Italian Cinema
      ENW 220  News Writing
      ENW 321  Broadcast News Writing
      EN 379  Film and Literature
      PS 71  Physics of Light and Color
      PS 76  Physics of Sound and Music
   e) or from the following Communication Department courses:
      Communication Electives
      CO 201  Persuasion
      CO 202  Small Group Communication
      CO 220  Intro to Organizational Communication
      (recommended for students with interests in media management)
      CO 230  Media and Society
      (most recommended)
      CO 231  History of Mass Communication
      CO 236  Women & Mass Media
      (also counts for women's studies minor)
      CO 335  Globalization, Media, & Culture
      (highly recommended; also counts for international studies minor/major)

VII. One New Media Capstone Project
     TL 301  Independent Study in Television

11 COURSES total

RADIO TRACK

Required Courses

I. One FOUNDATIONAL COURSE
   NM 10  Introduction to New Media
   Film, Television, and Radio

II. One INTRO COURSE
    RA 11  Art and Language of Radio
    (Must be taken first as prerequisite for radio track majors)

III. Two HISTORY/THEORY COURSES
     from the following:
     RA 101  Radio Drama
     RA 102  Nonfiction Radio
     TL 104  Sports Broadcasting
     RA 110  Special Topics in Radio
     (history/theory)
     RA 301  Independent Study in Radio

IV. Three APPLIED PRODUCTION COURSES
     from the following:
     (RA 11 Art and Language of Radio is prerequisite for all production courses)
     All Three are Required:
     RA 130  Radio Production I
     MU 158  Introduction to Recording Techniques
     ** VPA MUSIC COURSE
     RA 230  Radio Production II

V. Two ELECTIVE COURSES
   a) Choose from following advanced courses in radio area:
      RA 110  Special Topics in Radio (applied)
      RA 301  Independent Study in Radio
      RA 302  Radio Internship
   b) or from other courses in film, television or radio tracks:
   c) or from the following VPA courses:
      VPA Electives
      AH 11  Visual Culture
      AH 152  Modern Art
      AH 172  History of Photography
      MU 101  History of Jazz
New Media Film, Television and Radio MINOR
For a 6-course, 18-credit minor, students must choose one of three tracks (either film, or television, or radio), and complete the following:

**Required Courses**

I. One FOUNDATIONAL COURSE
   NM 10 Introduction to New Media Film, Television, and Radio

II. Two HISTORY/THEORY COURSES
    from the following:

   **Film Track:**
   - FM 101 Filmmaker Studies
   - FM 102 American Films: Decades
   - FM 103 World Cinemas
   - TL 102 Nonfiction Film and Television
   - FM 110 Special Topics in Film (history/theory)
   - FM 200 Film Genres
   - FM 301 Independent Study in Film

   **Television Track:**
   - TL 101 Television Drama
   - TL 102 Nonfiction Film and Television
   - TL 103 Television Comedy
   - TL 104 Sports Broadcasting
   - TL 110 Special Topics in Television (history/theory)
   - TL 301 Independent Study in Television

   **Radio Track:**
   - RA 101 Radio Drama
   - RA 102 Nonfiction Radio
   - TL 104 Sports Broadcasting
   - TL 105 Broadcast Management
   - RA 110 Special Topics in Radio (history/theory)
   - RA 301 Independent Study in Radio

III. Two APPLIED PRODUCTION COURSES
    from the following:
    (FM 11, TL 11, RA 11 are prerequisites for all production courses in their respective tracks)

   **Film Track:**
   - FM 110 Special Topics in Film (applied)
   - FM 120 Beginning Screenwriting for Film and Television
   - FM 130 Filmmaking I
   - FM 131 NonLinear Editing for Film/TV
   - FM 132 Directing for Film and Television
   - FM 230 Filmmaking II
   - FM 301 Independent Study in Film
   - FM 302 Filmmaking Internship

11 COURSES total
NM 10 Intro New Media Arts Film, Television and Radio (H)
We live in an age inundated by audio and visual media. Whereas earlier cultures communicated ideas through the spoken word or through printed texts, contemporary modes of communication are mass-produced sounds and images. In order to be truly literate in today’s world, people should be fluent in the “language” of modern media. This course explores the principles and elements of visual design – the basic concepts (such as line, balance, and motion) that are used to create attractive ads, Web pages, commercials and movies. It also introduces basic audio terms and the use of sound design in film and video. The class is built around a series of lectures and screenings of movie clips, TV commercials, and published materials. Students explore the use of design elements and principles through lab exercises and class presentations using a variety of computer illustration and editing programs. This course is the introductory course for the New Media Film, Television, and Radio major/minor, and fulfills a history requirement for the VPA core. Three credits.

FM 11 Art and Language of Film (H)
The course provides an overview of film – its history as an art form and as a business, its technological development, and its special ability to tell stories visually. Students write a short screenplay and produce a short film as members of small film crews. Topics include producing, directing, and acting for the camera. This course, which fulfills a VPA core requirement in history, is required for students majoring in the film track of the New Media Film, Television and Radio program and is a prerequisite for all production courses in the major or minor. Formerly listed as FM 101. Three credits.

FM 101 Filmmaker Studies (H)
Each semester that it is offered, this course takes up the study if one or more individual filmmakers – primarily directors – and surveys that person’s body of work, examining major themes, techniques, motifs, topics, collaborations. In so doing, it seeks to measure and evaluate his or her contribution to the history and craft of film. Filmmakers have included Alfred Hitchcock, Woody Allen, John Huston, D.W. Griffith and Charlie Chaplin, Lon Chaney and Buster Keaton, Quentin Tarantino and the Coen Brothers. This course fulfills a VPA core requirement in history. Formerly listed as FM 102. Three credits.
FM 102  American Films: Decades (H)
Whatever is happening in the country culturally and historically, one way or another finds its way into the popular media. This course examines how the films of a given 10-year period consciously and unconsciously reflect the era in which they were made. Each decade in the series has a focus indicated by the full title, so as to provide a theme that can be traced through the selected films. The course fulfills a VPA core requirement in history. Formerly listed as FM 103. Three credits.

FM 103  World Cinemas (H)
This course may survey a number of important countries’ cinemas, or focus on a particular country, language, or area of the world. Emphasis is placed on indigenous cinema, reactions to the U.S. film industry and culture, important themes and topics, the socio-political climate of a country, and historical moments, such as the French New Wave, Cinema Novo, or Italian Neo-Realism. It also includes major filmmakers such as Fellini, Fassbinder, Kurosawa, Truffaut, and Buñuel. Films are shown in original languages with English subtitles. This course fulfills a VPA core requirement in history. Formerly listed as FM 104. Three credits.

FM 110  Special Topics in Film (H)(A)
These courses, offered periodically, focus in depth on a specific theme or issue, and may draw upon films from one or more countries, from among numerous directors, and from various periods in film history from the dawn of cinema to the present. Special applied courses may also be offered in this category. This course fulfills a VPA core requirement in history or application. Three credits.

FM 120  Beginning Screenwriting for Film and Television
This course blends group and individual instruction with intensive writing workshops. Students develop and then write a screenplay for a 30-minute film, or the first 30 pages of a feature-length film from their own original idea. Character development and narrative structure are emphasized. Students learn the elements of dramatic storytelling for film; creating characters, scenes and dialogue; and script analysis. This is a required course in the film and television tracks for the New Media Film, Television and Radio program. Three credits.

FM 130  Filmmaking I (A)
This course is designed to follow FM 11 Art and Language of Film, and is a required course for film majors. As an application course, it focuses in depth on the three stages of filmmaking – preproduction, production, and post-production. Students learn how to use camera and editing equipment to tell a visual story, while learning the production details of filmmaking. Several small projects lead up to production of a short film. The course fulfills an application requirement in the VPA core. (Prerequisite for film majors: FM 11) Three credits.

FM 131  Nonlinear Editing for Television and Film (A)
This course introduces the theory and basics and aesthetics of digital editing, using Final Cut Pro and Avid digital-editing systems. Participants study the characteristics of nonlinear systems and learn how these systems are used to create effective and affecting visual and audio programs. This is a required production course for the film and television tracks of the New Media Film, Television and Radio major. The course fulfills an application requirement in the VPA core. Three credits.

FM 132  Directing for Film and Television (H)
This course explores what a film or television director does, how he/she manipulates and manages the divergent elements of cinema into a coherent whole, and often, into a unique and personal vision. The specific tasks of a director are studied from practical and theoretical perspectives. This is a required course for the film track of the New Media Film, Television, and Radio major. This course fulfills a VPA core requirement in history. Three credits.

FM 200  Film Genres (H)
A genre is a category or film characterized by a recognizable set of conventions, which may include settings, stock characters, narrative patterns, stylistic devices, historical contexts, and themes. Genres work off of filmmakers’ and audience’ shared expectations. Over time, these conventions develop and evolve. Genres offered have included: the western, the horror film, science fiction, independent film, classic comedy, and film noir. This course fulfills a VPA core requirement in history. Three credits.

FM 230  Filmmaking II (A)
In this advanced motion picture production course, students have access to advanced camera, lighting, audio, and editing equipment, and work in teams to produce more complex films. The course fulfills an application requirement in the VPA core. (Prerequisite: FM 130) Three credits.

FM 301  Independent Study in Film
Usually open only to students majoring or minoring in film, this course allows a student to pursue in depth a topic or project in film history/theory or production, in close consultation with a faculty member of the New Media Film, Television and Radio Program. Three credits.

FM 302  Film Internship (A)
In consultation with a faculty member, upper-level major and minor students arrange a semester-long internship with one of many film production companies located within Connecticut and the New York metropolitan area. The course combines on-site supervision and meetings with faculty advisors with weekly journal submissions and an assigned paper at the end of the internship. This is an elective applied course in the film track of the New Media Film, Television and Radio program. Three credits.
TL 11  Art and Language of Television (H)
This basic introduction to the study of television explores the visual and audio style of various television texts, their narrative and generic conventions, the practical implications of aesthetic choices, and the meanings and pleasures generated. The course reviews the historical roots of television content and technology, and traces the evolution of program types on broadcast and cable television and the Web. This course is required for students majoring in the television track of the New Media Film, Television and Radio program and is a prerequisite for all production courses in the major or minor. It fulfills a VPA core requirement in history. Formerly listed as TL 101. Three credits.

TL 101  Television Drama (H)
This history of dramatic form in television examines early teleplays and the development of the dramatic series, the soap opera, and narrative films for television. The course covers the unique characteristics of the medium as it applies to drama, the special qualifications and pressures applied to drama for broadcast consumption, and the staging and aesthetic differences between drama for film and drama for television, including different directing and acting techniques. It treats television drama as a viable and substantive genre, not simply a form of popular entertainment. This course fulfills a history/theory requirement for the television track of the major/minor, and fulfills a VPA core requirement in history. Formerly listed as TL 102. Three credits.

TL 102  Nonfiction Film and Television (H)
This course introduces students to a wide range of documentary practices and purposes as well as a number of aesthetic and ethical issues raised by the non-fiction film and television form. It explores the evolution of documentary motion pictures from the birth of the film medium to the present day explosion of "reality TV" programs such as Survivor and Real World and feature films such as Fahrenheit 9/11 and Super Size Me. Students examine a variety of non-fiction styles and the many agendas of this mode of filmmaking, such as persuasion, social commentary, voyeurism, and political activism. This course fulfills a history/theory requirement for the Television track of the major/minor, and fulfills a VPA core requirement in history. Formerly listed as TL 102. Three credits.

TL 103  Television Comedy (H)
Television comedy has its roots and parallels in theater, radio, and film. This course traces the development of the comedic form from the early days of television to the present. Topics include the development of the three-camera format for sitcoms, the rise and fall of variety formats, comedic casts, British imports, late-night entertainment, and political comedy. Students analyze scripting, camera, lighting, and editing techniques. This course fulfills a history/theory requirement for the television track of the major/minor, and fulfills a VPA core requirement in history. Formerly listed as TL 104. Three credits.

TL 104  Sports Broadcasting (A)
Sports broadcasting is a major component of the television, radio, and Internet industry. This course introduces students to the principles and practice of the world of sports broadcasting. Topics include the history of the industry, its developing techniques, the aesthetic and narrative structure of broadcast sportscasting, its economic impact on the industry, media law and ethics as applied to the sports world, and its significant place within the general broadcast world. Some applied practicum experiences are required, allowing students experiential learning in writing, interviewing, reporting, and producing for sports shows and live events. This is an elective applied course in the television track of the New Media Film, television and radio program of the VPA department, and fulfills an application requirement for the VPA core. Formerly listed as TL 107. Three credits.

TL 110  Special Topics in Television (H)(A)
This course offers rotating television topics and fulfills a VPA core requirement in history or application. Three credits.

TL 130  Studio Television Production (A)
This course offers an immediate, intensive, hands-on introduction to the art and technology of creative television production within the structure of Fairfield's HAM Channel. Students receive intensive instruction on creative and aesthetic use of the tools and elements of television – cameras, audio, lighting, editing, set design, and program development – and participate in a series of projects completed individually and with partners. They learn the structure and operation of the HAM channel and participate in the production of a regularly scheduled program that will be aired on the HAM channel during the semester. This course counts as a production requirement for the New Media Film, Television, and Radio major/minor, and fulfills an application requirement for the VPA (Prerequisite: TL 11) Three credits.

TL 133  Digital Graphics for New Media Film and Television (A)
The digital revolution has arrived for production of television and video. This course introduces the theory and basics of digital graphic design and editing, incorporating three-dimensional graphics, music, and sound effects. Students master nonlinear programs and technology such as, Final Cut Pro, Avid, Photoshop, Flash, and Dreamweaver. This is an elective applied course in the television track of the New Media Film, Television and Radio program, and fulfills an application requirement for the VPA core. Formerly listed as TL 131. Three credits.
Mercury Theatre on the Air. This course examines that unlike theatrical, film, or television performance, radio is a unique medium. Unlike other forms of media, radio relies on the human voice and imagination to create aural experiences. This course introduces the theoretical, creative, and practical world of radio broadcast and production. Students engage in a series of assignments that build skills in pre-production story development and scripting, camera use and composition, continuity and verité shooting/editing techniques, and portable lighting and sound recording. Students also produce short documentary and fiction projects for broadcast on the HAM Channel. This course counts as a production requirement for the New Media Film, Television, and Radio major/minor, and fulfills an application requirement for the VPA core. (Prerequisites: TL 11 and TL 130.) Three credits.

TL 301 Independent Study in Television (H)(A)
This course offers an immediate hands-on exploration of the art and technology of remote television production, also known as “electronic field production” or EFP. Students receive instruction on the creative and aesthetic use of the tools of video production beyond the confines of a TV studio, using portable “prosumer” video cameras, tripods, microphones, lighting equipment, and non-linear post-production editing. In addition to in-class demonstrations, lectures, screenings, and discussions, students engage in a series of assignments that build skills in pre-production story development and scripting, camera use and composition, continuity and verité shooting/editing techniques, and portable lighting and sound recording. Students also produce short documentary and fiction projects for broadcast on the HAM Channel. This course counts as a production requirement for the New Media Film, Television, and Radio major/minor, and fulfills an application requirement for the VPA core. (Prerequisites: TL 11 and TL 130.) Three credits.

RA 110 Special Topics in Radio (H)(A)
This course offers radio topics on a rotating basis and fulfills a VPA core requirement in history or application. Three credits.

RA 301 Independent Study in Radio (A)
This course allows a student to pursue in depth a topic or project in radio history/theory or production in close consultation with a faculty member of the New Media Film, Television, and Radio Program. Three credits.

RA 302 Radio Internship (A)
In consultation with a faculty member, upper-level students arrange a semester-long internship with one of the many television production companies located within Connecticut and the New York metropolitan area. The course combines on-site supervision and meetings with faculty advisors with weekly journal submissions and an assigned paper at the end of the internship. This is an elective applied course in the radio track of the New Media Film, Television, and Radio Program. Three credits.

RA 101 Radio Drama (H)
Unlike theatrical, film, or television performance, radio has a long history as a medium. It rose to prominence in the 1930s, highlighted by the broadcast of Orson Welles’s Mercury Theatre on the Air. This course examines that history, particularly with respect to its roots in theatre and its effects upon television. This course fulfills a history/theory requirement for the radio track of the major/minor, and fulfills a VPA core requirement in history. Formerly listed as RA 102. Three credits.

RA 102 Non-fiction Radio (H)
This course examines news, talk radio, sports, and public radio formats, including the history of the medium as a source of information and live-event broadcasting. Students analyze the roles of the producer, director, interviewer, and editor. This course fulfills a history/theory requirement for the radio track of the major/minor, and fulfills a VPA core requirement in history. Three credits.

RA 11 Art and Language of Radio (H)
This course introduces the theoretical, creative, and practical world of radio broadcast and production. The overview traces the development of technology, programming, and radio management and radio’s links to theatre, film, and television. Students consider the future of radio, including digital transmission and satellite radio. This course is required for students majoring in the radio track of the New Media Film, Television, and Radio Program and is a prerequisite for all production courses in the major or minor. It fulfills a VPA core requirement in history. Formerly listed as RA 101. Three credits.

TL 230 Remote Television Production (A)
This course offers an immediate hands-on exploration of the art and technology of remote television production, also known as “electronic field production” or EFP. Students receive instruction on the creative and aesthetic use of the tools of video production beyond the confines of a TV studio, using portable “prosumer” video cameras, tripods, microphones, lighting equipment, and non-linear post-production editing. In addition to in-class demonstrations, lectures, screenings, and discussions, students engage in a series of assignments that build skills in pre-production story development and scripting, camera use and composition, continuity and verité shooting/editing techniques, and portable lighting and sound recording. Students also produce short documentary and fiction projects for broadcast on the HAM Channel. This course counts as a production requirement for the New Media Film, Television, and Radio major/minor, and fulfills an application requirement for the VPA core. (Prerequisites: TL 11 and TL 130.) Three credits.

RA 230 Radio Production II (A)
This course offers advanced experience in radio operations and broadcast. Students produce special live programming for broadcast on WVOF and projects for Web-casting. This course counts as a production requirement for the radio track of the New Media Film Television and Radio major/minor, and fulfills an application requirement for the VPA core. (Prerequisites: RA 11 and RA 130) Three credits.

RA 130 Radio Production I (A)
This course offers advanced experience in radio operations and broadcast. Students produce special live programming for broadcast on WVOF and projects for Web-casting. This course counts as a production requirement for the radio track of the New Media Film Television and Radio major/minor, and fulfills an application requirement for the VPA core. (Prerequisites: RA 11 and RA 130) Three credits.

RA 301 Independent Study in Radio (A)
This course allows a student to pursue in depth a topic or project in radio history/theory or production in close consultation with a faculty member of the New Media Film, Television, and Radio Program. Three credits.

RA 302 Radio Internship (A)
In consultation with a faculty member, upper-level students arrange a semester-long internship with one of the many television production companies located within Connecticut and the New York metropolitan area. The course combines on-site supervision and meetings with faculty advisors with weekly journal submissions and an assigned paper at the end of the internship. This is an elective applied course in the radio track of the New Media Film, Television, and Radio Program. Three credits.
The Visual Arts broaden an awareness of the self, society and culture by communicating fundamental ideas and images. The Studio Art program is committed to teaching students to develop a visual language and working methodology based on skills, knowledge, technique and the integration of historical, personal and cultural artistic values. The faculty is dedicated to mentoring students of all levels, encouraging them to build on their innate talents and discover a personal vision. By developing a creative process as a means of giving form to their experience, students can search for what is true and challenge unexamined ideas through practice, experimentation, and by problem solving.

At the Foundation Level, the program is committed to teaching students to work with the core visual elements of composition, perception, abstraction, and concept while introducing students to a range of 2D and 3D materials. A strong foundation allows students to interpret and conceptualize their ideas before moving into Painting, Printmaking, Photography, Sculpture, Installation and Interdisciplinary. The faculty is comprised of artists, as it is the belief of the program that students benefit from working with practitioners actively engaged in the discipline. Empathy and sensitivity are nurtured as students build a visual vocabulary to create, critique and to analyze works in the studio and in museums and galleries.

The Studio Art Program’s goals include:

- Developing intuitive, creative, expressive, and aesthetic faculties, and the ability to connect these with reasoning skills
- Developing perceptual, critical, and conceptual skills
- Cultivating empathy, sensibility, and discernment
- Training and disciplining oneself to express individual form, style, and meaning
- Developing knowledge of major artistic achievements in Western and non-Western visual arts
- Communicating critical observations clearly, concisely, and with sensitivity, in written and oral forms
- Cultivating a deep commitment to and curiosity for the intellectual and creative life

The Studio Art Program is divided into three developmental areas: foundation studios, advanced studios, and capstone studios.

The foundation studios are recommended as a basis for all other studio art courses. They develop formal, technical, expressive, and problem-solving skills. They stress knowledge of modern and contemporary art and provide a survey of artistic disciplines. Through these courses, students begin to investigate visual thinking.

The advanced studios build upon the foundation studios and focus on a particular discipline, such as painting, photography, and sculpture. Students develop a formal vocabulary, visual sensitivity, and manual dexterity. Materials and historical concerns are integral parts of directed and individual investigations.

In the capstone studios, students further develop the diverse experiences and knowledge they have acquired as studio art majors and focus their newly acquired skills on a specific theme or area of artistic research. In addition to creating this visual work, students develop an appreciation for aesthetics and concept exploration. Capstone experiences develop creative autonomy. Students who complete the capstone studios are no longer dependent upon externally supplied assignments; they are able to focus upon artistic questions of their own. These courses are excellent preparation for life after Fairfield.

Students interested in the Studio Art major or minor should consult with the Studio Art Program Director before beginning the program. Students are encouraged to declare the major officially no later than the end of the sophomore year of studies. Transfer credits in studio art must be approved by the studio program director. Advanced Placement credits will not be accepted. Evening and intersession courses may not count for the studio art major or minor. There is a $55 laboratory fee for each studio art course. Courses in the Florence University of the Arts or other study abroad programs must be approved by the studio art program director for studio credit for majors and minors.

For a 33-credit studio arts major, students must satisfy the following requirements.

**Course Descriptions**

**Foundation Studios**

**SA 10  Foundation:**  
**Interpreting the Self**

This course develops fundamental studio skills and an understanding of visual thought processes. The course emphasizes concepts, contemporary art and theory, and a wide variety of materials and aesthetic categories such as drawing, painting, book arts, sculpture, and installation. Students investigate the ways in which visual thinking can be used to realize an awareness of one's self. Through the themes of line and the self, the course exposes students to the visual languages of abstraction and representation, and emphasizes the honing of perceptions, the process of selection and organization, and the seemingly constant revision and decision making involved in art making. Formerly listed as SA 100. Three credits.

**SA 11  Foundation:**  
**Structure, Space, and Environment**

This course develops fundamental studio skills and an understanding of visual thought processes. Emphasis is placed on concepts, contemporary art and theory, and a wide variety of materials and aesthetic categories including drawing, collage, sculptural construction, and installation. Students investigate the ways in which visual thinking can be used to realize an awareness of the world outside oneself. Through the themes of space and the world, the course exposes students to the visual languages of abstraction and representation, and emphasizes the honing of perceptions, the process of selection, organization, and the seemingly constant revision and decision making involved in art making. Formerly listed as SA 102. Three credits.

**SA 12  Foundation:**  
**Drawing**

This course focuses on the act of seeing and its intimate connection with mark-making. Experiences develop observational, expressive, and conceptual skills. Students explore the formal elements of drawing, such as line, value, composition, and form, and how they can be used to express an awareness of one's self and the world around one. The course explores a variety of materials and processes through in- and out-of-class projects. Students participate in critiques of these projects and, through writing and speaking, develop a language of aesthetic awareness and a sense of artistic quality. Formerly listed as SA 120. Three credits.
Advanced Studio Courses

FIRST LEVEL

SA 105 Color Workshop
This course investigates fundamental color theory through studio projects using contemporary and historical references. Students focus on the development and exploration of ideas using a variety of color media and study the practical mixing and application of pigments. The course stresses perception, visual awareness, sensitivity, attitude, and judgment, and is typically offered fall semester. Three credits.

SA 107 Special Workshop Studios
This course focuses on diversity in contemporary studio practice through the unique approaches of faculty and/or visiting artists. This cross-disciplinary course incorporates projects, lectures, and critiques. Offerings include multiculturalism in the arts; materials and techniques; land, landscape and environmental arts; art and the archaeological process; New York experience: museums, galleries and artists’ studios; art, politics and society, public art and community-based art, experimental photography, imaging and printing techniques; performance art and sound art; and interactive media and Web-based art. Three credits.

SA 130 Painting I
This course introduces the methods, techniques, and language of oil painting. Students explore principles of color, construction, paint handling, delineation of form and space, light and shadow, surface, texture, and composition. Students paint primarily from observation and employ representational and abstract modes. Materials and historical concerns are integral parts of directed and individual investigations. Three credits.

SA 131 Photographic and Digital Techniques in Printmaking
This foundation level course introduces traditional and experimental approaches to printmaking. It encourages development of imagery and technique, and emphasizes context through the medium. Areas explored include photographic transfer methods, digital imaging, monoprints, silkscreen, and etching. The course is typically offered fall semester. Three credits.

SA 132 Sculpture I
An introduction to three-dimensional form and space, this broad-spectrum studio encompasses the diversity of contemporary sculptural activities, including the construction of objects, installations, and site work. Students investigate specific concepts presented by the instructor using a variety of materials including wood, metal, plaster, clay, paper, mixed media, and fabric. Three credits.

SA 133 Photography I
This course covers basic techniques of black-and-white photography, including negative exposure, film development, and print production; development of concepts and theory in photography; relationship of photography to other visual media; and study of historical and contemporary precedents. A 35 mm camera is required for this course. Three credits.

SA 134 Digital Photography
This course covers basic techniques of digital photography, including print production, the development of concepts and theory in photography, the relationship of photography to other visual media, and the study of historical and contemporary precedents. In addition, students will explore the manipulation of photographic images in both black and white and color through the use of Adobe Photoshop. Three credits.

SA 136 Investigation of Text and Image
How does visual language differ from written language? How do they interact? This course considers these and related issues concerning the nature of visual and written language. The course introduces students to the working methods and thought processes of independent artists, and engages students in a dialogue with contemporary artistic, social, and natural and/or political issues under the tutelage of a practicing artist. Typically offered every other spring semester. Formerly listed as SA 113. Three credits.

SA 137 Time Arts
This course uses a wide variety of media to develop and present performance and installation art, emphasizing interconnections with video, computer, telecommunications, photography, film, live performance, music, and sound. It is typically offered every other spring semester. Formerly listed as SA 114. Three credits.

SA 138 From Drawing to Painting
This course specializes in teaching students to work with drawing as a way to develop subject matter and transition into painting. The first part of the semester is focused on collecting and drawing from visual references such as nature, the figure, interiors and still life. Working with sketches, students learn to develop a visual vocabulary to articulate ideas that are meaningful and personal to them. This practice is used as a starting point to develop a language of expression and transition into painting. Three credits.
SA 139 Watercolor
This course is an introduction to the methods, techniques and language of watercolor. In exploring the fundaments of watercolor this course helps students develop their abilities to see and explore washes of color in relation to pictorial space and form. It is typically offered every other spring semester. Three credits.

SECOND LEVEL
SA 230 Painting II
This course builds on the experience of Painting I and stresses fluency in paint and the advanced development of technical and expressive skills. It focuses on the generation of ideas as a central component in the process of painting. Individual direction is developed in consultation with the instructor. The course, typically offered in the spring semester, includes individual and group criticism. (Prerequisite: SA 130) Three credits.

SA 231 Printmaking II
This course focuses on the development of technical and conceptual skills as a central component in the process of printmaking, with an emphasis on developing individual direction through studio work, drawing, writing, and research. Students explore intaglio, silkscreen, and painterly methods of mono-printing. The course is typically offered fall semester. (Prerequisite: SA 131) Three credits.

SA 232 Sculpture II
This course builds on the experience of Sculpture I and stresses the advanced development of technical and expressive skills. It focuses on the generation of ideas as a central component in sculpture. Individual direction is developed in consultation with the instructor. Typically offered in the spring semester, the course includes individual and group criticism. (Prerequisite: SA 132) Three credits.

SA 233 Photography II
This course, which builds upon the fundamentals of black-and-white photography learned in SA 133, covers advanced exposure controls, introduces shooting color transparencies, and explores mural-size format and mixed media techniques. The course emphasizes the generation of ideas as the central component in the process of photography. A 35 mm camera is required for this course. Typically offered spring semester. (Prerequisite: SA 133) Three credits.

SA 235 Advanced Drawing
This course builds upon the experience of SA 12 and stresses advanced development of skills. It focuses on the generation of ideas as a central component in the process of drawing and emphasizes individual direction and inventive drawing through studio projects developed in consultation with the instructor. Typically offered in spring semester, the course includes individual and group criticism. (Prerequisite: SA 12) Three credits.
The theatre program at Fairfield offers students a liberal arts education balanced between the theoretical and practical aspects of the discipline. Students who complete a major or minor concentration in theatre know how to put on a show from conception through strike and have a broad, liberal education. They have had the benefit of instruction from theatre professionals in acting, dance, design, directing, playwriting, production, and stagecraft, and have studied with teachers specializing in history, literature, and criticism of the stage.

Theatre Fairfield is the production wing of the program. Theatre Fairfield’s season includes professionally directed and designed productions, as well as student-written, directed and designed work. In any given four-year period we produce plays from many historical periods and styles: musicals, comedies, serious dramas, period plays, contemporary works and original plays. A group of four scholarship students works closely with faculty and staff in administering Theatre Fairfield’s season.

Recent productions have included We Won’t Pay! We Won’t Pay! By Dario Fo; Cabaret, the Kander/Ebb musical; The Importance of Being Earnest by Oscar Wilde; The Shadow Box by Michael Cristofer; ’59 Pink Thunderbird by James McLure; Steve Martin’s Picasso at the Lapin Agile; Tim Robbins’s Dead Man Walking; Aristophanes’ The Birds; Shakespeare’s As You Like It; Lend Me a Tenor by Ken Ludwig; the rock-musical Hair; Lillian Hellman’s The Children’s Hour; The Laramie Project by Moises Kaufman; and Steel Magnolias by Robert Harling. We also introduced our first devised theatre piece this year, dis/connect, which is a multi-media exploration of the ways that we connect — and don’t — in today’s fast-paced, technological world. Fairfield also has its own improvisation company, On The Spot, which performs regularly throughout Theatre Fairfield’s season. Participation in Theatre Fairfield productions is open to all students at the University, regardless of major or minor.

In helping students to become well-rounded theatre people, this program emphasizes the development of good communication skills, which are essential to work in the theatre as well as to all aspects of life. Courses stress the development of written, verbal, and artistic abilities. The program also advocates double majors and/or minors with other academic disciplines such as English, psychology, sociology, history, philosophy, communication, and modern languages, as well as double-majors with the School of Business.

Due to the interdisciplinary nature of this program, undergraduate education in theatre is excellent preparation for a career in public relations, communications, advertising, writing or publishing, marketing, education, public service, and law, as well as all facets of the theatre industry. Students interested in a major or minor concentration in theatre should consult with theatre faculty before beginning the program.

Students participating in Theatre Fairfield productions earn one credit per show for either performance (TA 94), or production (TA 95). Theatre majors must earn a total of three credits in TA 94 or TA 95 each academic year. Theatre minors must earn a total of two credits in TA 94 or TA 95 each academic year.

Requirements

The Theatre Major

1. All incoming students are first registered as Comprehensive Majors.
2. Students are presented with a series of questions to ponder, designed to help them discern their goals and career plans.
3. At the end of sophomore year/beginning of junior year each student has a conversation with several faculty members. The faculty and student decide which track is most appropriate for the student.
4. Students may stay “Comprehensive” or change to “Performance” or “Design/Tech” Majors.
A. **COMPREHENSIVE MAJOR** 33 credits

**Theatre Core:**
- TA 11  Introduction to Theatre 3 credits
- TA 30  Acting I 3 credits
- TA 50  Backstage Fundamentals 3 credits
- **TA 110 OR**
  - TA 111  Theatre History I (or) II 3 credits
- **TA 120/EN 264**
  - American Drama 3 credits
- TA 155  Design I 3 credits
- TA 210  Theatre in Production 3 credits
- TA 310  Technique and Theory of Production 3 credits

**One Additional History/Drama Literature Class:** 3 credits
- EN 255  Shakespeare
- EN 355  Shakespeare I: The Elizabethan Age
- EN 356  Shakespeare II: The Jacobean Age
- **TA 110 OR**
  - TA 111  Theatre History I (or) II
- TA 122  Asian Theatre
- TA 123  American Women Playwrights

**One Additional Performance Class:** 3 credits
- TA 230  Acting II
- TA 240  Technique and Art in Directing
- TA 300  Special Topics

**One Additional Design/Tech Class:** 3 credits
- TA 153  Makeup and Costume Construction
- TA 157  Rendering and Drafting
- TA 158  Scene Painting
- TA 250  Advanced Stagecraft
- TA 255  Advanced Design
- TA 395  Technical Internship: Stage Management

**PLUS**
- One additional semester of Physical Performance Lab
- A minimum of 15 Tech Points total in Freshman/Sophomore Years
- A minimum of 15 Tech Points total in Junior/Senior Years
- Involvement in at least half the Theatre Fairfield productions in each year. Students participating in Theatre Fairfield productions earn one credit per show for either performance (TA 94), or production (TA 95). Theatre majors must earn a total of three credits in TA 94 or TA 95 each academic year.

B. **PERFORMANCE MAJOR** 33 credits

**Theatre Core:**
- TA 11  Introduction to Theatre 3 credits
- TA 30  Acting I 3 credits
- TA 50  Backstage Fundamentals 3 credits
- **TA 110 OR**
  - TA 111  Theatre History I (or) II 3 credits
- **TA 120/EN 264**
  - American Drama 3 credits
- TA 155  Design I 3 credits
- TA 210  Theatre in Production 3 credits
- TA 310  Technique and Theory of Production 3 credits

**The Following Advanced Performance Classes:**
- TA 230  Acting II 3 credits
- TA 240  Technique and Art in Directing 3 credits

**One Additional Design/Tech Class:** 3 credits
- TA 153  Makeup and Costume Construction
- TA 157  Rendering and Drafting
- TA 158  Scene Painting
- TA 250  Advanced Stagecraft
- TA 255  Advanced Design
- TA 395  Technical Internship: Stage Management

**PLUS**
- Two additional semesters of Physical Performance Lab
- A minimum of 15 Tech Points total in Freshman/Sophomore Years
- A minimum of 15 Tech Points total in Junior/Senior Years
- Involvement in the majority of the Theatre Fairfield productions in each year. Students participating in Theatre Fairfield productions earn one credit per show for either performance (TA 94), or production (TA 95). Theatre majors must earn a total of three credits in TA 94 or TA 95 each academic year.
C. **DESIGN/TECH MAJOR**  

### Theatre Core:

- **TA 11**  
  Introduction to Theatre  
  3 credits
- **TA 30**  
  Acting I  
  3 credits
- **TA 50**  
  Backstage Fundamentals  
  3 credits
- **TA 110 OR TA 111**  
  Theatre History I (or) II  
  3 credits
- **TA 120/EN 264**  
  American Drama  
  3 credits
- **TA 155**  
  Design I  
  3 credits
- **TA 210**  
  Theatre in Production  
  3 credits
- **TA 310**  
  Technique and Theory of Production  
  3 credits

### Three Additional Tech/Design Classes:

- **TA 153**  
  Makeup and Costume Construction  
  3 credits
- **TA 157**  
  Rendering and Drafting  
  3 credits
- **TA 158**  
  Scene Painting  
  3 credits
- **TA 250**  
  Advanced Stagecraft  
  3 credits
- **TA 255**  
  Advanced Design  
  3 credits
- **TA 395**  
  Technical Internship  
  3 credits

### PLUS
- A minimum of 15 Tech Points total in Freshman/Sophomore Years
- A minimum of 15 Tech Points total in Junior/Senior Years
- Involvement in the majority of the Theatre Fairfield productions in each year. Students participating in Theatre Fairfield productions earn one credit per show for either performance (TA 94), or production (TA 95). Theatre majors must earn a total of three credits in TA 94 or TA 95 each academic year.

### THEATRE MINOR (18 hours)

- **TA 11**  
  Introduction to Theatre  
  3 hours
- **TA 30**  
  Acting I  
  3 hours
- **TA 120**  
  American Drama  
  3 hours
- **TA 150**  
  Stagecraft  
  3 hours
- **TA 155**  
  Design I  
  3 hours
- **TA 310**  
  Technique and Theory of Production  
  3 hours

### PLUS
- A minimum of 15 Tech Points total in Freshman/Sophomore Years
- A minimum of 15 Tech Points total in Junior/Senior Years
- Involvement in at least half the Theatre Fairfield productions in any year.

### CREDIT FOR THEATRE FAIRFIELD PRODUCTIONS

It is impossible to understand the nature of theatre without engaging in the process of making theatre. Therefore, major and minor coursework is supplemented by required participation in Theatre Fairfield productions. As in the past, students will continue to earn course credit for such participation. This acknowledges and embraces the educational nature of production work.

### TECH POINTS

Each major and minor must complete:

- A minimum of 15 Tech Points total in Freshman/Sophomore Years

These requirements will be reasonably adjusted, as necessary, for semesters when students are studying abroad.

Production positions earn the following number of points:

- 10 Designer
- 10 Director, Festival/Indep. Project
- 10 Technical Director
- 10 Stage Manager, full-length piece
- 6 Asst. Stage Manager, full-length piece
- 6 Stage Manager, one-act piece
- 6 Master Carpenter
- 6 Props Manager
- 5 Costume Manager
- 5 Props Crew
- 5 Costume Crew
- 5 Paint Charge
- 4 Asst. Stage Manager, one-act piece
- 4 Master Electrician
- 4 Paint Crew
- 3 Light Board Operator
- 3 Sound Board Operator
- 3 Running Crew
- 2 House Manager
- 2 Electrician
- 2 Carpenter
- 1 Asst. Box Office Manager
Course Descriptions

A = Applied Theatre
H = Theatre History

TA 11  Introduction to Theatre (H)
What does the actor really do to prepare for a role? If the audience bursts into applause as soon as the curtain goes up, does that mean they’re seeing a good scenic design or is it just a pretty set? Directors have an important title, but what do they really do? These and other questions about producers, designers, critics, and audiences are addressed in this course, where students not only talk about these critical jobs, but also have the chance to perform them. The course is strongly recommended for non-majors and students interested in fulfilling a visual and performing arts core requirement. Three credits.

TA 30  Acting I (A)
This class is an intensive introduction to physical technique and training essential to acting. Manifesting the understanding of key concepts through demonstrating skills is the primary focus of the course. Physical openness and responsiveness are explored and developed in pursuit of performance that is dynamically immediate and wholly engages audience, ensemble, and performer. Students will learn and practice Viewpoints, an approach to performance that allows performers to develop stage presence, play as a member of an ensemble, and make exciting performance choices. The class also introduces vocal technique for stage, the key ingredient to theatrical storytelling. The course requires participation in a weekly Physical Performance Lab. Three credits.

TA 50  Backstage Fundamentals (A)
This class covers the rudiments of the technical end of theatrical production. Topics include stage management, proper tool use, basic scenery construction, lighting, prop management, basic costume construction, wardrobe management, and scene painting fundamentals. Students are required to participate in construction and rigging for Theatre Fairfield productions. Three credits.

TA 93  Physical Performance Lab (A)
Excellent and sustainable acting requires physical training and this lab develops students’ physical and breath support conditioning, core strength, physical alignment, overall kinesthetic and breath-center awareness, openness and responsiveness, and physical and vocal expressiveness. Each semester and session integrates conditioning with an overarching focus on addressing particular techniques or performance challenges (i.e. viewpoints, speaking verse). The course is open to all Fairfield students and is offered every semester; students may take the course more than once and are encouraged to do so. No prerequisite. One credit.
TA 94 Theatre Fairfield Performance Practicum (A)
Students gain first-hand training in the art of performance under the guidance of theatre professionals. Everyone cast in a Theatre Fairfield production is automatically enrolled in this one-credit practicum; students may not enroll on their own. This course may be repeated. One credit.

TA 95 Theatre Fairfield Production Practicum (A)
Students gain first-hand training in the art of theatre production under the guidance of theatre professionals. Everyone working on a crew of a Theatre Fairfield production is automatically enrolled in this one-credit practicum. Students must consult with theatre faculty regarding placement in stage management, technical, or front-of-house duties. This course may be repeated. One credit.

TA 110 History of Theatre I (H)
Theatre serves as a vehicle to consider the social, political, and economic forces that shaped societies and their entertainments. This course surveys theatre and performance (dance, pageantry, spectacle, and popular entertainments) as a mirror of the people and times that shaped them. It begins with a consideration of the human need for mimesis and entertainment, and swiftly moves into the fifth-century B.C.E. and the golden age of Greek drama. Other topics include Roman theatre, medieval religious drama, Japanese theatre, Renaissance spectacle and pageantry, censorship, the advent of women on the stage, and popular theatre forms through the 18th century. The course includes theatre trips. Three credits.

TA 111 History of Theatre II (H)
This course examines 19th- and 20th-century theatre and performance (dance, modern and post-modern dance, “happenings,” musical comedy) in the context of the people and societies that shaped them. It begins by examining the impact of technology on the theatrical world and continues to the present day with a consideration of the avant-garde and contemporary forms such as performance art. The course includes theatre trips. Three credits.

TA/EN 120/264 American Drama (H)
This course examines the development of American theatre from the 18th through the 21st centuries, including a study and analysis of the special problems affecting the development and changes in American society as seen through American playwriting and theatre production. The course meets the U.S. diversity requirement. Three credits.

TA 121 American Women Playwrights (H)
This course focuses on American Women Playwrights, 1775-2005. We trace the evolution of drama by women from Mercy Otis Warren's anti-British political satires of the Revolutionary War to plays reflecting the 21st-century concerns of African-American, Asian-American, and Latina playwrights. Plays are discussed in light of the social, political, and economic climates that produced them. Special emphasis is given to questions of sex, gender, race, ethnicity, and class as we explore how American women, despite considerable obstacles, have developed their own theatrical voices. Our study is further informed by the work of feminist performance theorists. Three credits.

TA 122 Asian Theatre (H)
Asian Theatre is a survey of major classical and contemporary theatres of Japan, China, India, and Indonesia. Included are traditional plays as well as dance, puppetry, and opera. Students view productions on video and film, read and discuss plays, explore the historical and sociological context which shaped these entertainments, and take at least one field trip to see a live performance. This course meets the world diversity requirement and is cross-listed with the Asian and International Studies programs. Three credits.

TA 123 American Women Playwrights (H)
This course will focus on American Women Playwrights, 1775-2005. We will trace the evolution of drama by women from Mercy Otis Warren's anti-British political satires of the Revolutionary War to plays reflecting the 21st-century concerns of African-American, Asian, American, and Latina playwrights. Plays will be discussed in light of the social, political, and economic climates that produced them. Special emphasis will be given to questions of sex, gender, race, ethnicity, and class as we explore how American women, despite considerable obstacles, have developed their own theatrical voices. Our study will be further informed by the work of feminist performance theorists. This course meets the U.S. diversity requirement and is cross-listed with Women's Studies. Three credits.

TA 135 Modern and Contemporary Dance (A)
This course explores the movement principles of the major dance figures in the 20th century, including Martha Graham, Doris Humphrey, Hanya Holm, Jose Limon, and Merce Cunningham. Students complete research, compositional assignments, and structured improvisations to support the classroom activity. Overall, students gain a historical perspective of modern dance as an art form and improve their own dance technique in terms of strength, alignment, and flexibility. Three credits.
Visual and Performing Arts

TA 136 Introduction to Jazz Dance (A)
This course combines dance technique and a historical survey of jazz dance. Students explore jazz dance origins from African and European traditions; their manifestation in the United States through slavery, minstrel shows, and vaudeville; and the development of style through the influences of tap, ballet, and modern dance. Students complete research, compositional assignments, and structured improvisations to support the classroom activity. Three credits.

TA 137 Dance in Musical Theatre (A)
This course explores dance for the popular stage in America. Through investigation of well-known musicals such as West Side Story, Grease, Guys and Dolls, and Oklahoma! students understand how each musical requires its specific idiom of movement, and how styles, trends, and traditions affect theatre choreography. Students learn the components within an effective musical theatre number as well as gain strength, flexibility, and proficiency in technique. Students complete research, compositional assignments, and structured improvisations to support classroom activity. Three credits.

TA 138 Folk and Social Dance (A)
This course explores dance as social interaction and communal activity. Students discuss and participate in various kinds of folk dances originating from different ethnic cultures and explore their common roots in primitive rituals, religious worship, courtship, recreation, celebration, and therapeutic or healing experiences. The course also explores contemporary forms of ballroom, disco, and club dancing. Students complete research, compositional assignments, and structured improvisations to support classroom activity. Three credits.

TA 153 Makeup and Costume Construction (A)
This workshop introduces the basic principles, skills, and techniques of applying theatrical makeup and building costumes. The makeup portion explores two- and three-dimensional makeup techniques including corrective makeup, age makeup, facial hair, and prosthetic makeup. The costume portion focuses on hand and machine sewing techniques, fabrics and fabric modification, and garment construction. Students are required to participate in costume construction for Theatre Fairfield productions. Three credits.

TA 155 Design I (A)
This practical course introduces the student to the skills of the theatre designer, and the elements of scenic, costume and lighting design. The course emphasizes play analysis for the designer and includes an investigation into the communicative properties of visual images. Three credits.

TA 158 Scene Painting (A)
This workshop introduces the basic principles, skills, and techniques of the scenic artist. Through a series of painting projects, students explore common painting techniques, including marble, brick, wood, and wallpaper. The course gives special attention to matching the paint project to the paint elevation. Students serve as members of the paint crew for a Theatre Fairfield production. This project emphasizes craftsmanship and the ability to work as part of a team in addition to dealing with the time factors of actual production. Research into various techniques, styles, and visual textures supplements hands-on work in the class. Three credits.

TA 210 Theatre in Production
(A or H depending on semester offered)
Open to students by instructor invitation, TA 210, Theatre in Production offers an expansive immersion as students engage in focused theatrical research in both classroom and theatre, resulting in a fully realized Theatre Fairfield production. The class-production format makes available particularly challenging scripts and/or artistic approaches that might not otherwise be approached. Though each course varies depending on instructor and production, the TA 210 class-production experience focuses on building significant bridges between theory and practice. Accordingly, TA 210 is a foundational class of the theatre major and one section is required, though multiple sections may be taken for credit. Three credits.

TA 230 Acting II (A)
This is an intensive acting course that builds upon the basic acting principles taught in TA 30 Acting I. In this course students apply what they have learned about the art, analysis, and interpretation of acting to a variety of dramatic styles. Students explore several period acting styles through in-class exercises and performances of rehearsed scenes and monologues. This course culminates in a public performance. Students gain a well-rounded and thoughtful understanding of acting as a practical and intellectual art that prepares them for further work in theatre and related performing arts. (Prerequisite: TA 30 or the permission of the instructor) Three credits.

TA 240 Technique and Art in Directing (A)
This course for advanced students covers the theory, practice, and history of directing for the theatre. In a workshop/seminar format, students explore various ways of bringing a play script from conception to full production. The course includes sections in text analysis, working with actors and designers, and the role and responsibility of the director to the overall production. Students direct several in-class scenes and a one-act play that is produced in Director’s Cut, part of Theatre Fairfield’s season. (Prerequisite: TA 30) Three credits.
TA 241 Examining the Sixties: History, Art, and Legacy (H)
This course, offered by two historians who specialize in 20th-century American history, explores the 1960s from the dual perspectives of history and the arts. Political and artistic change happened concurrently in this era, and was often instigated by people who promoted societal change via the creation of art. The course approaches the period as “the long ‘60s,” beginning in the early 1950s and ending in 1975 with the U.S. withdrawal of forces from Vietnam. Class sessions combine lecture, discussion, and experiential events as a means of understanding how art and activism worked hand-in-hand. Students may choose to take this course for either visual and performing art or history core credit. Also listed as HI 241. This course meets the U.S. diversity requirement. Three credits.

TA 250 Advanced Stagecraft (A)
This introduction to the technical aspects of theatre production provides an overview of the physical stage, including the use of scenery and lighting. Students learn basic techniques of set construction and rigging, lighting, and electronics for today’s theatre. Students are required to participate in construction and rigging for Theatre Fairfield productions. Three credits.

TA 255 Advanced Design (A)
This practical course fosters the development of visual communication skills, play analysis skills, and sensitivity to the communicative properties of visual images. The course covers scenic design, costume design, and lighting design, and emphasizes concept development and creative research. Readings include influential designers Robert Edmond Jones and Edward Gordon Craig. (Prerequisite: TA 155) Three credits.

TA 300 Special Topics (H)(A)
Students undertake an in-depth study of a specific problem, period, or style of acting, dance, or other aspect of production conducted by a leading scholar/practitioner in the field. The course is open to invited students only. Three credits.

TA 310 Technique and Theory of Production (H)
This in-depth exploration of theatre aesthetics and production theory centers on study and analysis of the writings and work of such major figures as Antonin Artaud, Peter Brook, Harold Clurman, Edward Gordon Craig, Jerzy Grotowski, and Susan Sontag. Students consider what theatre is, can, and should be while studying varying perspectives on theatrical design, directing, and staging practices. The course also examines contemporary theatre management and administration. The class culminates in group projects that present detailed production books for a selected classic play, including a consideration of style, period, point of view, historical precedent, acting, directing, design, venue, and budget. This is the capstone class for theatre majors and minors but other interested students with sufficient background are welcome. Three credits.

TA 395 Theatre Internship (A)
With faculty sponsorship and departmental approval, students develop internships as assistants to professional theatre designers and managers or with professional theatres, studios, and production companies in the regional/metropolitan area. Internships are also available in the organizational and management areas of Theatre Fairfield. Students interested in becoming interns must consult with theatre faculty well in advance of the desired internship semester. Three credits.

TA 399 Independent Study (H)(A)
Usually open only to students earning a major or minor in theatre, this course allows students to intensively explore stage management, design, or directing under the guidance of a faculty member. Students must have the approval of the theatre faculty before registering for this course. Three credits.
Women's Studies is an interdisciplinary program that focuses on two levels of inquiry, the theoretical and the experiential. The program demonstrates the ways in which cultural assumptions about gender influence the development of personal identity and public roles that consequently affect all social and political structures. By examining women's contributions in such fields as social science, natural science, the arts, business, and literature, the goal of the women's studies minor is to explore the experience of women of all cultures and socioeconomic backgrounds. Women's Studies courses engage with issues of race, ethnicity, class, gender, sexuality and other key components of identity, and the ways in which they intersect. The program allows female and male students to focus on issues of diversity and alternative perspectives.

Requirements
For an 18-credit minor in women's studies, students complete:

- Five courses, three of which must be gender-focused, and two others, which may be gender-focused or gender-component courses.
- WS 301 Women's Studies Capstone Seminar after completing the other five courses.

Courses must be chosen from a variety of fields and disciplines. Courses taken to fulfill arts and sciences core requirements may be used to fulfill requirements for the minor with the permission of the program director.

Courses available for the women's studies minor:
(*indicates gender-component course)

Applied Ethics
AE 271 The Sacred Balance
AE 283 Environmental Justice
AE 297 Eco-feminism
AE 298 Ethics and Feminist Perspectives

Biology
BI 71 Identity and the Human Genome

Business
BU 325 Law, Women, and Work

Classics
CL 123 Women in Classical Literature

Communication
CO 236 Gender, Sexuality, and Media
CO 246 Family Communication

Economics
EC 114 The Economics of Race, Class, and Gender in the American Workplace

English
EN 275 Victorian Poetry and Poetics
EN 278 Irish Women Writers
EN 284 Writers of the Asian Diaspora
EN 289 Modern Women Writers
EN 335 Gender and Sexuality in Film and Literature
EN 338 Seminar: Gender Theory
EN 345 Representations
EN 346 The Woman Question: Early Feminism and 19th-Century Literature
EN 348 Contemporary Women Writers of Color
EN 353 Gender and Western Values: Literature of Early Modern Europe
EN 354 Love, Gender, Spirituality: Literature of Early Modern England
EN 357 All About Eve
WS 299  Women’s Studies Internship
The internship program allows students to gain on-site experience that can be related to the discipline of Women’s Studies. Internship areas include health, publishing, communications, politics, and many other fields. Students consult the program director for a list of internship opportunities before registering for this course. Faculty supervision helps students integrate their experiences with the intellectual foundation acquired in their academic courses. Three credits.

WS 301  Women’s Studies Capstone Seminar
Students take this final course in the minor sequence in the senior year after completing the other five required courses. The course integrates feminist approaches across the disciplines, emphasizing the relationship between theory and practice. It is open to seniors only; juniors may enroll with the permission of the program director. Three credits.

WS 399  Women’s Studies Independent Study
By arrangement with Women’s Studies faculty, students may choose to work independently on special topics. See the program director for details. Three credits.
The Charles F. Dolan School of Business
A Message from the Dean

Excellence is what the business community demands of its leaders and this is what drives the activities of the Charles F. Dolan School of Business at Fairfield University. Our high quality was recognized in 1997 when AACSB International - The Association to Advance Collegiate Schools of Business accredited our undergraduate and graduate degree programs. Only 40 percent of all business schools are so recognized.

We have achieved this recognition because of the success we have had in educating undergraduate and graduate students to be successful and responsible business leaders dedicated to pursuing excellence. In doing so, we focus on being a worldwide leader in business curriculum innovation. In our undergraduate programs we focus on teaching current best practices for solutions to business problems within the context of a rigorous conceptual framework. We partner with our stakeholders in the business community to provide our programs in a technologically advanced active learning environment. Our active learning environment brings actual organizational problems into the classroom and puts students into actual organizational settings. This approach enables us to create a seamless learning environment that builds on our faculty’s excellence in their respective academic disciplines and that also builds on the business experience each faculty member has in his or her field. Students graduating from the Charles F. Dolan School of Business are thus equipped with state-of-the-art knowledge in current business concepts and practices. Our top-notch programs and faculty are appropriately housed in a building dedicated to the Charles F. Dolan School of Business. The educational facilities available to students in this building and on the entire campus are second to none.

This exciting business-learning environment is enhanced by our key geographic location, which puts us in close contact with the more than 40 Fortune 500 headquarters located within 50 miles of Fairfield and close to 100 Fortune 500 headquarters located in New York City and lower Westchester County. In addition, Fairfield County is home to the largest concentration of U.S. headquarters of foreign multinational corporations.

Because we are so highly regarded by the business community, each year the school hosts numerous high level executives – many of them alumni – who visit our classes and share their expertise with our students. Our business degree can be a passport to success in the job market. Our students are widely sought after by top firms upon graduation.

We believe that the Charles F. Dolan School of Business at Fairfield University offers you a tremendous opportunity to complete your undergraduate and graduate business education in a unique academic and professional environment. We look forward to welcoming you!

Dr. Norman A. Solomon
Dean, Charles F. Dolan School of Business
Students in the Dolan School of Business take the general education core curriculum required of all undergraduate students, thus ensuring that they receive a broad knowledge of the humanities, mathematics, social sciences, and natural sciences. In addition, students take a business core curriculum that introduces the fields of accounting, business ethics, economics, finance, global strategy, information systems, the legal environment of business, management, marketing, operations management, and statistics. The balance of the program depends on the major – accounting, finance, information systems, management, marketing, or international business. Minors are available to all students in accounting, accounting information systems, finance, information systems, management, marketing, international business, business law and ethics, and operations management.

All members of the business faculty act as academic advisors. Faculty members have substantial business experience, which makes them invaluable guides for students choosing a course of study to further specific career goals. The combination of general education and business core courses with those within the major areas of study develops in students the flexibility of mind that is a critical asset for the executive.

Students are motivated to continue to grow intellectually and be prepared for a professional career and future graduate study. A broad perspective on society and the proper role of business, based upon an appropriate set of moral values, are emphasized. In consultation with faculty, students follow an approved curriculum that reflects the depth and breadth of modern business practices.

**Major Areas of Study**

Six major areas of study are available to students in the Dolan School of Business. It is advised that students decide on a major, in consultation with their advisor, prior to the end of the sophomore year before registration begins (even though they are not required to do so until the beginning of their junior year). Once a major is selected, students have the option to change their major without penalty provided there is a sufficient period of time to complete the degree. The process of selecting and changing a major requires the student to complete a Change of Major form, available in the Dean’s office.

Majors available in the Dolan School of Business include:

- Accounting
- Finance
- Information Systems
- International Business
- Management
- Marketing

**Minor Areas of Study**

Dolan School of Business minors are available to all university students. It is the student’s responsibility to complete the proper university form to enroll in a minor and to make sure that appropriate copies of the form are filed in both the dean’s office and the registrar’s office. The form is available in the Dean’s office. The completion of the minor is subject to the availability of courses.

Minors available in the Dolan School of Business are as follows:

- Accounting
- Accounting Information Systems
- Business Law and Ethics
- Finance
- Information Systems
- Management
- Marketing
- Operations Management
Change of School
Students may transfer into the Dolan School of Business from the College of Arts and Sciences, School of Nursing, School of Engineering, or University College if their overall grade point average is 2.80 or better.

Honors Program
The Dolan School of Business participates in the University Honors Program (described on page 124) for those undergraduates who have distinguished themselves in their studies. Successful completion of the Honors Program is recorded on the graduating student’s transcript.

Internship Program
The Dolan School of Business offers optional internships for qualified students. The presence of a large number of corporate offices in the Fairfield area provides highly unusual and rewarding opportunities for internships. These internships are undertaken for credit and, sometimes, for pay. An on-the-job supervisor and a faculty member monitor student progress. Students interested in internships should discuss arrangements as early as possible with the director of internship programs. Students must have an overall GPA of 2.50 or higher to qualify for the internship program and to be a major in the School of Business. Internships do not fulfill any courses towards the major; rather, they satisfy either the business elective or a free elective requirement.

School Activities/Programs
Complementing the Dolan School of Business’s traditional pedagogical mission are a series of diverse and distinctive programs that serve to enrich the University community and its various constituencies.

• The Insignis Award for Visionary Leadership and Distinguished Achievement in Business is an award established to recognize outstanding business leaders for their fulfillment of the Jesuit concept of insignis — to distinguish oneself in a remarkable or extraordinary way. The award is consistent with the goals of The Dolan School of Business to achieve recognition and distinction in creating a business educational experience of the whole person who is socially responsible and prepared to serve others.

• The Distinguished Executive Lecture Series brings to the classroom setting leaders from the corporate or financial communities who address students on a specific topic related to the subject matter within an identified major area of study within the school. The unique perspective that business practitioners can bring to the academic environment is a welcome and valuable element to a student’s business education.

New Curriculum Enhancements in the Dolan School of Business Core
Effective with the Class of 2007, The Charles F. Dolan School of Business has redesigned the undergraduate business core curriculum to provide a solid foundation in business, while giving students more time to delve into their individual areas of study. Students following the previous curriculum should follow curricula requirements as set forth in the 2003-2004 undergraduate catalog and may consult the assistant dean in the Dolan School of Business.

Total required credits: a minimum of 123 credits
Total required courses: a minimum of 41 three- or four-credit courses

General Education Core Curriculum
(21 courses; 63 credits)
The general education core curriculum provides a truly liberal education, drawing upon five major areas of knowledge. For each of these five areas of competency, business majors select courses as follows:

Area I: Mathematics and Natural Sciences
• Three semesters of mathematics: MA 121 or MA 171, MA 122 or MA 172, and MA 217
• Two semesters of a natural science.

Area II: History and Social Science
• Two semesters of history. HI 30 plus one 200-level course. CL 115-116 (Greek and Roman Civilization) may be used to fulfill this requirement.
• EC 11 Introduction to Microeconomics
• EC 12 Introduction to Macroeconomics
Area III: Philosophy and Religious Studies
- Two semesters of philosophy. PH 10 is required followed by a 100-level course.
- Two semesters of religious studies. RS 10 is required.
- AE 291 Business Ethics

Area IV: English and Visual and Performing Arts
- EN 11 Composition and Prose Literature
- EN 12 Introduction to Literature and Writing the Research Paper
- One semester of English literature. Course must have a number designation of 200 or greater, not including EN/W courses.
- Two semesters of visual and performing arts. One semester must be in the art history, music history, theatre history, or film history.

Area V: Modern and Classical Languages
- Two semesters (at least at the intermediate level) of any language listed among the offerings of the Department of Modern Languages and Literatures or the Classical Studies Program.

Diversity Requirements*
All students must complete one U.S. and one world diversity course from a designated list of courses. The courses may be chosen from the University core, business core, major, or electives.

Business Core Requirements
(9 courses; 27 credits)
- AC 11 Introduction to Financial Accounting
- AC 12 Introduction to Managerial Accounting
- IS 100 Introduction to Information Systems
- FI 101 Introduction to Finance
- MG 101 Introduction to Management in Organizations
- MK 101 Principles of Marketing
- OM 101 Introduction to Operations Management
- BU 211 Legal Environment of Business
- MG 300 Business Strategies in the Global Environment

1These courses should be completed in the first year.
2These courses should be completed in the second year.
3This course may not be taken until the junior year.
4This course may not be taken until the senior year.

Business major requirements
(6 courses; 18 credits)
Descriptions and requirements of each of the six majors are detailed in the respective departmental sections that follow. Course descriptions are also included. Courses specific to the international studies/international business major are described under International Studies in the College of Arts & Sciences section of this catalog.

Business Elective
(1 course; 3 credits)
Each of the majors in the Dolan School of Business requires the completion of one business elective course of three credits. This elective course may be taken from any business offering, including an internship, provided all prerequisites are met.

Free Electives
(4 courses; 12 credits)
All business students must complete four free electives totaling 12 credits. A free elective is a three- to four-credit course chosen by students without any restrictions related to their majors. Students can use the free electives towards a double major or a minor.
Course Descriptions

Courses specific to the departments of accounting (AC), finance (FI), information systems and operations management (IS or OM), management (MG), and marketing (MK) are described in the respective departmental sections that follow. Courses specific to the international studies/international business major are described under international studies in the College of Arts & Sciences section of this catalog. Courses beginning with the letter BU are described below.

BU 120 Environmental Management and Policy
The course provides an opportunity to consider environmental issues and decision-making from a business, economic, and policy perspective. Defining and proposing solutions to domestic and international environmental problems provides for different points of view and approaches that are discussed and debated. The course format combines readings, simulations, cases, in-class discussions, role-playing, and presentations. Three credits.

BU 211 Legal Environment of Business
This course examines the broad philosophical as well as practical nature and function of the legal system, and introduces students to the legal and social responsibilities of business. The course includes an introduction to the legal system, the federal courts, Constitutional law, the United States Supreme Court, the civil process, and regulatory areas such as employment discrimination, protection of the environment, and corporate governance and securities markets. (Prerequisite: junior standing) Three credits.

BU 220 Environmental Law and Policy
This course surveys issues arising out of federal laws designed to protect the environment and manage resources. It considers in detail the role of the Environmental Protection Agency in the enforcement of environmental policies arising out of such laws as the National Environmental Policy Act, the Clean Water Act, and the Clear Air Act, among others. The course also considers the impact of Congress, political parties, bureaucracy, and interest groups in shaping environmental policy, giving special attention to the impact of environmental regulation on business and private property rights. Three credits.

BU 312 The Law of Business Organizations and Financial Transactions
This course offers an analysis of legal principles related to the law of agency, sole proprietorships, partnerships, corporations, limited liability companies, and other business forms. The second half of the course addresses several sections of the Uniform Commercial Code, such as negotiable instruments, bank collections and deposits and secured transactions. Finally, the course examines the law of suretyship, debtor-creditor relationships, and bankruptcy. (Prerequisite: BU 211) Three credits.

BU 320 Employment Law and Discrimination in the Workplace
This course examines a variety of legal issues related to the workplace including the doctrine of employment at will, employee privacy, and the history and development of labor unions and the legal protections afforded by the National Labor Relations Act. A study of the role of the Civil Rights Act of 1964 and the Equal Employment Opportunity Commission in eradicating discrimination based on race, sex, religion, national origin, age, and disability occupies a major portion of the course. Other employment issues include affirmative action, worker safety, and compensation. This course meets the U.S. diversity requirement. Three credits.

BU 325 Law, Women, and Work
This course explores the development of American law relating to women and gender, and its interrelationship with women's status and achievement in the workplace. The course focuses on how social concepts of gender have impacted law and work in the United States. Topics include: the historical context: the “cult of true womanhood;” the early feminist challenges; and early protective legislation; Constitutional development of the ideas of gender equality; equal employment opportunity laws; family issues including family leave, pregnancy, and benefits protection; current theoretical perspectives on women in work and law; and special issues regarding women of color, women in blue collar jobs, women in management, and women as entrepreneurs. This course meets the U.S. diversity requirement. Three credits.

BU 391 Seminar in Business Law and Ethics (capstone seminar)
This interdisciplinary study of these two aspects of the business environment is cross-listed as AE 391. Topics focus on the interaction of law and ethics, and the regulatory public policy issues in such areas as multiculturalism, work and family, the environment, product safety, international business, and advertising. This course is the capstone experience for students earning a minor in business law and ethics. (Prerequisites: AE 291, BU 211, two other courses in either law or applied ethics, or permission of the instructor) Three credits.
Accounting Minor

The accounting minor offers students an extensive understanding of accounting content and function in areas of business. It is not designed to prepare a student for the Certified Public Accountant exam.

For a 15-credit accounting minor, students must complete:

- AC 11 Introduction to Financial Accounting
- AC 12 Introduction to Managerial Accounting
- AC 203 Intermediate Accounting I
- AC 204 Intermediate Accounting II
- one 300-level accounting elective course

Accounting minors must maintain a 2.5 average in all accounting courses.

Accounting Information Systems Minor

The accounting information systems minor highlights the impact of technology on the accounting profession as well as the regulatory and internal control issues associated with accounting information.

For an 18-credit minor, students must complete:

- AC 11 Introduction to Financial Accounting
- IS 100 Introduction to Information Systems
- AC 203 Intermediate Accounting I
- AC 365 Accounting Information Systems
- IS 240 Systems Analysis and Logical Design
- IS 260 Database Systems

Accounting majors may double count AC 203 for the accounting major and the accounting information systems minor. Information systems majors may double count IS 240 for the information systems major and the accounting information systems minor. Accounting information systems minors may not declare a second minor in accounting or information systems.

Course Descriptions

AC 11 Introduction to Financial Accounting
This course introduces students to financial accounting. Students learn to read and comprehend published financial statements and are introduced to the financial reporting process. Topics include financial statement analysis; accrual accounting; revenue and expense recognition; and accounting for assets, liabilities, and equities. Three credits.
AC 12 Introduction to Managerial Accounting
This course introduces students to managerial accounting and the role of accounting information in managerial decision-making. Topics include a description of basic cost elements; the interrelationship between fixed costs, variable costs, and profit; and methods of accumulating the costs associated with producing products and providing services such as activity-based costing, performance evaluation, and project evaluation. (Prerequisite: AC 11) Three credits.

AC 203 Intermediate Accounting I
This course provides an in-depth study of financial accounting theory and concepts, and the presentation of financial statements in conformity with Generally Accepted Accounting Principles (GAAP). The course emphasizes balance sheet valuations and their relationship to income measurement and determination. (Prerequisite: AC 11) Three credits.

AC 204 Intermediate Accounting II
This course continues the in-depth study of financial accounting theory and concepts, and the presentation of financial statements in conformity with Generally Accepted Accounting Principles (GAAP) begun in AC 203. In addition to balance sheet valuation and income measurement issues, the course includes special topics such as earnings per share, accounting for income taxes, leases, and cash flows. (Prerequisite: AC 203) Three credits.

AC 310 Advanced Accounting
This course focuses on accounting for various financial investments, including financial instruments, derivatives, and business combinations. Students also study the role of financial instruments in hedging foreign currency exposures and the complications encountered in financial reporting in a global environment. (Prerequisites: AC 204; junior or senior standing) Three credits.

AC 320 Cost Management
This course focuses on the proactive management of costs and the effect of costs on managers’ decision-making, planning, and control. Students learn to accumulate costs and assign them to products and services using several different techniques such as activity-based costing. Other topics include profit planning and resource allocation through the budgeting process; the evaluations of organizational performance in cost, profit, and investment centers; and the importance of cost in the strategic management of the organization. (Prerequisites: AC 12, AC 203; junior or senior standing) Three credits.

AC 330 Auditing
This course introduces the audit of financial statements by independent CPAs. It bridges the gap between knowledge of accounting principles and the professional practice of accounting and auditing in the working world. Students learn about the role of auditing in society and the professional standards for behavioral and technical competence. They also study the factors entering into judgments about audit risk and the fair presentation of financial statement assertions. The course presents programs and procedures for defining audit objectives, gathering evidence, making decisions, and exercising professional skepticism. (Prerequisites: AC 204; junior or senior standing) Three credits.

AC 343 Federal Income Taxation I
This course introduces students to income tax, adjusted gross income, deductions from adjusted gross income, itemized deductions, property transactions, filing status and exemptions, passive activity losses, tax credits, and tax computations. The course also includes tax compliance and preparation considerations for individuals. (Prerequisites: AC 204; junior or senior standing) Three credits.

AC 345 Federal Income Taxation II
This course continues the study of taxation begun in AC 343. The topics include formation of the corporation, distributions, liquidations, and reorganizations. The course covers tax return preparation, tax planning, research, and compliance issues throughout, and also includes personal holding companies, Subchapter S corporations, and partnerships. (Prerequisites: AC 343; junior or senior standing) Three credits.

AC 365 Accounting Information Systems
This course analyzes the methods used to capture, process, and communicate accounting information in a modern business enterprise. Students learn to document business transaction cycles using data-flow diagrams and flowcharts. They analyze the accounting information system, identify weaknesses, and recommend improvements to internal control. Students process accounting information through a modern database management application program such as a general ledger package or an enterprise resource planning system. (Prerequisites: AC 12; junior or senior standing) Three credits.

AC 380 Municipal and Not-for-Profit Accounting
This course examines fund accounting theory and concepts, and the reporting principles promulgated by the Governmental Accounting Standards Board as well as the Financial Accounting Standards Board as they relate to municipalities, healthcare organizations, and universities. (Prerequisites: AC 204; junior or senior standing) Three credits.

AC 391-392 Accounting Internship
Students gain practical experience in accounting. (Prerequisites: accounting major, junior standing, minimum overall GPA of 2.5) Three or six credits.

AC 397-398 Independent Study in Accounting
This course provides students with the opportunity to study and research a specialized topic under faculty guidance. (Prerequisites: accounting major, senior standing, minimum overall GPA of 2.5, and approval) Three or six credits.

Requirements

Finance Major
Finance majors study the theory and practice of financial management and investments. Additionally, they analyze actual case histories of the financial operations of several different companies. The courses included in this major area prepare students to enter into financial management positions with corporate or governmental organizations.

For an 18-credit major in finance, students complete:

• FI 210 Principles of Investments
• FI 215 Financial Management
• FI 330 Case Studies in Finance
• Any three* courses chosen from
  • FI 200 Global Capital Markets
  • FI 220 Working Capital Management
  • FI 240 International Finance
  • FI 310 Portfolio Analysis
  • FI 315 Futures and Options Markets
  • FI 320 Financial Modeling

*At least one elective must be a 300-level course.

Finance Minor
This minor offers students the opportunity to complement their major by studying financial theory and its application to decision-making. The investment and financing decisions of organizations are emphasized.

For a 15-credit minor in finance, students complete:

• FI 101 Introduction to Finance
• FI 210 Principles of Investments
• FI 215 Financial Management
• Two finance courses selected from the following:
  • FI 200 Global Capital Markets
  • FI 220 Working Capital Management
  • FI 240 International Finance
  • FI 310 Portfolio Analysis
  • FI 315 Futures and Options Markets
  • FI 320 Financial Modeling

*Students should note that AC 11, EC 11, EC 12, and one math course are prerequisites for FI 101.

Course Descriptions

This course provides the building blocks for understanding the role of finance in the domestic and international environments. Specifically, in a qualitative and quantitative manner, this course addresses the three interrelated fields of finance, namely: the financial markets, investments, and business finance. Emphasis is given to such issues as forecasting and planning; investment and financing decisions; and interaction with capital markets. (Prerequisites: sophomore standing, AC 11, EC 11, EC 12, one math course.) Three credits.

FI 190 Personal Finance
This course for non-majors covers financial decision-making from a personal standpoint. The course examines investments including stocks, bonds, housing purchases, and mutual funds with an emphasis on the elementary financial principles of risk and return. Other topics include life, health, and other insurance needs, and pension and estate planning. Three credits.

FI 200 Global Capital Markets
With the rate of financial innovation and globalization, increasing financial instruments and institutions are becoming international in nature and scope. This course surveys a variety of financial instruments, institutions, and markets from a global perspective and covers the relationship between financial intermediaries and central banks. Students review the use of traditional and new financial instruments in the context of the specific markets they serve. (Prerequisite: FI 101) Three credits.
FI 210  Principles of Investments
This course offers a general view of the operation of security markets and the factors that influence security prices. Further, it includes basic analysis and valuation of stocks, bonds, options, and futures. The course also provides an introduction to the tools and techniques that can be used to measure performance, manage risk, and construct efficient portfolios. (Prerequisite: FI 101) Three credits.

FI 215  Financial Management
The analysis of optimal financial decision-making for corporate financial managers emphasizes corporate investment, financing, and dividend decisions within the framework of efficient capital markets. Further, the course explores the topics of cash budgeting, real options, economic value added, mergers and acquisitions, bankruptcy, and corporate risk management. (Prerequisite: FI 101) Three credits.

FI 220  Working Capital Management
This course examines the management of current assets and current liabilities and emphasizes cash and marketable securities management, cash budgeting, inventory control, accounts receivable management, and short-term and intermediate-term financing. (Prerequisite: FI 101) Three credits.

FI 240  International Finance
This course deals with the international aspects of corporate finance. Topics include foreign exchange with emphasis on exchange rate determination, exchange rate risk management, international money and capital markets, international capital budgeting, cost of capital, and international trade financing. (Prerequisite: FI 215) Three credits.

FI 310  Portfolio Analysis
This course deals with the principles and applications of modern portfolio theory from the point of view of both the institutional and the individual investor. More specifically, the course analyzes portfolio objectives, efficient portfolio construction, performance evaluation, and portfolio risk management using derivatives. (Prerequisite: FI 210) Three credits.

FI 315  Futures and Options Markets
This course deals with options and futures on financial assets, as well as commodities. The course covers the basic uses of these instruments and the various pricing methodologies based on equilibrium conditions. (Prerequisite: FI 210) Three credits.

FI 320  Financial Modeling
The course emphasizes extensive Excel-based valuation including the creation and analysis of financial statements, scenario analyses, and simulations including the use of simulated trading software for corporate valuation and investment analysis. Data for analyses are obtained from Reuters, Datastream, and Compustat. Contemporary issues in valuation may also be explored, which include real options, EVA, and hedging. The course culminates in either a business plan for a real business or a simulated merger and acquisition. (Prerequisite: FI 215) Three credits.

FI 330  Case Studies in Finance
This course examines and applies the principles developed in financial management and investments in a domestic and international context with the objective of integrating finance practice and theory using case studies. Simulations are used including trading simulations. (Prerequisites: FI 210, FI 215, and senior status) Three credits.

FI 391-392  Finance Internship
Students take up to two semesters of a department-approved internship. Students must have a GPA of 2.5 or higher, have junior standing, and complete an internship in their major area. Three or six credits.

FI 397-398  Seminar in Finance
This is a special program that involves contemporary or specialized topics in finance and may be offered as an independent study format under faculty guidance. (Prerequisites: open only to seniors majoring in finance, with approval by the department chair. Students must have an overall grade point average of 2.5 or better.) Three or six credits.
Requirements

Information Systems Major

The Information Systems major prepares students to design and deliver business solutions that integrate people, processes, and technology. Students learn to:

- identify and analyze business opportunities,
- acquire and assess business solutions,
- lead and facilitate strategic initiatives,
- enable informed decision making, and
- manage relationships with technology providers and customers

Information systems majors study the analysis, design, development, and management of information systems in organizations. They develop an understanding of the need for information, its use in the decision-making process, and the procedures by which information is provided to management.

For an 18-credit major in information systems, students complete:

- IS 240 Systems Analysis and Logical Design
- IS 260 Database Systems

- Two elective courses from information systems or operations management offerings.
- Any two of the following upper-division courses:
  - IS 310 Systems in Organizations
  - IS 320 Systems Design and Implementation
  - IS 395 Systems Project

Students must maintain at least a 2.5 average in all information systems and operations management major courses. Note: IS majors are encouraged to take IS 135 as their third math course.

Information Systems Minor

This minor complements the other disciplines within the school. It provides students with the knowledge and skills to actively participate in the design and delivery of integrated business solutions in their major field.

Students earn a 15-credit information systems minor by completing:

- IS 100 Introduction to Information Systems
- IS 240 Systems Analysis and Logical Design
- IS 260 Databases and Data Management
- Two elective courses from information systems and operations management offerings.

Accounting Information Systems Minor

The accounting information systems minor highlights the impact of technology on the accounting profession as well as the regulatory and internal control issues associated with accounting information.

For a 18-credit minor, students must complete:

- AC 11 Introduction to Financial Accounting
- IS 100 Introduction to Information Systems
- AC 203 Intermediate Accounting I
- AC 365 Accounting Information Systems
- IS 240 Systems Analysis and Logical Design
- IS 260 Database Systems

Accounting majors may double count AC 203 for the accounting major and the accounting information systems minor. Information systems majors may double count IS 240 for the information systems major and the accounting information systems minor. Accounting information systems minors may not declare a second minor in accounting or information systems.
Operations Management Minor

This minor leads to an understanding of the central role technical and functional skills play within the global environment to produce quality products and services in business unit operations.

Students earn a 15-credit operations management minor by completing:

- IS 100 Introduction to Information Systems
- OM 101 Operations Management
- OM 140 Project Management
- IS 210 Management Science with Spreadsheets
- OM 340 Service Operations

Course Descriptions

IS 100 Introduction to Information Systems
This course helps students understand the role of Information Systems in the contemporary business environment. It introduces them to the use of information systems concepts and techniques in solving a wide range of business problems. Working in small teams, students develop, analyze, and present solutions to a business problem using information technology. Three credits.

IS 135 Introduction to Business Programming
This course introduces students to programming logic and design in a contemporary high-level language. Topics include data structures and representation, algorithm development, control structures, object orientation, and user interaction. Business situations provide the basis for course assignments and examples. The course includes weekly programming assignments and a semester project. Formerly IS 235. Three credits.

IS 210 Management Science with Spreadsheets
This course focuses on the modeling and analysis of managerial problems using spreadsheet software and add-ins. Topics include linear programming, integer programming, demand forecasting, decision and risk analysis, and systems simulation. Operations, finance, and marketing problems are set up and solved, and use of "what if" analysis provides further insight into the problems and solutions. (Prerequisites: one course in calculus, one course in statistics, and basic knowledge of spreadsheet software) Three credits.

IS 220 Technology and Society
This course examines the developmental stages of different technologies and their effects on society. Topics include the use of technology to solve social problems in the developing world. The role of technology in the solution of social problems is also explored in such areas as health, environment, communication, education, war, and politics, and gender and ethnic relations. The readings and resulting class discussions focus on technological solutions of contemporary social problems and the moral dilemmas those choices often generate. Special attention is given to the student service project that will be completed during the semester, and to the weekly written reflections. This course meets the U.S. diversity requirement. Three credits.

IS 240 Systems Analysis and Logical Design
This course focuses on the introduction of new systems and technology into the firm. Students learn to analyze and design information systems to meet specific business needs. Coverage includes structured and object-oriented methodologies, with an emphasis on current best practice. CASE tools employing the Unified Modeling Language are used as appropriate. As part of a semester project, students analyze requirements for an information system of moderate size and complexity, and then architect and evaluate alternative systems that meet the requirements. The semester projects are "juried" by a team of experienced professionals from the field. (Prerequisite: IS 100) Three credits.

IS 245 Business Telecommunications and Networks
Students learn the fundamentals of the telephone system and its relationship to computer networking. Students acquire an understanding of LANs, MANs, WANs, wireless networking, network security, and the international standards and protocols related to networking, and discuss management of small and enterprise networks. Students implement a LAN to connect several computers in a classroom and add a wireless device to that network. Students learn how to evaluate, select, and implement different networking options. (Prerequisite: IS 100) Three credits.

IS 260 Database Systems
This course introduces the concepts of data modeling, as they apply in the business world, within the context of a client/server environment. Topics include relational databases, object-oriented databases, and Internet databases, along with the Structured Query Language that is used to create and manipulate databases. Students are also introduced to the architecture of Data Warehouses. Formerly IS 340. (Prerequisite: IS 100) Three credits.
IS 300  Special Topics in Business Computing
In this course students study opportunities and problems created by the increasingly widespread use of computers. They examine new developments and/or current practices in computer and information science. A topic is selected for thorough study; subject areas may include data structures, recent hardware or software advances, and specialized applications. (Prerequisite: IS 100) Three credits.

IS 310  Systems in Organizations
This course examines business strategy and electronic methods of delivering products, services, and exchanges in inter-organizational, national, and global environments. Students explore new business models, the economics of e-business, value chains and value networks, legal and ethical issues, information privacy and security, disaster planning and recovery, and the societal impacts of widespread e-business. The course includes a brief introduction to technical architecture, technology solutions, and financing required for effective e-business. Students investigate emergent opportunities, challenges, and industry shifts through interactive team exercises, case studies, and individual research projects and presentations. (Prerequisite: IS 100) Three credits.

IS 320  Systems Design and Implementation
Students work in collaborating teams to design and build a networked information system. Emphasis is placed on development as an ongoing iterative and incremental process. Standard CASE tools, design patterns, and business practices are used to ensure proper communication and integration across development teams. (Prerequisites: IS 260, IS 240, and a programming course) Three credits.

IS 350  International Information Systems
This course investigates information technologies in a variety of international business environments. The course content includes national infrastructures and discrete information cultures in advanced and developing economies. The social, economic, and political impacts of information technologies outside the United States are examined, with an emphasis on appropriate systems design and control. The course covers contemporary issues such as privacy, security, the protection of intellectual property, and national information policies extensively. This course meets the world diversity requirement. (Prerequisite: IS 100) Three credits.

IS 391-392  Information Systems Internship
Students may take two semesters of internship, approved by the department. Students must have a GPA of 2.5 or higher, have junior standing, and complete the internship in their major area. Three or six credits.

IS 395  Systems Project
This course applies skills that have been learned in the information systems major and the business core. These skills span the areas of project management, systems analysis, systems design, business communication, organizational behavior, software development, operations management, and business processes. Students demonstrate their knowledge by engaging in a student-defined project that provides a business solution for a client. The primary deliverables for the course are a system or a set of alternatives to solve the business problem, along with all related documentation. (Prerequisites: IS 240 and senior status) Three credits.

IS 397-398  Seminar in Information Systems
This special program involving independent study and research is also intended for students accepted in an approved internship. This course, administered by the Office of the Dean, requires a formal application by the student to the faculty project advisor and the department chair. The course does not count toward fulfilling the requirements for the information systems major, but does count toward meeting University credit requirements. (Prerequisite: open only to seniors majoring in information systems and approved by the department chair) Three or six credits.

IS 399  Independent Study in Information Systems
Students pursue topics of special interest through independent study, research, and/or completion of an information systems project under the supervision of a full-time faculty member. The department chair and dean must approve the work. The student and a faculty project advisor who agrees to conduct the work according to a mutually agreeable schedule must complete an application form. Once the form is completed and submitted to the registrar, the student may register for the course, which is taught during the fall and spring semesters. If any work is expected to occur at any time other than the semester registered, students must obtain the approval of the faculty project advisor and the department chair prior to commencing of any work. Normally, students completed at least two advanced information systems courses before taking this course. Three credits.

OM 101  Operations Management
This course provides the primary exposure to service and manufacturing operations management within the business core curriculum. Topics include process modeling, quality management and control, decision analysis, capacity planning, supply chain management, and project planning and control. Special attention is given to showing how concepts and models presented in lectures and readings apply to real-world business situations. Examples of international operations are studied, and ethical issues are explored within the context of decisions such as where to locate facilities. (Prerequisites: sophomore standing and one statistics course) Three credits.
OM 140  Project Management
This course introduces students to project management and its role in business operations, with applications in such functional areas as accounting, finance, information systems, management, and marketing. Topics include the linkage between projects and organizational strategy, project planning and scheduling, project development and implementation, applying best practices and tools, evaluation methodologies and control techniques, and critical success factors. Special attention is given to showing how concepts and models presented in lectures and readings apply to real-world projects. (Prerequisite: one statistics course) Three credits.

OM 340  Service Operations
This course examines service sector industries such as financial services, healthcare, retailing, and education. It focuses on the associated operational challenges related to high labor intensity, variable demand patterns, high degrees of customer contact, and subjectively determined quality. (Prerequisites: IS 100, and BU 225 or OM 101) Three credits.

OM 345  Global Logistics and Supply Chain Management
This course introduces students to logistics management and identifies the relationships between logistics and the other functions of the firm, particularly marketing and operations management. The course covers strategic and operational issues in logistics and supply chain management, including logistics and supply chain design, logistics of customer service, transportation management, demand forecasting, inventory management, order processing, warehousing and materials handling, and facility location. The course examines recent developments in logistics, including third party logistics. (Prerequisites: IS 100, and BU 225 or OM 101) Three credits.

OM 350  Strategic Management of Technology and Innovation
This course enables students to understand and to manage innovation at the operational and strategic levels of an organization. It integrates the management of market, technological, and organizational changes to provide a framework for improving the competitiveness of firms and effectiveness of organizations. It emphasizes an effective transition from research and development to successful products and services. The course adopts a competence-based approach to technology management and focuses on internal structure as well as external linkages and processes. (Prerequisite: IS 100) Three credits.

The International Studies Program at Fairfield University draws from a group of interdisciplinary faculty, practitioners, and students from many parts of the world with a commitment to thinking critically about global challenges, promoting social justice, and service. Students enrolled in the Dolan School of Business have the opportunity to pursue the major in International Business with a co-curricular major or minor in the Dolan School of Business. The International Business major seeks to heighten global awareness in the ways we situate ourselves geographically, and encounter conflict, gender, race, class, nationality, environmental challenges, as well as business and economic development.
Requirements

Students majoring in International Business begin with foundational coursework in international relations, economics, geography, and sociology/anthropology, and complete their degree requirements with a senior research project. To prepare for this, they develop their own specialization taking one theory and one applied course from the thematic areas of Global Development; Conflict, Diplomacy, and Peacebuilding; and Social Justice and Humanitarianism; and by choosing a co-curricular major or minor (with at least one course that has an international focus) in the Dolan School of Business. Students take courses on multinational organizations and regional trade pacts, economic and political systems, socio-cultural structures, microfinance, and other diversities that have operational significance for community and economic development and international business.

Complementary Studies and International Opportunities

The International Studies Program reinforces multidimensional learning with real-world experience through foreign language studies, service learning, Model United Nations, internships and study abroad opportunities, and through work with our faculty in research projects and as student teaching assistants.

For a full listing of courses in International Studies/International Business, see page 244.

Requirements include:

For a major in International Business, students complete:

- IL 50 World Regions
- IL 51 Challenges of Global Politics
- IL 52 Culture and Political Economy
- EC 11 Introduction to Microeconomics (required for all business students)
- EC 12 Introduction to Macroeconomics (required for all business students)
- IL 300 Senior Capstone Seminar
- Choose 2 electives from any of the 3 thematic areas, with 1 theory and 1 applied course
- Choose a co-curricular major or minor in the Dolan School of Business that includes at least one course with an international focus.

Students are advised to select their required electives from the approved course offerings in international studies/international business. Please refer to the International Studies Program for a complete list, pages 128-131.

International Business courses completed abroad must be pre-approved by the assistant dean of the Dolan School of Business.

Students completing the pre-2008-2009 curricular requirements for a major or minor in International Business, are advised to consult with the the assistant dean of the Dolan School of Business.
Plus three more Management courses to complete the general management major. Students are not required to pursue a concentration. Two courses are required from a concentration area in order to receive the concentration notation; the third course can be from any management area. No course may count for more than one concentration.

Concentrations and Area Courses

Business and Society Concentration
Complete at least two courses from the following:
- BU 220 Environmental Law and Policy
- BU 320 Employment Law and Discrimination in the Workplace
- BU 325 Law, Women, and Work
- BU/AE 391 Seminar in Business Law and Ethics
- MG 301 Topics in Business and Society
- MG 350 International Law
- MG 360 Negotiation and Dispute Resolution
- MG 365 Ethics and Technology in Business
- MG 390 Cross-Cultural Management

Human Resources Concentration
Complete at least two courses from the following:
- MG 302 Topics in Human Resources
- MG 320 Diversity in the Workplace
- MG 330 Career Development
- MG 355 Organizational Culture
- MG 380 Performance, Compensation, and Reward
- MG 385 Managing People for Global Business
- MG 390 Cross-Cultural Management
- BU 320 Employment Law and Discrimination in the Workplace
- BU 325 Law, Women, and Work
General Management Major

Complete three courses from the following:

- MG 301  Topics in Business and Society
- MG 302  Topics in Human Resources
- MG 303  Topics in Management
- MG 320  Diversity in the Workplace
- MG 330  Career Development
- MG 335  Entrepreneurship and Small Business Management
- MG 350  International Law
- MG 355  Organizational Culture
- MG 360  Negotiation and Dispute Resolution
- MG 365  Ethics and Technology in Business
- MG 380  Performance, Compensation, and Reward
- MG 385  Managing People for Global Business
- MG 390  Cross-Cultural Management
- BU 220  Environmental Law and Policy
- BU 320  Employment Law and Discrimination in the Workplace
- BU 325  Law, Women, and Work
- BU/AE 391  Seminar in Business Law and Ethics

Minors

Management Minor

This minor offers students in the non-management disciplines an opportunity to examine some of the theories, principles, and issues that influence their growth and development as managers in their chosen fields.

For a 15-credit management minor, students complete:

- MG 101  Introduction to Management in Organizations
- MG 235  Managing Human Resources for Competitive Advantage
- MG 240  Leading and Managing People
- Two other courses from:
  - BU 220  Environmental Law and Policy
  - BU 320  Employment Law and Discrimination in the Workplace
  - BU 325  Law, Women, and Work
  - BU/AE 391  Seminar in Business Law and Ethics

Business Law and Ethics Minor

This minor offers students a foundation in law and regulation, as well as ethics, applied to the business sector to better understand the social responsibility of business and the interdependent nature of business and society.

For an 18-credit minor in business law and ethics, students must complete:

- BU 211  Legal Environment of Business
- AE 291  Ethics in Business Management
- BU/AE 391  Seminar in Business Law and Ethics
- Three courses from the following groups (no more than two courses can be selected from each group):
  - **Group 1**
    - BU 220  Environmental Law and Policy
    - BU 311  The Law of Contracts, Sales, and Property
    - BU 312  The Law of Business Organizations and Financial Transaction
    - BU 320  Employment Law and Discrimination in the Workplace
    - BU 325  Law, Women, and Work
    - MG 350  International Law
  - **Group 2**
    - AE 276  Ethical Dimensions of Global Business Policy
    - AE 281  Ethics of Communications
    - AE 282  Ethics and the Computer
    - AE 284  Environmental Ethics
    - AE 295  Ethics in Law and Society
    - AE 384  Seminar in Environmental Law, Economics, and Policy
    - MG 365  Ethics and Technology in Business
    - Other law or ethics courses by permission of the program director.

One course may double count for the business law and ethics minor and the management major.
Course Descriptions

MG 101  Introduction to Management in Organizations
This course integrates, through theory and its application, the various topics, concepts, and modalities that make up the Management discipline. Its purpose is twofold: 1) to provide all business students with a strong grounding in how individuals and organizations function to support the strategic goals of business, and 2) to provide a foundation for further study by management majors and minors. The course introduces students to team/group work; the relationship of business to local, national, and global communities; the ethical implications of business decisions and models; organizational behavior; human resource management; leadership and organizational culture. (Prerequisite: sophomore standing) Three credits.

MG 235  Managing Human Resources for Competitive Advantage
This course introduces students to how effective management of people can contribute to firm performance and competitive advantage. The course explores human resource management activities: human resource planning, recruiting, selection, training, performance appraisal, compensation, and labor relations. Through extensive use of cases, simulations, and exercises, students actively learn to implement various human resource management strategies to better serve organizational and employee interests. (Prerequisite: junior standing) Three credits.

MG 240  Leading and Managing People
This course prepares students for the task of leading and managing people. The purpose of the course is to address advanced organizational behavior topics as well as to illuminate the research and practice associated with effective leadership. The first segment of the course reviews the leadership literature, including trait theory, aspects of leadership style, leader emergence, contingency theories, and charismatic/transformational leadership practices. The second segment involves skill practice in managing people in the areas of communication, conflict resolution, empowerment, delegation, influence, teamwork, problem solving, and diversity issues. The third and final segment explores strategic leadership from the CEO perspective, and addresses how leaders create change and transform organizations. (Prerequisite: junior standing) Three credits.

MG 300  Business Strategies in the Global Environment
This capstone course, required for senior level students in the School of Business, integrates the business core through the concept of strategic management. It offers an opportunity for students to put together all they have learned in their discipline and to see the “big picture” of how business organizations function. The primary goal is to prepare students to think like top managers and to understand that strategic decision-making encompasses all parts of the organization, internal and external, bringing together all disciplines of management. The course includes lectures, readings, cases, and a capstone group project. (Prerequisites: matriculation in a business program, senior status, completion of business core, or permission of the instructor) Three credits.

MG 301  Topics in Business and Society
This course gives students an in-depth understanding of current issues or topics in the area of business and society. The faculty member teaching this course constructs course content around current developments in his or her research, thus providing students with breaking information about cutting-edge issues in the field and, when appropriate, with an opportunity to participate in the research process. Topics may include business ethics and technology; social and political implications of corporate structure and decision-making; socially responsible investing; and gender constructs and management. (Prerequisites: juniors or seniors with a concentration in business and society or permission of the instructor) Three credits.

MG 302  Topics in Human Resources
This course examines topics in human resource management as they relate to contemporary organizations. The course gives students an in-depth understanding of current issues or topics in the area of human resources, giving special attention to the strategic aspect of human resource management: how human resources can create value for the organization. Topics may include strategic human resource management; human resource systems; human resource planning; quality of work life; flexible work; diversity; affirmative action; legal aspects of employment; and work-family issues. (Prerequisite: junior standing) Three credits.

MG 303  Topics in Management
This course gives students an in-depth understanding of current issues and topics in management. The focus is on the application and analysis of managerial principles in contemporary problem solving. The faculty member teaching this course constructs course content around current developments in his or her research area. Topics may include decision-making in a chaotic environment; change management; organizational structure and design; health care; social justice; the political and social context of organizations; the consequences of the free market logic; leadership; the environment; diversity and gender; e-business; and managing virtual teams and organizations. Three credits.
MG 320  Diversity in the Workplace
This course allows questions to be framed, and answers sought, with regard to the challenge of diversity in the work environment. The course uses readings, exercises, and real-world projects to formulate the following: a definition of diversity; an awareness of its impact on businesses and their managers; the identification of the challenges that diversity presents and the opportunities it allows for even more productive workplace interactions; and the necessary skills, attitudes, and patterns of critical thinking needed for effective leadership in this important area. The course presents issues in the specific real-life context of ethnic, racial, gender, and class groups. This course meets the U.S. diversity requirement. (Prerequisite: junior standing) Three credits.

MG 330  Career Planning
This course prepares students for the job search while exploring theoretical issues in career development over the life span. Theories of career development covered include: life stage and career stage models, aspects of politics that shape careers, issues of derailment, technical career paths, gender issues in careers, mentoring, and new career models, such as the boundaryless career, the protean career, and the kaleidoscope career. Students undertake a resume revision process, develop a sample cover letter, participate in workshops on Internet job searching techniques, and practice mock interviews. An in-class session with members of the Career Planning Center is included. Students may also receive credit for a job shadowing assignment, attendance at Career Fairs, and other career-related activities. (Prerequisites: junior standing; MG 240 or MG 235; or permission of the instructor) Three credits.

MG 335  Entrepreneurship and Small Business Management
This course raises student awareness of the problems, opportunities, policies, and practices of the small-business enterprise and its unique role in the free enterprise system. The small-business firm is examined from the conception of the opportunity to operation of the firm, including the creative idea, feasibility studies, the development of the business and financial plan, launching the venture, and managing the firm. Participants study case problems of small-business firms. (Prerequisite: junior standing) Three credits.

MG 340  Critical Issues in Management
This course applies the knowledge students have acquired from previous management courses by examining integrative topics and issues in both domestic and global contexts. The focus of the course reflects traditional core concepts and their application to emerging critical issues in the field of business management. Case studies and experiential learning are used to enhance the classroom pedagogy. (Prerequisite: senior standing) Three credits.

MG 350  International Law
This course is a study of international laws, legal institutions, and the societal and cultural institutions that impact and regulate business activity throughout the world. The student is introduced to the risks of international business and how those risks differ from doing business domestically; the function and importance of public international law; the international commercial transaction and its potential problems; and the basic structure and principles of international trade law and negotiations for trade. Also discussed are the legal and ethical problems facing multinationals operating in a number of countries, including licensing and protection of international property rights, and a comparative analysis of host country employment laws. Special emphasis is placed on the developing countries and emerging markets, such as China, Russia, India, Africa, Latin America, the Middle East, and the Caribbean, with a comparative legal and cross-cultural perspective. This course meets the world diversity requirement. (Prerequisite: junior standing) Three credits.

MG 355  Organizational Culture
The notion of organizational culture is rooted in the assumption that organizations are greater than the sum of their material parts. Culture, therefore, is a means for close examination of the operation assumptions shaping organizational identity and behavior. Special emphasis is placed on organizational thinking, the presuppositions driving thinking, and the challenges that culture poses for substantive organizational change. (Prerequisite: junior standing) Three credits.

MG 360  Negotiation and Dispute Resolution
This course builds skills in negotiating and managing disputes and explores various theories concerning negotiation styles, strategy and tactics, alternative dispute resolution, and the major legal and ethical issues in the field. The course strengthens negotiation skills, introduces the many formal and informal processes available for dispute resolution, and develops managers' ability to resolve and prevent disputes. The heart of the course is a series of experiential exercises that create opportunities to practice and develop the principles learned in the course. (Prerequisite: junior standing) Three credits.

MG 365  Ethics and Technology in Business
This course examines the ways computer technologies may pose new kinds of ethical issues that call for fresh approaches to thinking ethically about business. The purpose of the course is to help students prepare to deal effectively with ethical issues of a technology they are likely to face in their careers. (Prerequisite: junior standing) Three credits.

MG 380  Performance, Compensation, and Reward
This course covers theories and practices for effective compensation management. Topics include strategic perspectives of compensation systems, determining pay
structure, job analysis, and job evaluation, design and administration, external pay competitiveness, designing pay levels, employee contributions and individual pay, subjective performance evaluation and merit pay, alternative reward systems, employee benefits, government’s role and compliance, pay discrimination, budgets and pay administration, and union role in wages and salary administration. (Prerequisite: junior standing) Three credits.

MG 385 Managing People for Global Business
This course recognizes the complexities of managing human resources in the global business arena. Modern-day business is characterized by the relentless pace of globalization, through formation of international collaborations, mergers, joint ventures, and the opening up of new markets such as China, India, and Eastern Europe. There has been a dramatic increase in virtual work teams across several countries, globally outsourced work, and cultural diversity in the workplace as more people move across national borders to work. As a result, human resource management practices like recruitment, training, compensation, performance management, and employee relations are more complex. Additionally legal and regulatory requirements of foreign countries, cultural differences, expatriate management, and workforce mobility become important considerations. This course analyzes these complexities along with in-depth study of the people-related issues in different countries in Asia, Africa, Latin America, and Eastern Europe. This course meets the world diversity requirement. (Prerequisite: junior standing) Three credits.

MG 390 Cross-Cultural Management
Globalization, the internationalization of markets and corporations, has changed the way modern corporations do business. This course examines major themes and issues in the area of cross-cultural management. It focuses on three perspectives: the values, attitudes, and behaviors that are common to a cluster of countries, specific to one country, or specific to a major cultural subgroup or subgroups within one country. It explores what happens when cultures clash, and the need to understand different approaches to doing business in a diverse world. This course meets the world diversity requirement. (Prerequisite: junior standing) Three credits.

MG 391-392 Management Internship
Students may take two semesters of internship, approved by the department. (Prerequisites: students must have a GPA of 2.5 or higher, have junior standing, and complete the internship in their major area) Three or six credits.

MG 397-398 Seminar in Management
This special program involving independent study and research under faculty guidance is also intended for students accepted in an approved internship. Open only to seniors majoring in management and approved by the department chair. (Prerequisites: students must have an overall grade point average of 2.5 or greater) Three or six credits.

Requirements

Marketing Major
Marketing majors examine the exchange processes by which consumers and organizations satisfy their needs and wants. In a sense, it is the most humanistic of the business majors; it requires students to understand consumer behavior, the motivation of sales personnel, the impact of advertising and communication on the potential consumer, the characteristics of consumers, the cultures involved in international marketing, market research techniques, and the role of marketing on the Internet. Marketing majors may further specialize by choosing one of two concentrations: relationship marketing or integrated marketing communications.

For an 18-credit major in marketing, students complete:

- MK 212 Consumer Behavior,
- MK 311 Marketing Research,
- MK 312 Global Marketing, and
- Three more marketing courses listed below. Two courses are required from a concentration area in order to receive the concentration notation.

Relationship Marketing Concentration
Complete at least two courses from the following:
- MK 221 Sales and Sales Management
- MK 321 Marketing Channels
- MK 322 Business to Business Marketing
Integrated Marketing Communications Concentration
Complete at least two courses from the following:
- MK 231 Advertising
- MK 331 Media Strategy
- MK 332 Public Relations

General Marketing Major
Complete three courses from the following:
- MK 221 Sales and Sales Management
- MK 231 Advertising
- MK 241 Internet Marketing
- MK 321 Marketing Channels
- MK 322 Business to Business Marketing
- MK 331 Media Strategy
- MK 332 Public Relations
- MK 341 Brand Management
- MK 342 Contemporary Issues in Marketing

Marketing Minor
This minor provides students with a basic foundation in marketing by exposing them to the functions that constitute the marketing discipline, including market research techniques and consumer behavior.

For a 15-credit minor in marketing, students must complete:
- MK 101 Principles of Marketing
- MK 212 Consumer Behavior,
- MK 311 Marketing Research,* and
- Two courses from the following:
  - MK 221 Sales and Sales Management
  - MK 231 Advertising
  - MK 241 Internet Marketing
  - MK 312 Global Marketing
  - MK 321 Marketing Channel
  - MK 322 Business to Business Marketing
  - MK 331 Media Strategy
  - MK 332 Public Relations
  - MK 341 Brand Management
  - MK 342 Contemporary Issues in Marketing

*Students should note that statistics and senior standing are prerequisites for MK 311.

Course Descriptions

MK 101 Principles of Marketing
The purpose of this course is to introduce the student to the fundamental concepts and theories that drive day-to-day marketing decisions. A thorough understanding of the marketplace (consumer or business-to-business) is at the heart of such decision-making, and the student develops skills for identifying the customer’s wants and needs and satisfying these demands. The core tools that enable managers to move from decision-making to action are addressed, namely; product development, pricing, channel management and structure, and promotions (including advertising and sales). Additional relevant topics include global marketing; society and marketing ethics, and Internet marketing. Students are required to work in a team to construct a written marketplace analysis for a chosen product/service. (Prerequisite: sophomore standing) Three credits.

MK 212 Consumer Behavior
This course provides students with an understanding of the behavior of consumers in the marketplace, using an interdisciplinary approach that employs concepts from such fields as economics, psychology, social psychology, sociology, and psychoanalysis. Topics include motivation, perception, attitudes, consumer search, and post-transactional behavior. (Prerequisites: MK 101, junior or senior standing) Three credits.

MK 221 Sales and Sales Management
This course helps students learn sales management principles. Effective management of salespeople is critical to business success because many goods and services demand personal contacts to close the sale. To function effectively as managers, students must know how salespeople perform their jobs. In addition, this course emphasizes the role of personal selling, account relationships, territory management, and new technologies in sales management program. (Prerequisites: MK 101, junior or senior standing) Three credits.

MK 231 Advertising
This course focuses on the many changes that are occurring in the advertising industry and how they influence advertising and promotional strategies and tactics. Designed from an integrated marketing communications perspective, this course emphasizes the importance of coordinating the various promotional mix elements with other marketing activities that communicate with a company’s customers. Topics include advertising on traditional media such as television, radio, and magazines, and on non-traditional media such as the World Wide Web, media planning, direct marketing, public relations, sales promotions, and personal selling. (Prerequisites: MK 101, junior or senior standing) Three credits.
MK 241 Internet Marketing
This course examines the impact of the Internet on traditional methods of doing business and explores uses of the Internet for the marketing of goods, services, information, and ideas. The course pays particular attention to the impact of Internet technology on marketing strategy and practices, and relates Internet technology and e-business to established marketing concepts such as promotion, distribution/logistics, pricing, retailing, marketing research, consumer behavior, and many other product/service decisions. (Prerequisites: MK 101, junior or senior standing) Three credits.

MK 311 Marketing Research
This course gives students an appreciation of the role marketing research plays in reducing the risks associated with marketing decisions. The course emphasizes developing the student’s basic skills in conducting and evaluating marketing research projects. Topics include problem formulation, research design, data collection instruments, sampling and field operations, data analysis, and presentation of results. (Prerequisites: MK 101, a statistics course, and senior standing) Three credits.

MK 312 Global Marketing
This course emphasizes the role of marketing and marketing management in different environments having an impact on the various marketing functions. In addition to a focus on marketing activities and their management, which are experienced in the domestic environment, the course emphasizes cultural, political, geographic, and other factors in different environments. The course focuses on international marketing by firms in other nations as well as American firms. (Prerequisites: MK 101, junior or senior standing) Three credits.

MK 321 Marketing Channels
This course provides a management focus and managerial framework to the discipline of distribution and channel management, emphasizing the design and management of marketing channels as a key strategic tool in satisfying the needs of the customers in the new millennium. The course integrates theory and practice, and applies them to the decision-making processes. The course also discusses the importance of the Internet as a marketing channel for the distribution of goods and services. (Prerequisites: MK 101, junior or senior standing) Three credits.

MK 322 Business to Business Marketing
This course examines the characteristics that differentiate industrial from consumer marketing. Topics include the nature of industrial demand; buyer characteristics; industrial market research; competitive bidding; selling of industrial products; sales and advertising strategies in marketing to business, government, and non-profit organizations; and practices and policies in the distribution of industrial goods. (Prerequisites: MK 101, junior or senior standing) Three credits.

MK 331 Media Strategy
This course examines the basic processes involved in strategic media planning including budgeting, selecting media forms and media vehicles, media timing, and media audience measurement. Students understand the role of traditional and non-traditional media, as well as new media such as the Internet, as channels for communicating promotional messages to consumers. The course also covers varied media allocation models. (Prerequisites: MK 101, junior or senior standing) Three credits.

MK 332 Public Relations
This course facilitates the fundamental understanding of audiences: receiving information from them, advertising management of their attitudes and responses, helping to set policies that demonstrate responsible attention to them, and constantly evaluating the effectiveness of all public relations programs. This inclusive role integrates all activities associated with ascertaining and influencing the opinions of a group of people. The course pays increasing attention to the use of electronic technology for messages from fax machines to e-mail to specialized networks in cyberspace. (Prerequisites: MK 101, junior or senior standing) Three credits.

MK 341 Brand Management
This course focuses on one element in the marketing mix: the product. It examines such questions as how should a firm effectively and efficiently manage its current product line and develop potential new products. Consideration is also given to strategic planning. (Prerequisites: MK 101, junior or senior standing) Three credits.

MK 342 Contemporary Issues in Marketing
This seminar on current marketing issues familiarizes students with the latest issues, events, and problems in marketing. The subject matter for the course draws upon recent events in marketing and course materials are derived from current periodicals and cases. (Prerequisites: MK 101, junior or senior standing) Three credits.

MK 391-392 Marketing Internship
Students may take two semesters of internship, approved by the department. (Prerequisites: MK 101, a GPA of 2.5 or better, junior standing, and completion of the internship in their major area) Three or six credits.

MK 397-398 Seminar in Marketing
This is a special program involving independent study and research under faculty guidance. Open only to seniors majoring in marketing and approved by the department chair. (Prerequisites: MK 101, an overall grade point average of 2.5 or better, senior standing) Three or six credits.
School of Engineering
A Message to Students

Welcome to the School of Engineering at Fairfield University, where we are devoted to serving students pursuing undergraduate and graduate engineering degrees. The School provides students the opportunity to combine study with experience and professional practice by combining classroom instruction with industrial internships, offering the prospect for the best in engineering education.

The School of Engineering strives to maintain the highest level of institutional and instructional integrity and remains committed to the Ignatian ideals of education, including intellectual rigor, service to others, and service to faith, with the promotion of justice for all as an absolute requirement. In pursuit of this mission, the School dedicates its resources to the nurturing of the intellectual capital and skills of its students across disciplines, and devotes the material means needed to support a robust working and learning environment. The School’s graduates will have mastered theoretical and practical knowledge of engineering skills, and will have acquired additional competencies in communications, critical judgment, social responsibility, and a sense of economic and ethical values.

In the following pages in this catalog, you will find an explicit description of the academic goals of each of the areas offered in the School of Engineering. As expected, these goals dictate the curricula and degree requirements. The engineering curricula include a robust core of liberal arts courses – the hallmark of Fairfield’s education – that aim to endow our engineering graduates with competencies that transform them into thinking citizens and lifelong learners, and prepare them to live an inspired life.

Additionally, our ambition in the School of Engineering is to enable all our students to assume positions of technical leadership and professional responsibility, and to achieve full satisfaction in their jobs, or in graduate studies, upon graduation from Fairfield. Furthermore, we train our graduates to become energetic participants in the social change that engineering and technology bring about in the course of time.

On behalf of the entire School of Engineering faculty and staff, welcome. We remain committed to excellence in engineering education.

[Signature]

Dr. Evangelos Hadjimichael
Dean, School of Engineering
Program Goals and Assessment
The School of Engineering aims to graduate students with leading-edge engineering skills and additional competencies in oral and written communications and critical thinking who possess a well-developed cultural orientation, an understanding of economic values, and a sense of ethical and social responsibility. The engineering curriculum addresses several knowledge areas: science and mathematics, computer science, major engineering field requirements, and engineering design, on one hand; a liberal studies core composed of courses in English, the humanities, social sciences, and the arts, on the other. Of particular note are the first-year courses, Fundamentals of Engineering (EG 31-32), which are designed to introduce students to the engineering mindset – the tools and vision of engineering – and enable them to recognize the role of creativity and innovation in engineering, and to differentiate among engineering disciplines and their interactions. At the other end of the engineering experience, during the fourth year of studies, the team-driven senior project course offers a rigorous learning experience that completes the education of engineering students.

The mission of Fairfield’s engineering program is to graduate liberally educated engineers equipped with knowledge and experiential skills so they may successfully enter the mainstream of industrial/manufacturing activity, education, or government service, or to continue with postgraduate studies. To that end, the School of Engineering:

- continually improves the quality and currency of its instructional programs and monitors their outcome,
- equips engineering laboratories with modern and versatile equipment and software applications,
- provides support services – advising, self-paced learning, tutorials – as needed by engineering students,
- maintains a close working relationship with industry to better know its needs and identify new opportunities to serve it,
- maintains a close relationship with practitioners of the engineering disciplines to gain input in program development and outcomes assessment,
- maintains small-size engineering classes so that rigorous instructor-to-student and student-to-student interactions are an integral part of the pedagogy.

The overriding themes of the educational process in the School of Engineering are:

- employing the inductive teaching methodology that is centered on active student learning, and
- assessing the outcome of student learning measured against the prescribed learning goals of the engineering programs and students’ expectations. The Assessment and Continuous Quality Improvement Process (ACQIP) constitutes the operational paradigm in the School of Engineering and encompasses the educational philosophy that motivates innovation and the implementation of best educational practices.

Mentoring
Entering and continuing students meet with academic advisors to design jointly their schedule of courses. Students review their academic records before course registration each semester with assistance from advisors to keep abreast of their progress. The school provides counseling to students upon request so that their academic goals can be achieved efficiently and economically. Department chairs and program directors are actively involved in student advising and mentoring. Practicing engineers are often invited to participate in mentoring of interdisciplinary teams in the final senior project.
Tutoring
Out-of-classroom assistance, provided by engineering faculty members, is available in the school’s tutorial center on a daily basis. A schedule of tutorial/mentoring services is distributed to all students in the beginning of each term.

Facilities
The offices of the School of Engineering, along with primary laboratory and computer facilities, are located in McAuliffe Hall. Science and additional classroom and computer application facilities are in the Bannow Science Center. A tutorial facility and a reading and reference lounge are also in McAuliffe Hall. The engineering reference and circulating collection is housed in the University’s DiMenna-Nyselius Library.

The School’s laboratories are equipped with modern instrumentation and are subject to continuous innovation in order to provide an environment for experiential learning that is closely integrated with classroom learning. The School of Engineering complements its educational activities through its Web-based facility, which links laboratory instrumentation to the School’s global network, and so enables demonstration of phenomena, simulation of processes, measurements, and data management in learning-supporting fashion. Finally, a small number of engineering courses are offered online as needed. A video-teleconferencing system is among the teaching tools in the School of Engineering. The School’s website is www.fairfield.edu/engineering. It offers information on the School, its programs, courses, and faculty.

Transfer Admission
General Transfer
Students with previous studies at other accredited institutions may apply for transfer to the School of Engineering. Credit for work completed elsewhere, with a grade of C or better, will be granted for equivalent Fairfield courses, in accordance with Fairfield University guidelines. The transfer student must provide an official transcript of all academic work and a catalog with course descriptions from each institution previously attended.

Transfer from Community Colleges
The School of Engineering has articulation agreements with the Connecticut College of Technology embracing the 12 community colleges in Connecticut. Under this agreement, the B.S. degree completion by graduates of community colleges with an engineering associate’s degree is greatly facilitated at Fairfield University. Bridge courses to facilitate transfer, and some financial aid to transfers from community colleges, are also offered by the School of Engineering.

School Activities/Industrial Relations
Engineering students at Fairfield University may join the Engineering Student Society, an umbrella organization that embraces student chapters of the American Society of Mechanical Engineers, Manufacturing Engineers, the Institute of Electrical and Electronic Engineers, and the Society of Women Engineers. Students are encouraged to join ESS and profit from events sponsored by the chapters.

The School of Engineering maintains direct relations with area industries and manufacturers. These open lines of communication encourage the flow of information and support that keeps the engineering curriculum current and relevant to the environment in industry. These contacts are particularly useful to students in the senior project course where they tackle real-life engineering problems encountered by practicing engineers and become involved in the mainstream of engineering activity.

The SOE Advisory Board
The School of Engineering receives support and guidance in program development and other matters from its Advisory Board, a group of men and women in leading positions in industry and education.

Undergraduate Programs
The School of Engineering offers undergraduate programs leading to the Bachelor of Science degree in engineering and the associate degree in engineering, as well as certificate programs in automated manufacturing, and information technology.

Bachelor of Science in Engineering
Students in this program complete 132 to 134 credit hours. Students begin their studies with EG 31-32, Fundamentals of Engineering, and complete the degree requirements with the team-based Senior Design Project.
EG 31-32 is designed to introduce first-year students to important design elements and the tools of engineering and develop their skills in analysis and synthesis, and in teamwork. It further provides the basis for students to select the engineering discipline most suitable to their skills and career objectives. The Senior Project caps students' engineering education by demanding the implementation of engineering design principles and associated skills in designing for functionality, reliability, and economy in real-world projects undertaken by multidisciplinary teams.

All engineering programs include experiential learning in laboratory courses and culminate with the Senior Design Project. Students can avail themselves of opportunities for independent study and for internships in local industry. As a rule, the undergraduate curriculum, pursued on a full-time basis, is completed in:

1. The traditional 4-year full-time program
2. The 3/2 five-year program
3. The part-time evening program

The Full-Time Traditional Program
This program leads to a B.S. degree in one of the following:
- computer engineering
- electrical engineering
- mechanical engineering, and a concentration in manufacturing or automation engineering
- software engineering

As shown in later pages, this four-year course of study encompasses 132 to 134 credit hours, depending on the specific degree, in areas of engineering, science, mathematics, computer science, and the liberal arts. Freshmen are introduced into the spirit and vision of engineering through the Fundamentals of Engineering course. Seniors complete their degree requirements with the Senior Project.

The 3/2 Five-Year Program
The 3/2 engineering program is a five-year course of study. Students complete three years of studies at Fairfield in the areas of mathematics, the sciences, a portion of the engineering curriculum, humanities and social sciences, and two years of specialized engineering studies at one of four partner institutions: Columbia University, Rensselaer Polytechnic Institute, the University of Connecticut, and Stevens Institute of Technology.

Students in this program earn two degrees, a B.A. from Fairfield University and a B.S. in engineering from one of the other four institutions. Through our partner schools, students have expanded options in choosing an engineering discipline: e.g., aeronautical, chemical, civil, environmental, biomedical, and nuclear engineering. With a 3.2 grade point average, students in the 3/2 program may transfer automatically to a university of their choice among the four partner institutions. Students who have completed the liberal arts core will be awarded the B.A. degree from Fairfield University at the end of their fourth year of studies, and will be graduated with their Fairfield class.

The Part-Time Evening Program
This program leads to either:
- a B.S. degree in electrical, mechanical, manufacturing, computer, or software engineering covering the same curriculum as the traditional 4-year full-time program,
- an associate’s degree (AS) in electrical or mechanical engineering, or
- a certificate in automation, and/or information technology.

This program allows fully employed students to pursue engineering degrees on a part-time basis at a pace suited to their circumstances. In most instances, employers provide tuition reimbursement. The technical curriculum requirements for this program are the same as those for the full-time traditional program. However, occasionally work and/or life experience may count toward a reduced required curriculum upon permission of the dean. Advanced engineering classes, offered in the evening, are subscribed by both full-time and part-time students.

Major Areas of Study
Specific program objectives and curriculum requirements are provided in the sections that follow each engineering discipline. In general, the curricula consist of four areas:
- major field requirements
- major field electives
- general education core curriculum courses
- general electives

Concentrations Within Majors
Within each major field of study there are specialized options that can be taken to fulfill special career plans, under advisement from the department chair. Numerous elective courses afford opportunities for students to gain deeper knowledge and skills in areas of their interest. For example, microelectronics, power electronics, or wireless communications would be areas of concentration in electrical engineering; signal processing, digital design, or computer graphics in computer engineering; data bases, data warehousing and mining, or networks and network programming in software engineering; strength of materials or machine design in mechanical engineering; programmable logic control systems in manufacturing engineering.
Minors in Other Fields of Study
Engineering students are automatically awarded a mathematics minor with the completion of five mathematics courses. It should be noted that all engineering programs require five, or more, mathematics courses.

In addition, engineering majors can opt and fulfill the requirements for other minors. For example, an engineering student who wishes to gain further knowledge in economics could use the two social science electives and the two general electives in the liberal arts core, and with one summer course, he/she will complete the requirements for an economics minor. Similar arrangements can be made for a business minor or a physics minor.

Associate’s Degree in Engineering
Students may earn an associate’s degree in electrical engineering (ASEE) or mechanical engineering (ASME) by completing coursework representative of the first two-year phase of the 4-year engineering education; curriculum requirements for the associate’s degree are approximately one-half those of the B.S. degree. Graduates may continue their studies to the B.S. degree, or seek employment immediately upon graduation with an A.S. degree. The detailed 2-year A.S. curriculum is shown in later pages.

Combined Bachelor’s and Master’s Degree
The Five-Year Dual Degree, B.S./M.S. Program in Software Engineering
This is a fast track program to a master’s degree in software engineering. Students may request a change of status from the undergraduate to the undergraduate/graduate five-year combined plan of study at any point after the following conditions are met:

- Completed 98 credits towards the B.S. in Software Engineering, i.e., most likely at the end of their third year
- Completed all required Junior-level math and software engineering courses specified in the undergraduate catalog
- Successfully completed six courses in software engineering or computer science with a GPA of 3.2, and are enrolled in at least one graduate course in software engineering
- Have an overall GPA of 3.0.

Students will be awarded both the B.S. and master’s degree simultaneously, when all the requirements of the combined degree curriculum have been satisfied.

Minor in Engineering
The School of Engineering offers a minor in engineering for non-engineering students. This is a 14-credit hour course of study for students who have completed two courses in calculus and two in physics with a grade of C or better. Students who choose the engineering minor will benefit intellectually from exploring the field of engineering and will strengthen their candidacy for professional studies such as medicine or law. For details, see following pages.

Graduate Programs
The School of Engineering offers four master of science degrees: M.S. in the management of technology, which is offered in conjunction with the MBA program in the Charles F. Dolan School of Business; M.S. in software engineering; M.S. in electrical and computer engineering; and M.S. in mechanical engineering. In addition, graduate engineers with special interests may enroll in certificate programs in Network Technologies, Network and Data Security Technologies, Web Application Technologies, and Mechatronics. For information about these programs, please see the School of Engineering graduate catalog, or visit the School’s website at www.fairfield.edu/engineering.
The Automated Manufacturing Engineering curriculum is constructed to include abundant experiential learning. This is accomplished through the integration of laboratory experiences within the framework of the theoretical courses in the basic curriculum, and by making use of well-equipped laboratories and computing facilities. Concentrations in manufacturing engineering, control systems, and automation engineering are available in this program, with a focus on robotics and automation, feedback and product and process design, and manufacturing systems. A team-based senior project completes the technical education.

Automated Engineering Curriculum (134 credits)

The four-year curriculum follows precisely the sequence of courses in the Mechanical Engineering curriculum, except that the following seven courses:

- MF 230 Computer Aided Manufacturing (CAM) I
- MF 240 Computer Aided Manufacturing (CAM) II
- MF 250 Programmable Logic Control Systems (PLC)
- MF 250L Programmable Logic Control Systems Lab (PLCL)
- MF 260 Hydraulics and Pneumatics Design
- MF 315 Computer Integrated Manufacturing (CIM)
- MF 351 Manufacturing Systems

replace the following courses in the ME program:

- ME 306, ME 342, ME 347, ME 406L, ME 349, MC 290, ME 307L, ME 348L, and ME 350L.

Automated Manufacturing Electives

- MF 350 Advanced Programmable Logic Control System (PLC)
- MF 350L Advanced Programmable Logic Control System Lab
- MF 352 Manufacturing Systems II
- MF 354 Product and Process Design for Manufacturing
- MF 361 Automation and Robotics I
- MF 362 Automation and Robotics II

Certificate in Automated Manufacturing

Engineers with the requisite background may opt for a Certificate in Automated Manufacturing consisting of four courses: MF 230, MF 240, MF 250 with Lab, and MF 260.

Concentration in Control Systems

Electrical and mechanical systems often require intelligent control systems interfaced with feedback mechanisms. See description of MC 300 under Mechatronics.

Bachelor of Science
In Computer Engineering, theoretical work is integrated with experiential learning and design activity. The program is accredited by ABET, the international Accreditation Board for Engineering and Technology.

The educational objectives of the Bachelor of Science degree program in Computer Engineering are as follows:

• **Domain Knowledge:** Graduates will be able to apply their in-depth understanding in areas of computer systems. They will be able to solve computer system-related problems with real-world constraints, (i.e., constraints on performance, budget and scheduling, etc.).

• **Professional Practice:** Graduates will develop their engineering design, problem-solving skills, and aptitude for innovation as they work on multi-disciplinary teams.

• **Lifelong Learning:** Graduates will become experts in their selected field and broaden their professional knowledge with continuing education.

• **Engineering Citizenship:** Graduates will practice the ethics of their profession consistent with a sense of social responsibility.

Computer engineering students obtain the background they need to take the lead in creating the next generation of computer technologies. They are immersed in computer science, digital design, electrical engineering, physics, mathematics, and the liberal arts.

Students learn about embedded systems, computer graphics, computer games, image processing, multimedia programming, visualization, and display techniques. Students become skilled in object-oriented design while using state-of-the-art facilities. Our close interactions with industry enable employment of our graduates in all sectors of industry, government, and academe. They are active in the areas of hardware and software design and information technologies, and take the lead in the research and development of new computer systems and applications. Demand for computer engineering graduates has been consistently strong and is expected to persist.

### Science Electives

Students who wish to expand their knowledge in the sciences may opt for EE 321 Electromagnetic Fields or any other approved Physics elective.

A B.S. degree program in Computer Science is in preparation in the School of Engineering. This program will share some courses with the Computer Science program in the College of Arts and Sciences, but it will have a distinctly different focus through additional required and elective courses, such as CSE 368 Programming Languages, CSE 378 Algorithms Analysis, SW 201 Software Design, and CSE 390-391 Computer Science Senior Design Project I and II. For further information about this program contact the Dean’s Office.

Bachelor of Science
This program is accredited by the international Accreditation Board for Engineering and Technology (ABET). The program blends theoretical knowledge with hands-on experiential learning in a rich menu of topics. The educational objectives of the Bachelor of Science degree program in electrical engineering are as follows:

• **Domain Knowledge:** Graduates of the BSEE program will apply their technical skills to design/analyze/manage electrical/electronic systems in their chosen discipline in the field of electrical engineering. They will exercise technical, quality, schedule, and cost constraints in the design process.

• **Professional Practice:** They will practice the profession of electrical engineering as either an individual contributor or as a member of an interdisciplinary team in a competent and efficient manner.

• **Lifelong Learning:** They will be a member of their professional society as part of being committed to lifelong learning about their profession and its relationship to society.

• **Engineering Citizenship:** They will practice in an ethical and professional manner and will constantly be aware of the impact of their efforts on social welfare, safety, and the environment. They will promote justice in all matters and be of service to their community.

The first year of this program places major emphasis on the Fundamentals of Engineering and Computer Science, basic mathematics, and the physical sciences to provide the background for engineering science and design courses. Following preparatory work, the fundamentals of electrical, mechanical, and materials engineering concepts are developed. Advanced courses in electrical and electronic engineering further develop knowledge in this engineering discipline. Students may specialize in a specific area by taking two elective courses in the electrical engineering discipline. The program places increasing emphasis on design assignments and offers advanced elective courses that permit students to tailor their programs to specific career objectives.

Standard software packages, such as MultiSim, MathCad, and MATLAB Toolboxes, are employed for problem-solving purposes, and electronic design packages such as Xilinx and Viewlogic are used in digital electronic design laboratories.

Bachelor of Science

The educational objectives of the Bachelor of Science degree program in mechanical engineering is as follows:

- **Domain Knowledge:** Graduates will be able to apply their in-depth understanding of mechanical or manufacturing systems within the constraints of performance specification, budget, and scheduling.

- **Professional Practice:** Graduates will develop their engineering design, problem-solving, and communication skills, and aptitude for innovation, as they work on multi-disciplinary teams.

- **Life-Long Learning:** Graduates will become experts in their chosen fields, members of their professional societies, and broaden their professional knowledge with formal and/or informal continuing education.

- **Engineering Citizenship:** Graduates will practice the ethics of their profession, consistent with a sense of social responsibility and the promotion of justice.

This program is accredited by the Accreditation Board for Engineering and Technology (ABET). After completing the Fundamentals of Engineering course and establishing the mathematics and science (physics, chemistry) foundation courses necessary for the study of engineering science, students proceed with studies in materials science, solid and fluid mechanics, thermodynamics, heat transfer, machine design, and system dynamics. Advanced elective courses in Mechanics and Material Sciences, Design and Manufacturing, Mechatronics, and Energy Systems are pursued toward career goals. A team-based senior project completes the technical education.

The mechanical engineering curriculum is constructed to include abundant experiential learning. This is accomplished through the integration of laboratory experiences within the framework of the theoretical courses in the basic curriculum, and by making use of well-equipped laboratories and computing facilities. Concentrations in manufacturing engineering, control systems, and automation engineering are available in this program, with a focus on robotics and automation, feedback and product and process design, and manufacturing systems.

- CD 212 Engineering Graphics II
- CD 215 Graphic Design CATIA I
- ME 382 Independent Study, Advanced Mechanical Project
- ME 441 Advanced Material Science

#### Automated Manufacturing Engineering Electives

See earlier pages.
The Software Engineering program offers both a Bachelor of Science degree and a five-year Bachelor/Master dual-degree track. For the latter program see details later in this section.

Bachelor of Science
The future of technological advances lies in more sophisticated and more complex software applications. Hence, software design and development will play an increasingly more central role in all aspects of technology. The application domains of programs being developed will grow dramatically. The effect of web-based applications will add more complexity and demand for software engineering methods and design. At Fairfield, a software engineering curriculum is implemented that not only emphasizes computer science, information science and technology, but also focuses on the most advanced practices of software engineering and includes the equally critical human factor in software development, testing, and validation for producing high quality, sophisticated, and dependable software products.

The educational objectives of the Bachelor of Science degree program in software engineering are:

- **Domain Knowledge:** Graduates will be able to apply their in-depth understanding of software systems within the constraints of performance specification, budget, and scheduling. They will produce software following the basic software development lifecycle. This software will implement complex algorithms, may be distributed, and will have complex graphical user interfaces. The software may use varying operating system constructs, databases, programming languages, and design methodologies.

- **Professional Practice:** Graduates will develop their engineering design, problem-solving, and communication skills as they work with or manage multidisciplinary teams. They will have an understanding of cost constraints, timely delivery, feasibility, reliability, safety, and maintenance issues. They will work in a variety of industrial, educational, business, scientific, and engineering settings and interact with those considered experts in these areas to produce useful, efficient software solutions.

- **Life-Long Learning:** Graduates will become experts in their chosen fields, members of their professional societies, and broaden their professional knowledge with formal and/or informal continuing education.

- **Engineering Citizenship:** Graduates will practice the ethics of their profession consistent with a code of social responsibility that promotes social welfare, and be alert to issues of safety and justice.

The goal of this program is to provide students with a solid understanding of a broad range of areas of knowledge and practice that are the foundation of software engineering. These include the fundamental concepts of computing, and the skills and abilities to apply these concepts in industrial, business, and other complex problems in order to produce software solutions. To meet this goal, students learn how to apply key engineering principles and mathematical models to application development projects.

The program emphasizes the complete lifecycle of the software development process. Students learn how to design, develop, test, and deploy software using rigorous software engineering practices. They are taught how to leverage technology to create flexible and scalable applications and to address the challenges that arise during the development process. Also, the program exposes students to a range of other disciplines, such as the physical sciences, social sciences, economics, and business so they gain an understanding of the real world scenarios that make up the software engineering environment. Theoretical courses are supported by rigorous laboratory tasks. Advanced elective courses are offered that permit students to tailor the program to specific career objectives or specializations.

**Major Electives (12 credits)**

Software engineering covers software systems in a wide variety of fields. Therefore, the electives for software engineers come from a variety of disciplines. In some cases electives are chosen to bring the students depth in the computing field. In other cases they are chosen to bring the student ancillary skills in areas where software development requires topical knowledge of the chosen area.

Electives will be chosen under advisement of department chair or academic advisor.

The following sets of concentrations list some of the major electives available to the software engineering student. Students may vary these depending upon their preferences as long as prerequisite requirements are followed. Courses at the 400 level can be taken by students with at least a junior standing. To take courses at the 500 level students must be of junior or senior standing and have permission from the instructor. Courses are three credits per course. Laboratory courses are 1 credit per course.

Students must take a minimum of two courses in at least one of the concentrations areas.

**Electives in Electrical Engineering/Computer Hardware**

Electives in Programming
SW 227 Object-Oriented Programming with C++
CS 343 Analysis of Algorithms
(prerequisite: CS 232)
SW 403 Visual C# .NET for Programmers
(see graduate catalog)

Electives in Computer Theory
CS 342 Theory of Computation
(prerequisite: CS 232)
CSE 378 Algorithms (prerequisite: CS 232)
CSE 368 Programming Languages
CS 355 Artificial Intelligence (prerequisite: CS 232)

Electives in Network Administration
SW 404 Network Concepts (see graduate catalog)
SW 596 Network Routing and Switching
(see graduate catalog)
SW 597 LAN/WAN Engineering
(see graduate catalog)

Electives in Database Concepts
SW 505 Advanced Database Concepts
(prerequisite: SW 355)
SW 508 Data Warehouse Systems
(prerequisite: SW 355)
SW 518 Data Mining and Business Intelligence
(prerequisite: SW 355)

Electives in Robotics
MF 361 Automation and Robotics I
(prerequisite: ME 203)
MF 362 Automation and Robotics II
(prerequisite: ME 361)

Math and Basic Science Electives
One 4-credit elective requirement. The electives must come from the following list. For course description see Chemistry, Physics, and Mathematics in the Arts and Science part of this catalog.

Chemistry
CH 11-12 General Inorganic Chemistry I and II
CH 211 Organic Chemistry I

Mathematics
MA 211 Applied Matrix Theory
MA 228 Calculus IV: Engineering and Physics Majors
MA 322 Partial Differential Equations with Special Functions
MA 235 Linear Algebra
MA 342 Theory of Computation (same as CS 342)
MA 377 Numerical Analysis

Physics
PS 122 Optics
EE 321 Electromagnetic Fields
PS 285 Modern Physics

Software Engineering
Five-Year Dual-Degree BS/MS Program

A five-year program is offered at Fairfield’s School of Engineering, in the discipline of Software Engineering leading to a combined Bachelor of Science and Master of Science degrees. This program embraces the educational objectives of the traditional undergraduate program, as well as those of the graduate program. It emphasizes experiential learning in terms of summer industrial internships following the sophomore year, and a final capstone project that guides students through a process of design and innovation at the level of a professional engineer. Graduates of the program master the knowledge and tools they need to create the next generation of software solutions to ever more complex technological and societal problems.

Changing from Undergraduate to Graduate Status
Students may request a change of status from the undergraduate to the undergraduate/graduate combined plan of study at any point after the following conditions are met:

• Completed 98 credits towards the B.S. in Software Engineering.
• Completed all required Junior-level (300-level) math and SE courses specified in the undergraduate catalog.
• Have successfully completed 6 courses in Software Engineering or Computer Science with a GPA of 3.2, and are enrolled in at least one graduate course in Software Engineering at the time the change is requested.
• Have an overall GPA of 3.0 or higher.

Students are also required to submit two letters of recommendation, one of which must be from their faculty advisor.
The five-year curriculum for combined BS/MS program is as follows:

**Dual Degree Curriculum**

### Associate in Engineering Degree
The Associate in Engineering degree program can be completed on a part-time basis. The curricula for the associate's degree programs in Electrical and Mechanical Engineering are outlined below.

### Associate's Degree in Electrical Engineering
The requirements for this degree amount to approximately one-half of those for the B.S. degree in electrical engineering.

#### Electrical Engineering Curriculum (65 credits)

Engineering students in this program complete a three-year course of study at Fairfield University encompassing the areas of science, mathematics, the liberal arts, and several engineering courses, before transferring to a school of their choice among Columbia University, Rensselaer Polytechnic Institute, the University of Connecticut, and the Stevens Institute of Technology, where they complete their engineering studies in two additional years. This five-year course of study leads to a B.A. from Fairfield University and a B.S. in Engineering from the school of the student’s choice.

At the end of the 4th year, and assuming full completion of Fairfield’s liberal arts core, the student will receive the B.A. degree from Fairfield University together with the rest of his/her Fairfield class.

The three-year Fairfield component of this program includes:

### Special Requirements:

- MA 311, Partial Differential Equations is strongly recommended for students in the 3/2 Program.
- Students who intend to major in electrical or computer engineering must take a C++ or Java programming course and CR 245/EE 245 Digital Electronics Design I.
- Students who intend to major in chemical engineering must take CH 12 and CH 12L Organic Chemistry and Organic Chemistry Lab.
- Columbia University requires one semester of economics.
- The University of Connecticut has a foreign language requirement that may be fulfilled at Fairfield or on the UConn campus. The Fairfield General Electives could be utilized for this purpose.
- Students who intend to transfer to Columbia, RPI, or Stevens must also take thermodynamics (ME 241/PS 241) and, if possible, PS 285 Modern Physics.
The Engineering Minor Program of Studies

The minor in engineering assists non-engineering students in acquiring some technical skills through lectures and laboratory experiences, but primarily improves their understanding of engineering and its methods, purposes, ethics, and ramifications. Students in the minor ultimately are able to work more effectively in their primary field, having acquired additional skills and an enhanced perspective of the capabilities and limitations of a discipline that is a powerful force in shaping our lives. Specifically, the minor seeks to integrate science fundamentals and mathematical methods with engineering analysis and design.

A minimum of 14 credit hours is required for the engineering minor, in addition to mathematics and science prerequisites. Four engineering courses of three credits each, and two laboratory courses of one credit each, are required for the completion of the minor.

Students in the minor may choose a sequence of courses in tune with their area of interest, and with advice from the coordinator of the minor. For example, students who lean toward electrical systems may choose the sequence EE 213, EE 245, EE 231, CR 246. Interests in computer engineering are satisfied with the sequence CR 245, CR 246, CR 311, CR 320. In the area of software engineering, a recommended sequence consists of SW 201, SW 202, MF 250, CR 246. In the area of mechanical systems the sequence ME 201, ME 241, ME 205, MF 207 is recommended. Laboratory courses are chosen to supplement the sequence of lecture courses. From outside the sciences and mathematics, students may opt for EG 31, SW 201 (with CS 131 as a prerequisite), ME 201, MF 207. Finally, a track in nanotechnology is also available. The Dean’s office should be consulted regarding this track. The recommended four-course sequence for the minor may be chosen from among those listed below:

* Assuming satisfactory prerequisites
Courses offered through the School of Engineering are described below. Course descriptions for all other required courses in mathematics, physics, computer science, humanities, and fine arts can be found in the appropriate departmental listing under the College of Arts and Sciences section of this catalog.

**EG/EG 31/32  Fundamentals of Engineering and Computer Science**
This two-course sequence provides core knowledge and competencies in engineering and computer science to engineering and computer science students in their first year. Topics include computer-based computational skills, principles of engineering design and software design, digital logic and programming, laboratory data acquisition and reporting, along with probability and statistical analysis of data, design analysis techniques, implementation of engineering projects. In EG 32, hands-on team projects are core learning experiences. They are structured to introduce students to the implementation of principles of design and engineering methodologies, system engineering management, and presentation skills. Guest presenters and field trips augment these courses, which are taught by interdisciplinary faculty teams. (Co-requisites: PS 15, PS 16) Six credits.

**EG 174  Engineering Economy**
This course presents the fundamental concepts of engineering economic analysis. The course develops the tools required to resolve engineering problems by applying criteria for economic efficiency, including present worth analysis, annual cash flow analysis, and rate of return analysis, as applied to engineering problems. The course also demonstrates the complex effects of depreciation, income tax, and inflation on economic analysis. (Prerequisites: MA 126, EC 11) Three credits.

---

**Engineering Graphics and CAD**

**CD 211  Engineering Graphics I**
This basic course in engineering graphics coordinates and is taught simultaneously with 2D AutoCAD application. Board work covers geometric constructions, theory of orthographic projection, perspective and visualization, dimensioning, tolerancing, sections, assembly drawing, and geometric tolerancing. The course stresses esthetics and technical sketching. Three credits.

**CD 212  Engineering Graphics II**
This course, which uses the most up-to-date version of AutoCAD software, begins with an overview of computer-aided drafting, covering the fundamentals in orthographic projection; the creation, modification, and manipulation of geometry in the two-dimensional and three-dimensional environment; dimensioning; layering; and view and world coordinate systems. The course includes wire frame and solid model construction and the application of CAD to engineering drawings. (Prerequisite: CD 211) Three credits.

**Computer Science**

Descriptions of the following three-credit computer science courses and their prerequisites can be found under the Computer Science Department in the College of Arts and Sciences section of this catalog:

- **CS 131**
- **CS 132** Computer Programming I and II with Java
- **CS 141** Introduction to Computer Science and Programming I, with Lab 4
- **CS 142** Introduction to Computer Science and Programming II, with Lab 4
- **CS 221** Computer Organization and Assembler
- **CS 232** Data Structures
- **CS 322** Computer Architecture
- **CS 331** Operating Systems
- **CS 342** Theory of Computations
- **CS 355** Artificial Intelligence

The above CS courses are included in the curricula of Computer Engineering and Software Engineering.

**CSE 368  Programming Languages**
This course introduces topics on the design of programming languages; organization and control structures, data structures; also, formal specification and analysis of programming languages (Prerequisite: CS 232) Three credits.
CSE 378  Algorithms Analysis
Development and evaluation of algorithms. This class covers object oriented programming principles, classic algorithms, algorithm analysis, searching, sorting and parsing techniques, stacks, queues, linked lists, and trees. Algorithm efficiency and performance is a focus as the student gains experiences through problems and programming projects. (Prerequisite: SW 403 or SW 408) Three credits.

CSE 390-391  Computer Science Senior Project I and II
In this two-semester capstone design course emphasizing creativity and organizational abilities, students work with a faculty mentor to select a project that is representative of a realistic information technology. Students prepare design goals, execute a literature search, prepare an in-depth analysis, and develop the final product. A final report and presentation demonstrate student accomplishments. Students meet with their mentor on a regular basis to discuss project status and to review alternative solutions to problems. This course may follow the format of independent study. Three credits per semester; six credits total.

Computer Engineering

CR 206  Fiber-Optic Communications Lab
In this laboratory course, students use optical test equipment to get a working knowledge of various electro-optical measurement techniques. Students learn to characterize diode lasers and photo detectors, and experiment with fiber attenuation, back-scatter, bandwidth of fiber, fiber optic connections, and a variety of fiber optic splices, distribution systems, and wavelength division multiplexing. Students measure multi-mode and single mode fibers in step and graded index. They learn how to characterize both pulse distortion and bit rates. (Prerequisites: PS 16 and PS 16L) One credit.

CR 245  Digital Design I
Topics include digital design principles; Boolean algebra; combinational logic design; sequential logic design; registers, counters; memory; multiplexers, finite state machines, radix conversion and programmable logic devices. Students learn to write, implement, and simulate elementary digital design. Three credits.

CR 245L  Digital Design I Laboratory
This lab course covers the practical aspects of digital logic design. Students design and implement logic circuits using simulators and hardware, and techniques taught in CR 245. Students use state machines to implement open-ended design problems. (Co-requisite: CR 245) One credit.

CR 246  Digital Electronics Design II
This course examines computer architecture implemented using a hardware design language and programmable logic devices. Students design, implement, and program small reduced-instruction-set-computer machines. Students understand central processing unit architecture and the VHDL language and implement and program a central processing unit using VHDL. Student knowledge of the basics culminates in being able to design and implement programmable finite-state machines. (Prerequisite: CR 245) Three credits.

CR 254  Fiber-Optic Communications Systems
This course examines the theory and basic elements of fiber optic communications systems; fundamentals of transmission in optical fibers; source component operations including light-emitting diodes and solid-state lasers; and coupling element and detector devices. Students analyze modulation and demodulation techniques and determine overall loop performance relative to bandwidth and signal-to-noise ratio. Design problems enhance student understanding. (Prerequisites: EE 231, EE 301) Three credits.

CR 310  Voice and Signal Processing
This course has both signal processing and object-oriented design content. It emphasizes hands-on multi-media programming, offering an overview of digital signal processing and its applications. Students build software systems that make use of sampling theory, Fourier transforms, and processing in both space and time. Students implement algorithms for elementary sound synthesis (Prerequisites: CS 232, and MA 126 or MA 172) Three credits.

CR 311  Image Processing
This course builds on CR 310, extending the multi-media program content into the area of image processing. Students build image-processing applications, implementing algorithms in areas that include color space conversion, low-level pattern recognition, theory of two-dimensional in space and time. Students write high-performance image-processing applications with applications in the area of streaming multi-media content. (Prerequisite: CR 310 or permission of the instructor) Three credits.

CR 320  Computer Networks
Students learn the principles of network programming, distributed computing, Remote Method Invocation, Parallel Programming, operating system elements, multi-threading, command-line interpreters, and monitors. Students learn about TCP/IP protocols and build streaming multi-threaded multi-media multicasting applications. Students write their own distributed systems. Students deploy a custom-built, distributed, multi-platform, distributed computing systems. (Prerequisite: CR 310 or permission of the instructor) Three credits.
CR 325  Computer Graphics
This course supports the visualization and computer systems domain, offering an introductory treatment to two-dimensional and three-dimensional computer graphics concepts. Students write computer games and employ their knowledge to imbue them with realism. High performance rendering uses the latest in cutting edge hardware-accelerated graphics processors. (Prerequisite: CR 311 or permission of the instructor) Three credits.

CR 382  Independent Studies in Computer Engineering
This course includes supervised reading and research. Available only by pre-arrangement with the instructor. Three credits.

CR 390-391  Senior Project
This is the capstone of a student’s experience in the Computer Engineering Department. Many of the courses in the curriculum are geared to prepare students for the computer engineering and research skills that this final two-semester sequence requires. Three credits per semester.

Electrical Engineering

Note: In addition to the undergraduate courses listed below, advanced juniors and seniors are allowed to take appropriate graduate courses as electives with the permission of the department chair and the instructor.

EE 213  Introduction to Electric Circuits
This course introduces engineering students to the analysis of linear electric circuits. The course covers the basic laws of circuit behavior and analysis techniques, including descriptions of circuit elements and electronic variables, and considers circuit theorems and principles for insightful analysis of electrical circuits. The course introduces basic concepts and analysis of networks. (Prerequisites: PS 16, PS 16L) Three credits.

EE 213L  Electric Circuits Lab
Students use common electrical laboratory instruments (oscilloscopes, meters, and signal generators) and elemental circuit components to construct and analyze basic electrical circuits. They study the application of circuit theorems and circuit elements (RL and RC); conduct experiments with transient, steady state, and frequency response; and use software applications such as Electronic Workbench and PSpice. (Co-requisite: EE 213) One credit.

EE 221  Frequency Domain Circuit Analysis
Students perform frequency domain analysis of passive and active circuits, study transient and AC circuit analysis manually and with computer-aided applications, and examine the transient response of first and second order circuits. The course introduces pole and zero concepts and applies them to circuit analysis, and introduces computer methods of circuit analysis and design. (Prerequisites: MA 227, EE 213) Three credits.

EE 231  Introduction to Electronics Circuits and Devices
This first course in electronics teaches basic principles and technologies to understand, analyze, and design electronic circuits. The course reviews the properties of semiconductor materials used in the fabrication of diodes, bipolar junction transistors, and field effect transistors. Students analyze amplifier biasing techniques and develop circuit models of semi-conductor devices that are used to analyze and design electronic circuits. Computer simulations of circuits are used to illustrate the fundamental principles. (Prerequisite: EE 213) Three credits.

EE 231L  Electronics Circuits Lab
Students build and test circuits using diodes, bipolar junction transistors, and MOSFETs. They use the principles developed in EE 231 to analyze, build, and test amplifier and oscillator circuits. (Prerequisite: EE 213L; Co-requisite: EE 231) One credit.

EE 245  Digital Design I
Topics include: digital design principles, Boolean algebra, combinational logic design, sequential logic design, registers, counters, memory, multiplexers, finite state machines, radix conversion and programmable logic devices. Students learn to write, implement, and simulate elementary digital design. Note: This course is equivalent to CR 245. Three credits.

EE 245L  Digital Design I Laboratory
This lab course covers the practical aspects of digital logic design. Students design and implement logic circuits using simulators and hardware, as well as techniques taught in CR 245. Students use state machines to implement open-ended design problems. Note: This course is equivalent to CR 245L (Co-requisite: EE 245) One credit.

EE 221  Frequency Domain Circuit Analysis
Students perform frequency domain analysis of passive and active circuits, study transient and AC circuit analysis manually and with computer-aided applications, and examine the transient response of first and second order circuits. The course introduces pole and zero concepts and applies them to circuit analysis, and introduces computer methods of circuit analysis and design. (Prerequisites: MA 227, EE 213) Three credits.

CR 325  Computer Graphics
This course supports the visualization and computer systems domain, offering an introductory treatment to two-dimensional and three-dimensional computer graphics concepts. Students write computer games and employ their knowledge to imbue them with realism. High performance rendering uses the latest in cutting edge hardware-accelerated graphics processors. (Prerequisite: CR 311 or permission of the instructor) Three credits.

CR 382  Independent Studies in Computer Engineering
This course includes supervised reading and research. Available only by pre-arrangement with the instructor. Three credits.

CR 390-391  Senior Project
This is the capstone of a student’s experience in the Computer Engineering Department. Many of the courses in the curriculum are geared to prepare students for the computer engineering and research skills that this final two-semester sequence requires. Three credits per semester.

Electrical Engineering

Note: In addition to the undergraduate courses listed below, advanced juniors and seniors are allowed to take appropriate graduate courses as electives with the permission of the department chair and the instructor.

EE 213  Introduction to Electric Circuits
This course introduces engineering students to the analysis of linear electric circuits. The course covers the basic laws of circuit behavior and analysis techniques, including descriptions of circuit elements and electronic variables, and considers circuit theorems and principles for insightful analysis of electrical circuits. The course introduces basic concepts and analysis of networks. (Prerequisites: PS 16, PS 16L) Three credits.

EE 213L  Electric Circuits Lab
Students use common electrical laboratory instruments (oscilloscopes, meters, and signal generators) and elemental circuit components to construct and analyze basic electrical circuits. They study the application of circuit theorems and circuit elements (RL and RC); conduct experiments with transient, steady state, and frequency response; and use software applications such as Electronic Workbench and PSpice. (Co-requisite: EE 213) One credit.
EE 301  Signals and Systems I
This course studies and classifies continuous and discrete signals and systems. It presents time domain and discrete transforms, Fourier transforms, z-transforms, and fast Fourier transforms (e.g., differential equations, convolution, concept and meaning of impulse response); and examines frequency domain analysis, the Fourier series, and the Fourier transform as an alternative to time domain analysis. Students gain further insights into signal and system properties through the Laplace transform methods and the concept of the transfer function. (Prerequisite: EE 221) Three credits.

EE 302  Feedback and Control Systems
This course emphasizes analysis and synthesis of closed-loop control systems using both classical and state-space approaches with an emphasis on electro-mechanical systems. The mathematical requirements include the Laplace transform methods of solving differential equations, matrix algebra, and basic complex variables. The discussion of classical control system design includes the modeling of dynamic systems, block diagram representation, time and frequency domain methods, transient and steady state response, stability criteria, controller action, root locus methods, the methods of Nyquist and Bode, and dynamics compensation techniques. The discussion of state-space methods includes the formulation and solution of the state equations and pole-placement design. (Prerequisite: EE 301) Three credits.

EE 304  Signals and Systems II
This course is an introduction to the study of communications theory, including signal conversion from analog to discrete and from discrete to analog. Additional topics include filtering of continuous and digital signals; amplitude and frequency modulation; and a description of the fundamentals, implications, and filtering of thermal noise. (Prerequisite: EE 301) Three credits.

EE 321  Electromagnetic Fields
This course uses vector calculus to investigate electric and magnetic fields. Topics include techniques for the computation of fields for given charge distributions; Coulomb's and Gauss' law and applications, and the significance of Poisson's and Laplace equations; solution methods; moving charges and corresponding electric and magnetic forces; electric and magnetic fields in matter; methods of solving boundary value problems; Maxwell's equations in integral and differential form; and electromagnetic radiation and wave propagation. (Prerequisites: EE 301 or CR 310 and MA 321) Four credits.

EE 331  Analog Electronics Design
This advanced course in electronics examines high frequency response of bipolar junction transistor and field-effect transistor amplifiers using hybrid two-port active device models. Students consider the effect of feedback and frequency compensation techniques on the amplifier response and study a variety of analog circuits with respect to their analysis and applications, including active filters, oscillators, waveform generation and shaping, voltage regulator, and communication circuits. The course introduces basic power electronics device components. (Prerequisites: EE 221, EE 231) Three credits.

EE 331L  Analog Electronics Lab
This advanced lab provides insight into the functions of various application-specific electronic circuits. Experiments characterize functioning of various analog systems such as oscillators, active filters, waveform generation and shaping circuits, and voltage regulator circuits. (Prerequisite: EE 231L; Co-requisite: EE 331) One credit.

EE 335  Microelectronics
This course covers three methods of fabricating high-density interconnection structures for manufacturing microelectronic assemblies: thick films, thin films, and printed circuit boards. The thick and thin film technologies use substrates of metalized ceramic to make the interconnections between components and are capable of fabricating integrated resistors with high precision and stability. The printed circuit board technology uses organic materials with copper laminates to etch the interconnection patterns. The individual layers are laminated to produce the multilayer structure, but do not include integrated resistors. Each of the technologies is examined to determine the electrical and physical properties of the structures. Such parameters as distributed capacitance and how they affect circuit performance are discussed. In the laboratory accompanying the course, students have the opportunity to fabricate thick and thin film circuits and to examine the structure of printed circuit boards. (Prerequisite: EE 33) Three credits.

EE 346  Embedded Microcontrollers
This course covers the architecture of microcontrollers, including how they are constructed internally and how they interface with external circuitry. Applications for microcontrollers in both complex and simple equipment are discussed. Students learn how to apply and how to select a microcontroller for a given application. An accompanying laboratory course covers the programming of microprocessors to do a specific task. This course covers the programming and application of the PIC microcontroller. Students are able to develop programming skills using assembly language and software tools such as MPLAB IDE and MultiSim MCU. These tools are used to develop software code for practical applications such as motor speed control and voltage regulation for power supplies. (Prerequisite: EE 245 or equivalent) Three credits.
EE 346L  Microcontroller Laboratory
This laboratory covers the basic operation and applications of a microcontroller. Students learn to program a microcontroller to control applications such as motor speed by the use of an emulator connected to a PC. They design a circuit using a microcontroller for a specific application and write a program to control the circuit. On completion of the program, they use the emulator to program an actual microcontroller for use in their circuit. (Co-requisite: EE 346) One credit.

EE 350  Communication Systems
The course focuses on analog communication systems and the effects of noise on those systems, developing modulation and demodulation techniques (amplitude, frequency, and phase modulation and pulse code). It discusses dealing with non-linear system elements and presents a mathematical treatment of the effects of various noise sources on these systems. Historical design studies and topics in communication applications permit students to apply these concepts to meet system requirements. The course clarifies important concepts through simulation of modulation techniques on multimedia computing systems. (Prerequisite: EE 301) Three credits.

EE 354  Fiber-Optic Communications Systems
This course examines the theory and basic elements of fiber optic communications systems; fundamentals of transmission in optical fibers; source component operations including light emitting diodes and solid-state lasers; and coupling element and detector devices. Students analyze modulation and demodulation techniques and determine overall loop performance relative to bandwidth and signal-to-noise ratio. Design problems enhance student understanding. (Prerequisites: EE 231, EE 301) Three credits.

EE 354L  Fiber-Optic Communications Laboratory
Students are introduced to fiber optics with experiments on Snell’s Law and total internal reflection. Students then use optical test equipment to measure the characteristics and applications of fiber optic cables, including single communication systems. Fiber optic characteristics may include losses due to transmission, mismatch, and bending, optical fiber connections and splicing, and frequency response. Both in-lab computer assisted instruction and a textbook will be used to supplement the experiments. Students prepare laboratory reports each week on their results. (Co-requisite: EE 354) One credit.

EE 360  Power Electronics
This course covers the design and operation of power electronics circuits, such as power supplies and motor controls. Using electronic circuit models for transistors and diodes developed in earlier courses, students analyze and design power circuits. Particular attention is paid to power dissipation and packaging. The accompanying laboratory course, ECE 360L, provides practical experience in conjunction with the lecture material. (Prerequisites: EE 301, EE 221) Three credits.

EE 360L  Power Electronics Laboratory
This lab applies the theory developed in EE 360 to actual devices. Students fabricate, test, and optimize their designs. They gain practical experience in packaging and cooling power circuits. One credit.

EE 382  Advanced Electrical Project
During this design course emphasizing individual creativity, students (working with a faculty mentor) develop project objectives and performance specifications. At review meetings, students present progress on their project including analytic and experimental results to date. A final report and presentation demonstrates the accomplishments and significant conclusions. Faculty involvement creates a realistic engineering development environment. Students may take this course as independent study once the prerequisites have been met. (Prerequisites: departmental approval of project proposal following completion of non-elective electrical engineering courses and at least one major elective) Two credits.

EE 390-391  Senior Project
In this two-semester capstone course, students work in teams on advanced projects that emphasize the engineering design approach. Each team works closely with a faculty mentor and conducts literature searches, synthesis, and in-depth analysis and experimentation. Individual team members make frequent presentations to faculty and peers; students receive instruction in effective communication to enable successful presentation skills. An oral presentation, written report, and working models complete the course requirements. Students begin the sequence in the fall term. (Prerequisites: completion of all non-elective courses and completion of adequate program requirements to enable graduation within one year of course completion) Three credits per semester; six credits total.

ECE 405  Electronic Materials
This course describes the properties and applications of certain materials used in the design and manufacture of electronic assemblies. Ceramics are often used as insulators, heat sinks, and substrates for interconnection structures. The course presents electrical, mechanical, and thermal properties of various ceramics, along with methods of fabricating and machining ceramic structures. Adhesives used to mount components and to replace mechanical fasteners such as screws and rivets provide connections that are stronger and take up less space. The course examines properties of adhesives such as epoxies, silicones, and cyanoacrylates under conditions of high temperature storage and humidity, along with methods of applications. Solders used to interconnect electronic components and assemblies are selected for temperature compatibility, mechanical properties, and reliability. The course emphasizes the new lead-free solder materials and presents the properties of plastic materials and the methods of forming plastic structures. Three credits.
ECE 415  Engineering Applications of Numerical Methods
Topics include root-finding, interpolation, linear algebraic systems, numerical integration, numerical solution of ordinary and partial differential equations, modeling, simulation, initial boundary value problems, and two point boundary value problems. (Prerequisite: SW 408 or equivalent demonstrated programming language skills) Three credits.

ECE 445  Digital Integrated Circuit Design
This course considers the design of CMOS digital integrated circuits. The fabrication, structure, and properties of CMOS devices are presented in detail along with the structure of basic building blocks, such as gates and flip-flops. Students use PSpice to analyze circuits and LASI to design and lay out CMOS circuits. (Prerequisite: EE 331) Three credits.

ECE 447  Analog Integrated Circuit Design
This course considers the design of CMOS analog integrated circuits, such as amplifiers, op amps, mixers, and oscillators. Diodes and CMOS transistors are studied in detail at the device level and electric circuit models are constructed for use in higher level systems. Design tools for analysis and circuit layout are extensively to optimize the design. Three credits.

ECE 465  Nonlinear Control Systems
Control systems are used in many industrial applications to control processes or operations and in many nonindustrial operations as well. Nonlinear control systems are frequently used in applications where the control variables have a wide dynamic range. Unlike linear systems, the analysis on nonlinear systems rarely results in a closed-form mathematical expression. This course considers the analysis and applications of nonlinear control systems by numerical and graphical techniques and considers means of implementing the solutions. (Prerequisite: EE 302) Three credits.

ECE 475  Microwave Structures
This course considers the generation and transmission of electromagnetic waves. Maxwell’s equations and the generation of radiation by currents and charges in free space are covered, followed by the propagation of waves in various media. Structures used in microwave propagation, including transmission lines, waveguides, resonators, amplifiers, and antennas are also considered. Three credits. (Prerequisite: EE 321) Three credits.

ECE 480  Wireless Systems
This course covers several aspects of wireless communication, including antenna design, FCC regulations, and multi-channel transmission protocols. Modern design approaches, such as Bluetooth, are discussed, along with wide-area network systems (WANS) and local broadband networks. (Prerequisites: EE 321, EE 217) Three credits.

ECE 485  Digital Communications
This course is designed to explore current digital communications features, including network communications between computers. Fundamentals of sampling principles and channel coding are utilized to develop common baseband and digital modulation techniques (ASK, FSK, PSK, PCM, and delta modulation). Multiplexing and multiple access networks are also analyzed. (Prerequisites: EE 321, EE 217) Three credits.

ECE 495  Power Generation and Distribution
This course considers the generation and distribution of electrical power to large areas. Three-phase networks are described in detail, including both generators and loads. Methods of modeling distribution systems by per-unit parameters are covered, along with power factor correction methods. Fault detection and lightning protection methods are also described. Some economic aspects of power generation and distribution are presented. (Prerequisite: EE 221) Three credits.

Mechanical Engineering

Note: In addition to the undergraduate courses listed below, advanced juniors and seniors are allowed to take appropriate graduate courses as electives with the permission of the department chair and the instructor.

ME 201  Engineering Statics
This introduction to rigid body mechanics using vector representation covers free body diagrams and static equilibrium in two- and three-dimensional space; solves problems in trusses, frames, and simple mechanisms; and develops methods in problem-solving techniques using computer-based approaches. The course integrates computer-aided analysis and design tools such as Working Model, ensuring relevance to the statics problems. Students perform lab experiments to support lecture theories and prepare professional-level reports. (Prerequisites: PS 15, PS 15L, EG 31, MA 126) Three credits.

ME 203  Kinematics and Dynamics
This course presents kinematics principles applied to particles and rigid body elements. Topics include analysis of forces and motion using Newton’s second and third laws of motion; theory of kinetics of particles and rigid body elements under rectilinear and curvilinear motion, vector methods; principles of work, energy, and power; and momentum and impact. The course integrates computer-aided analysis and design tools such as Working Model, ensuring relevance to the kinematics and dynamics problems. (Prerequisite: ME 201) Three credits.
ME 205  Strength of Materials I
This course examines concepts of two-dimensional stress and strain, factors of safety, thermal strain, static indeterminacy, stress concentration, bending including normal and shearing stresses, torsion, and direct shear. Lab experiments reinforce developed theory. This course includes design project. (Co-requisite: ME 201) Three credits.

ME 206L  Mechanics Laboratory
Students complete mechanics experiments for two- and three-dimensional structures under static loading conditions. Concepts include Young’s Modulus, thermally induced stresses, torsion, and cantilever beams. The course introduces strain gages and measurement instrumentation as well as statistical data analysis and uncertainty principles. Students prepare written laboratory reports. (Co-requisites: ME 201, ME 205) One credit.

ME 241  Principles of Thermodynamics
This course on macroscopic thermodynamics with applications covers conservation of energy for open and closed systems; equations of state and pure substances; first and second law of thermodynamics, including the concepts of internal energy, enthalpy, and entropy; statistical thermodynamics including phase space, micro-state, macro-state, thermodynamics probability and partition function; tables of thermodynamic properties, ideal gases, and elements of cycle analysis and applications. (Prerequisites: PS 16, PS 16L; co-requisite: ME 321) Three credits.

ME 306  Strength of Materials II
This course examines principal stresses; Mohr’s Circle; thin-walled pressure vessels; beam theory including shear and bending moment diagrams; deflection; elastic curves; indeterminate beams; energy methods; the use of superposition; and impact effects and column theory. Lab experiments reinforce these aspects of theory. This course includes a design project. (Prerequisite: ME 205) Three credits.

ME 307L  Dynamics Systems Lab
This hands-on lab experience covers the concepts of kinematics, dynamics, and strength of materials. Experiments include gyroscopic motion, dynamic balancing, and verification of Mohr’s circle using strain gage arrays, deflection of beams by superposition, photoelasticity, and column buckling. Labs require statistical data analysis and uncertainty calculations. Students complete written lab reports. (Co-requisites: ME 203, ME 306) One credit.

ME 311  Machine Design
This course applies the fundamentals of mechanical engineering design to analyze, design, and/or select components typically used in the design of complete mechanical systems. The course covers the design process and analysis of stress and deflection; material properties and loading (steady state and variable) as they relate to failure prevention; and the procedures for design and analysis of common machine elements such as fasteners, springs, rolling-element bearings, and gears. In team reverse-engineering projects, students apply the course topics to real hardware. The course emphasizes computer techniques and responsible design (safety factors and ethics). (Prerequisite: ME 306) Three credits.

ME 312  Advanced Machine Design
The advanced study of mechanical designs emphasize the process of developing creative solutions through conceptual analysis and synthesis in this course that covers topics related to the design of rotating mechanical systems, welded joint design, and fracture mechanics. Students conduct a research project, investigating and reporting on a topic in advanced design, and compete as part of a team in a design development project that applies structured design practices to real hardware. The course emphasizes concept generation and development. (Prerequisite: ME 311) Three credits.

ME 318  Finite Element Analysis I
This course examines applications of finite element analysis in modern engineering including structural analysis, stiffness matrix formulation, and energy methods. The course explores computer techniques and guidelines for using finite elements with respect to sophisticated computer programs. Students solve problems manually and using finite-element software. (Prerequisites: MA 321, CD 211, and ME 306) Three credits.

ME 342  Applications of Thermodynamics
This course continues and applies concepts learned in ME 241. Topics include mixtures of ideal gases and vapors; psychrometry; combustion analysis of common power generating, refrigeration, and air conditioning cycles; figures of merit including thermal efficiency; continuity and momentum equations for steady, one-dimensional frictionless flow; basic energy relations for turbomachinery; fundamentals of compressor and turbine design; and application and synthesis of design using thermodynamic principles. This course contains a lab segment. (Prerequisite: ME 241) Three credits.

ME 346  Energy Conversion
This course covers selected topics in energy conversion, including solar energy; propulsion; internal combustion engines; battery power; heat pumps; classics and novel power and refrigeration cycles; system analysis; system economics; and environmental considerations. The course includes computer simulation of power plant performance to optimize energy conversion efficiency. (Prerequisite: ME 241) Three credits.
ME 347 Fluid Mechanics
Topics in this course include incompressible fluids at rest and in motion; Bernoulli's theorem and the principle of similarity flow through orifices, nozzles, and pipes; flow through open channels; energy relationships as applied to pipe lines, pumps, and turbines; acceleration of fluid masses; fluid dynamics; the momentum theorem in turbomachinery; and introduction to compressible fluids. This course emphasizes design solutions using computer analysis and synthesis. (Prerequisite: ME 203, ME 241) Three credits.

ME 348L Thermal and Fluids Lab
This laboratory learning experience provides the opportunity to explore various components, such as the compressor, condenser, and evaporator, in a series of experiments using refrigeration equipment. Students investigate lift and drag in a wind tunnel, pressure losses in duct flow, and the Bernoulli principle. The course emphasizes statistical analysis, test planning, data evaluation, and report writing. (Co-requisites: ME 342, ME 347) One credit.

ME 349 Heat Transfer
This course covers one- and two-dimensional heat conduction, including solutions for finned surfaces and solutions for transient problems; convection heat transfer in laminar and turbulent flows; fundamental radiation concepts; laws of thermal radiation; radiation exchange geometrical factors and network methods; and heat exchangers and electrical analogies. The course emphasizes design solutions using computer analysis and synthesis. In the lab, students investigate heat transfer in plane surfaces, enhanced heat transfer in extended surfaces, and heat exchanger effectiveness. (Prerequisites: ME 342, ME 347) Three credits.

ME 350L Energy Transfer Lab
This laboratory learning experience provides the opportunity to explore energy transfer methods related to transmitted forces in vibrating systems, as well as thermal transfer gradients in mechanical, electrical, and electronic systems. Students use simulation and modeling software for many experiments, including conduction and convection heat transfer processes. The course emphasizes statistical analysis, instrumentation, and report writing. (Co-requisites: MC 290, ME 349) One credit.

ME 360 Internal Combustion Engines
This course presents the theories of internal combustion engines including engine types; gas cycles; fuel, air, and combustion thermodynamics; air cycles; and engine performance. (Prerequisite: ME 241; co-requisite: ME 342) Three credits.

ME 382 Independent Study, Advanced Mechanical Project
During this design course emphasizing individual creativity, students (working with a faculty mentor) develop project objectives and performance specifications. At review meetings, students present progress on the project including analytic and experimental results to date. A final report and presentation demonstrates the accomplishments and significant conclusions. Faculty involvement creates a realistic engineering development environment. Students may take this course as independent study once the prerequisites have been met. (Prerequisites: departmental approval of project proposal following completion of non-elective mechanical engineering courses and at least one major elective) One to three credits.

ME 390-391 Senior Project
In this capstone course, students work in teams on advanced projects that emphasize the engineering design approach. Each team works closely with a faculty/mentor and conducts literature searches, synthesis, and in-depth analysis and experimentation. Individual team members make frequent presentations to faculty and peers; students receive instruction in effective communication to enable successful presentation skills. An oral presentation, written report, and working models complete the course requirements. Students begin this two-semester course in the fall term. (Prerequisites: completion of all non-elective courses prior to ME 391 and completion of adequate program requirements to enable graduation within one year of course completion) Three credits per semester; six credits total.

ME 410 Vibration Analysis
This course covers fundamental laws of mechanics, free and forced vibration of discrete single and multi-degree-of-freedom systems, periodic and harmonic motion, viscous damping, and measures of energy dissipation. Modal analysis for linear systems, computational methods in vibration analysis, natural frequencies and mode shapes, analytical dynamics and Lagrange's equation, longitudinal, torsional, and flexural vibration of continuous elastic systems (strings, rods, beams) are discussed. Students learn energy methods, approximate methods for distributed parameter systems, and dynamic response by direct numerical integration methods. (Prerequisites: ME 203, MC 290, or equivalent) Three credits.
ME 411 Advanced Kinematics
Topics included in kinematics are spatial mechanisms, classification of mechanisms, basic concepts and definitions, mobility criterion, number synthesis of mechanisms, kinematic analysis of mechanisms: Raven’s method, Hartenberg and Denavit’s method, Chace’s vector method, general transformation matrix method, Dual number quaternion algebra method, method of generated surfaces, method of constant distance equations, and method of train components. Class covers existence criteria and gross-motion analysis of mechanisms, kinematic synthesis of mechanisms, function generation synthesis, rigid-body guidance synthesis, and path generation synthesis, coupler curves and cognates, and Robert’s cognates and spatial coupler curves. Three credits.

ME 412 Advanced Dynamics
The topics in the area of Dynamics include degrees of freedom, generalized coordinates, constraints, principle of virtual work and D’Alembert’s principle. Energy and momentum, frames of reference, orbital motion, Lagrange’s equation, moments and products of inertia, and dynamics of rigid bodies are also discussed, as well as variational principles: stationary value of a function, Hamilton’s principle, principle of least action, Hamilton’s equation, and phase space. (Prerequisites: ME 203, MC 290, or equivalent) Three credits.

ME 441 Advanced Material Science
This course covers electronic principles and concepts applied to the structure and properties of solid materials, and the relationships of these principles to the properties and to applications in structures and devices. Also covered are: macroscopic phenomenological and electronic molecular approaches; metals and alloys, semiconductor, and dielectrics; electronic structures, band theory, thermal properties, and electrical conductivity; and magnetic, dielectric, and optical properties. (Prerequisite: MF 207 or equivalent) Three credits.

ME 451 Advanced Turbomachinery
Students in this course examine aerodynamic and thermodynamic concepts; review compressors, turbines, jet propulsion, and single- and multistage machines; and study performance and evaluation of turbo-machines. (Prerequisites: ME 342, ME 347) Three credits.

ME 470 Advanced Finite Element Analysis
An introduction to advanced concepts in finite element analysis, this course covers advanced two- and three-dimensional element formulation and structural analysis. It is an introduction to the concepts of dynamics as applied to structures. This finite element analysis is extended to problems in dynamic systems and control, design and manufacturing, mechanics and materials, and fluids and thermal systems. Problems in heat transfer, including both steady state and transient analysis, along with conduction, convection, and radiation modes are also covered. Students solve problems both manually and with the use of modern computer finite element software. (Prerequisite: ME 318 or equivalent) Three credits.

ME 480 Quality Control
This course presents in a concise but thorough manner the foundations of modern methods of quality control and improvement that are used in the manufacturing industries. It includes the fundamentals of statistical concepts and techniques in quality control and improvement, Deming, Crosby and Juran’s philosophies and their impact on quality, tools for quality improvement and standards, statistical process control using control charts, control charts for variables and attributes, acceptance sampling plans for attributes and variables, experimental design. Case studies. Three credits.

ME 491 Computer Aided Analysis and Design
This course covers computer aided aspects of mechanical design, theories of failure, optimization of the design, static, transient and dynamic analysis methods, finite element analysis, theoretical background, plane stress and plane strain analysis, axi-symmetric stress analysis, isoparametric finite element formulations, element types for finite element analysis, mesh generation, and FEM software. Cyclic symmetric structures: advantages of cyclic symmetry, symmetric loading, generalized loading, free and forced vibration analysis. Case studies. (Prerequisite: ECE 415, or equivalent) Three credits.

Manufacturing

MF 207 Materials Science
This course provides an overview of the various classes of materials including metals, ceramics, and polymers and the role of these materials in service and design applications. Subjects include atomic structure and bonding, the periodic table, crystal structure, microstructure, defects, diffusion, binary phase diagrams, phase transformations, and corrosion. The effects of processing, microstructure and composition on mechanical, electrical, and thermal properties are discussed. Lab sessions examine mechanical testing methods and microstructure analyses. Students learn sample preparation and metallographic techniques. (Prerequisites: CH 11, CH 11L) Three credits.

MF 230 Computer-Aided Manufacturing (CAM) I
An in-depth introduction to the science, math, and engineering of computer-aided manufacturing methods, the course provides a comprehensive view of manufacturing planning, design, automation, flexible automation, and computers in manufacturing, using a strong science-based and analytical approach. CNC and tooling for CNC application are discussed. The course consists of lectures, group discussions, case studies, a term project, computer simulation, and laboratory. (Prerequisite: CD 211) Three credits.
MF 240  Computer Aided Manufacturing (CAM) II
The course balances CAD and CAM with up-to-date information on rapid prototyping, NT-based solid modeling systems, and Web-related issues. Complicated mathematical terminology is kept to a minimum; instead, the concepts are explained in as intuitive a way as possible. Students are required to have a background only in programming, calculus, and matrix and vector algebra. The course also covers components of CAD/CAM/CAE Systems and CAD/CAM postprocessor development manufacturing systems. The course consists of lectures, group discussions, case studies, a term project, computer simulation, and laboratory. (Prerequisite: MF 230) Three credits.

MF 250  Programmable Logic Control (PLC) Systems
This course introduces the design and implementation of programmable logic controllers for use in industry in the areas of automation, manufacturing, and other related applications. It takes an overall look at Programmable Logic Controllers while concentrating on relay ladder logic techniques and how the PLC is connected to external components in an operating control system. State-of-the-art software used includes: MultiSim, LabView, Cosivis, VeeP, and RS Logix 500. The course also covers input/output ports, continuous process control, timing and counting functions, chaining sequences, and digital gate logic. The course consists of lectures, group discussions, case studies, a term project, computer simulation, and laboratory. (Prerequisite: PS 16) Three credits.

MF 250L  Programmable Logic Control (PLC) Systems Lab
This course is designed to teach the students to work with the PLC. The student learns to analyze open- and closed-loop control tasks from the field of activities, and to develop structured and PLC-adequate programs in either function plan, ladder diagram, instruction list, sequential function chart, or structured text. Allen Bradley, Mitsubishi, GE, Fanuc, and Siemens PLC are used. The students must create the PLC programs from description of desired operations. State-of-the-art software used includes: MultiSim, LabView, Cosivis, VeeP, and RS Logix 500, Fluid Sym P, and others. (Co-requisite: MF 250) One credit.

MF 260  Hydraulics and Pneumatic Design
This course introduces the integration of fluids and mechanics theory to real world applications. Fluid power components and how they are configured to operate efficient mechanical work are discussed. The primary topics include piping, hydraulic fluids, pumps, diverting valves, actuators, ISO symbols, and system design with safety as a priority. Upon completion, students have an understanding of how a fluid power system is developed and applied to satisfy industrial requirements. The course consists of lectures, group discussions, case studies, a term project, computer simulation, and laboratory. (Prerequisite: ME 241) Three credits.

MF 315  Computer Integrated Manufacturing (CIM)
This course shows how CIM fits into the current manufacturing systems and how the technology is used to solve real-world industrial problems. It integrates basic product design techniques and manufacturing fundamentals and principles, along with a look at the changing operations and information systems that support CIM in the enterprise. Topics include concepts of CIM and the manufacturing enterprise; the design elements and production engineering; managing the enterprise resources; and enabling processes and systems for modern manufacturing. The course consists of lectures, group discussions, case studies, a term project, computer simulation, and laboratory. (Prerequisite: MF 240) Three credits.

MF 350  Advanced Programmable Logic Control (PLC) Systems
This course will give students advanced concepts in programmable logic controllers and their applications and interfacing to industrial controls in the areas of automation, manufacturing, and others. Topics include bit operations, data manipulation, industrial PLC network utilizing Ethernet, ControlNet, and DeviceNet. Data sharing and distributed PLC programming techniques along with fundamentals of touch panel programming and operation are studied. State of the art software used: MultiSim, LabView, Cosivis, VeeP, Automation Studio, and RS Logix 500. It will include also: input/output ports, intermittent and continuous process control, arithmetic and comparison instruction, function block diagrams, indirect and indexed addressing, and sequential function charts. The course will consist of: lectures, group discussions, case studies, a term project, computer simulation. (Prerequisite: MF 250) Three credits.

MF 350L  Advanced Programmable Logic Control (PLC) Systems Lab
This course will introduce the advance design and implementation of programmable logic controllers for use in industry in the areas of automation, manufacturing, and others. It will take an overall look at Programmable Logic Controllers while concentrating on data handling, function block diagram, and industrial networks & distributive control. State of the art software used: MultiSim, LabView, Cosivis, VeeP, Automation Studio, and RS Logix 500. It will include also: input/output ports, intermittent and continuous process control, arithmetic and comparison instruction, function block diagrams, indirect and indexed addressing, and sequential function charts. (Co-requisite: MF 350) One credit.
MF 351  Manufacturing Systems I
This introduction to general and special modern manufacturing technologies includes sheet metal fabrication and process, gear manufacturing, hard mold, powder metallurgy, plastic and rubber processes, primary metalworking processes, metal shearing and forming, welding, different machine processes, and material surface treatment. Additional topics include manufacturing techniques such as measurement and inspection for quality control process, material properties analysis in common materials and composites, material selections and applications in modern manufacturing environments. (Prerequisite: MF 207) Three credits.

MF 352  Manufacturing Systems II
This course considers several advanced manufacturing technologies. Topics include laser cutting and welding; water-jet cutting and cleaning; plasma cutting and welding; analysis and application of numerical control, computerized numerical control, and programmable logic control systems in manufacturing facilities and modern production systems; robotics; automated assembly lines; and material handling systems. Advanced topics include management of modern automated production lines, design of material handling systems, and selection of control systems in manufacturing applications. (Prerequisite: MF 351) Three credits.

MF 354  Product and Process Design for Manufacturing
Students learn the principles of product design for optimizing product manufacture and assembly – an essential part of the concurrent engineering process. The course examines materials and processes used in part manufacture and designing for manual and automated assembly processes. A course project applies these principles. (Prerequisite: ME 311) Three credits.

MF 361  Automation and Robotics I
This course introduces the basic elements of automation, industrial robotics, automated work cells, common information model systems, and the automated factory. Topics include kinematics, dynamics, the classification of robots, automation sensors, work cells, import systems and programming, robot/system integration, economic justification, and applications. (Prerequisite: ME 203) Three credits.

MF 362  Automation and Robotics II
This course introduces components of the automated factory. Topics include design of parts and processes for automation, hard and flexible automation, blocks of automation, automatic production and assembly, numeric controllers, computer-aided design/computer-aided manufacturing, industrial logic control systems, programmable logic controllers, and computer applications in automation. (Prerequisite: MF 361) Three credits.

Mechatronics

MC 290  Engineering Systems Dynamics
This course covers basic engineering vibration analysis with application to control systems including free-damped and undamped vibration of one degree of freedom systems, forced vibration, response, shock excitation, harmonic analysis, and random vibration, multi-degree of freedom systems, Lagrange equation, and vibration of systems with distributed mass and elasticity. Automatic control system topics include the simple hydraulic servo, open loop and closed loop systems, root locus, Routh-Hurwitz criterion, Nyquist criterion, and Bode analysis. The course includes applications and case studies, and integrates computer-aided analysis and design tools (MATLAB and Working Model) to ensure relevance to the design and analysis of real-world engineering dynamic and control system problems. (Prerequisites: MA 321, ME 203) Three credits.

MC 300  Feedback and Control Systems
This course emphasizes analysis and synthesis of closed-loop control systems using classical and state-space approaches with an emphasis on electro-mechanical systems. The mathematical requirements include the Laplace transform methods of solving differential equations, matrix algebra, and basic complex variables. Discussion of classical control-system design includes modeling of dynamic systems, block diagram representation, time and frequency domain methods, transient and steady state response, stability criteria, controller action (proportional; proportional and integral; proportional, integral, and derivative; and pseudo-derivatives feedback), root locus methods, the methods of Nyquist and Bode, and dynamics compensation techniques. Discussion of state-space methods includes formulation and solution (analytical and computer-based) of state equations, and pole-placement design. The course integrates computer-aided analysis and design tools (MATLAB and Working Model) to ensure relevance to the design of real-world controlled electro-mechanical systems. The course also includes lab (hardware-based) exercises. (Prerequisites: MA 321, ME 203, and EE 213) Three credits.
Software Engineering

SW 201 Software Design I
In this two-course sequence students develop an understanding of a formal process for designing a system to be implemented based on distributed architectures. Software design tools and formal design methods are used in designing software. Discussions include concepts of software design, notations, traditional versus object-oriented design techniques, design patterns, interface design, component design, UML, software architecture, data modeling, and distributed system architecture. Students implement software using modern programming languages. This course includes laboratory work. (Prerequisite: CS 232) Three credits.

SW 202 Software Design II
This course continues SW 201 Software Design I with in-depth projects and further discussions of design and implementation topics. (Prerequisite: SW 201) Three credits.

SW 227 Object-Oriented Programming with C++
This introduction to object-oriented methodology and abstract data types includes discussions in polymorphism and data encapsulation. Participants study examples of object-oriented program use in situations, as well as large system integration by object-oriented methodology. (Prerequisite: CS 232) Three credits.

SW 304 Web Development
This course introduces the student to developing applications for use on the World Wide Web. Students learn basic n-tier concepts for designing distributed applications and gain hands on experience through the construction of Web-based applications. The course covers concepts that allow communication over the Web. This includes designing and authoring Web pages, markup languages, the client side document object model, client side dynamic Web pages, client communication with a Web server, server software, server side programming, distributing server side functionality, server side connections to databases, and Web services. (Prerequisite: SW 202) Three credits.

SW 355 Database Management Systems
This course examines data formats, organizations, representations and structures; design and analysis of searching, sorting, and other algorithms; data management systems; relational database model; domains and relational integrity; structured query language; database design – logical and physical; entity-relationship diagrams; normalization; transaction processing; and database administration. (Prerequisite: CS 232) Three credits.

SW 382 Special Topics in Software Engineering
This course emphasizes individual creativity. Students work with a mentor in studying and investigating topics of current interest in software engineering. The course concludes with a final report and presentation. This course requires approval from the program chair. Three credits.

SW 390-391 Software Engineering Senior Project I and II
In this two-semester capstone design course emphasizing creativity and organizational abilities, students work with a faculty mentor to select a project that is representative of a realistic information systems engineering development task. Students prepare design goals, execute a literature search, prepare an in-depth analysis, and develop the experiment. A final report and presentation demonstrates student accomplishments. Students meet with their mentor on a regular basis to discuss project status and to review alternative solutions to problems. This course may follow the format of independent study. Three credits per semester; six credits total.

SW 403 Visual C# for Programmers I
This course provides an introduction to programming using Visual C# and the .NET framework. Students learn to create applications using object oriented programming and learn about Microsoft.NET, Visual Studio.NET, classes and objects, structured programming, exception handling, and debugging. Students complete this course understanding how Visual C# interacts with the .NET framework and will be able to build applications using Visual C#. The course is intended for designers and programmers who are developing systems in the Windows environment. Lab included. Three credits.

SW 404 Network Concepts
This course covers network components, network architecture, and operating systems, including cabling, wiring hubs, file servers, bridges, routers, and network interface cards. It discusses network software and hardware configurations and demonstrates network concepts such as configuring protocol stacks and connecting a personal computer to a network. The course examines the seven-layer OSI-model and relates it to the current industry standard, TCP/IP. Identifies sources of network overhead, introduces WAN architecture, with its implications for the developer and network security, discusses basic operating system architecture and its integration with the network, including operating system basic functions such as resource management and interfaces, and network-related functions such as multi-tasking, security, and authorization. Note: Students who have completed the Cisco Academy CCNA Course of study, Part I, will have been exposed to all topics to prepare for the exam toward their Cisco Certified Network Associate certification (CCNA). Students seeking to complete the Cisco Academy CCNA series may do so by completing SW 404, SW 596 Network Routing and Switching and SW 597 LAN/WAN Engineering. Lab included. Three credits.
SW 408  Java for Programmers I
This programming course introduces Java fundamentals to experienced programmers. Topics include the Java elements: objects, classes, variables, methods, syntax, reserved words, data types, operators, control structures, and container data structures. The course views object-oriented programming as integral, teaching it throughout. Accordingly, it includes the concepts of encapsulation, inheritance, polymorphism, packages, interfaces, and inner classes. The course teaches screen design using classes and graphics from Sun’s Application Programming Interface and includes data handling concepts such as input from the keyboard, output to the screen, input from files and output to files. The course also introduces the concept of multi-threading in preparation for follow-up studies. Lab included. (Prerequisite: significant programming experience or CS 132 or CS 134) Typically offered fall term annually. Three credits.

SW 409  Java for Programmers II
This advanced topic Java programming course covers threading, nested references, design patterns, Servlets, JavaServer Pages (JSP), the Spring Framework, JDBC, persistence, I/O and topics such as swing, graphics, etc., as time permits. Lab included. (Prerequisite: SW 408 or permission of the instructor) Typically offered spring term annually. Three credits.

SW 410  Enterprise Java
This course explores advanced Java technologies. Coverage includes state-of-the-art explorations into server-side technologies such as JDBC, Hibernate, Enterprise JavaBeans (EJB), Java Message Service (JMS), XML, etc., as time permits. Lab included. (Prerequisite: SW 409 or permission of the instructor) Elective. Typically offered fall term annually. Three credits.

SW 505  Advanced Database Concepts
This course covers topics in database implementation designed to provide software engineers with a wide variety of server-side problem solving techniques. Topics include cursors, query and index optimization, implementations of common data structures and algorithms in SQL, distributed databases, object-oriented databases, XML metadata, and direct Web publishing. While Oracle and Microsoft SQL Server are both used for demonstration, the topics covered are applicable to any database platform. Format consists of lecture and lab. The syllabus of this advanced course assumes the student is well versed in relational databases, SQL, client-server or multi-tiered applications, data structures, and algorithms. Topic List:

- Advanced Query Performance (indexing techniques, use of statistics, use of optimizer hints)
- Using Temporary Tables, Use of Server Side Cursors
- Subset Queries (TOP n, every nth item)
- Table-valued functions
- Representing Data Structures in a Relational Database (arrays, graphs, trees)
- Publishing data to HTML
- Publishing data to XML, using XPath/XDR
- Using ERWin
- Distribution, Publisher/Subscriber Replication, Snapshot and Merge Replication.
- Database Trust Relationships and Cross-Server Queries
- Online Analytical Processing (OLAP)
- Object-oriented databases

(Prerequisites: SW 402 plus SW 403 or SW 408, or instructor approval) Three credits.

SW 508  Data Warehouse Systems
This course examines the business role, architecture, database management structure, and use of mapping, data-mining, and query tools associated with a data warehouse. The course explores design strategies and construction tools, as well as techniques for capacity planning and network analysis. Three credits.
SW 518  Data Mining and Business Intelligence
In this course, students examine business intelligence concepts, methods and processes used to improve data-centric business decision support solutions with a particular focus on data mining techniques. We first examine the principals and practices of gathering and retrieving large volumes of data for analysis and synthesis. The major focus of the course is the examination analytical techniques for extracting information from large data sets to provide the students with a broad background in the design and use of data mining algorithms, exposure to software tools, and the application of these ideas to real-life situations. Data mining techniques such as classification, estimation, prediction, and clustering are examined. The final portion of the course focuses on the presentation and cataloging of information extracted from these large data sets. Students are also provided with case studies to review in order to obtain an understanding of how data mining algorithms have been applied in a diverse set of enterprises. Three credits.

SW 597  LAN/WAN Engineering
This course builds on the knowledge acquired and skills developed in SW404, Network Concepts and SW 596, Routing and Switching. Class presents knowledge and skills necessary to use advanced IP addressing and routing in implementing scalability for routers connected to LANs and WANs. Lectures include Advanced IP Addressing, Routing Principles, Configuring the EIGRP protocol, Configuring the Open Shortest Path First Protocol, Configuring IS-IS, and Manipulating Routing Updates. In addition there is discussion of wireless networks and protocols. Students complete laboratory exercises using Cisco routers and switches. Students develop skills to list the key information routers needs to route data; describe classful and classless routing protocols; describe link-state router protocol operation; compare classful and classless routing protocols; compare distance vector and link state routing protocols; describe concepts relating to extending IP addresses and the use of VLSMs to extend IP addresses; describe the features and operation of EIGRP; describe the features and operation of single area OSPF; describe the features and operation of multi-area OSPF; explain basic OSI terminology and network layer protocols used in OS; identify similarities and differences between Integrated IS-IS and OSPF; list the types of IS-IS routers and their role in IS-IS area design; describe the hierarchical structure of IS-IS areas; describe the concept of establishing adjacencies; and understand the basic wireless protocols and their uses. (Prerequisites: SW 404, SW 596) Three credits.
School of Nursing
A Message from the Dean

Students are entering Fairfield University’s School of Nursing at a point in time when the world of healthcare is rapidly changing. The goal of the faculty is to establish a caring, diverse academic learning environment that in the Jesuit tradition provides one of the world’s highest standards of nursing education.

The Fairfield University School of Nursing curriculum prepares future nurses at the baccalaureate and graduate level in an exciting environment that includes classroom experiences on campus and opportunities to care for patients at numerous clinical sites in hospitals, nursing homes, clinics, and community agencies. Students are prepared for leadership roles in all healthcare settings.

The School of Nursing enhances learning through close relationships and partnerships with clinical agencies that offer students individualized experiences during the academic year and internships during the summer months. Opportunities exist for students to interact with national nursing leaders who are present in the School at key points in time and to participate in international study abroad programs that add to the value of a nursing education.

The faculty believes that the School of Nursing offers a tremendous opportunity for undergraduate and graduate nursing education in a unique academic and professional environment. We invite you to study nursing with us at Fairfield.

Jeanne M. Novotny, Ph.D., RN, FAAN
Dean, School of Nursing
The goal of the undergraduate program is to prepare students for professional nursing practice. One of the unique features of all undergraduate programs at Fairfield is the strong liberal arts core that is integral to the curriculum. Through these courses, nursing students develop the social awareness, historical consciousness, thinking skills, aesthetic sensibility, values orientation, and foundations in art, literature, and science that are hallmarks of undergraduate education. The program of study contributes to the development of a well-rounded person who is able to live effectively and productively in the world of today and tomorrow. Students grow personally and professionally to become committed and compassionate nurses, capable of providing professional care to people in whatever setting they encounter.

The curriculum of the School of Nursing provides students with educational experiences from which they gain a strong base in the humanities, mathematics, social sciences, and natural sciences as well as in nursing theory and practice. Students are fully integrated into the University community and enroll in core courses with students of all majors.

Faculty members in the School of Nursing are exceptionally well qualified by academic and clinical preparation. The small student to faculty ratio is an inherent component of the program, particularly as it relates to clinical practice. Each student is assigned to a faculty advisor who works closely with students to monitor progression through the program. Academic counseling, individualized attention, and career planning are integral to the advisement process.

In the nursing program, students participate in nursing practice in a variety of clinical settings. The School has affiliations with more than 50 agencies, including small and large hospitals, community health centers, in-patient and out-patient psychiatric institutions, and schools. Opportunities are available in urban and suburban settings, servicing the poor and the affluent, for students to work with people of different cultures, backgrounds, and needs.

Fairfield nursing students gain community health experience through clinical rotations at the School of Nursing’s Health Promotion Center in Bridgeport. The Center is nationally recognized for its community health outreach program, which provides care to the region’s poor and underserved population. Students provide services through partnering agencies throughout the community, offering health screenings, education, and referral. Opportunities exist for volunteering and internships at the Center.

The School of Nursing facility houses multimedia classrooms, faculty offices, a study/reference room for students, conference rooms, and a tiered lecture hall. The modern, multipurpose Learning Resource Center is well-equipped with demonstration stations, interactive mannequins, and current technology designed to develop and sharpen students’ patient-care, critical-thinking, and decision-making skills.
Upon successful completion of the program, students receive a B.S. degree in Nursing and qualify to take the NCLEX examination for licensure as a registered nurse. The School of Nursing programs are accredited by the Commission on Collegiate Nursing Education and approved by the Connecticut Department of Higher Education and the Connecticut State Board of Examiners for Nursing.

The School of Nursing Philosophy

The Philosophy of the School of Nursing flows from the Mission Statement of Fairfield University, and gives definition to the Jesuit ideals of social responsibility, truth, and justice. The faculty believes that people are biological, psychological, social, and spiritual beings who are unique members of families and of larger social systems. Interaction and communication within these systems influence health, harmony, and well-being. Situational and developmental change represent transitional points in the life cycle, which may result in disharmony and/or an opportunity for growth.

Health is a dynamic process of physical, mental, spiritual, and environmental harmony that enables people to affirm and pursue their own life goals. Optimum health begins with nurturing and promoting one's own emotional and spiritual growth, which then extends to respect and caring for others. Alterations from health are a trajectory from wellness to illness with many variables affecting the quality of life along that continuum. When recovery from illness is not possible, death is viewed as the final state of life offering an opportunity for further growth.

Students are viewed as holistic individuals with multifaceted roles, who are accountable for their learning. Each student brings unique qualities that contribute to the strength and diversity of the program. Along with planned educational experiences, faculty offer support, guidance, and mentoring throughout the learning process. Students are encouraged to develop their individual strengths and identify areas of interest as they progress throughout the curriculum. Students emerge as qualified entry-level practitioners, at the baccalaureate or master's level, who integrate theory and research into their practices and use a critical approach to problem solving.

Because society is rich with diverse religious, ethnic, and cultural groups, professional nurses must be prepared to work with those whose beliefs and values may be different from their own. In order to be sensitive to others, it is first necessary to know and accept one's own values and beliefs. Students and faculty demonstrate mutual respect for the rights of others and appreciation of these differences.

The School of Nursing Mission & Purpose

In keeping with the mission of Fairfield University to develop men and women for others, the School of Nursing builds on a tradition of innovation and a commitment to provide the very best nursing education, scholarship, and professional service locally, nationally, and internationally.

The School of Nursing is committed to leadership in nursing. The discovery, transmission, and use of knowledge are at the core of our work. Knowledge of health and illness in individuals, families, groups, and communities, both locally and internationally, provides the context for our charge. The ultimate test of our vision will be the results of contributions of faculty and graduates over time.
Organizing Framework

Ethics and Social Responsibility
Commitment to social responsibility, truth, and justice is inherent in the Jesuit ideal and underscores the need to provide care to vulnerable populations. Nurses have a moral and ethical obligation to provide and advocate for optimal healthcare for all members of society regardless of differences in culture, race, gender, socioeconomic status, religion, and age. Provision of care to vulnerable populations is a particular concern to nursing.

Nurses consider the interplay of health and social issues as they care for clients in various stages of health and illness. Students confront the range of ethical dilemmas and value conflicts inherent in care delivery, and develop an understanding and acceptance of self and others.

Holism
Human beings are unique individuals who grow in complexity throughout life – physically, mentally, emotionally, socially, and spiritually. The interaction among human beings and between people and the many environments and cultures in which they live is considered in planning and providing care. The physical environment includes climate, geography, air and water quality, and food purity, as they affect health and wellbeing. The social environment, defined by roles, relationships, and a network of care, influences health and provides support. The cultural environment, which includes family norms, religious beliefs, health beliefs, health practices, and the development of values and mores, influences definitions of health and illness and determines the manner in which health problems are managed. These environments and their interactions with human beings are integral to a holistic perspective.

Nursing Practice
Nurses diagnose human responses to actual and potential health problems, identify individual strengths and nursing care needs, and plan and deliver culturally competent care that promotes, maintains, or restores health. The role of the nurse is conceptualized as helping clients across the life span to maximize their optimum potential.

As students engage in clinical practice, they consider the complex interactions among individuals, families, and communities and analyze how those interactions influence health and the larger society in providing care. Nursing practice integrates scientific problem-solving with holistic caring. Based on research and theoretical knowledge, the nursing process is used as a problem-solving approach to analyze information and prioritize patient care needs for individuals and groups.

Professionalism
Characteristics of professional nursing practice include critical thinking, decision-making, and accountability. Behaviors integral to professional nursing’s role are advocacy, political activism, effective communication, collegiality, commitment to lifelong learning, scholarship, and the upholding of standards as defined by the profession.

Nurses function as integral members of multidisciplinary teams, engage in interdependent roles, and collaborate with other healthcare providers, clients, and family members.

Students facilitate collaborative processes, make referrals, teach others, confer with individuals and groups, and strategize to shape health policy at various levels. The purpose of this collaborative, interdisciplinary activity is to improve care through education, consultation, and management.

Professional nursing practice combines holistic care with evidence-based practice. Nursing research is viewed as the investigation of issues of concern in nursing practice with the aim of answering complex questions and developing knowledge to improve care and potentiate health.

Leadership and management skills are essential to shape the future of healthcare and help others attain goals and facilitate change. Participation in professional organizations and groups, role modeling, client advocacy, political activism, and fostering a learning environment by mentoring and precepting others is expected.

Undergraduate Program Objectives
1. Demonstrate effectiveness in planning and providing therapeutic nursing care, managing information, and promoting self-care competence of culturally diverse individuals, families, groups, and communities.
2. Employ a variety of technologies and other therapeutic modalities with sensitivity for the provision of care.
3. Make sound clinical judgments based on nursing science and related theory, using critical thinking and ethical decision-making.
4. Demonstrate collaboration with peers, patient, healthcare professionals, and others within healthcare teams in the process of planning, delegating, implementing, and evaluating care.
5. Communicate with clarity, purpose, and sensitivity using a variety of methods including technology.
6. Identify clinical problems and apply research findings in order to promote evidence-based and creative practice in nursing.
7. Synthesize knowledge from the humanities and sciences in developing and providing care that is holistic, visionary, culturally competent, fiscally responsible, and socially relevant.
8. Demonstrate accountability for professional growth, the provision of nursing care, and lifelong learning.
9. Advocate for patients, consumers, and the nursing profession through involvement in the political process, and health/patient care policies and practices.
Nursing Curriculum

The four components of the School of Nursing undergraduate program are:

**The core curriculum**
Nursing students must complete the core curriculum that is required of all Fairfield undergraduates, except that nursing students may meet either the visual and performing arts or the language requirement. Students meet the U.S. diversity requirement through enrollment in the NS 112 Healthcare Delivery Systems. Students meet the World diversity requirement through enrollment in a course focusing on non-western culture or society, exclusive of Europe and the United States (may be met through existing core courses). Statistics is required for all nursing students; the minimum requirement is MA 17 Introduction to Probability and Statistics. Those who complete two semesters of calculus enroll in MA 217 Accelerated Statistics.

**Natural and social sciences**
Students take one semester of chemistry and three semesters of biology that include anatomy and physiology, and microbiology. Because the social sciences form an important part of the foundation for nursing practice, students also take developmental psychology and a social science elective.

**Nursing courses**
Classroom instruction in nursing theory and skills begins in the sophomore year and continues throughout the undergraduate program. Nursing courses include theoretical and clinical components. With each passing year clinical work increases, until by the senior year, a significant portion of time is spent in the nursing major, which includes clinical practice as well as the theory component. To ensure that students obtain the breadth and depth of clinical experience needed, the school has associations with many clinical facilities, including private hospitals, veterans' hospitals, clinics, outpatient departments, rehabilitation centers, public health departments, long-term care facilities, home care agencies, community health centers, schools, and its own Health Promotion Center in Bridgeport. Students provide their own transportation to clinical agencies.

**Electives**
Two free electives in the curriculum provide students with an opportunity to explore topics of interest including the liberal arts, nursing, independent study, and minor options.

**Transferring into the School of Nursing**
Students may transfer into the School of Nursing from the College of Arts and Sciences, Dolan School of Business, University College, or another accredited college on a space-available basis. Minimum criteria include an overall grade point average of 2.80 or better and completed prerequisite courses for the semester. The typical transfer student has earned A's and B's in prerequisite courses and an overall GPA of 3.0 or better.

Progression in the Nursing Curriculum
Nursing students must follow all University educational policies and general regulations including those regarding academic progress.

The science and psychology courses are sequential and are prerequisites to designated nursing courses. Strong foundational knowledge in the science courses is critical to success in the nursing program. Thus, students may not progress to the next semester with an incomplete in a prerequisite course. BI 107 Human Anatomy and Physiology I, BI 108 Human Anatomy and Physiology II, BI 151 Microbiology, CH 84 Chemistry, and PY 163 Developmental Psychology must be completed successfully with a minimum grade of C (73) for students to progress to the next semester in the course sequence for the nursing major. Students unable to complete these courses successfully are expected to repeat coursework in the next semester or the summer session immediately following or they will be dismissed from the School of Nursing. Students consistently achieving minimum passing grades in prerequisite courses will be placed on Academic Warning. Students who do not obtain a grade of C or better in a prerequisite course may repeat the course once. A grade of less than C+ in three or more prerequisite courses will result in dismissal from the School of Nursing.

Nursing courses are sequential, beginning with foundational courses and progressing to increasing levels of complexity and challenge throughout the program. As students move through the curriculum, new content is integrated and builds upon previously learned material. Thus, all students must earn the minimum grade of C+ (77) in all nursing courses to progress to the next semester and continue in the program. Students who do not obtain a grade of C+ or better in a nursing course may repeat the course once. A grade of less than C+ in two nursing courses (including a repeated course) will result in dismissal from the School of Nursing. The clinical component of all clinical nursing courses is graded on a pass/fail basis. Students must pass the theory and clinical component of a course to pass the entire course, regardless of their grade in the theory component. Students who fail to earn the minimum grade in either component of a clinical course must repeat the entire course.
Health and Professional Requirements
Nursing majors must be certified in cardiopulmonary resuscitation by Jan. 1 of the sophomore year and remain certified throughout the nursing program. Health Care Provider (American Heart Association) or Professional Rescuer (American Red Cross) is the minimum requirement. Please note that the American Heart Association certifies for two years. All health requirements and OSHA training requirements must be met each year prior to clinical practica. To attend clinical, students must provide a physical examination and non-reactive Mantoux test yearly. Proof of immunization or immunity must be provided for the following: hepatitis, varicella, measles, mumps, rubella, and diphtheria-tetanus. Some agencies require drug testing and/or criminal background checks. Students unable to comply with agency requirements will be dismissed from the program. All costs associated with clinical placements are the responsibility of the student.

Student Background Checks
Because of new requirements in hospital and agency contracts, CertifiedBackground.com is the source for background checks for Fairfield University School of Nursing students. All students will be expected to obtain a background check prior to their first clinical experience.

Continuous Assessment
All nursing students participate in a comprehensive nationally standardized assessment program. This total testing program allows close monitoring of student progress and serves as the basis for individualized advisement. A testing fee will be included for all nursing students in appropriate semesters. All students must meet the national average on the final assessment test before transcripts are released.

Licensure
All nursing students graduate with a bachelor of science degree in nursing. To obtain initial licensure as a Registered Nurse, students apply to the State Board of Nursing in the state in which they plan to practice. In addition, students register to take the National Council Licensure Examination (NCLEX) at a conveniently located testing center. All students are expected to pass the licensure exam on the first try. Application procedures vary by state. Information may be obtained in the School of Nursing office or on the National Council of State Boards of Nursing website: http://www.ncsbn.org.

Please note that graduation from the nursing major does not ensure eligibility for state licensure. A candidate who has been convicted of a felony or another crime in any state may be required to submit documentation about this conviction to the State Board of Nursing in which licensure is sought. Each State Board of Nursing reserves the right to make a decision on whether to grant licensure to practice as a registered nurse.

Scholastic Honors
Dean's List
To qualify for the Dean's List at the conclusion of each semester's work, a student must have completed a minimum of 12 credit hours, have no outstanding or incomplete grades for that semester, and have attained a semester grade point average of 3.50 or better.

Sigma Theta Tau, International Honor Society
The Mu Chi Chapter of the Sigma Theta Tau International Honor Society of Nursing was established at Fairfield University in 1992. Since then, the Chapter has grown to nearly 600 members. The Society is committed to fostering nursing leadership, research and creativity. Standards for membership include demonstrated excellence in scholarship and/or exceptional achievement in nursing. Undergraduate nursing students in the top 35 percent of their class with a grade point average of at least 3.0 are eligible for membership after completion of at least one-half of the required nursing curriculum. Students in the graduate program are eligible when they have achieved a grade point average of at least 3.5 and have completed a minimum of one-quarter of the required graduate curriculum.

**Total Credits:** 129  
**Total Courses:** 38
The School of Nursing offers study abroad opportunities for short-term and semester study at Fairfield University affiliated programs. The Nursing Study Abroad Program is open to Fairfield University nursing students who have successfully completed the spring semester of the sophomore year, have a GPA of 2.8 or better, and are recommended by their faculty advisor and dean.

Full-time undergraduate students in the nursing study abroad program take liberal arts and nursing courses and study healthcare and professional nursing in an international setting. The semester long program is offered at the University of Galway in the spring. Upon return, students take a six week summer course on campus that begins in mid-May and they continue in the traditional nursing progression with some minor adjustments and graduate on time with their class. Students are responsible for the cost of the course and housing in the summer.

Selected opportunities for short-term study during intercession and summer sessions are available for all students including adult learners and graduate students. Nursing Research is normally offered each summer in Italy at the University of Padova for undergraduate or graduate credit.

Nursing Study Abroad – Curriculum Plan (for full-time undergraduates)

**First Year – Fall Semester**
- PH/RS 10 Philosophy or Religious Studies: 3 credits
- EN 11 Composition and Prose Literature: 3 credits
- ML/VA Language or Visual and Performing Arts: 3 credits
- MA 17 Introduction to Probability and Statistics: 3 credits
- CH 84 or Chemistry: 3/4 credits
- Total: 15/16 credits

**First Year – Spring Semester**
- PH/RS 10 Philosophy or Religious Studies: 3 credits
- EN 12 Introduction to Literature: 3 credits
- ML/VA Language or Visual and Performing Arts: 3 credits
- CH 84 or Chemistry: 3/4 credits
- MA 19 Introduction to Calculus: 3 credits
- Total: 16/17 credits

**Sophomore Year – Fall Semester**
- BI 107 Anatomy and Physiology I: 4 credits
- NS 110 Introduction to Professional Nursing: 3 credits
- NS 112 Healthcare Delivery Systems: 3 credits
- PH/RS Philosophy or Religious Studies Elective: 3 credits
- HI 30/ Europe and the World: 3/4 credits
- BI 151 or Microbiology: 3/4 credits
- Total: 16/17 credits

**Junior Year – Fall Semester**
- NS 301 Wellness to Illness: 4 credits
- NS 303 Basic Concepts of Pathophysiology and Physiology: 3 credits
- NS 305 Mental Health Nursing: 4 credits
- NS 307 Therapeutic Nursing Interventions: 3 credits
- HI History Elective: 3 credits
- Total: 17 credits

**Junior Year – Spring Semester**
- NU 216 Research Methods: 3 credits
- NU 219 Fundamentals Issues in Health Care: 3 credits (Ethics)
- NU 230 International Nursing (WDiv): 3 credits
- EN EL/ English Elective/ SS EL or Social Science Elective: 3 credits
- Total: 12 credits

**Summer Session (upon return)**
- NS 312 Patterns of Illness I: 5 credits

**Senior Year – Fall Semester**
- NS 314 Nursing Women & Childbearing Family: 4 credits
- NS 323 Nursing of Children and Family: 4 credits
- NS 325 Patterns of Illness II: 5 credits
- PH/RS Philosophy or Religious Studies Elective: 3 credits
- Total: 16 credits

**Senior Year – Spring Semester**
- NS 321 Professional Nursing: Leadership and Management: 3 credits
- NS 330 Public Health Nursing: 4 credits
- NS 332 Transition: Professional Nursing Practice: 4 credits
- EL Free Elective: 3 credits
- EN EL English Elective/ SS EL or Social Science Elective: 3 credits
- Total: 17 credits

Total Credits: 129
Total Courses: 38
PROGRAM OPTIONS FOR ADULT LEARNERS

The programs for adult learners are designed to draw on previous education and experience and allow students to earn the bachelor’s degree by different routes. A program of study for individuals without a bachelor’s degree allows students to pursue a career in nursing in the part-time program. Another option for adult learners is an accelerated format for persons holding a bachelor’s degree in another field.

Admission
Students interested in pursuing a bachelor’s degree in nursing may attend on a part-time basis. Classes are available during the academic year and in the summer. Adult learners and registered nurses may begin prerequisite courses through the School of Nursing. Admission is competitive and all students must have a minimum GPA of 2.80 to declare a nursing major. Students must complete an application to begin nursing courses.

Matriculation
Matriculation is official enrollment in a degree program. Until such time as they matriculate, students are classified as special status. Students in the part-time and Second Degree Programs must matriculate after the completion of 12 credits to continue in the nursing curriculum. Students in the RN to B.S. in Nursing Program must matriculate after successful completion of NS 250, Professional Nursing.

Core Requirements
Adult learners must meet the University’s core course requirement. Course requirements in the liberal arts and required supportive courses can be met by challenge examinations, transfer credits from other academic institutions, or enrollment in specific courses. Courses are accepted in transfer from other accredited colleges and universities on the basis of a satisfactory (C or better) academic record and course equivalency.

Prerequisite Course Requirements
The School of Nursing suggests that all prerequisite courses be completed within 10 years prior to the first nursing course. Applicants normally have completed science courses with grades of A or B in the last three to five years. Acceptance of credit is at the discretion of the Dean. Students are expected to review course material to ensure that their knowledge of the subject matter is current. Students can maximize their potential for success in the nursing program with a strong foundation that is provided by these courses.

Residency Requirement
A minimum of 60 credits, including 59 credits in nursing, must be completed at Fairfield University. In addition, the last 30 credits for the degree must be taken at Fairfield University. Students are expected to enroll in at least one semester as a full-time student.

Credit from International Programs
Students completing coursework outside the United States must submit certified English transcripts and course-by-course evaluation of all academic records. Information may be obtained from World Education Services (800-937-3895 or e-mail info@wes.org).

Diversity Requirements
Students meet the U.S. diversity requirement through enrollment in NS 112 Healthcare Delivery Systems. Students meet the World diversity course requirement through enrollment in a course focusing on non-western culture or society, exclusive of Europe and the United States (may be met through existing core courses).
BACHELOR OF SCIENCE – SECOND DEGREE PROGRAM

For students who have earned a bachelor's degree in another field, the school offers a Second Degree Program in an accelerated format leading to a B.S. in nursing. Upon completion of prerequisite courses, students matriculate and complete degree requirements in approximately 15 months. A total of 60 credits must be earned at Fairfield University after the first degree is awarded. Admission is competitive and students are expected to have completed all prerequisite and non-nursing courses prior to admission. Applicants normally have completed science courses with grades of A or B in the last three to five years. Tuition for students in this program is based on a cohort rate.

Second Degree Core Courses

Humanities: five courses distributed as follows:

- English (six credits)
- Philosophy (three credits)
- Ethics (three credits)
- Religious Studies (three credits)

Prerequisites: six courses

- Statistics (three credits)
- Developmental Psychology (three credits)
- Anatomy and physiology (eight credits)
- Microbiology (four credits)
- Chemistry (four credits)

Selected prerequisite requirements may be met through challenge exams or transfer of credit from approved academic institutions.

General Electives: 11 courses (33 credits)

Summer 1 Credits
NS 110 Introduction to Professional Nursing 3
NS 112 Healthcare Delivery Systems 3
NS 270 Health Assessment 4
NS 272 Geriatric Nursing 3
NS 307 Therapeutic Nursing Interventions 3
Total 16

Fall 1 Credits
NS 301 Wellness to Illness 4
NS 303 Basic Concepts of Pathophysiology and Pharmacology 3
NS 305 Mental Health Nursing 4
NS 312 Patterns of Illness I 5
Total 16

Spring 1 Credits
NS 310 Research in Nursing 3
NS 314 Nursing of Women and the Childbearing Family 4
NS 323 Nursing of Children and Family 4
NS 325 Patterns of Illness II 5
Total 16

Summer 2 Credits
NS 321 Professional Nursing: Leadership and Management 3
NS 330 Public Health Nursing 4
NS 331 Nursing Emerging Professional Identity 1
NS 332 Transition: Professional Nursing Practice 4
Total 12
Fairfield University’s School of Nursing offers a traditional B.S. in Nursing degree for adult learners who are not college graduates or have an associate degree. Depending upon the number of general education courses completed prior to application, students may complete the program in a minimum of three years. Students begin classes in the fall semester and the program is individualized to meet the unique needs of each student. Some core requirements may be met through challenge exams or transfer of credit from approved academic institutions. Applicants normally have completed science courses with grades of A or B in the last three to five years. Study abroad opportunities may be available for selected students.

**Adult Student Core Courses**

**Humanities:** 12 courses distributed as follows:
- English composition (three credits)
- English literature (three credits)
- History of Western civilization (three credits)
- History elective (three credits)
- Visual and performing arts (two courses totaling six credits) or two modern language courses at the intermediate level totaling six credits
- Philosophy (three credits)
- Ethics (three credits)
- Religious Studies (three credits)
- Three elective courses chosen from classics, communication, or any of the above disciplines (nine credits)

**General Electives:** two courses (six credits)

**Social Science:** four courses from at least two disciplines distributed as follows:
- Developmental psychology (three credits)
- Three social science courses (at least one not in psychology) (nine credits)

**Math and Science:** five courses distributed as follows:
- Anatomy and physiology I (four credits)
- Anatomy and physiology II (four credits)
- Microbiology (four credits)
- Chemistry (four credits)
- Statistics (three credits)

The RN to B.S. in nursing program individualizes learning experiences for completion of the degree. The sequence of courses for registered nurse students is designed to build on existing knowledge and skills, and integrates a professional, research-based, family-oriented, community-focused perspective.

Advanced Placement in Nursing for Registered Nurses
Registered nurse students may earn advanced placement in the nursing major for a maximum of 30 credits. Advanced placement is awarded for most students through the articulation agreement among nursing programs. Occasionally RN credit is awarded through challenge exams or portfolio assessment. The RN to B.S. program individualizes learning experiences for completion of the degree.

Partnership Programs
The Fairfield University School of Nursing has partnerships with the Schools of Nursing at Norwalk Community College and St. Vincent’s College. These unique programs provide seamless transition from the associate to bachelor’s degree in nursing, and grant 34 credits in advanced placement nursing.

RN to BS Core Courses

Humanities: 12 courses distributed as follows:
- English composition (three credits)
- English literature (three credits)
- History of Western civilization (three credits)
- History elective (three credits)
- Visual and performing arts (two courses totaling six credits)
or two modern language courses at the intermediate level (totaling six credits)
- Philosophy (three credits)
- Ethics (three credits)
- Religious Studies (three credits)
- Three elective courses chosen from classics, communication, or any of the above disciplines (nine credits)

General Electives: three courses (nine credits)

Social Science: four courses (12 credits) from at least two disciplines as follows:
- Anthropology, Sociology, Psychology, Political Science, or Economics

Math and Science: four courses distributed as follows:
- Science (3-4 credits)
- Science or math (2 courses totaling 6-8 credits)
- Statistics (3 credits)

Diversity Requirements
Students meet the U.S. diversity with NS 250 and World diversity requirements through enrollment in designated courses (see diversity requirements in catalog).

Advanced Placement
By Articulation, Partnership or Exams
30-34 credits
Courses described below are nursing courses only. Descriptions of other required courses can be found in the appropriate departmental listing in the College of Arts and Sciences section of the catalog.

**NS 110  Introduction to Professional Nursing**  
This course serves as a foundation to the development of the nurse as a professional person. Central to this is the awareness and acceptance of self. The course introduces the process of critical thinking/judgment as an approach to the planning and delivery of nursing care to individuals, families, groups, and communities. Discussion of nursing’s history and accomplishments serves as the cornerstone for the advancement of professional behaviors including scholarship, communication, collaboration, personal responsibility/accountability, integration of research and practice, and peer and self-evaluation. (Prerequisite: CH 84 or CH 11, PY 163) Three credits (42 theory hours).

**NS 112  Healthcare Delivery Systems**  
This course explores the healthcare delivery system in the United States through issues relating to conceptual, historical, economic, political, and technological developments. The course emphasizes ethical and legal aspects of the current system that remain unresolved, such as access to care, type of services to provide, and roles within the system and discusses consumer use of traditional, alternative, and experimental therapies. This course gives an interdisciplinary perspective to students interested in healthcare from any field of study. *This course meets the U.S. diversity requirement.* Three credits (42 theory hours).

**NS 250  Professional Nursing**  
This course orients the registered nurse to baccalaureate nursing education to facilitate re-entry into a new educational system. The course articulates the scope and aims of professional nursing practice in the study of concepts and issues of multiple aspects of healthcare delivery and education. Students examine the School of Nursing philosophy and conceptual framework. (Prerequisites: Connecticut RN license or academic transcript and approval of advisor.) Three credits (42 theory hours).

**NS 252  Health Assessment for Registered Nurses**  
This course provides the registered nurse with knowledge and skills of health assessment of clients throughout the life span, with consideration of cultural and ethnic variations. Critical thinking and communication are essential components of health assessment and are incorporated in this course. This is a Web-enhanced course that also uses lecture, discussion, demonstration, supervised and individual practice, and opportunities to develop self-evaluation skills. Students organize and prioritize data, and record assessment data on designated forms. (Prerequisites: BI 107; BI 108; NS 250) Three credits (28 theory, 28 lab hours).

**NS 270  Health Assessment**  
This course introduces students to the knowledge and skills of client health assessment throughout the life span, with consideration of cultural and ethnic variations. Critical thinking and communication are essential components of health assessment. The course uses lecture, discussion, demonstration, supervised and individual practice to help students expand their skills in interviewing, taking a health history, and completing a physical examination. Students organize and prioritize data using functional health patterns and record assessment data on designated forms. This course also includes a separate one-credit laboratory module designed to complement physical assessment skills. Students use the School of Nursing Learning Resource Center to develop skills pertaining to infection control, body mechanics, and client hygiene. (Prerequisites: BI 107; CH 84 or CH 11; NS 110; PY 163; pre- or co-requisites: BI 108, BI 151, NS 272) Four credits (28 theory, 56 lab hours).
Course Descriptions

School of Nursing

NS 272  Geriatric Nursing
This course focuses on nursing care of older adults living in a long-term care setting. Normal physiological changes of aging and related assessment skills are incorporated and evaluated. Management of common geriatric care problems is emphasized. Instruction in Medicare/Medicaid, insurance reimbursement systems, political focus of older adult care, the minimum data set framework, and policies and procedures as they relate to long term care are offered. (Prerequisites: BI 107, CH 84 or CH 11, NS 110; pre- or co-requisites: BI 108, BI 151, NS 270) Three credits (28 theory hours, 42 clinical hours).

NS 301  Wellness to Illness
This course explores factors that influence the degree of health and wellness experienced by individuals across the life span. Epidemiology provides a framework for the assessment of risk and the management of common health problems. Students have opportunities to promote wellness through clinical experiences with healthy children and adults. The course examines how people make health-related decisions, what risks threaten their health, and reasons they give for adopting particular lifestyles, and addresses spirituality and culture, with particular attention devoted to assessment techniques and intervention strategies. Students learn traditional and (alternative) complementary therapeutic techniques to enhance health. (Prerequisites: NS 270, NS 272, BI 108, BI 151) Four credits (42 theory, 42 clinical hours).

NS 303  Basic Concepts of Pathophysiology and Pharmacology
This course focuses on the study of physiological and biological life processes with an emphasis on deviations from normal and a particular emphasis on exemplar cases. The course discusses manifestations of disease and alterations in all body systems including pharmacological kinetics and dynamics as therapeutic strategies for treating alterations in normal life processes. (Prerequisites: NS 270, NS 272, BI 108, BI 151) Three credits (42 theory hours).

NS 305  Mental Health Nursing
This course focuses on the nursing care of individuals with psychiatric disorders. The course uses theories of human behavior and personality as well as biophysical and holistic models as foundations to plan and implement care in a variety of traditional and non-traditional treatment settings. It discusses factors that may contribute to an individual developing a psychiatric disorder and considers ethical, legal, and cultural issues. The course emphasizes development of a therapeutic nurse-patient relationship and use of communication techniques to assist patients toward mental health. (Prerequisites: NS 270, NS 272, BI 108, BI 151, PY 163) Four credits (42 theory, 42 clinical hours).

NS 307  Therapeutic Nursing Interventions
This course focuses on the provision of safe and effective care for the basic needs of clients of all ages using common nursing technical skills and considering cultural and ethnic variations. The course introduces psychomotor skills and various nursing interventions that help clients maintain physical well-being including wound care; administration of oral, parenteral, and intravenous medications; glucose monitoring; nasogastric and respiratory care; and measures to assist with urinary and bowel elimination. The School of Nursing Learning Resource Center provides opportunities to use critical thinking in skill practice, interactive learning, supervised return demonstration, and hypothetical clinical situations. (Prerequisites: NS 270, NS 272, BI 108, BI 151, MA 19 or higher) Three credits (14 theory, 56 lab hours).

NS 310  Research in Nursing
This course introduces the research process and its application to scholarship in clinical practice. Students learn to be consumers of research through a review of the literature, critique of research, and identification of methods appropriate to study specific practice-related problems. The course emphasizes critical thinking and writing skills and considers ethical, economic, technological, and statistical dimensions. The course applies concepts to clinical research, evidence-based practice, and quality improvement. (Prerequisites: NS 110 or NS 250, and, MA 17 or MA 217) Three credits (42 theory hours).

NS 312  Patterns of Illness I
This course introduces students to illnesses that are most frequently occurring in the adult population. Discussion of these illnesses includes application of the components of the nursing process: assessment, diagnoses, interventions, and evaluation of expected outcomes. The course discusses specific independent and collaborative therapeutic interventions including indications for their use and evaluation of effectiveness. Extensive use of case examples enhances learning. Students achieve competence in the performance of selected skills during this course, which includes a clinical practicum with an acutely ill adult population. (Prerequisites: NS 301, NS 303, NS 305, NS 307) Five credits (42 theory, 84 clinical hours).
NS 314 Nursing of Women and the Childbearing Family
This course provides students with the opportunity to master the knowledge and skills necessary to help families cope with changes in their reproductive needs, reproductive health issues, and gynecological challenges. Reproductive needs include the childbearing cycle: pregnancy; childbirth; postpartum care; care of the healthy newborn; and prenatal, intrapartal, and postpartal complications. Reproductive health issues include infertility, family planning, menarche, and menopause. Gynecological challenges include breast and reproductive tract surgery. The course integrates ethical and legal aspects of reproductive issues throughout and discusses nursing theories and research findings generally related to reproductive health. (Pre- or co-requisites: NS 301, NS 303, NS 305, NS 307) Four credits (42 theory, 42 clinical hours).

NS 321 Professional Nursing: Leadership and Management
This course immerses students in issues and concepts central to professional nursing. It examines political, social, and legal systems that affect the image of nursing and influence its role definition. Students consider organizational dynamics and theories of leadership and management, with case studies and concurrent clinical practice providing the foundation for theory integration. Experiential projects that involve acute care and community-based practice settings facilitate critical reflection and creative planning. (Pre-or co-requisites: NS 310, NS 312, NS 314, NS 323, NS 325; prerequisites for RNs: NS 250, NS, 252, NS 310) Three credits (28 theory, 42 clinical hours).

NS 323 Nursing of Children and Family
This course focuses on the nursing care of children, adolescents, and families dealing with health and developmental challenges of childhood and explores health promotion needs of childrearing families. Clinical resources reflect the trend toward community-based care, with student experiences in community agencies as well as in acute-care settings. The course employs a developmental perspective through which major causes of morbidity and mortality are examined. Case studies serve as vehicles for the integration of multicultural and multidisciplinary perspectives that introduce health problems. The course challenges students to develop critical and creative reasoning skills in working through the cases, guiding them in the use of developmentally and empathically appropriate communication strategies. (Prerequisites: NS 310, NS 312) Four credits (42 theory, 42 clinical hours).

NS 325 Patterns of Illness II
This course integrates knowledge learned in NS 312 and introduces other patterns of illness. Discussion involves the components of the nursing process: assessment, diagnoses, interventions, and evaluation of outcomes of patients throughout the adult lifespan. The course discusses specific independent and collaborative therapeutic interventions, including indications for their use and evaluation of their effectiveness. The course, which includes a clinical practicum working with high acuity patients across the adult lifespan, frequently uses case studies as a teaching strategy. (Prerequisites: NS 310, NS 312) Five credits (42 theory, 48 clinical hours).

NS 330 Public Health Nursing
This course focuses on the provision of safe and effective care to people living in communities. Students synthesize prior learning with public health theory and public health nursing core functions. Using an ecological model, students address population level concerns such as emergency preparedness (bioterror, disease outbreaks, and natural disasters), disease surveillance, and health promotion/disease prevention services. (Prerequisites: NS 323, NS 325; pre- or co-requisite: NS 314, NS 321; prerequisites for RNs: NS 250, NS 252, NS 310) Four credits (28 theory, 48 clinical hours).

NS 332 Transition: Professional Nursing Practice
This capstone course addresses health promotion, maintenance, and restoration with clients in a variety of healthcare settings. Students are placed in selected healthcare settings in which they can practice under the supervision of a staff nurse preceptor. The course focuses on moving students toward autonomous professional nursing practice within their clinical setting. Functional health patterns provide the framework for giving care. The course explores nursing theories for their relevance and utility to nursing practice, and students apply leadership principles in coordinating care for groups of clients. The course emphasizes decision-making, collaboration, autonomy, and outcome evaluation and includes weekly conferences to discuss professional, clinical, and health policy issues. (Prerequisite: NS 323, NS 325; pre- or co-requisites: NS 314, NS 321, NS 330) Four credits (168 clinical hours).
NS 356  **Transition Seminar:**
**Professional Nursing Practice for RNs**
This course for registered nurses challenges students to facilitate change in a clinical setting for the purpose of positively influencing patient care in health promotion, health maintenance, and/or health restoration. Through clinical experiences and the implementation of an individually-designed project, students further develop their critical thinking and communication skills, demonstrate the application of research, leadership, management, education and therapeutic nursing principles, and make the transition to a more autonomous, professional level of practice. (Prerequisites: Connecticut RN license, NS 310; pre-or co-requisite: NS 321, NS 330) Three credits (21 seminar, 63 clinical hours).

NS 360  **Critical Care Nursing**
This course introduces critical care nursing, focusing on nursing diagnosis and management of patients with cardiovascular, pulmonary, gastrointestinal, renal, neurological, and multisystem alterations. The course covers frequently used medications and basic EKG interpretation. (Prerequisite: NS 325.) Three credits (42 theory hours).

NS 397  **Nursing Study Abroad**
This independent study course provides students with the opportunity to study healthcare and professional nursing in an international setting. Qualified students study abroad at a University affiliated program site. The course focuses on historical events that shaped the healthcare system, policy making and implementation, the impact of health services on consumers and providers, factors leading to current reforms, and the changing role of the nurse. (Prerequisite: permission of advisor and dean) One to three credits (by special arrangement).

NS 399  **Nursing Independent Study**
Through individually designed projects or activities, students work with a faculty member to study a specific area in depth. (Prerequisite: permission of the instructor and dean) One to six credits.
University
College
A Message to Students

At University College, you’ll find faculty and staff dedicated to helping you meet your educational needs. We believe in providing a variety of learning opportunities for students within a caring environment. This belief is rooted in the Jesuit tradition of cura personalis, which is Latin for “care for the person,” a hallmark of Jesuit education.

Lifelong learning is also embedded in the Jesuit tradition. St. Ignatius of Loyola, the founder of Jesuit education, was himself a returning student. Ignatius began his university studies at age 35, without any financial aid, attending four colleges over the course of nine years before earning his degree. He demonstrated his commitment to lifelong learning by walking from Barcelona to Paris so he could study at the best university of his time. Ignatius realized that it is never too late for learning.

Nearly 500 years later, you, too, can continue in the footsteps of Ignatius. Take the first step to continuing your studies by meeting with a University College advisor. Learn how you can access resources and become self-directed in your learning pursuits. We pride ourselves in having superb faculty who care about students, and our faculty-student interaction is the most precious relationship on our campus. Faculty members are committed to working with you to develop your talents to their fullest. As a University College student, you’ll learn new ways to develop your intellectual life and broaden your global perspectives. Take advantage of the quality, excellence, and reputation of Fairfield University. It’s all within your reach.

University College is your gateway to Fairfield University and to your future. Your Fairfield education will enhance your life and work beyond your expectations.

Sincerely,

Dr. Edna Farace Wilson
Dean, University College
Associate Vice President, Global Relationships and Community Engagement
Bachelor of Arts/Bachelor of Science Degree Completion Programs

Fairfield University offers both traditional and online degree completion for students looking for flexibility and convenience from a comprehensive university. This degree is designed for:

- Adults who are returning to college to finish what they started
- Community college students seeking a bachelor's degree
- Working students who are looking to advance their career with a respected degree from an accredited university
- Students who need to complete their degree to advance to a graduate program

Fairfield University individualizes educational plans to help students achieve their goals. University College's advisors work with students to help them map out a baccalaureate curriculum. Previous experience is evaluated: up to 75 credits may be transferred in from accredited colleges and universities, and credit is also granted through CLEP exams and/or portfolio credits for life/work experience. University College offers classes in online formats as well as accelerated and traditional programs.

The B.A./B.S. Degree-Completion Program offers several concentrations; this allows students to design a program to meet their professional and personal needs. Concentrations include:

- behavioral science
- information technology
- liberal studies
- organizational leadership
- professional communication

Jesuit Education

Jesuit education focuses on the formation of the whole person and a vision of a graduate who is one of competence, conscience, and compassion. Professors strive to gain an awareness and understanding of students' own reality as well as the circumstances of their world. They provide students with experiences that engage them — emotionally and affectively — by appealing to their imagination, creativity, and senses. Upon the acquisition of knowledge, students are encouraged to make the truth their own, take a stand, make a judgment, and/or take some action.

LIBERAL STUDIES CONCENTRATION

Requirements:
Earn a B.A. by choosing courses from the humanities and social and behavioral sciences. Earn a B.S. by choosing courses from mathematics and science and professional studies.

Complete 120 credits with a minimum of 45 credits at University College.

- Meet the requirements of the University core curriculum.
- Complete GS 300 Special Topics
- Complete GS 399 Independent Research Project
- Complete eight upper-level courses from at least two of the areas below to concentrate your studies.
  - No more than four courses can be taken in any one subject.

Areas of Concentration and Subjects

**The Humanities**
Applied Ethics, Classics, Communication, English, History, Modern Languages, Philosophy, Religious Studies, Visual and Performing Arts

**Social and Behavioral Sciences**
Anthropology, Economics, Geography, Politics, Psychology, Sociology

**Mathematics and Science**
Biology, Chemistry, Mathematics, Physics

**Professional Studies**
Accounting, Information Systems, Engineering, Finance, Management, Marketing, Nursing

MK 241 Internet Marketing
MK 331 Media Strategy
GS 300 Special Topics
GS 399 Independent Research Project

Note: Each of these courses has specific prerequisites.

Course Descriptions

GS 11 Introduction to Adult Learning and Development
This course examines major adult learning and development theories and their implications for university study. Designed for adults returning to college or beginning a course of study for the first time, the course helps students gain an understanding of their personal cognitive style and how it applies to adult learning. Students establish learning objectives and address the components of a liberal arts education through research and written assignments. Three credits.

GS 299 Independent Study
Independent study provides students with the opportunity for supervised research and study. Advanced students work individually with a faculty member to address a specific area of interest. Three credits.

GS 300 Special Topics
This required course for all students earning a B.A. or B.S. degree through University College is typically taken during the final semester. The course synthesizes and integrates students' multidisciplinary studies. Students complete a project or thesis under the direction of a faculty member after first discussing the proposed project with an academic advisor and the faculty member. The course requires a written paper reflecting the various disciplines studied. Three credits.
Core Curriculum
The core curriculum is designed to engage students in understanding the value of a liberal arts education and to develop the critical thinking and problem-solving skills that enhance every aspect of lifetime learning.

Bachelor’s Degree
Students who matriculate in University College must complete a minimum of 120 credits with a QPA of 2.0 or better. Of these, 60 must be Fairfield University credits (or 45 credits if the student has enrolled in the University College Degree-Completion Program). The distribution of the 120 to 123 credits (40 to 41 courses) required for the bachelor’s degree is listed below.

I. CORE AREAS
   Humanities (36 credits)
   Twelve courses as follows:
   - English: Two courses (one in composition; one in literature)
   - History: Two courses (one must be HI 30)
   - Philosophy: One course
   - Religious Studies: One course
   - Philosophy/Religious Studies/Applied Ethics: One course chosen from any of these three disciplines
   - Visual and Performing Arts: Two courses, one of which may be a studio course
   - Humanities: Three courses

   Social Sciences (12 credits)
   Four courses from at least two of the following disciplines:
   - Anthropology
   - Economics
   - Politics
   - Psychology
   - Sociology
   **Business majors must take EC 11 and EC 12

   Natural Sciences and Mathematics (12 credits)
   Four courses, including at least one science and one mathematics course from:
   - Biology
   - Chemistry
   - Physics
   - Mathematics
   Note: specific math and science courses are required for certain majors

II. MAJOR (10 to 16 courses)

III. FREE ELECTIVES (4 to 10 courses)
Diversity requirement: All students must complete one U.S. and one world diversity course selected from the published list on pages 34-35.

Evening B.A. and B.S. Degree Programs
In addition to the Degree Completion Program with a variety of concentrations, University College offers the following evening degrees:

Bachelor of Arts
   Communication

Bachelor of Science
   Accounting
   Marketing

Note: Except for the core curriculum, students follow the same degree requirements listed in this catalog under the applicable academic departments. Students must complete 60 credits including their last 30 credits at Fairfield University for a bachelor's degree in these areas.

Part-Time Studies
A significant number of University College students enroll in courses with no intent of degree completion. These students may be seeking advanced knowledge in particular areas or seeking to advance their careers.

Those wishing to learn for personal fulfillment may also enroll online for day and evening courses through University College.

Associate of Arts Degree
This degree constitutes the foundation for a bachelor’s degree. Of the 60 credits required, 30 must be completed at Fairfield University. The Associate’s degree at Fairfield is viewed as recognition of achievement and not as a terminal degree. To earn an A.A., students must maintain a grade point average of 2.0 or better and complete the following curriculum:

Humanities (24 credits)
Eight courses including:
- English: one composition course, one literature course
- Visual and Performing Arts: one course
- History: HI 30 Europe and the World in Transition
- Philosophy: one course
- Religious Studies: one course
- Humanities: two courses

Social Science (9 credits)
Three courses selected from at least two of the following disciplines:
- Anthropology
- Economics
- Politics
- Psychology
- Sociology
MBA Preparation
EC 11  Introduction to Microeconomics
EC 12  Introduction to Macroeconomics
MA 17  Introduction to Probability and Statistics
MA 19  Introduction to Calculus

Marketing Certificate
MK 101  Principles of Marketing
MK 212  Consumer Behavior
MK 231  Advertising and Promotion
MK 311  Strategic Market Planning

Professional Writing
EN 11  Composition and Prose
EN 12  Introduction to Literature

Choose four of the following: (12 credits)
ENW 200  Creative Writing
ENW 205  Creative Writing: Fiction I
ENW 220  News Writing
ENW 295  Advanced Composition
ENW 305  Creative Writing: Fiction II
ENW 309  Topics and Techniques for Women Writers
ENW 310  Writing the Feature Story
ENW 332  Business Writing
ENW 335  Technical Writing
ENW 347  Independent Writing Project

Professional Development
The professional development certificate programs are designed for those seeking the basic knowledge and skills required for an entry level position in a special field, whether or not they are currently employed in the field, and for those who are currently employed and are seeking additional knowledge to enhance their careers. Certificates include:

- Interior Design
- Interior Decorating
- Society for Human Resource Management Learning System
- Certified Financial Planning
- Emergency Medical Technician
- Leadership Development

For more information, call (203) 254-4307 or visit www.fairfield.edu/uc_profdevelopment.

Natural Sciences and Mathematics (9 credits)
Three courses including at least one mathematics and one science course selected from:
- Biology
- Chemistry
- Mathematics
- Physics

Electives
- six courses (18 credits)

All classes must be lower-division courses (numbered 200 or lower). At least two courses must meet the University’s diversity requirement (see page 36), and students must complete a minimum of 30 credits at Fairfield University.

Students whose long-range goals include earning a bachelor’s degree are encouraged to complete prerequisite courses for their chosen majors and must complete a minimum of 60 credits at Fairfield University (45 credits for the B.A./B.S. Degree-Completion Program).

Post-Baccalaureate Certificates
Undergraduate Accounting
AC 11  Introduction to Financial Accounting
AC 12  Introduction to Management Accounting
AC 203  Intermediate Accounting I
AC 204  Intermediate Accounting II
AC 310  Advanced Accounting
AC 320  Cost Management
AC 330  Auditing
AC 343  Federal Income Taxation I

Business Processes
AC 11  Introduction to Financial Accounting
AC 12  Introduction to Management Accounting
IS 100  Introduction to Information Systems
AE 291  Business Ethics

OR
BU 211  Legal Environment of Business
Arts and Culture

University College offers a variety of ways for adults to expand their knowledge of the arts and culture. These include:

- Open VISIONS Forum
- MFA Distinguished Author Series
- Manhattan Art Tours
- Art Lectures
- Community Cultural Engagement Programs
- Cultural Trips Abroad
- Language Immersion Weekends
- Interior Decorating and Design Programs

Learning for a Lifetime

The Institute for Retired Professionals is an association of lifelong learners who participate in broadly based monthly symposia, audit a wide range of University courses, and attend special-interest programs. Members have the privilege of auditing one or two select undergraduate courses each semester. The current membership of $222 (spouse $199) per semester covers the cost of instruction and materials exclusive of textbooks. For more information, contact (203) 254-4110.

Au Pair Program

University College has a special arrangement with several Au Pair organizations. Earn your required six auditing credits through us. You may either audit one course for two semesters at $275 each or audit both courses in one semester for $550. Au Pairs do not earn grades but enjoy the benefits of a full semester undergraduate course. Au Pairs may take evening, daytime, or weekend courses. For more information, contact (203) 254-4110.

Study Abroad Program

University College administers all Fairfield University Study Abroad programs. An international learning experience has become an invaluable part of a complete undergraduate education. University College provides many opportunities for study abroad and assistance in navigating the wide array of international study choices. Students from other colleges and universities are welcome to participate in Fairfield University’s study abroad programs. See page 39 for full information.

Scholarships

**Alpha Sigma Lambda Scholarship:** The William F. Murphy Award is available to matriculated adult undergraduate students with a quality point average (QPA) of 2.0 or better. Sponsored by Alpha Sigma Lambda and named after the first dean of the School of Continuing Education (University College’s previous name), this scholarship is awarded on the basis of need. Deadlines: Aug. 20 and Dec. 15.

**The Albert M. Loch Scholarship** is available to matriculated adult undergraduate students with a QPA of 2.8 or better. Sponsored by the association of lifelong learners, this scholarship is awarded on the basis of need. Deadline: Nov. 15.

Lifetime Learning Tax Credits

You may be eligible for a lifetime-learning tax credit, which can come in the following ways. Please consult IRS tax publications or an accountant to determine your qualifications.

**Hope Scholarship**
- Credits up to $1,500 per eligible student
- To be eligible, you must be pursuing a degree or other recognized educational credential.

**Lifetime Learning Credit**
- Credits up to $1,000 per tax return
- In this case, you do not need to be pursuing a degree or other recognized educational credential.

Loans

SLM Financial Corporation, a Sallie Mae company, offers loans to students in certificate programs at a reasonable rate.
Overview

University College Policies and Procedures

Application
New students are required to complete a brief application prior to or at the time of enrolling in courses.

Matriculation
Matriculation is official enrollment in a degree program. Until such time as they matriculate, students are classified as special status students. After completing four courses at Fairfield University with a minimum 2.0 quality point average and a grade of C or higher in each course, students are qualified to apply for matriculation.

To matriculate, students must complete the application and immunization forms, send all transcripts to University College, and submit a $55 matriculation fee.

Students who speak English as a second language may be required to take a TOEFL examination and will be required to attain a minimum score of 550 on the paper exam or a score of 213 on the computerized version for matriculation.

Matriculating and declaring a major as soon as these requirements are met is desirable for the following reasons:

- Academic requirements for the major will be fixed at the time of matriculation. If those requirements are changed at a later date by the University, students have the option of fulfilling the requirements in effect at the time of their matriculation.
- Upon matriculation, credits from other academic institutions will be reviewed and accepted if they meet University standards. Transfer credits should be less than 10 years old at the time of matriculation. Transfer credits earned more than 10 years prior to matriculation can only be transferred into the B.A./B.S. professional studies degree.
- After declaring a major, students receive information about special course offerings in their area of study from University College.
- Matriculated students are eligible to apply for financial aid. Students who seek and are approved for provisional matriculation status are also eligible to apply for financial aid.
- Matriculated students are eligible to apply for the two University College scholarships.
- Matriculated students are eligible for independent study courses and for receiving credit for life-experience learning.

Prior to matriculation, students should meet with a University College advisor to discuss courses and a plan of study leading to a degree.

Provisional Matriculation
Provisional matriculation is available to students who plan to enroll in a degree program in University College, but who have not yet completed four courses. This status enables students to apply for financial aid or provide immediate proof to their employers of enrollment in a degree program. To provisionally matriculate, students submit a completed Matriculation form, proof of immunization, official transcripts from high schools and colleges attended, and a $55 fee.

Request to Change Schools (part-time to full-time)
Part-time students who wish to enroll in a full-time, day program at Fairfield University must first have matriculated within University College and have completed at least two semesters of study (excluding intersession) in University College. A Request for Change of School form may then be submitted to the associate dean’s office in University College. Upon approval, the student’s file will be sent to the dean of the appropriate school, who will review the student’s request for admission.

Request to Change Schools (full-time to part-time)
Students who wish to change from full-time status to part-time status and transfer to University College must fulfill the following requirements:

- The student must formally request to change schools by filling out a Change of School Form in the appropriate Dean’s Office.
- The student must meet with his/her academic dean in order for the Change of School Form to be processed.
- Eligibility for the following areas may be impacted once the student becomes part-time and should be discussed further with the appropriate office.
  - On-campus Housing
  - Financial Aid
  - Health Insurance
  - Student Life and Activities
  - Honors Societies and Senior Awards
- The deadline to switch to University College during any given semester is the last day of the Drop/Add Period as outlined in the academic calendar.

A graduating senior may transfer to University College and complete his/her final semester as a part-time student if he/she has less than 12 credits remaining. The policy and deadline as outlined above must be adhered to.

Transfer Credit Policy
Refer to page 27.
ACE Credit
The University accepts the evaluations of the American Council on Education and grants credits for programs comparable to its curriculum.

Renewal Policy for Adult Learners
Fairfield University students who have not enrolled in credit courses at any college or university for a period of five years, who return to the University through University College, and who have successfully completed 12 consecutive credit hours with a grade of C or higher in each course may write to the dean requesting a transcript renewal. Students must submit the request within one semester of successful completion of 12 credit hours. Should the request be granted, the earlier academic record from Fairfield University will be evaluated in the same manner as a transfer record. Grades for courses lower than C will be annotated and the cumulative GPA will be adjusted accordingly. This request may be made only once by a student. Any student receiving the renewal may not transfer to any other school within the University without the written permission of the dean of the receiving school.

College Equivalency Exams
Credit may be granted for specific college-level learning gained through self-education or non-collegiate-sponsored instruction. Fairfield University is a participating institution in accepting approved CLEP (College Level Examination Program) and Excelsior examinations for credit. Both of these standardized examination programs are designed to let students demonstrate proficiency in various college-level subjects. The Excelsior examinations are generally taken by nursing students. An advisor should be consulted about applicable examinations prior to taking any CLEP or Excelsior exams.

Portfolio Credit for Life Experience Learning
Matriculated students may choose the portfolio assessment process as a means of receiving credit for non-collegiate sponsored learning or life experience where there are no CLEP or Excelsior examinations. An evaluation process of the documented learning is necessary. Portfolios must be submitted to the dean’s office a minimum of one semester prior to the anticipated graduation date. Contact a University College advisor for complete information.
Admission
Tuition, Fees,
and Financial Aid
Admission

Fairfield University admits without discrimination students of any sex, race, color, marital status, sexual orientation, religion, national or ethnic origin, or handicap to all the rights, privileges, programs, and activities generally accorded or made available to students of the University.

Freshman Admission

Typically, freshman students are admitted in September only. Applicants should have received a high school diploma from a recognized high school or preparatory school and should have acquired no less than 15 units in college-preparatory studies. The unit is commonly understood as a measure of credit assigned for the successful completion of a high school course that meets four or five times each week throughout the year; college-preparatory units are those usually found in the high school curriculum that explicitly prepare students for college. No vocational, commercial, or industrial units are considered to be preparatory to the work of the liberal arts college. Candidates for admission must take units chosen from the following areas.

BASIC REQUIREMENTS

<table>
<thead>
<tr>
<th>Subject</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>English</td>
<td>4</td>
</tr>
<tr>
<td>Mathematics (may include)</td>
<td>3 to 4</td>
</tr>
<tr>
<td>• Algebra 1</td>
<td></td>
</tr>
<tr>
<td>• Algebra 2</td>
<td></td>
</tr>
<tr>
<td>• Geometry</td>

<td>3 to 4</td>
</tr>
</tbody>
</table>

Candidates interested in mathematics, engineering, business, and the sciences are urged to pursue a fourth unit of lab science and mathematics, preferably pre-calculus or calculus. Candidates for nursing must have one laboratory course in chemistry.

In addition to the basic requirements, applicants must present evidence to indicate interest in and competence for college studies. To that end they must submit a complete record of high school studies, together with other supporting materials as described in the admission application form. All applicants are also required to take the College Board SAT I or the American College Testing Program Assessment.

The deadline for regular decision applicants to have all application materials (application, high school transcript, SAT I or ACT scores, and recommendation) postmarked is Jan. 15. The University also strongly recommends a campus visit including a tour, information sessions, and/or an optional personal interview.

Students who speak English as a second language should take the Test of English as a Foreign Language (TOEFL) if they have resided in the United States for fewer than five years. The University may, at its discretion, admit students who do not meet the regular published entrance requirements.

Early Action Admission

Students who consider Fairfield University to be among their top choices for their undergraduate education and who would like to have their application reviewed early may submit it under our Early Action Program. Applicants for Early Action must submit all application materials, including the Common Application, Fairfield University Supplement, high school transcript, SAT or ACT scores, and recommendation by Nov. 15. Early Action candidates who are interested in arranging a campus interview should be sure to make that request before the Nov. 15 deadline. Early Action candidates will be notified of their admission decision before Jan. 1. Early Action admission is non-binding, and students have until May 1 to make their college selection.

Superior students who have completed a four-year high school program at the end of three years may apply for admission to the University.

Academic Scholarships

A small number of academic scholarships are available to outstanding students. Scholarships are awarded to students who apply under both the Early Action and Regular Decision guidelines.
Wait List
Freshman applicants to Fairfield will receive one of three decision letters: admit, deny, or wait list offer. Wait list students who are serious in their intent to remain on the wait list are asked to return a card indicating their interest.

Alumni Relatives
One of the strongest endorsements an educational institution can receive is to have alumni send their children to their alma mater. At Fairfield we believe that such candidates can contribute significantly to enhancing the tradition and the spirit that are an important part of a Fairfield education. In light of this, it is our practice to consider the alumni relations of applicants when reviewing factors for admission.

Transfer Admission –
Admission to Advanced Standing
The University welcomes qualified students for either first or second semester who wish to transfer to Fairfield from other accredited colleges. Students interested in transferring normally have accumulated at least 15 credits and have maintained at least a 2.5 grade point average (the Charles F. Dolan School of Business and the School of Nursing require at least a 2.8 GPA). Please note that the GPA is simply a guideline, and not a guarantee of admission.

Applicants who are current first-semester freshmen may not apply for admission to the spring term. To apply, students must submit, in addition to the required application forms, a high school transcript, SAT or ACT scores, college records, a recommendation form, and a personal statement explaining current academic and/or work activities and reasons for transferring.

Every effort is made to accept transfer credit as a program rather than totaling single course credits so students may be admitted to a specific year at Fairfield, e.g., accepted as a second semester sophomore or first semester junior. The core courses of Fairfield’s program should be met, but appropriate adjustments will be made in individual cases.

Every transfer student is required to complete at least two years of full-time undergraduate study in order to receive a Fairfield University bachelor’s degree. Applications should be directed to the Office of Admission. The application deadline for September admission is May 1; the application deadline for January admission is Nov. 15.

International Students
Matriculating international students must attend Fairfield University on a full-time basis (minimum of 12 credits per semester). Degree-seeking (freshman or transfer) students should contact the Office of Admission.

To be eligible to attend Fairfield the student must:

1. Provide a complete and certified listing of all academic institutions attended, including dates of entry, grades, termination, and title of the certificate or diploma received. Include rank in class if available. These documents should be prepared in English or with an official English translation.

2. Demonstrate proficiency in the English language. A minimum score of 550 (paper-based), 213 (computer-based), or 80 (Internet-based) on the Test of English as a Foreign Language is the preferred documentation. Results from the SAT exam may also be submitted.

3. Prove sufficient financial support for the period of the student’s stay at Fairfield, including tuition, room and board, and transportation.

4. Obtain an F-1 student visa (required for entry into the United States for the purpose of studying full-time at Fairfield) after receiving an I-20/DS-2019 from the University. The visa is issued by the U.S. Embassy or Consulate in one’s own country.

Non-matriculated international students may attend Fairfield University for a semester or academic year. All students must be enrolled on a full-time basis (minimum of 12 credits per semester). Such students are accepted into the academic programs at Fairfield and are treated as regular members of the student body. They are usually full-fee-paying students. Visiting international students should contact the Office of International Student Services, (203) 254-4000, ext. 2445.
Tuition and Fees

Application Fee
(This fee is not refundable)

Tuition
(up to 18 credits each semester)
Full-Time Undergraduates $35,510
Payable on or before Aug. 1 for fall semester and Jan. 1 for spring semester. An acceptance deposit (non-refundable and credited toward the semester’s tuition) of $100 is paid on acceptance of the notice of admission.

Resident Student Fees
Residence Halls and Meals $10,850
Townhouse (Room Only) $8,820
Apartment Village (Room Only) $9,100
Payable on or before Aug. 1 and Jan. 1.
Room Deposit $300
Not refundable if reservation is voluntarily canceled. Credited when graduating or leaving the school or University housing.

General Fee, per year $565

Special Fees
Orientation $230
Science Laboratory Fee (per course) $50
Language Laboratory Fee (per course) $50
Fine Arts Materials Fee (per course) $45
Computer Science and Information Systems courses (per credit) $15
Practice Teaching $20
Extra course (per credit hour) $1,000
Continuous Registration for Educational Leave (per semester) $200
Change of Single Course $10
Late Registration ($10 per course) $50
Automobile Registration Fee $60
Returned Check Fee $30
Commencement $150
Academic Transcript $4

Nursing student costs:
Two uniforms and equipment (estimated) $150
Student malpractice insurance $20
ERI Total Testing Fee (per semester) $65
Nursing pin (estimated) $100

Transportation to clinical experience is the responsibility of the student.

The trustees of the University reserve the right to change tuition rates and to make additional charges whenever they believe it to be necessary.

All checks are to be made payable to Fairfield University. The University reserves the right to make a finance charge computed by a periodic rate of 1 percent per month which is an annual rate of 12 percent on amounts past due 30 days or more and to add all costs of collection, including a reasonable sum for attorneys fees, or charge a one-time $50 late fee per semester.

International students who are admitted must make known to the University the source of their financial support for their college education. They will be expected to make a deposit before a certificate of eligibility (I-20) is issued.

The University makes available a monthly payment plan as well as federal, state, and private loan programs. Brochures on the payment plan and the loan programs are available to all students. Please contact the Office of the Bursar for additional information.

No degree will be conferred and no transcripts will be issued until all financial obligations to the University have been met.

Institutional Refund Policy
Refunds, as the result of official withdrawal through the University Registrar’s Office, will be made according to the following schedule. General and special fees are not refundable.

Financial Aid

Financial Aid Policy
Fairfield University administers a comprehensive financial aid program offering assistance on the basis of need and merit, with funds derived from University, state and federal government, and private student-aid programs. Need-based funds are distributed following a thorough analysis of a family's ability to pay for educational expenses. The amount of need-based assistance provided to a student will vary from year to year depending on the student's need and the availability of funds. Merit-based awards are made to academically talented students as entering freshmen and are generally renewed for their remaining three years of enrollment. Assistance funded by the University is credited toward tuition unless otherwise indicated. Renewal of any type of assistance is contingent on the recipient making satisfactory academic progress and by filing the Federal aid application on time every year.

Students who demonstrate need will receive an assistance package that may consist of grants, scholarships, student employment, and student loans. Although the University invests a significant amount of its own resources in its student aid programs, funds are limited; and it is usually not possible to meet a student's full need. In those instances where a family needs additional resources, the University will recommend a payment plan and a number of loan options.

Financial aid awards are usually made to prospective freshmen during the first week of April, assuming the appropriate applications have been filed on time. Upper-class students who apply for financial aid will receive their award notifications approximately mid-March via their StagWeb email account.

Staff members in the Office of Financial Aid are available throughout the year to answer questions and to provide assistance. The Office of Financial Aid is located at the Kelley Center, and may be reached by phone at (203) 254-4125 or by email at finaid@mail.fairfield.edu.

Application Procedures
To apply for financial aid, all new students must complete the Free Application for Federal Student Aid and the CSS Profile Form and must submit the forms to their respective processing centers by University deadlines. Fairfield’s FAFSA code is 001385 and the CSS Profile code is 3390. Prospective freshmen are required to complete the FAFSA and CSS Profile Form by Feb. 15; upper-class students by March 1, and transfer students must apply by May 1.

Students may file the FAFSA online at www.fafsa.ed.gov. See the CSS Profile at www.collegeboard.com.

All first-time applicants must also submit complete, signed copies of their own and their parents' federal income tax returns from the preceding calendar year to the Office of Financial Aid by March 1. Other forms and documents may be requested of applicants depending on individual circumstances. Additional documents and tax returns are required for upper-class students as indicated on StagWeb.

Early action candidates must complete the Profile Form and submit it for processing by Nov. 15. You may register and file the CSS Profile online at: www.collegeboard.com. Early action candidates should submit the Profile registration form by Nov. 1 to ensure that the CSS Profile Form is available for processing by Nov. 15. Early Action students will receive a tentative award decision by February. To finalize the award, students must file the FAFSA by Feb. 15 and must submit signed copies of their and their parent’s Federal tax returns, Schedules and W-2’s by March 1.

Renewal
Need-based awards of University grants and scholarships will be renewed provided that the recipient reapplies for aid by University deadlines and continues to demonstrate sufficient need. Need-based awards may be increased or reduced depending on changes in a student’s need. Renewal of awards of state and federal funds will depend on a student’s continued eligibility and on the availability of funds.

Merit-based awards will be renewed at the same amount received as an entering freshman. Merit awards are not available to transfer students or to upper-class students who did not receive a merit award as a freshman. Renewal of any type of award is contingent on a student making satisfactory academic progress. Merit awards have minimum grade point average requirements for renewal.

Academic Eligibility
For students to be eligible for financial aid, they must be in good academic standing and must make satisfactory academic progress toward a degree. Students are placed on academic probation when their GPA falls below minimum standards established by the University. (Specific requirements for good academic standing are described elsewhere in this catalog.) Students placed on academic probation are considered eligible for aid. However, consecutive terms of probation may result in dismissal, at which time aid eligibility would be suspended.

For the purposes of financial aid eligibility, satisfactory academic progress is defined as the successful completion of a minimum of 67 percent of the credit hours attempted. For merit awards, students must meet the additional criteria of a specified cumulative GPA. Students who fail to successfully meet these
requirements will not be eligible for any form of financial assistance until additional coursework is completed, and the minimum GPA or completion of credit hours is attained. All students who have received aid and who have attempted at least 60 credit hours must maintain a 2.0 GPA. Students who lack the required GPA to renew a merit scholarship will be given only one semester to achieve the specified GPA.

Students who lose eligibility for financial aid as a result of academic deficiencies and later re-establish eligibility are not guaranteed reinstatement of the same amount or type of assistance received previously. In those instances, eligibility for aid will be dependent on a variety of factors including demonstrated need, the timeliness of the application for financial aid, and the availability of funds.

The University realizes that individual circumstances may affect a student’s academic performance. Students who have not met the academic requirements for continued financial aid eligibility may make an appeal for reinstatement if mitigating circumstances exist. Appeals should be addressed to the Office of Financial Aid, Kelley Center.

Estimate of Expenses
The student cost of attendance used in determining financial aid eligibility includes direct charges from the University as well as other expenses incurred by a student during the course of the academic year. The cost of attendance for a full-time resident student, for the 2008-09 academic year, is as follows:

- Tuition and Fees: $35,510
- General Fee: 565
- Room and Board Allowance: 10,850
- Books and Supplies: 500
- Personal Expenses: 900
- Transportation: 1,000
- Total Residential Budget: $49,325

Academic Withdrawal
Those who are asked to withdraw from the University for academic failure will lose all entitlement to financial aid.

Financial Aid Available
The following listing provides a brief description and general award ranges of the financial aid programs available at Fairfield University.

Scholarships
All students who apply for admission to Fairfield University are automatically considered for a merit scholarship. The exact academic criteria for awarding scholarship will vary from year to year, depending on the size and quality of the application pool. All scholarships are renewable, providing students maintain a GPA of 3.0. For further details about the merit scholarships available to incoming students, please consult the University website, www.fairfield.edu.

Fairfield University Grant
In addition to scholarships, a number of need-based grants are awarded by the University. Amount and availability of each grant is dependent upon the current status of revenues from which they are drawn. Demonstrated financial need, as well as academic performance and potential, are the criteria used in determining the awards. Fairfield University provided $29 million of its own resources in 2007-08 for financial aid. Most scholarships and grants-in-aid are packaged with other types of federal or state aid.

Federal Grants
Federal Pell Grants
A federal entitlement program that provides grants of up to $4,731 to eligible students who are pursuing their first baccalaureate degree.

Federal Supplemental Educational Opportunity Grants
Grants from federal funds are made available to students who demonstrate exceptional financial need. Funding for the program is very limited. Priority is given to Federal Pell Grant recipients.

Academic Competitiveness Grants
First-year undergraduates: (up to $750) must be U.S. citizens, Pell-eligible, full-time from high school after 1/1/06, and who attended a high school whose program the Secretary has deemed rigorous.

Second-year undergraduates: (up to $1,300) must have graduate from high school after 1/1/05, meet the above criteria, and have a 3.0 GPA after the freshman year.

National Smarts Grants for third- and fourth-year undergraduates: (up to $4,000) must be majors in math, science, technology, or certain foreign languages who retain a 3.0 in their major. Limited to U.S. citizens who are Pell-eligible and are full-time students. For a transfer student, a 3.0 cumulative GPA is required.

State Scholarships and Grants
All financial aid applicants are expected to investigate the opportunities that exist in their home state for direct scholarships or grants. Students should contact their state board or commission for higher education or see their high school guidance counselor for information.
Loans

**Federal Perkins Loans**
A campus-based federal loan program for students with exceptional need. Recipients are selected by the University. No payments of principal or interest are required until after the borrower completes his or her education, at which time repayment at 5 percent interest is assessed. Repayment may extend up to 10 years, depending on the amount borrowed. Funding for the program is very limited and is usually reserved for the freshmen class.

**Federal Nursing Loans**
A campus-based federal loan program for nursing majors with need. Recipients are selected by the University. No payments of principal or interest are required until after the borrower changes majors or completes his or her nursing degree, at which time repayment at 5 percent interest is assessed. Repayment may extend up to 10 years, depending on the amount borrowed. Funding for the program is very limited.

**Federal Stafford Loan Program**
Loans may be obtained from any participating lender. Up to $3,500 per academic year for freshmen, $4,500 per academic year for sophomore-level students, or $5,500 per academic year for junior- and senior-level students may be borrowed. Repayment begins six months after graduation at which time interest is assessed. Families must file a FAFSA before a Federal Stafford Loan can be processed. The FAFSA will determine if the student is eligible for a subsidized loan (government pays interest while student is enrolled) or unsubsidized loan (student pays or allows interest to accrue while enrolled full-time). To apply online, visit: www.salliemae.com/fairfield/.

**Federal Parent Loan Program**
A program of loans to parents of dependent undergraduate students. Through a bank, a parent may borrow up to the cost of education minus any financial aid received during any one academic year. Repayment begins 60 days after disbursement of the loan at a variable rate of interest. To apply online, visit: www.salliemae.com/fairfield/.

**Fairfield University Premier Signature Student Loan**
Fairfield University has partnered with Sallie Mae to provide its students with a comprehensive education loan program. The Premier Signature Student Loan has been designed to help student borrowers obtain the additional funding needed to cover the cost of education when federal loans or other financial aid are not enough. To apply online, visit: www.salliemae.com/fairfield/; or call (800) 695-3317.

**CT Family Education Loan Program**
An alternative loan to assist families with the cost of attending the University. Repayment of interest only begins approximately 60 days after money is disbursed at a fixed rate. Families may borrow from $2,000 to $20,000 per year depending on the cost of the school. For information contact the Connecticut Higher Education Supplemental Loan Authority at (888) 547-8233.

**AMS Payment Plan**
The University has an arrangement with Academic Management Services and offers a 10-payment plan for payment of educational expenses. Please contact the Office of Financial Aid or the Office of the Bursar for further information.

Campus Employment

**Federal Work-Study Program**
Jobs on the campus or off-campus in a community service organization may be arranged for students demonstrating need. Where possible, the work assigned relates to the student’s field of study.

**University Employment**
Students who are not eligible for participation in the Federal Work-Study Program, but who desire extra spending money, may obtain employment in the cafeteria, the bookstore, and several other campus locations.

Scholarships

Through the generosity of individuals, corporations, and foundations, a number of scholarships have been made available to students at the University. These gifts continue the rich tradition of philanthropy that characterizes American life, and it is through the donors’ generosity that Fairfield is able to offer these scholarships. The University is pleased to be a beneficiary of that tradition and commitment.

Students applying for financial aid are considered automatically for the named scholarships listed here, which are administered by the Financial Aid Office in accordance with the wishes of the donors.

**Alumni Association Scholarship**: A need-based scholarship with a preference for the son or daughter of an alumnus/alumna of Fairfield University.

**Alumni Multicultural Scholarship**: A fund established with the proceeds from the annual Alumni Association Awards Dinner to help meet financial needs of minority students.

**Beiersdorf Nursing Scholarship**: An endowed scholarship established in 1986 by Beiersdorf Inc. of Wilton, Conn., the fund assists chemistry majors and offers an internship opportunity.

**Carl and Dorothy Bennett Scholarship**: A fund established by Mr. and Mrs. Carl Bennett to provide annual scholarships for Fairfield University students on a financial need basis.
Financial Aid

Joseph F. ’72 and Gail T. Berardino Scholarship: Established in 2001 by alumni and University Trustee Joseph F. Berardino, this need-based scholarship assists students in the Charles F. Dolan School of Business.

Barbara M. Berchem Memorial Scholarship: An endowed award established in 1988 by University Trustee Robert M. Berchem ’62, to honor the memory of his mother. This scholarship has a preference for a student from Milford, Conn.

James W. and Jean L. Birkenstock Scholarship: This scholarship has been made possible through the estate of James W. Birkenstock, former University trustee. Preference will be given to students who demonstrate financial need.

John and Jane Bohnsack Scholarship: A scholarship fund established in 1985, to be awarded on the basis of financial need and divided equally between a nursing student and a business student.

Salvatore F. Bongiorno Scholarship: Established in 1993 in memory of a long time University faculty member and former chair of the Biology Department, this scholarship assists minority biology majors in their junior or senior years who plan further studies and careers in the life sciences.

Mr. and Mrs. Charles A. Bott Scholarship: Established by Mrs. Charles A. Bott and the late Mr. Bott of Huntingdon Valley, Pa., the fund provides assistance to students with financial need.

John V. Brennan Scholarships: A gift from John V. Brennan, former president of U.S. Underwriters Inc., and parent of Paul F. Brennan ’89, provides scholarships to assist minority students with financial need.

Marina Holder Brewster Memorial Scholarship Fund: Established by Dr. and Mrs. John P. Sachs to provide financial assistance with a preference for nursing students.

Ned John Briggs ’69 Memorial Scholarship: Established in 1989 by the estate of his mother, Kathryn V. Briggs, this endowed scholarship perpetuates the memory of Ned John Briggs, who attended Fairfield in 1965 and 1966. It is awarded on the basis of academic potential and financial need.

Gladys Brooks Foundation Asian Studies Endowed Scholarship: The Gladys Brooks Foundation Scholarship in Asian Studies, a one-year award, recognizes a student who has excelled academically in this program.

Gladys Brooks Foundation Scholarship: Created in 1986 to enhance Fairfield’s ability to attract students of the highest quality. Recipients will be asked to assume a “moral obligation” to support the University after graduation by voluntary service and/or contributions. Criteria for scholarship recipients include secondary school class rank, scholastic aptitude test scores, extracurricular activities, and leadership potential.

Professor Frank F. Bukvic Scholarship: Established in 1997, the scholarship honors the memory of Dr. Bukvic who taught German and German literature in the University’s Modern Languages Department for 35 years. Preference is given to a student with a major or minor in modern languages.

Sophie Burger and Pauline Hagen Scholarship: An endowed scholarship made possible by the generosity of Carl E. Hagen ’65 through the Chipman Union Foundation to provide financial aid assistance with a preference for students in the Charles F. Dolan School of Business.

The Burger King Scholarship: An endowed scholarship established by The Burger King Corp. to provide financial assistance with a preference for minority students.

Anna Cain Scholarship: A fund to support students who demonstrate financial need and strong academic qualifications. Established in 1978, the scholarship is a bequest of the late Anna Cain, an area educator who took many advanced courses at Fairfield.

Louis Calder Foundation Scholarship: The Louis Calder Foundation Scholarship was established in 1988. The Foundation’s initial award was designed as a challenge grant that ultimately encouraged various other donors to create scholarships in support of students with residency in one of New York’s five boroughs. Additionally, these young people must demonstrate academic promise and have significant financial need.

Margaret and Marjorie Campbell Scholarship: A scholarship established to provide financial assistance with a preference for a student whose life has been affected by alcohol or drugs.

Jonathan Neff Cappello ’00 Scholarship: This scholarship, in memory of Jonathan Cappello who died in the World Trade Center tragedy on Sept. 11, 2001, was established by his family and friends. Preference is given to graduates of Garden City High School in New York who have demonstrated need.

Donna Rosanne Carpenter-Sederquest Memorial Scholarship Fund: A need-based scholarship established by family members and friends in memory of Donna Carpenter-Sederquest, who attended Fairfield University. Preference is given to communication arts and English majors in the top 10 percent of their high school classes and who are graduates of Fairfield High School or reside in Fairfield County. The scholarship is dedicated to the perpetuation of the academic, professional, and personal excellence Donna so well embodied.

Alex Rafael Carrion Banco Popular Scholarship: Renamed in 2006 in memory of Fairfield student Alex Rafael Carrion, this scholarship was established in 2004 by Banco Popular to provide financial assistance with a preference for students from Puerto Rico.

Celanese Corporation Minority Scholarship: A fund created by Hoechst Celanese Corp. to provide financial assistance with a preference for minority students from New Jersey who are in the Charles F. Dolan School of Business.
**Financial Aid**

**JP Morgan Chase Scholarship**: An endowed scholarship fund that assists students on the basis of need and academic promise. Current restrictions limit this award, which was established in response to a challenge grant from the Louis P. Calder Foundation, to New York City residents.

**Ciacci-Pascale '65 Scholarship**: A fund established in 1985 in memory of Douglas Ciacci and Joseph Pascale, outstanding members of the Class of 1965. Preference is given to Connecticut student-athletes who have financial need and best demonstrate drive, compassion, courage, and leadership. Principal benefactors include J. Jeffrey Campbell '65 and the Pillsbury Co., in addition to members of the Class of 1965.

**The Ciola Family Scholarship Fund**: A need-based scholarship which provides financial aid with a preference for Catholic students with academic promise.

**Citytrust Scholarship**: An endowed scholarship established in 1985, by Citytrust Bank, to provide financial aid assistance to Fairfield University minority students.

**John A. and Edna Connaughton Scholarship**: An endowed scholarship established in 1986 in memory of Mr. and Mrs. Connaughton by Mrs. Charles A. Bott of Huntingdon Valley, Pa. Preference will be given to students with financial need.

**Connecticut Post Scholarship**: Established by the Post Publishing Co. of Bridgeport, Conn., to provide financial aid assistance with a preference for minority students.

**Dr. Robert F. Conti ’51 Scholarship Fund**: An endowed scholarship established in 1994 to provide financial assistance with a preference for students in the pre-medical program.

**E. Gerald Corrigan Endowed Scholarship Fund**: This fund, established by E. Gerald Corrigan ’63, a member of the Fairfield University Board of Trustees, provides assistance with a preference for first generation or minority or foreign students in good academic standing.

**Arsene Croteau Family Scholarship**: Provides financial assistance with a preference for a student majoring in French. The late Professor Croteau was a long-time member of the Department of Modern Languages and Literatures.

**William Cummings and Brothers Scholarship**: A scholarship fund established by Mary C. Cummings in January 1968. Preference is given to entering freshmen from the town of Fairfield.

**James and Denise Daly Nursing Scholarship**: An endowed fund, created in 1991 by Mr. and Mrs. James J. Daly, to provide financial aid with a preference for nursing students.

**Dennis and Marsha Dammerman Scholarship Fund**: An endowed fund created by Dennis and Marsha Dammerman to provide multicultural scholarships.

**George E. Diffley Scholarship**: Established in 2006 by Fairfield University, this need-based endowment honors former vice president for advancement, who retired in 2006 after 31 years of service to the University.

**Charles and Helen Dolan Scholarship Fund**: An endowed fund established by Mr. and Mrs. Charles F. Dolan ‘86, ’85 to provide financial assistance to students of the Charles F. Dolan School of Business.

**David J. Dolan Memorial Scholarship Fund**: An endowed scholarship established by Mr. and Mrs. Charles F. Dolan, honoring the memories of Mr. Dolan’s father and brother. Income will provide financial aid assistance to Fairfield University students.

**E&F Construction Company Scholarship**: A scholarship funded by the E&F Construction Company to assist students attending Fairfield University.

**Rev. Anthony J. Eiardi, S.J., Scholarship Fund**: A fund created in 1986 by the estate of Dominic R. Eiardi, who left the bequest in honor of his brother, Fr. Eiardi, a retired member of the Fairfield University mathematics department faculty. The fund will provide scholarship opportunities for deserving undergraduate students.

**Fairfield County ISA Endowed Scholarship**: Established by the Fairfield County Instrument Society of America, this scholarship gives preference to engineering students from Fairfield County who have a G.P.A. of 3.0 or greater.

**Fairfield Jesuit Community Scholarship**: An endowed fund established in 1983 by the Fairfield Jesuit Community to provide annual scholarships to Fairfield students on the basis of financial need.

**Helen T. Farrell Scholarship Fund**: A fund created in 1983 from the estate of Helen T. Farrell, who was a Westport, Conn., resident, to provide financial aid to undergraduate students.

**Christiane Felsmann Memorial Scholarship**: An endowed scholarship, established by Maja Dubois, to provide an annual scholarship to a student with demonstrated financial need.

**Mae B. Feracane Scholarship**: Established through a bequest from Mae, who was a secretary in the Psychology Department, to help needy and deserving students.

**Daniel R. Finn, Jr. ’66 Scholarship**: Established in 1988 by Daniel R. Finn, Jr., member of the Class of 1966 and former University trustee, this need-based scholarship provides financial assistance with a preference for AHANA students.

**Professor Thomas J. Fitzpatrick, Sr. Minority Accounting Scholarship**: A fund established by former professor of accounting Thomas J. Fitzpatrick, Sr. to provide financial assistance with a preference for a minority student majoring in accounting in the Charles F. Dolan School of Business.
F.U.S.A. Scholarship: An endowed scholarship established by the Fairfield University Student Association in 1985. Income will provide financial aid assistance to Fairfield University students.

Nelson Fusari Memorial Scholarship Fund: Established by Mr. and Mrs. Albert Fusari in 1981 in memory of their son Nelson, a member of the class of ’83, for the benefit of handicapped students.

John P. Gahan, Jr. Memorial Scholarship: A fund donated by friends of the father of John P. Gahan, Jr. (Class of ’61). John was killed after completing one year of school. Preference is given to graduates of St. Mary’s High School in Manhasset, N.Y.

Dr. Edward E. Garcia ’57 Scholarship Fund: Established by Mr. Ronald F. Borelli ’62, this need-based scholarship honors the memory of Mr. Borelli’s late brother-in-law. Preference is given to students studying in the natural sciences.

Bernard A. Gilhuly Jr. ’52 Scholarship: An endowed scholarship established by this alumnus and former trustee, to be awarded to students with demonstrated need.

John T. Gorman, Jr. ’54 Scholarship: Established by John T. Gorman, Jr. in 1984 to provide undergraduate students with financial aid.

Simon Harak - Fr. John P. Murray, S.J. Glee Club Scholarship: Created in 1976, this endowed scholarship provides annual financial aid assistance to members of the University Glee Club. Preference is given to students who are sons or daughters of Glee Club alumni.

William Randolph Hearst Foundation Scholarship: An endowed scholarship fund established in 1986 by the William Randolph Hearst Foundation to assist Charles F. Dolan School of Business students with financial need.

William Randolph Hearst Foundation Community Partnership Scholarship: Students are selected for this four-year scholarship by the Office of Admissions and Financial Aid based on the criteria established by the Community Partnership Scholarship Program. Students are chosen from a grouping of ten high schools in New York City and Bridgeport.

Cornelius A. Heeney Scholarship: Created by the Brooklyn Benevolent Society, this scholarship assists students who demonstrate financial need, with a preference for residents of Brooklyn.

Jeanne Murphy Hoffman Scholarship: This scholarship was established by Paul J. Hoffman ’72 in 2002 in honor of his mother. Preference is given to high-achieving students with demonstrated need.

Rev. William H. Hohmann, S.J., Memorial Scholarship: A scholarship established by alumni and friends in memory of Fr. Hohmann, who was chairman of the University’s economics department until his retirement. This need-based scholarship will be awarded with preference given to an economics major.

Lorraine Hoxley M’66 Scholarship: Established in memory of Lorraine Hoxley, M.A. ’66, by her husband, Paul Hoxley of Sun City, Ariz. The fund is used to assist needy students.

Rev. Gerald F. Hutchinson, S.J. Scholarship: Inaugurated by an anonymous donor to honor the memory of Fr. Hutchinson, this need-based scholarship provides financial assistance with preference given to a student or students majoring in chemistry.

Frank H. James Memorial Scholarship: A bequest from the estate of Frank H. James, late president of the Hat Corporation of America, established this need-based scholarship to provide financial assistance with a preference for students who are residents of Fairfield County.

Keating Family Scholarship Fund: A need-based, renewable scholarship for undergraduate students, established in 1991 by a bequest from the late Loretta M. Keating.

Aloysius and Teresa Kelley Scholarship: Established by a gift from Carmen A. Tortora on the occasion of the 25th anniversary of the ordination of the Rev. Aloysius P. Kelley, S.J., the proceeds from this fund will be available each year to assist an academically qualified and financially needy student at Fairfield University.

Abbas Khadjavi Memorial Scholarship: A scholarship in honor of Dr. Khadjavi, a member of the Fairfield University faculty who died in 1983. Funded by family and friends, the scholarship provides financial assistance to Fairfield students.

Jeffrey P. Killian Memorial Scholarship: An endowed scholarship established in 2001 by friends and family of Paul and Linda Killian in loving memory of their son, Jeff, from the Class of 1997. Preference is given to a junior in good academic standing who demonstrates financial need and participates in University activities.

Edward F. Kirik Sr. Scholarship: An endowed scholarship established in 1988 by Edward F. Kirik, Sr., who was a longtime friend of Fairfield University. Preference is given to qualified students of Polish-American descent.

Edward F. Kirik Jr. Scholarship: This scholarship benefits a student in the Charles F. Dolan School of Business and is based on demonstrated need and academic achievement. Preference is given to juniors and seniors.

Lt. William Koscher ’67 Memorial Scholarship: Awarded each year to a graduating senior, this scholarship was established by the parents of alumnus William Koscher, who died in a military training accident soon after his graduation.

Vincent A. LaBella ’61 Scholarship: A permanent fund for the benefit of minority students. Established in 1996, the scholarship is a bequest from the late Vincent A. LaBella, a member of the Class of 1961. Mr. LaBella, an attorney and judge, resided in Washington, D.C.
**Lautenbach-Kelley Scholarship Fund:** Established in 2000 by former trustee Ned Lautenbach and his wife, Cindy, in recognition of their friend, former University President Aloysius P. Kelley, S.J.

**Rev. Victor F. Leeber, S.J. Scholarship:** Established in 1992 by friends and family of Fr. Leeber on the occasion of his retirement from the University’s faculty. Preference is given to a student who has a major or minor in Spanish.

**Rev. Victor F. Leeber, S.J. Scholarship:** A second scholarship honoring Fr. Leeber was established in 2000 by William ’67 and Jacqueline Egan. Preference is given to students with demonstrated need who are majoring in a modern language.

**Thomas P. Legen ’78 Memorial Scholarship:** Created in 1994 to provide need-based financial assistance with a preference for a student from Bridgeport, Conn., or the surrounding area. Underwritten by contributions from People’s Bank and Mr. Legen’s friends and associates.

**Lawrence A. Lessing Scholarship:** This endowed scholarship benefits an individual with financial need. It was established in 1990 by Stephen Lessing ’76, and other family members, to honor his father.

**George A. and Grace L. Long Foundation Scholarship:** A scholarship fund given by the George A. and Grace L. Long Foundation for support of nursing students.

**Loyola Chapel Community Scholarship:** Established to provide financial aid assistance with a preference for a member of the junior or senior class at Fairfield University who is active in Campus Ministry.

**Donald S. Lupo Memorial Scholarship:** An endowed scholarship in honor of Donald S. Lupo, a member of the Class of 1962. The fund, established by friends and associates at Merrill Lynch, provides financial aid to students in need.

**Rev. Donald M. Lynch, S.J. Scholarship:** This need-based award was established in 2000 by William ’67 and Jacqueline Egan. Preference is given to students who are majoring in English.

**Roger M. Lynch ’63 Scholarship:** An endowed scholarship, established by Mr. Lynch, to be awarded to a full-time student in the Charles F. Dolan School of Business who has demonstrated financial need, academic initiative, and the capacity to derive the most from his or her talents.

**Richard Magro, Jr. ’81 Scholarship:** Established by Ronald F. ’81 and Newell Carapezzi in memory of their classmate and friend.

**William A. ’80 and Debra Malloy Endowed Scholarship:** Established by alumnus William A. Malloy and his wife Debra in honor of William’s parents, Mr. and Mrs. Donald Malloy, to assist academically qualified students with demonstrated financial need.

**Richard A. Marfurt ’68 Memorial Scholarship:** This endowed scholarship was established in 2003 to honor the memory of Dick Marfurt, Class of 1968, whose friendship, energy and influence was an inspiration to so many. It is awarded on the basis of demonstrated financial need.

**Marketing Corporation of America Business School Scholarship:** An endowment fund created by Marketing Corporation of America, providing scholarship aid to worthy students in the Fairfield University Charles F. Dolan School of Business.

**Rev. Thomas A. McGrath, S.J., Scholarship:** Established in 1986 by John Leverty of Fairfield, Conn., and other friends. Fr. McGrath, who died in 1992, was a longtime professor of psychology, a greatly admired teacher, counselor, and priest. The scholarship is awarded on the basis of need with preference given to a student majoring in psychology.

**Elizabeth DeCamp McInerny Scholarship Fund:** A permanent scholarship established by The Ira W. DeCamp Foundation created under the will of Elizabeth DeCamp McInerny. The fund provides financial assistance with a preference for students engaged in undergraduate study relating to the health sciences.

**Edward F. McPadden Memorial Scholarship:** A scholarship fund created by Anabel McPadden Davey in honor of her brother.

**James and Margaret McQuaid Scholarship:** This scholarship was established in 2000 by Joseph DiMenna ’80, a member of Fairfield University’s Board of Trustees. The need-based scholarship underwrites one full tuition with preference given to a student studying in the liberal arts or fine arts.

**John C. Meditz ’70 Scholarship:** This endowed scholarship was created by alumnus John C. Meditz and his mother, the late Clara Meditz. Established in response to a challenge grant from the Louis P. Calder Foundation, the scholarship requires residency in one of New York’s five boroughs.

**Merrill Lynch & Co. Foundation Inc. Scholarship:** An endowed scholarship established by Merrill Lynch & Co. Foundation Inc. to provide financial support with a preference for minority students.

**Merritt 7 Corporate Park Scholarship:** An endowed scholarship funded by the First Merritt Seven Corp. to provide financial assistance to Fairfield students.

**Charles J. Merritt Jr. and Virginia B. Merritt Scholarship Fund:** Established from the estate of Virginia B. Merritt in 1998, this scholarship fund provides financial assistance with a preference for students who exhibit high academic performance or promise. Mrs. Merritt served as personal secretary to three Fairfield University presidents.
Elizabeth K. Murphy Scholarship: This scholarship was established by Robert J. Murphy Jr. ’71 in memory of his mother. The Financial Aid Office and Student Services Division jointly select a recipient who has distinguished himself or herself in the service of fellow students.

Jamie and Laura O’Brien Scholarship: A scholarship fund established in 1986 by William O’Brien of Enfield, Conn., James O’Brien of Fairfield, Conn., and Richard O’Brien of Ashland, N.H., and other family members and friends, to honor two young retarded members of the O’Brien family. Preference is given to students who have financial need, are academically qualified for Fairfield University, and who are immediate members of a family with a retarded child.

Teisha Capozzi O’Leary ’87 Scholarship: Established in 1991 by her husband and family to honor the memory of this 1987 alumna. Preference is given to a computer science major, preferably a woman and a graduate of Notre Dame High School in Fairfield, who best exemplifies Teisha’s “funny, loving, and irresistible personality.”

John Roe O’Mealia ’80 Scholarship Fund: This endowed fund, established in memory of John R. O’Mealia ’80 by his family and friends, provides financial assistance with a preference for a student who is a current or prospective hockey player with demonstrated need and a strong sense of character.

O’Meara/Foster Scholarship Fund: Established in 1996 by B. Maxwell O’Meara ’52 in memory of his mother, Margarette F. O’Meara, and aunt, Grace M. Foster, to benefit a student with demonstrated need and strong academic standing, with a preference for a student matriculating in the College of Arts and Sciences.

Rev. W. Laurence O’Neill, S.J. Scholarships: Established by TransAmerican Natural Gas Corp. in honor of the longtime counselor and dean of students, these awards are made to students who demonstrate financial need. Seventy-five percent of the awards go to Hispanic students with a preference given to Mexican-Americans.

Gia Orlando Memorial Scholarship: A fund established in 1985 by Carl Orlando ’64 in memory of his daughter. Preference is given to a senior or seniors who perform to the best of their abilities academically and who demonstrate a spirit of generosity and unselfish caring reminiscent of Gia Orlando.

Lawrence F. O’Shea ’56 Scholarship: An endowed scholarship, established in 1988 by Mr. O’Shea, to assist students with demonstrated financial need.

Owens Family Scholarship: Through the generosity of Christopher ’77 and Carol Owens, the Owens Family Scholarship has been endowed to assist students demonstrating financial need who are enrolled in the Dolan School of Business. Per the Owens’ request, this scholarship will first give priority to those students who are graduates from the following high schools: Jesuit High School (Sacramento, CA), Trumbull High School (Trumbull, CT), Scecina Memorial High School (Indianapolis, IN), Warren Harding High School (Bridgeport, CT) and Paul Schriber High School (Port Washington, NY).

Howard T. Owens Sr. Scholarship: A need-based scholarship fund created in 1986 by family members and friends of Mr. Owens, who received an honorary doctor of laws degree in 1967 from Fairfield University.

Robert M. Owens Memorial Scholarship Fund: Established in 1998 by the family and friends of the late Mr. Owens. As the University’s attorney for more than 25 years, Mr. Owens was integrally involved in University affairs, and his wisdom and devotion contributed mightily to Fairfield’s evolution. The fund provides scholarship support to a student with demonstrated need.

Pace-Barone Scholarship: This award is a full-tuition scholarship with a preference for a minority student who has graduated from either Bassick or Harding high school in Bridgeport, Conn. It was established in 1987 by Rose Marie Pace Barone, who taught business in Bridgeport high schools for 25 years.

People’s Bank Minority Scholarship: Awarded to minority students from the greater Bridgeport area, this scholarship was established by the bank in 1987.

Elizabeth M. Pfriem Scholarship: A scholarship created in 1989 by Mrs. Pfriem, former president of the Bridgeport Post Publishing Co., to provide financial assistance with a preference for Fairfield University minority students.

J. Gerald Phelan Scholarship: Established by J. Gerald Phelan in 1964 to provide financial assistance.

John G. Phelan Scholarship for Engineering Excellence: This scholarship, established in 2000 by Fletcher-Thompson Inc., in recognition of John G. Phelan, P.E., is awarded to junior or senior engineering majors who have achieved top grade point averages. This competitive scholarship includes the possibility of a summer internship at Fletcher-Thompson Inc. Preference is given to electrical and mechanical engineering students.

Phi Kappa Theta Memorial Fund: A scholarship established in 1980 with funds generously provided by alumni members of Phi Kappa Theta Fraternity in memory of Fraternity member David Caissie ’71. Preference for this annual scholarship is given to a physically disabled student.

Sharon Ann Pollice ’85 Memorial Scholarship: This scholarship was established in 2001 by the friends and family of the late Sharon Ann Pollice ’85. Preference is given to a student in the School of Nursing with demonstrated need and established academic achievement.

Joseph A. Pollicino/CIT Group Scholarship: Restricted to students in the Charles F. Dolan School of Business, this scholarship was established by the CIT Foundation in 1987 to honor Mr. Pollicino, who is vice chairman of CIT Group Holdings. The fund has since been supplemented by gifts from Mr. Pollicino. He is the father of John Pollicino ’82 and Kerry Pollicino ’88.
**Pope Foundation Scholarship:** An endowed scholarship to assist students with demonstrated financial need.

**Pope Foundation/New York Scholarship Fund:** An endowed scholarship to assist students with demonstrated financial need.

**Bernadette and John Porter Fund:** This need-based scholarship was established in 2003 by the estate of the late Professor John Porter, a member of the faculty at the University’s School of Engineering. Preference is given to those students studying software and computer engineering at the bachelor’s level.

**Thomas Puglise Honorary Scholarship:** A need-based scholarship established in 1993 to honor Mr. Puglise’s many years of teaching at Stratford High School. Preference is given to students entering Fairfield University from Stratford High School.

**Christopher C. Quick ’79 Scholarship:** An endowed scholarship established by Christopher C. Quick ’79 to provide financial assistance to students with economic need due to unusual family hardship or circumstances.

**Mary B. Radwick Scholarship:** A fund created from the estate of Mary B. Radwick to provide financial assistance to students.

**Rev. Albert Reddy, S.J., Scholarship:** This fund was established in 2000, by William ’67 and Jacqueline Egan, in honor of retired faculty member, Fr. Reddy. Preference is given to students with demonstrated need who are majoring in English.

**Herbert F. Rees and Kevin W. Carroll Scholarship:** This scholarship has been established anonymously and benefits a recipient with demonstrated need who gives evidence of the kindness of spirit and generosity exhibited by the fund’s namesakes.

**Harry ’65 and Grace Rissetto Scholarship:** Established in 2001 by Harry and Grace Rissetto of Falls Church, Va., this is a need-based scholarship. Mr. Rissetto is a practicing attorney in Washington, D.C.

**Dr. Robert D. Russo Sr. Scholarship Fund:** Established in 2001 by Wanda Russo in memory of her late husband. The fund has a preference for pre-medical students with demonstrated need. Dr. Russo, who died in 1999, was a longtime friend and benefactor, and served on the University’s Board of Trustees.

**Joseph ’63 and Moira Russoniello Scholarship:** This endowed scholarship fund established by Joseph ’63 and Moira Russoniello gives preference to a student from the San Francisco Bay area and is awarded based on academic achievement, strength of character and demonstrated financial need.

**Walter G. Ryba, Jr. Memorial Scholarship Fund:** This fund honors the memory of the late Dr. Walter G. Ryba, Jr., who served as dean of the Charles F. Dolan School of Business from 1998-2000. Awarding is decided with a preference for a person of color with demonstrated need and who has shown significant leadership in academics, student activities, and athletics in high school.

**Saint Michael the Archangel Scholarship:** Established in 1988 by an anonymous donor, this scholarship is to be awarded to a minimum of two students each year, preferably from Fairfield or Bridgeport. Preference is given to a student of Polish ancestry.

**Casper A. Scalzi ’52 Scholarship Fund:** An endowed fund established by Casper Scalzi, a member of the Class of ’52, to provide financial assistance with a preference for a student with demonstrated need majoring in mathematics.

**Paul Scolaro ’78 Memorial Scholarship Fund:** A fund established by family, alumni, and friends in memory of Paul J. Scolaro. Preference is given to a modern language major at the recommendation of the department. Academic achievement, financial need, and University community involvement are the basis for the award.

**Rev. Bernard M. Scully, S.J., Memorial Scholarship:** Established in 1996 on the 10th anniversary of Fr. Scully’s death. It has been underwritten by parishioners and friends at St. Agnes Church in Greenwich, Conn., where Fr. Scully served as a pastoral assistant. Fr. Scully also taught mathematics at Fairfield from 1960 through 1985.

**Arthur R. Sekerak Memorial Scholarship:** This scholarship was set up by friends of Arthur Sekerak in 2004. It was established to provide annual scholarship assistance to students who demonstrate financial need.

**September 11 Scholarship Fund:** This scholarship benefits children of alumni and rescue worker victims of the Sept. 11, 2001 tragedy. Recipients must qualify for admission and, similar to other University scholarships, must offer evidence of demonstrated need.

**Isabelle C. Shea Nursing Scholarship:** An endowed fund established in 1984 by the George A. Long and Grace L. Long Foundation to honor the memory of Mrs. Shea, a long-time friend of Fairfield University. Provides financial aid assistance with a preference for nursing students.

**Christopher Slattery Fairfield Memorial Scholarship:** This scholarship was established in 2002 and honors the memory of Christopher Slattery ’92 who died in the World Trade Center attack on Sept. 11, 2001. Established by his family and friends, the scholarship gives preference to students who attended Chaminade High School in Mineola, N.Y., Chris’s own alma mater.

**James D. Small ’70 Scholarship:** Established in 1990 by the family and friends of this alumnus who had forged a successful career in banking and died at the age of 42. Preference goes to students with financial need who have a parent working in the banking industry.

**Spillane Family Golf Scholarship:** This scholarship was established in 2004 by Todd ’81 and Maureen ’82 Spillane in loving memory of Virginia C. Spillane. Preference is given to a student who demonstrates financial need, maintains a minimum grade point average of 3.0, and is a member of the men’s golf team.
Virginia Spillane Memorial Golf Scholarship: This scholarship was established in 2004 by Todd ’81 and Maureen ’82 Spillane in loving memory of Virginia C. Spillane. Preference is given to a student who demonstrates financial need, maintains a minimum grade point average of 3.0, and is a member of the men’s golf team.

Virginia C. Spillane Memorial Scholarship: This scholarship was established in 2004 by Todd ’81 and Maureen ’82 Spillane in loving memory of Virginia C. Spillane. Preference is given to a student who demonstrates financial need and who maintains a minimum grade point average of 3.0.

John J. Sullivan Scholarship: A fund established by friends of the late John J. Sullivan, first selectman of the Town of Fairfield, Conn., from 1959 to 1983, to provide financial assistance with a preference for a student who is a politics major.

Surdna Foundation Scholarship: An endowed fund established in 1985 to underwrite scholarships for the benefit of minority students.

Janet W. Tanner Scholarship Fund: This endowed fund was established in 1998 for the benefit of AHANA students with demonstrated need.

Kathleen Nolan Tavino ’80 Nursing Scholarship: Established in 1997 by family, friends, and alumni, to honor the memory of this 1980 alumnus. This endowed award is a special memorial scholarship to provide financial assistance with a preference for nursing students. This scholarship is intended to benefit today’s nursing students whose hopes and ambitions reflect the values that inspired Kathleen Nolan Tavino’s life and work.

Aileen Thomann ’94 Memorial Scholarship: Established in January 1992 by her family, this scholarship honors the memory of Aileen Thomann, a member of the Class of 1994 who was very involved in the music ministry at Egan Chapel and who died during her sophomore year. There are no restrictions other than financial need, although preference is given to a member of the Loyola Chapel Singers.

Helena S. Thompson Scholarship: An endowed fund, set up by the estate of Helena S. Thompson, to provide financial assistance to students with need. Preference is given to students studying the arts and education.

Robert A. Torello ’56 Scholarship: This fund provides an award to an incoming freshman with one or both parents deceased. The fund is supplemented by proceeds from the Robert A. Torello Annual Memorial Scholarship Golf Tournament held in Orange, Conn.

Daniel P. and Grace I. Tully Scholarship Fund: Established in 1997 by the Merrill Lynch Foundation, this endowed scholarship fund will help meet the financial aid needs of a Fairfield student, preferably one majoring in economics.

Alice Lynch Vincent Scholarship Fund: Created by Francis T. “Fay” Vincent to assist qualified students who have demonstrated financial need.

Dr. Joan Walters Scholarship: This fund was established in 2000, by William ’67 and Jacqueline Egan, in honor of retired faculty member Joan Walters. Preference is given to students majoring in economics.

Leo ’58 and Kathleen Waters Scholarship Fund: A scholarship fund established by Mr. and Mrs. Waters to provide financial assistance to Fairfield University students.

Wesley T. Wood Scholarship Fund: An endowed scholarship established in 1988 by Mr. and Mrs. Wesley T. Wood, whose two children are graduates of Fairfield University. Mr. Wood is a past member of the University’s Trustee Advisory Council. The fund benefits deserving students with demonstrated need.

Dennis Yee/Patricia Farrell Family Foundation Scholarship: This endowed fund was established in 2004 to provide financial assistance with a preference for Asian students. The scholarship is need based and recipients must maintain high academic standing.

Stephen J. Zales ’81 Scholarship: Established in 2006 by Stephen J. ’81 and Grace Zales. Preference is given to finance majors with demonstrated need and strong academic potential.

Ernesto Zedillo Scholarship: The Ernesto Zedillo Scholarship at Fairfield University was established by the Corrigan Foundation in 2004 as part of the University’s endowed Multicultural Scholarship Fund. The Zedillo Scholarship recognizes academic achievement for students in the College of Arts and Sciences pursuing their studies in the humanities or the behavioral and social sciences, students of Mexican heritage, and financial need. The Ernesto Zedillo Scholar will be an undergraduate entering his or her sophomore, junior, or senior year at Fairfield. An application process is required and is managed by the Dean of the College of Arts and Sciences.

Further Information

1996

Nicholas M. Rinaldi  
Professor of English, Emeritus  
2002

Donald J. Ross  
Professor of Biology, Emeritus  
1997

Joseph E. Sarneski  
Professor of Chemistry, Emeritus  
2007

Jerome J. Schiller  
Professor of Psychology and Special Education, Emeritus  
1997

John J. Schurdak  
Associate Professor of Education, Emeritus  
1997

Dorothy B. Shaffer  
Professor of Mathematics, Emerita  
1992

Martin A. Stader  
Associate Professor of Education, Emeritus  
1999

Jane L. Sutherland  
Associate Professor of Fine Arts, Emerita  
1996

Alexander Tolor  
Professor of Psychology and Education, Emeritus  
1989

Lik Kuen Tong  
Professor of Philosophy, Emeritus  
2005

Richard F. Tyler  
Professor of Management, Emeritus  
2005

Joan Walters  
Professor of Economics, Emerita  
1996

Robert M. Webster  
Associate Professor of Modern Languages and Literatures, Emeritus  
2004

Celia T. Wells  
Associate Professor of English, Emerita  
1997
Bharat B. Bhalla  
Professor of Finance  
B.A., Punjab University, India  
M.B.A., Delhi University, India  
Ph.D., Cornell University  

Mousumi Bhattacharya  
Associate Professor of Human Resource  
and Strategic Management  
M.B.A., Jadavpur University, India  
Ph.D., Syracuse University  

James E. Biardi  
Assistant Professor of Biology  
B.S., University of California, Irvine  
Ph.D., University of California, Davis  

Angela Biselli  
Assistant Professor of Physics  
B.S., Universita' di Genova  
M.S., Ph.D., Rensselaer Polytechnic Institute  

Elizabeth H. Boquet  
Associate Dean of College of Arts and Sciences  
Professor of English  
B.A., Nicholls State University  
M.A., University of Southern Mississippi  
Ph.D., Indiana University of Pennsylvania  

Jocelyn M. Boryczka  
Assistant Professor of Politics  
B.A., The College of William and Mary  
M.A., Louisiana State University  
M.A., Wayne State University  
Ph.D., City University of New York  

Betsy A. Bowen  
Professor of English  
B.A., Colby College  
M.A., Middlebury College  
Ph.D., Carnegie Mellon University  

Bruce M. Bradford  
Associate Professor of Accounting  
B.S., M.S., Ph.D., Virginia Polytechnic Institute  
and State University  
M.B.A., Arkansas State University  
D.B.A., Memphis State University  
C.P.A., Tennessee  

Dorothea D. Braginsky  
Professor of Psychology  
B.A., Queens College  
M.A., Ph.D., University of Connecticut  

Phyllis C. Braun  
Professor of Biology  
B.S., Fairfield University  
Ph.D., Georgetown University  

Kim Bridgford  
Professor of English  
B.A., M.F.A., University of Iowa  
Ph.D., University of Illinois, Urbana-Champaign  

Sara Brill  
Assistant Professor of Philosophy  
B.A., Trinity University  
Ph.D., The Pennsylvania State University  

Diane J. Brousseau  
Professor of Biology  
B.S., Ph.D., University of Massachusetts, Amherst  

Carolynn Bruno  
Assistant Professor, VA Nursing Academy  
B.S.N., Fairfield University  
MSN, University of Pennsylvania
Cecelia F. Bucki  
Associate Professor of History  
B.A., University of Connecticut  
M.A., Ph.D., University of Pittsburgh

Stephanie Burrell  
Visiting Assistant Professor of Curriculum Instruction  
B.A., M.Ed., Kent State University  
Ed.D., University of Massachusetts

James A. Buss  
Roger M. Lynch Professor of Economics  
B.A., M.A., Ph.D., University of Connecticut

Ashley (Soyong) Byun-McKay  
Assistant Professor of Biology  
B.Sc., York University  
Ph.D., University of Victoria, British Columbia, Canada

Sheila Candelario  
Visiting Assistant of Modern Languages and Literatures  
B.A., University of Puerto Rico  
M.A., University of Connecticut  
M.A., Ph.D., State University of New York, Stony Brook

Gerard M. Campbell  
Associate Professor of Information Systems and Operations Management  
B.A., Columbia University  
M.B.A., University of Connecticut  
M.S., Rensselaer Polytechnic Institute  
Ph.D., Indiana University

Anne E. Campbell  
Assistant Professor of the Bilingual/TESOL Education Program  
B.A., University of New Hampshire  
M.Ed., University of Hartford  
Ph.D., University of Florida

Suzanne H. Campbell  
Associate Professor of Nursing  
B.S., M.S., University of Connecticut  
Ph.D., University of Rhode Island

J. Michael Cavanaugh  
Associate Professor of Management  
B.A., St. Francis College  
B.S., Baylor College of Medicine  
M.S., Georgetown University  
M.B.A., Rensselaer Polytechnic Institute  
Ph.D., University of Massachusetts

Suzanne Chamlin  
Assistant Professor of Visual and Performing Arts  
B.A., Barnard College  
M.F.A., Yale University

M. Debnam Chappell  
Dean of Freshmen  
Assistant Professor of English  
B.S., College of William and Mary  
M.A., University of Bridgeport  
Ph.D., New York University

Arjun Chaudhuri  
Rev. Thomas Fitzgerald, S.J., Professor of Marketing  
B.A., M.A., Calcutta University, India  
M.A., Ph.D., University of Connecticut

Vera Cherepinsky  
Assistant Professor of Mathematics  
B.S., M.S., Polytechnic University  
M.S., Ph.D., New York University

Geoffrey A. Church  
Health Science Advisor, Assistant Professor of Biology  
B.S., Clarkson University  
M.S., Ph.D., Albert Einstein College of Medicine

Matthew P. Coleman  
Professor of Mathematics  
B.A., LaSalle College  
M.A., Ph.D., Pennsylvania State University

Thomas E. Conine Jr.  
Professor of Finance  
B.S., University of Connecticut  
M.B.A., Ph.D., New York University

Carol Connery  
Visiting Assistant Professor of Nursing  
BSN, Skidmore College  
MSN, University of Pennsylvania

Yvonne Conybeare  
Visiting Professor of Visual & Performing Arts  
B.A., Marymount  
M.F.A., CUNY

Jaclyn Cornelius  
Assistant Professor, VA Nursing Academy  
BSN, Fairfield University  
MSN, Yale University  
Ph.D., University of Connecticut

Ralph M. Coury  
Professor of History  
B.A., Hamilton College  
M.A., Ph.D., Princeton University

Michael Coyne  
Associate Professor of Accounting  
B.S., Fairfield University  
M.B.A., New York University  
Ph.D., University of Connecticut
Robbin Crabtree  
Dean of the College of Arts and Sciences, 
Professor of Communication  
B.A., University of California, Santa Barbara  
M.A., Ph.D., University of Minnesota  

David L. Crawford  
Associate Professor of Sociology and Anthropology  
B.A., California State University, Fullerton  
M.A., Ph.D., University of California, Santa Barbara  

Joseph D. Cron  
Visiting Instructor of Mathematics and Computer Sciences  
B.S., Marist College  
M.S., New York University  

Nancy A. Dallavalle  
Associate Professor of Religious Studies  
B.Mus., Benedictine College  
M.A., St. John’s University  
Ph.D., University of Notre Dame  

Sally Dalton  
Assistant Professor, VA Nursing Academy  
BSN, MSN, Sacred Heart University  

Ronald M. Davidson  
Professor of Religious Studies  
B.A., M.A., Ph.D., University of California, Berkeley  

Jessica M. Davis  
Assistant Professor of Chemistry  
B.S., Marist College  
M.S., Yale University  

Edward J. Deak  
Professor of Economics  
B.A., M.A., Ph.D., University of Connecticut  

Mark Demers  
Assistant Professor of Mathematics and Computer Science  
B.A., Amherst College  
M.S., Ph.D., Courant Institute, New York University  

Joseph B. Dennin  
Professor of Mathematics  
B.A., College of the Holy Cross  
M.A., Ph.D., University of Wisconsin  

Jill Deupi  
Visiting Assistant Professor of Art History  
B.A., Mount Holyoke  
M.A., University of London  
Ph.D., University of Virginia  

Edward M. Dew  
Professor of Politics  
B.A., Pomona College  
M.A., George Washington University  
M.A., Yale University  
Ph.D., University of California, Los Angeles  

W. Richard DeWitt  
Associate Professor of Philosophy  
B.S., University of Idaho  
M.A., Ph.D., The Ohio State University  

David Downie  
Associate Professor of Environmental Studies  
B.A., Duke University  
M.A., Ph.D., University of North Carolina  

Ryan Drake  
Visiting Assistant Professor of Philosophy  
B.A., University of Oregon  
Ph.D., Pennsylvania State University  

Elizabeth A. Dreyer  
Professor of Religious Studies  
B.A., Rosary College  
M.A., Xavier University  
Ph.D., Marquette University  

Jo Ann Drusbosky  
Visiting Assistant Professor of Accounting  
B.S. Villanova  
M.S. University of New Haven  

Pamela J. Dudac  
Assistant Professor of Nursing  
B.A., Manhattanville College  
M.S., Fordham University  
M.S.N., New York Medical College  

Rao V. Dukkipati  
Professor of Mechanical Engineering  
B.S., Sri Venkateswara University, India  
M.S., Andhra University, India  
M.S., University of New Brunswick, Canada  
Ph.D., Oklahoma State University  

Peter Duval  
Visiting Assistant Professor of English  
B.A., University of Connecticut  
A.M., University of Illinois  
M.A., New York University  
M.A., Boston University  

King J. Dykeman  
Associate Professor of Philosophy  
B.A., Creighton University  
M.A., Ph.D., University of Chicago  

Christine Earls  
Visiting Instructor of Biology  
B.S., Fairfield University  
M.S., University of Bridgeport  

Philip I. Eliasoph  
Professor of Visual and Performing Arts  
B.A., Adelphi University  
M.A., Ph.D., State University of New York at Binghamton  

Robert Epstein  
Associate Professor of English  
B.A., University of Pennsylvania  
M.A., Ph.D., Princeton University  

Zoe Erotopoulou  
Visiting Assistant Professor of Modern Languages and Literature  
B.A., College of New Rochelle  
M.A., M.Phil., Ph.D., Columbia University  

Carol A. Fackler  
Visiting Assistant Professor of Nursing  
B.S.N., University of Rhode Island  
M.S., University of Massachusetts Boston  

Anita Fernandez  
Assistant Professor of Developmental Genetics  
B.S., University of Michigan  
M.S., Ph.D., University of Wisconsin  

Benjamin Fine  
Professor of Mathematics  
B.S., Brooklyn College  
M.S., Ph.D., Courant Institute, New York University  

Dina Franceschi  
Associate Professor of Economics  
B.S., Pennsylvania State University  
Ph.D., University of Tennessee, Knoxville
Cinthia Lee Gannett
Writing Program Administrator
B.A., Plymouth State College
M.A., Ph.D., University of New Hampshire

Elizabeth B. Gardner
Professor of Psychology
B.A., Middlebury College
M.A., Ph.D., McGill University

Johanna K. Garvey
Associate Professor of English
B.A., Pomona College
M.A., Ph.D., University of California, Berkeley

Sally O’Toole Gerard
Assistant Professor of Nursing
B.S., Pace University
M.S., College of New Rochelle
DNP, Case Western University

Catherine Giapponi
Assistant Professor of Management
B.A., Providence College
M.B.A., University of Connecticut
Ph.D., University of New Haven

Donald E. Gibson
Professor of Management
B.S., University of California, Riverside
M.A., San Francisco State University
M.B.A., Ph.D., University of California, Los Angeles

Gisela Gil-Egui
Assistant Professor of Communication
B.A., Universidad Central de Venezuela
M.A., Ph.D., Temple University

Marjorie Godfrey
Visiting Professor of Nursing
B.S., Norwich University
M.S., Dartmouth College

Joel D. Goldfield
Associate Professor of Modern Languages and Literatures
B.A., Dartmouth College
M.A., Brandeis University
Ph.D., Université Paul Valéry

C. Joy Gordon
Professor of Philosophy
B.A., Brandeis University
J.D., Boston University School of Law
M.A., M.Phil., Ph.D., Yale University

Donald W. Greenberg
Associate Professor of Politics
B.A., Alfred University
Ph.D., City University of New York

Lydia Greiner
Assistant Professor, VA Nursing Academy
BSN, University of Pennsylvania
MSN, Fairfield University

Philip A. Greiner
Associate Professor of Nursing
B.S., Albright College
B.S.N., M.S.N., D.N.Sc., University of Pennsylvania

Orin L. Grossman
Academic Vice President
Professor of Visual and Performing Arts
B.A., Harvard University
M.Phil., Ph.D., Yale University

Sheila C. Grossman
Professor of Nursing
B.S., University of Connecticut
M.S., University of Massachusetts
Ph.D., University of Connecticut

David J. Gudelunas
Assistant Professor of Communication
B.A., University of San Francisco
M.A., Ph.D., The Annenberg School for Communication
University of Pennsylvania

William Guelakis
Visiting Assistant Professor of Software Engineering
B.S., M.S., University of New Haven

Elizabeth Haas
Visiting Assistant Professor of English
B.A., University of North Carolina
M.A., Hollins University
M.F.A., Ph.D., University of Michigan

Evangelos Hadjimichael
Dean, School of Engineering
Professor of Physics
B.S., The City University of New York
Ph.D., University of California, Berkeley

Francis T. Hannafey, S.J.
Associate Professor of Religious Studies
B.S., Southern Connecticut State University
M.B.A., Ph.D., Loyola University of Chicago
M.Div., S.T.M., Jesuit School of Theology at Berkeley

Shannon Harding
Associate Professor of Psychology
B.A., College of the Holy Cross
M.S., University of Connecticut
Ph.D., New York University

Angela K. Harkins
Associate Professor of Religious Studies
B.A., Loyola University, Chicago
M.A., Ph.D., University of Notre Dame

Amanda S. Harper
Assistant Professor of Chemistry
B.A., St. Olaf College
Ph.D., University of North Carolina at Chapel Hill

Olivia Harriott
Associate Professor of Biology
B.S., University of Connecticut

Bonnie Haupt
Assistant Professor, VA Nursing Academy
A.S., University of Bridgeport
M.S., University of Hartford
BSN, Southern Connecticut State University

James He
Professor of Information Systems and Operations Management
B.S., Zhejiang University, China
M.B.A., Shanghai University, China
Ph.D., Penn. State University

Timothy J. Heitzman
Assistant Professor of Psychology
B.S., La Salle University
M.S., Loyola College
Ph.D., University of Rhode Island

Linda A. Henkel
Associate Professor of Psychology
B.A., Friends World College
M.A., Ph.D., State University of New York at Stony Brook
Michela Knight  
*Part-time Instructor in Modern Languages and Literatures*  
B.A., Harpur College  
M.A., Fairfield University  

Gregory D. Koutmos  
*Gerald M. Levin Professor of Finance*  
B.S., Graduate School of Business Studies, Athens, Greece  
M.A., City College of the City University of New York  
Ph.D., Graduate School and University Center, City University of New York  

Robert W. Kravet  
*Assistant Professor of Accounting*  
B.A., Southern Connecticut State College  
B.S., University of New Haven  
M.S., University of Massachusetts  
C.P.A., Connecticut  

Alison Kris  
*Assistant Professor of Nursing*  
B.S., University of Pennsylvania  
MSN, Ph.D., University of California, San Francisco  

Matthew A. Kubasik  
*Associate Professor of Chemistry*  
B.A., Swarthmore College  
M.A., Ph.D., Cornell University  

Jean W. Lange  
*Associate Professor of Economics*  
B.A., Providence College  
M.A., Northeastern University  
Ph.D., Tufts University  

Jeffrey W. Lange  
*Associate Professor of Nursing*  
B.S.N., State University of New York at Binghamton  
M.N., University of California, Los Angeles  
Ph.D., University of Connecticut  

Nikiforos T. Laopodis  
*Associate Professor of Finance*  
B.Sc., The Graduate Industrial School of Thessaloniki, Greece  
M.A., Morgan State University  
Ph.D., Catholic University of America  

Janie Leatherman  
*Professor of Politics*  
B.A., Manchester College  
M.A., Ph.D., University of Denver  

Mark S. LeClair  
*Professor of Economics*  
B.A., Colgate University  
M.A., Northeastern University  
Ph.D., Rutgers University  

Patrick S. Lee  
*Associate Professor of Information Systems and Operations Management*  
B.A., Berea College  
M.S., Ph.D., Carnegie-Mellon University  

Sooyeon Nikki Lee-Wingate  
*Assistant Professor of Marketing*  
B.A., MBA, Seoul National University  
M. Phil., Ph.D., New York University
Valeria Martinez  
Assistant Professor of Finance  
B.A., Tecnologico Autonomo de Mexico  
M.Sc., University of Warwick, England  
Ph.D., University of Texas, San Antonio  

Dawn W. Massey  
Associate Professor of Accounting  
B.S., M.B.A., Fordham University  
Ph.D., University of Connecticut  
C.P.A., Connecticut  

James Mayzik, S.J.  
Assistant Professor of Visual and Performing Arts  
B.A., Georgetown University  
M.A., Weston School of Theology  
M.F.A., New York University  

John F. McCarthy  
Associate Professor of Psychology  
B.S., Boston College  
M.A., Ph.D., Catholic University  

John McDermott  
Associate Professor of Finance  
B.S., U.S. Coast Guard Academy  
MBA, Columbia Universit  
Ph.D., University of Connecticut  

Sharlene A. McEvoy  
Professor of Business Law  
B.A., Albertus Magnus College  
M.A., Trinity College  
J.D., University of Connecticut  
Ph.D., University of California, Los Angeles  

David W. McFadden  
Professor of History  
B.A., University of Denver  
M.A., Ph.D., University of California, Berkeley  

Derrick McKisick  
Assistant Professor of History  
B.A., M.A., Ph.D., University of Arkansas  

Laura A. McSweeney  
Associate Professor of Mathematics  
B.S., Bridgewater State College  
M.S., Ph.D., University of New Hampshire  

Camelia C. Micu  
Assistant Professor of Chemistry  
B.S., Trinity College  
M.S., Ph.D., Yale University  

Eric H. Mielants  
Associate Professor of Sociology  
B.A., M.A., State University of Ghent  
Ph.D., State University of New York at Binghamton  

Laurence A. Miner  
Associate Professor of Economics  
B.A., State University of New York at Binghamton  
Ph.D., University of North Carolina, Chapel Hill  

James F. Mullan  
Assistant Professor of English  
B.S., Manhattan College  
M.A., The City College of New York  
Ph.D., Fordham University  

Danke Li  
Associate Professor of History  
B.A., Sichuan University, China  

Mark Ligas  
Associate Professor of Marketing  
B.A., University of Pennsylvania  
M.S., Pennsylvania State University  
Ph.D., University of Connecticut  

Doris T. Lippman  
Professor of Nursing  
B.S.N., Cornell University  
M.A., Fairfax University  
M.Ed., Ed.D., Teachers College, Columbia University  

Amalia Liombart  
Assistant Professor of Spanish Linguistics  
University of Barcelona, Spain  
Ph.D., University of California, Santa Barbara  

Martha S. LoMonaco  
Professor of Visual and Performing Arts  
B.A., Boston College  
M.A., Tufts University  
Ph.D., New York University  

R. James Long  
Professor of Philosophy  
B.A., Saint Mary’s College  
M.S.L., Pontifical Institute of Mediaeval Studies  
Ph.D., University of Toronto, Canada  

Edrik Lopez  
Assistant Professor of Twentieth Century American Poetry  
B.A., University of North Florida  
M.A., University of Florida  
Ph.D., University of California  

Kathleen Lovanio  
Assistant Professor, VA Nursing Academy  
BSN, Southern Connecticut State University  
MSN, Fairfield University  

Douglas A. Lyon  
Professor of Computer Engineering  
B.S., M.E., Ph.D., Rensselaer Polytechnic Institute  

Jennifer Magas  
Visiting Assistant Professor of English  
B.A. Fairfield University  
M.A. Northeastern University  
J.D. Suffolk University  

Lisa A. Mainiero  
Professor of Management  
B.A., Smith College  
M.A., Ph.D., Yale University  

Fredy Cesar Maldonado, S.J.  
Assistant Professor of Modern Languages and Literatures  
Licenciate in Philosophy, Universidad Catolica Bolivian  
B.A. in Divinity, Pontificia Universidad Javeriana  
M.A., Facultad Latinoamericana de Ciencias Sociales  

Mary Frances A.H. Malone  
Associate Academic Vice President  
Assistant Professor of Visual and Performing Arts  
B.A., Molloy College  
M.A., Fordham University  
Ph.D., New York University  

Todd Martin  
Visiting Instructor of Economics  
B.A., New England College  
MBA, University of Bridgeport
Irene Mulvey  
Professor of Mathematics  
B.A., Stonehill College  
Ph.D., Wesleyan University

Tod L. Osier  
Associate Professor of Biology  
B.S., State University of New York at Binghamton  
Ph.D., University of Wisconsin

Yasin Ozcelik  
Assistant Professor of Information Systems  
and Operations Management  
B.S. Bilkent University  
M.S., Purdue University  
Ph.D. Purdue University

Michael Pagano  
Assistant Professor of Communication  
B.A., M.S., Ph.D., University of Oklahoma

Marcie J. Patton  
Associate Professor of Politics  
B.A., Trinity University  
M.A., Ph.D., University of Chicago

Nels Pearson  
Assistant Professor of English  
B.A., M.A., James Madison University  
Ph.D., University of Maryland

Milo W. Peck Jr.  
Assistant Professor of Accounting  
B.A., Middlebury College  
M.S., Northeastern University  
J.D., Suffolk University  
LL.M., Boston University  
C.P.A., Massachusetts

Laura Nash  
Assistant Professor of Visual and Performing Arts  
B.A., Wellesley College  
Ph.D., Yale University

John Neal  
Visiting Assistant Professor of Marketing  
B.S., University of Missouri

Lisa H. Newton  
Professor of Philosophy  
B.S., Ph.D., Columbia University

Curtis R. Naser  
Associate Professor of Philosophy  
B.A., University of Pittsburgh  
Ph.D., State University of New York at Stony Brook

Jeanne M. Novotny  
Dean, School of Nursing  
Professor of Nursing  
B.S.N., M.S., The Ohio State University  
Ph.D., Kent State University

Edmond J. O'Connell Jr.  
Professor of Chemistry  
B.S., Providence College  
Ph.D., Yale University

Leo F. O'Connor  
Professor of American Studies  
B.S., St. Peter's College  
M.A., Ph.D., New York University

Sally E. O'Driscoll  
Associate Professor of English  
B.A., Queens College, City University of New York  
M.A., M. Phil., Ph.D., The Graduate School of the City University of New York

John M. Orman  
Professor of Politics  
B.S., Indiana State University  
M.A., Ball State University  
Ph.D., Indiana University

Emily Orlando  
Visiting Assistant Professor of English  
B.A., St. Anselm College  
M.A., Ph.D., University of Maryland

Eileen O'Shea  
Assistant Professor of Nursing  
B.S.N., Boston College  
M.S.N., University of Pennsylvania  
DNP, Case Western Reserve University

Raymond P. Poincelot  
Professor of Biology  
B.A., Southern Connecticut State College  
Ph.D., Case Western Reserve University

Patricia M. Poli  
Associate Professor of Accounting  
B.S., University of Connecticut  
M.Ph., Ph.D., New York University  
C.P.A., Connecticut

Carole A. Pomarico  
Assistant Professor of Nursing  
B.S.N., Carlow College  
M.S.N., University of Pittsburgh  
M.A., Fairfield University

Lynne K. Porter  
Associate Professor of Visual and Performing Arts  
B.A., Western State College of Colorado  
M.F.A., Indiana University

Judith Primavera  
Professor of Psychology  
B.A., Mount Holyoke College  
M.A., Ph.D., Yale University
W. Ronald Salafia  
Professor of Psychology  
B.S., Loyola College  
M.A., Ph.D., Fordham University

Katsiaryna Salavei  
Assistant Professor of Finance  
B.A., Hartwick College  
B.S., Belarusian State University  
Ph.D., University of Connecticut

David A. Sapp  
Associate Professor of English  
B.A., University of Minnesota  
M.A., University of Tennessee, Chattanooga  
Ph.D., New Mexico State University

Glenn R. Sauer  
Associate Professor of Biology  
B.S., Pennsylvania State University  
M.S., Ph.D., University of South Carolina

Stephen F. Sawin  
Professor of Mathematics  
B.A., Princeton University  
Ph.D., University of California, Berkeley

Mark Scalaese, S.J.  
Assistant Professor of Visual and Performing Arts  
B.A., Marywood College  
M.A., University of Notre Dame  
M.Div., Jesuit School of Theology, Berkeley  
M.F.A., Temple University

Leslie Schaffer  
Assistant Professor of Physics  
B.S., Massachusetts Institute of Technology  
Ph.D., Cornell University

Carl A. Scheraga  
Associate Professor of Business Strategy and Technology Management  
Sc.B., M.A., Brown University  
Ph.D., University of Connecticut

Kurt C. Schlichting  
E. Gerald Corrigan Chair and Professor of Sociology and Anthropology  
B.A., Fairfield University  
M.A., Ph.D., New York University

David P. Schmidt  
Associate Professor of Religious Studies and Business Ethics  
B.S., Illinois State University  
M.A., Ph.D., University of Chicago

Katherine A. Schwab  
Associate Professor of Visual and Performing Arts  
B.A., Scripps College  
M.A., Southern Methodist University  
Ph.D., New York University

Sripriya Seetharaman  
Visiting Instructor of Chemistry  
B.S., Madras University, India  
M.A., Indian Institute of Theology  
Ph.D., Syracuse University

Jerry E. Sergent  
Professor of Electrical Engineering  
B.S.E.E., M.S.E.E., Ph.D., University of Cincinnati

James Shanahan  
Associate Professor of Communication  
B.A., Tufts University  
M.S., Boston University  
Ph.D., University of Massachusetts, Amherst
Philip Shaw
Assistant Professor of Economics
B.A., M.A., Ph.D., University of Connecticut

Joyce M. Shea
Assistant Professor of Nursing
B.S., Fairfield University
M.S.N., D.N.Sc., Yale University School of Nursing

James Simon
Professor of English
B.A., Rutgers University
M.M.C., Ph.D., Arizona State University

Rachel Smith
Assistant Professor, VA Nursing Academy
BSN, University of Bridgeport
MBA, Sacred Heart University
MSN, Fairfield University

Norman A. Solomon
Dean, Charles F. Dolan School of Business
Professor of Management
B.S., Cornell University
M.A., Ph.D., University of Wisconsin

Marie-Agnes Sourieau
Professor of Modern Languages and Literatures
D.E.S., University of Paris, France
M.A., Marquette University
Ph.D., University of Virginia

Peter Spoerri
Associate Professor of Computer Science
B.S., Brooklyn Polytechnic Institute
M.S., Oregon State University
Ph.D., Brooklyn Polytechnic Institute

L. Kraig Steffen
Assistant Professor of Chemistry
B.S., Houghton College
Ph.D., University of Arizona

Debra Strauss
Assistant Professor of Business Law
B.A., Cornell University
J.D., Yale University

Janet Striuli
Assistant Professor of Mathematics
Università degli Studi di Trieste
M.S., Ph.D., University of Kansas

Michael P. Sweeney
Visiting Assistant Professor of English
B.A., Salem State University
M.A., University of Bridgeport
MFA, Brooklyn College, City University of New York

Angela Tauro
Part-time Instructor in Modern Languages and Literatures
B.A., State University of New York, New Paltz
M.A., Iona College

William Taylor
Associate Dean, School of Engineering
Professor of Electrical Engineering
B.S., University of California
M.S., Marquette University
Ph.D., University of California

Winston Tellis
Camille and Stephen Schramm Professor
of Information Systems and Operations Management
B.C., University of Bombay, India
M.A., Fairfield University
Ph.D., Nova Southeastern University

John E. Thiel
Professor of Religious Studies
B.A., Fairfield University
M.A., Ph.D., McMaster University

Brian Q. Torff
Professor of Visual and Performing Arts
B.E.S., M.S., University of Bridgeport

Cheryl L. Tromley
Professor of Management
B.A., Michigan State University
M.A., Florida Atlantic University
Ph.D., Yale University

Rhonda Trust-Schwartz
Visiting Instructor in Communication
B.A., Bridgewater State College
M.A., Florida Atlantic University
Ph.D., University of Connecticut

Michael T. Tucker
Professor of Finance
B.A., Washington College
M.B.A., D.B.A., Boston University

Ellen M. Umansky
Carl and Dorothy Bennett Professor of Judaic Studies
B.A., Wellesley College
M.A., Yale University
M.Phil., Ph.D., Columbia University

Joan L. Van Hise
Associate Professor of Accounting
B.S., M.B.A., Fordham University
Ph.D., New York University
C.P.A., New York University

John Vangor
Visiting Instructor of Mathematics and Computer Science
B.A., Eastern Nazarene College
M.Ed., Northeastern University
M.A.T., Brown University

William E. Vasquez-Mazariegos
Assistant Professor of Economics
B.S., M.S., University Francisco Marroquin, Guatemala
M.A., Ph.D., University of New Mexico

Vishnu Vinekar
Assistant Professor of Information Systems and Operations Management
B.E. Manipal Institute of Technology (India)
M.S., Texas A&M
Ph.D. University of Texas, Arlington

Shirley Wakin
Visiting Assistant Professor of Mathematics and Computer Science
B.A., University of Bridgeport
M.S., Ph.D., University of Massachusetts

Brian G. Walker
Assistant Professor of Biology
B.A., Drake University
B.S., Dalhousie University, Canada
Ph.D., University of Washington

Roxana Walker-Canton
Assistant Professor of Visual and Performing Arts
B.A., Spelman College
M.A., MFA, Ohio State University
MFA, Temple University

Gary H. Weddle
Associate Professor of Chemistry
B.A., Thiel College
Ph.D., University of Delaware
Joan W. Weiss  
*Professor of Mathematics*  
B.S., Carnegie Mellon University  
M.S., University of Delaware  
D.A., Idaho State University

Barbara Welles-Nystrom  
*Associate Professor of Education and Allied Professions*  
B.A., Pennsylvania State University  
Ed.M., Ed.D., Harvard University

Kathleen A. Wheeler  
*Professor of Nursing*  
B.S., Cornell University  
M.A., Ph.D., New York University

Michael C. White  
*Professor of English*  
B.A., University of Connecticut  
Ph.D., University of Denver

Renee T. White  
*Professor of Sociology and Anthropology*  
B.A., Brown University  
M.A., Ph.D., Yale University

Eileen M. Wilkinson  
*Part-Time Assistant Professor in Modern Languages and Literatures*  
B.A., Fairfield University  
M.A., New York University  
Ph.D., University of Texas at Austin

Maggie A. Wills  
*Associate Professor of Communication*  
B.S., M.A., University of Delaware  
Ph.D., Pennsylvania State University

David R. Winn  
*Professor of Physics*  
B.A., Cornell University  
Ph.D., University of Wisconsin

Yohuru R. Williams  
*Associate Professor of History and Director of Black Studies Program*  
B.A., M.A., University of Scranton  
Ph.D., Howard University

Jiwei Xiao  
*Assistant Professor of Modern Languages and Literatures*  
B.A., Beijing Foreign Studies University  
M.A., Ph.D., Rutgers University

Min Xu  
*Assistant Professor of Physics*  
B.S., M.S., Fudan University, China  
Ph.D., City University of New York

Kathryn Jo Yarrington  
*Professor of Visual and Performing Arts*  
B.F.A., B.A.E., M.F.A., The Ohio State University

Wook-Sung Yoo  
*Associate Professor of Software Engineering*  
D.D.S., Seoul National University  
M.S., Ph.D., Florida Institute of Technology

Michael P. Zabinski  
*Professor of Engineering*  
B.S., M.S., University of Connecticut  
M.S., University of New Haven  
M.S., M. Phil., Ph.D., Yale University

Eugenia Zavras  
*Visiting Assistant Professor of Biology*  
B.A., M.S., University of Bridgeport  
Ph.D., University of Massachusetts, Amherst

Qin Zhang  
*Assistant Professor of Communication*  
B.A., M.A., Central China Normal University  
Ph.D., The University of New Mexico
FAIRFIELD UNIVERSITY ADMINISTRATION
2008-09

Jeffrey P. von Arx, S.J., Ph.D.
President
William Weitzer, Ph.D.
Senior Vice President
Charles H. Allen, S.J., M.A.
Executive Assistant to the President
James M. Bowler, S.J., M.A.
Facilitator of Jesuit and Catholic Mission and Identity

Orin L. Grossman, Ph.D.
Academic Vice President
Mary Frances A.H. Malone, Ph.D.
Associate Academic Vice President
Judith Dobai, M.A.
Associate Vice President for Enrollment Management
Robbin Crabtree, Ph.D.
Dean, College of Arts and Sciences
Norman A. Solomon, Ph.D.
Dean, Charles F. Dolan School of Business
Susan Douglas Franzosa, Ph.D.
Dean, Graduate School of Education and Allied Professions
Edna F. Wilson, Ed.D.
Dean, University College
Associate Vice President for Global Relationships and Community Engagement
Evangelos Hadjimichael, Ph.D.
Dean, School of Engineering
Jeanne M. Novotny, Ph.D.
Dean, School of Nursing

Mark C. Reed ’96, Ed.D., MBA, Ph.D.
Vice President for Administrative Services and Student Affairs
Thomas C. Pellegrino ’90, Ph.D., J.D.
Associate Vice President for Student Affairs and Dean of Students
Michael J. Doody, S.J.
Director of Campus Ministry
Eugene P. Doris, M.A.T.
Director of Athletics

Stephanie B. Frost, M.A.
Vice President for University Advancement

Administrators Emeriti

Aloysius P. Kelley, S.J., Ph.D.
1979-2004
President Emeritus
Barbara D. Bryan, M.S.
1965-1996
University Librarian, Emerita
Phyllis E. Porter, MSN
1970-1989
Associate Professor of Nursing, Emerita
Dean, School of Nursing, Emerita

William J. Lucas ’69, MBA
Vice President for Finance and Administration and Treasurer
Michael S. Maccarone, M.S.
Associate Vice President for Finance

James A. Estrada, M.A., M.L.I.S.
Vice President for Information Services and University Librarian

Rama Sudhakar, M.A.
Vice President for Marketing and Communications
FAIRFIELD UNIVERSITY
BOARD OF TRUSTEES

William L. Atwell P'08
John F. Baldovin, S.J.
