Embedding Kaltura Videos in Blackboard

1. Log in to Blackboard (http://fairfield.edu/blackboard) and navigate to the course, and to the location within the course, where you'd like your assigned video to appear.

2. From the Build Content menu, select Item.

3. In the Name box, type the title of the video. Below that, in the Text box, click on the "<>" symbol (i.e., Toggle HTML Source Mode).

4. Once in HTML Source Mode, paste the HTML code that has been provided you by C&NS, then click the Submit button at the bottom of the page.

5. Your students will then see the video within the Blackboard window and can simply click the Play button to begin watching.

(Please note that the video can also be enlarged to full-screen mode by clicking the cube in the lower right-hand corner of the video player.)
